

Central Turnpike Mainline Resurfacing and Improvements Project from Milepost 190 to Milepost 198

Project Description

Florida's Turnpike Enterprise (FTE) is resurfacing the Central Turnpike Mainline/State Road (SR) 91 from milepost 190 to milepost 198, north of the Fort Drum Service Plaza, in Osceola County.

This project is also improving the interchange at Florida's Turnpike and Yeehaw Junction, including:

- Resurfacing the ramps and Tandem Truck parking lot at the interchange
- Widening Florida's Turnpike at Yeehaw Junction to provide longer entrance ramp and exit ramp lanes

Construction and Traffic Impacts

Construction will take place during both daytime and nighttime hours. Nearby residents and businesses may experience periodic construction light, noise, vibration, and dust. FTE takes steps to reduce construction impacts and efforts will be made to limit traffic and noise disruptions.

Continuous lane closures will be necessary throughout the project limits, taking place Mondays through Thursdays. Any additional lane closures will generally take place during off peak hours to minimize traffic congestions and delays for most drivers. Closures will be announced in advance in the Central and Central West Florida Weekly Lane Closures and Work Zone Advisory.

Schedule and Funding

Construction Schedule

Work is anticipated to be completed in late 2022.

Cost and Funding

The project cost is approximately \$16.7 million.
