

SAWGRASS EXPRESSWAY CANAL BANK RESTORATION PHASE 4 **CONSTRUCTION UPDATE**

As part of the Sawgrass Expressway Canal Bank Restoration Project, the contractor has completed vegetation removal within the North Springs Improvements District's right-of-way, adjacent to Sawgrass Expressway from Coral Springs Drive to University Drive.

During the next phase, construction crews will begin breaking existing voids in the canal bank, and installing an engineered rock slope with filter fabric. This will protect the embankment and prevent future erosion. These activities will take place during daytime hours — between 7 a.m. and 7 p.m. — in an effort to minimize disruptions.

This schedule may change due to inclement weather or unforeseen conditions.

At Florida's Turnpike, we thank you in advance for your patience and understanding while we complete this project.
