

## Florida's Turnpike Mainline/SR 91 Resurfacing and Roadside Improvements Project from Milepost 47 to Milepost 48 & Turnpike Extension/SR 821 Ramps

### Project Description

Florida's Turnpike Enterprise is resurfacing Florida's Turnpike Mainline/State Road (SR) 91 for the one mile between mileposts 47 and 48, and the associated interchange ramps at SR 91 and the Turnpike Extension/SR 821, in Broward County.

This project is extending the life of the pavement and will provide safety improvements. Improvements will include:

- Asphalt milling and resurfacing of the Mainline and SR 821 ramps
- Installation of high friction surface treatment to reduce skidding and placement of illuminated warning signs along the on-ramp from northbound SR 821 to northbound SR 91
- New highly reflective signing and pavement markings
- Improvements to Intelligent Transportation Systems, lighting, and structures

### Construction and Traffic Impacts

Construction will take place during both daytime and nighttime hours. Nearby residents and businesses may experience periodic construction light, noise, vibration, and dust. The Enterprise takes steps to reduce construction impacts and efforts will be made to limit traffic and noise disruptions.

Lane closures will generally take place during off-peak hours to minimize traffic congestions and delays for most drivers. Closures will be announced in advance in the South Florida and Treasure Coast Weekly Lane Closures and Work Zone Advisory.

#### Schedule and Funding

##### Construction Schedule

Work is anticipated to be completed in 2023.

##### Cost and Funding

The project cost is approximately \$4.2 million.
