

## Pompano Beach Toll Gantry on Northbound Florida's Turnpike Begins Operating on Tuesday, January 28, 2020

Construction of the Pompano Beach All-Electronic Tolling (AET) gantry on northbound Florida's Turnpike in Broward County is scheduled to be completed on Tuesday, January 28, as part of the AET Phase 5A Project.

This Pompano Beach Mainline gantry located at milepost 65 will replace the existing Cypress Creek Toll Plaza at milepost 63. Once all-electronic toll collection begins on Tuesday, January 28, at 12:01 a.m. at this gantry, the existing toll plaza will be demolished over a period of several months. The toll rates for this new gantry will be the same as the toll rates at the existing Cypress Creek Toll Plaza.

A toll gantry servicing the southbound direction is also under construction and is expected to be completed by early 2020.
