

Interoperability in 18 states

The partnership between Florida's Turnpike Enterprise (FTE) and the E-ZPass network allows for toll interoperability in 18 states along the East Coast and west to Illinois, with more states on the way.

SunPass PRO™ is a new portable transponder that can be used everywhere E-ZPass is accepted.

E-ZPass can now be used as a toll payment method on Florida's Turnpike System and on toll facilities owned and operated by the Florida Department of Transportation (FDOT), giving E-ZPass customers the ease of using one transponder on more than 900 miles of roadway in Florida.
