Subject: RE: 442764-1 Suncoast Parkway 2 SR 44 to CR 486 DRAFT SE American kestrel survey protocol

Good morning Tiffany,

I apologize that I wasn't able to respond sooner. The survey protocol looks good, with a few recommendations:

- Please note that we recommend a 492-foot buffer around active nests even if they are off the project site to avoid take
 - Figure 2 sheet 3 of 3 -- We recommend extending surveys to include the area where the side road will be constructed, especially since the sideroad construction comes close to the utility corridor
- We also recommend extending the vehicular transects to the end of the project (on sheet 3 of 3, we recommend surveying along Norvell Bryant Hwy, going west to follow the edge of the primary corridor line in red)

Cheers,
Craig

Hi Tiffany,

I wasn't able to finish my comments this week, but I will do my best to send comments on Monday or Tuesday.

Cheers,

Craig

Hello Craig,

I hope all is well. I'm checking in to see if you had a chance to review the proposed kestrel survey methodology. Please let me know if you have any comments or need additional information for your review.

Thanks,

Tiffany Crosby

Hello Craig,

As Terry indicated previously, he requested Turnpike coordinate with you for the review and approval of the proposed SE American kestrel survey methodology for the Suncoast Parkway 2 extension project from SR 44 to CR 486. I believe you were involved in the coordination for the segment to the south (US98- SR 44) that is currently under construction. Attached is the proposed survey methodology for your review and comment as well as the meeting notes from our coordination with Terry. Please let me know if you need any further information to assist in your review.

Thanks,

Tiffany Crosby
