Department Pauses Northern Turnpike Extension Project

~ Florida Turnpike Enterprise Alternative Corridor Evaluation Study Concludes with no Viable Proposed Corridors ~

OCOEE, Fla. – The Florida Department of Transportation (FDOT) has completed the Alternative Corridor Evaluation (ACE) Study for the Northern Turnpike Extension without recommending a specific corridor and will not pursue the project any further until options can be reassessed to address concerns of the Department and the community. Based on feedback received from across the four-county study area, significant concerns were identified with portions of all four initially proposed corridors. The Department deeply values community input and is committed to thoroughly exploring all concerns received during this process.

“The goal of every project is to ensure all needs are met, environmental concerns are addressed, and community characteristics are protected. The region and local community should be assured that as we continue to refine and develop viable corridor concepts for this area, it will include extensive engagement with community leaders and the community as a whole,” **said Florida Department of Transportation Secretary Jared W. Perdue, P.E.**

In the near term, to help address regional and statewide transportation needs, the Department is dedicating resources to prioritize improvements on the Interstate 75 corridor. Much of the feedback received from local communities during the ACE study recommended reviewing and prioritizing solutions for the I-75 corridor as part of the overall process.

The foundation of every FDOT project is to balance evolving transportation needs with the community vision of the region and the local area. Conducting evaluations in early planning stages of projects like the ACE study specifically seeks to thoroughly review any impacts and obtain feedback prior to proceeding further on projects and is precisely why we have processes like this.

FDOT appreciates all the input and efforts from the local communities, government partners, and stakeholders. We look forward to collaborating toward a shared transportation vision for the region and local area.

Additional details will be available as we move further along. Until then, the project's website, www.floridasturnpike.com/NTE, will remain active as a resource for project updates.

The Florida Department of Transportation's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of the state's environment and communities. The department is committed to building a transportation system that not only fits the current needs of Florida's residents and visitors, but also enhances mobility throughout the state to accommodate its consistent and rapid growth. The unique nature of the Sunshine State and its year-round warm climate provides numerous opportunities to achieve the department's mission through multiple transportation modes including highways/streets, air, rail, sea, spaceports, transit, and the ever-expanding deployment of bicycle & pedestrian facilities.
