

Pompano Beach Toll Gantry on Southbound Florida's Turnpike Begins Operating on Sunday, March 1, 2020

Construction of the Pompano Beach All-Electronic Tolling (AET) gantry on southbound Florida's Turnpike in Broward County is scheduled to be completed on Sunday, March 1, as part of the AET Phase 5A Project.

This Pompano Beach Mainline gantry located at milepost 65 will replace the existing Cypress Creek Toll Plaza at milepost 63. Once all-electronic toll collection begins on Sunday, March 1, at 10 p.m. at this gantry, the existing toll plaza will be demolished over a period of several months. The toll rates for this gantry will be the same as the toll rates at the existing Cypress Creek Toll Plaza.
