

Chapter 10

Roadway Plan and Roadway Plan-Profile

The following are changes, additions or deletions to the January 2003, Topic #625-000-007, Plans Preparation Manual (PPM) - English, for use on Turnpike projects only:

10.2 Roadway Plan Portion

Add the following as item 5

10.2.5 Construction and Project Limits

5. The lateral construction limits (toe of fill or top of ditch cut back slope) shall be plotted on all new alignment roadway plan sheets. This includes new interchange projects and projects that widen to the outside. This limit has always been shown as a dashed line on all R/W maps, and that method shall be used on the roadway plans as well.

Exhibit 10-1 General Notes for Roadway Plan and Roadway Plan-Profile Sheets

Add the following note

7. All bottom profile elevations and cross section elevations for treatment/attenuation swales shall be constructed to within 0.1 feet +/- of the values shown on the plans. Also, ditch-block top elevations and/or any longitudinal berms adjacent to treatment/attenuation swales shall also be constructed within this earthwork tolerance.
