**EXISTING ROADWAY SECTION E**

BETWEEN SAWGRASS EXPRESSWAY (SR 869) AND HILLSBORO BOULEVARD (SR 810)

The diagram illustrates the existing roadway layout for Section E. The road is a four-lane highway with a center turn lane. The cross-section shows the following details:

- Southbound Lanes:** Five lanes total, including a 12' shoulder, four 12' travel lanes, and a 68' existing limited access row on the left.
- Center Turn Lane:** A 10' paved lane separating the southbound and northbound directions.
- Northbound Lanes:** Five lanes total, including a 12' shoulder, four 12' travel lanes, and a 24' gas area on the right.
- Right-of-Way:** The total width of the section is 94', including the 29' Florida gas transmission line and 18' gas area on the right side.
- Legend:**
  - General Toll Lane: Indicated by a downward arrow.
  - Auxiliary Lane: Indicated by an upward arrow.

# PROJECT LIMIT

An aerial photograph of a highway interchange. A red line is drawn across the image, labeled 'PROJECT LIMIT' in large, bold, black letters. The line is positioned between the interchange and a line of trees. The area to the right of the trees is a grassy field with some trees. The area to the left of the trees is a paved road with a few cars. The area to the right of the trees is a grassy field with some trees. The area to the right of the trees is a grassy field with some trees.
