

Turnpike Mainline (SR 91) Interchange Improvement at SR 91 and Sample Road FPID: 444301-1

Project Description

This project widens the existing northbound off ramp for Sample Road from Turnpike Mainline (SR 91) and updates the Sample Road Toll Plaza. An additional lane of approximately 2,000 feet in length will be constructed.

This project includes pavement widening and reconstruction, milling, resurfacing, signage improvements, associated stormwater drainage improvements and updates to the Sample Road Toll Plaza.

Project Status

This project was advertised for bid in October 2021.

Construction is funded in Fiscal Year 2022.
