PROJECT OVERVIEW

The Florida Department of Transportation (FDOT), Florida's Turnpike Enterprise (FTE) is planning to widen the Seminole Expressway (SR 417) from Aloma Avenue (SR 436) to SR 434 in Seminole County, Florida from two lanes in each direction to four lanes in each direction.

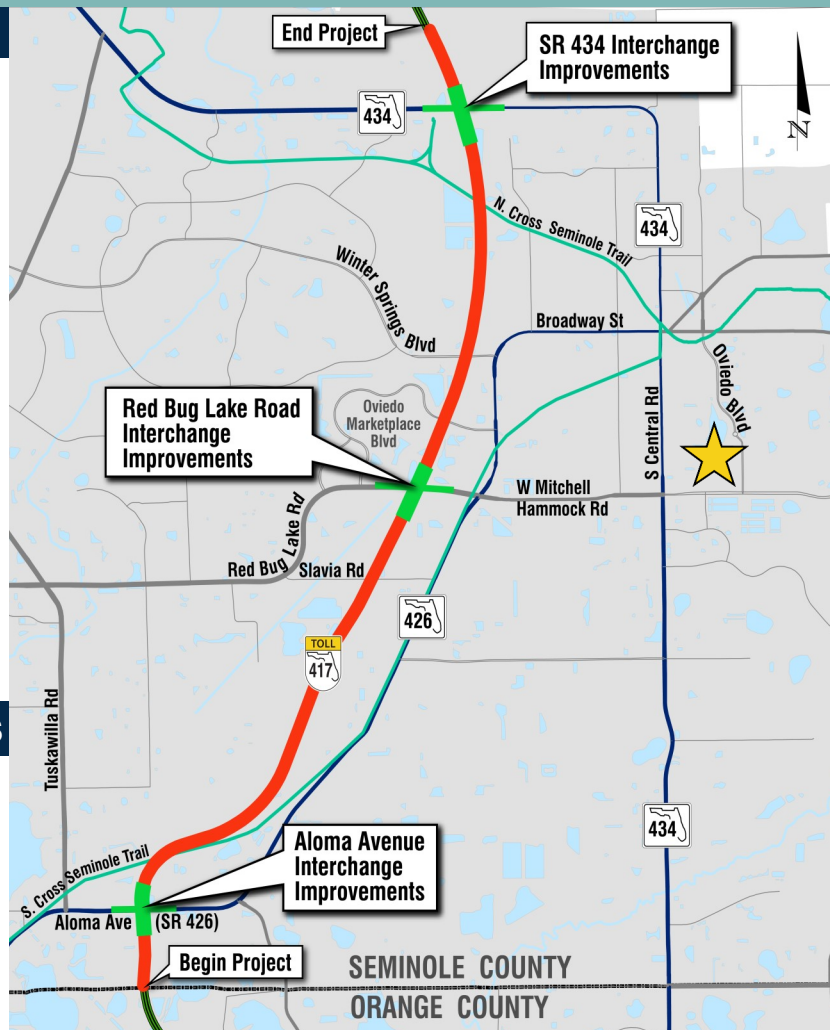

The project will improve operations and safety and increase capacity to accommodate future traffic volumes resulting from increased population and freight demands in Orange and Seminole Counties.

The project covers approximately 6.6 miles of the Seminole Expressway mainline. Project improvements proposed for SR 417 include adding two travel lanes in each direction to increase the roadway capacity from four lanes to eight lanes. Proposed widening will occur primarily to the inside of the existing travel lanes and a concrete barrier wall in the median will separate opposing lanes of traffic.

OTHER KEY PROJECT IMPROVEMENTS

To accommodate the mainline widening, the project will provide additional improvements at three existing interchanges (Aloma Avenue, Red Bug Lake Road, and SR 434). The improvements proposed along the mainline include:

- ◆ Enhancements to roadside safety features
- ◆ Construction of noise walls (according to FDOT criteria)
- ◆ Improvements to existing stormwater ponds
- ◆ Bridge widening and/or replacement
- ◆ Installation of roadway lighting
- ◆ Upgrades to the Intelligent Transportation Systems
