EXECUTIVE SUMMARY

The Florida Turnpike Enterprise (FTE), part of the Florida Department of Transportation (FDOT), is conducting a Project Development and Environment (PD&E) Study to evaluate the capacity improvement needs associated with Florida's Turnpike (State Road (SR) 91), from south of SR 408 to SR 50 (milepost (MP) 263 to 273), a distance of approximately 10 miles and along SR 408 from the Florida's Turnpike interchange to east of the Old Winter Garden Road overpass. As part of the study, all existing interchanges within the project limits and the need for a new interchange will be evaluated. This Contamination Screening Evaluation Report (CSER) evaluates contamination concerns within the FTE PD&E study area.

The purpose of this evaluation was to assess the risk of encountering petroleum or hazardous substance contamination of soil, groundwater, surface water, or sediment that could adversely affect this project. The CSER activities included a review of public regulatory files and historical data sources, and a site reconnaissance of the project study area.

As a result of this evaluation, we have assigned Contamination Risk Ratings (CRRs) to **70** sites. The **70** site locations are shown on **Figures 7A** through **7F** in **Appendix K** and the contamination status of each site is summarized in **Table 9** in **Appendix L**.

Using the FDOT Risk Ratings presented in **Appendix C**, we have identified **50 Low Risk** sites and **20 Medium Risk** sites. Design plans should be reviewed to evaluate potential project impacts and the need for Level II Impact to Construction Assessments (ICAs).

DRAFT

Due to this project being in the PD&E Study phase, no Level II Impact to Construction Assessments (Level II ICAs) are recommended at this time.

This CSER should be updated once the project reaches the design stage and preferred pond sites are known. Level II ICAs may be required for the 20 **Medium Risk** sites and the 35 **Medium Risk** pond sites that may be impacted by the roadway improvements, depending on design and construction requirements.

DRAFT

1.0 INTRODUCTION

1.1 Project Description

Geotechnical and Environmental Consultants, Inc. (GEC) has been retained by RS&H, on behalf of the Florida's Turnpike Enterprise (FTE), to provide a Level I Contamination Screening Evaluation Report (CSER). The FTE, part of the Florida Department of Transportation (FDOT), is evaluating alternatives to widen Florida's Turnpike (State Road (SR) 91) from south of SR 408 to SR 50 (milepost (MP) 263 to 273), a distance of approximately 10 miles, and along SR 408 from the Florida's Turnpike interchange to east of the Old Winter Garden Road overpass. As part of the study, all existing interchanges within the project limits and the need for a new interchange at Avalon Road were evaluated. The project is located in Orange County, Florida within the municipalities of Oakland, Winter Garden, and Ocoee. The project location map, **Figure 1**, shows the study area for the Florida's Turnpike Project Development and Environment (PD&E) Study. This CSER was performed as part of Financial Project ID No. 444007-1-22-01.

Figure 1: Project Location Map

DRAFT

Florida's Turnpike currently has eight to twelve lanes (four travel lanes and up to two auxiliary lanes in each direction) within the study limits. The roadway is functionally classified as an Urban Principal Arterial – Freeway and Expressway and has a posted speed limit of 70 miles per hour (mph). The access management classification is Class 1 and the corridor does not have a context classification.

Early planning efforts conducted by FTE concluded that major operational, safety, and capacity improvements are needed along Florida's Turnpike to improve current and future peak period traffic operations along the mainline at the major interchanges with SR 408, SR 429, and SR 50 to reduce the potential for traffic incidents and accommodate travel at acceptable levels of service. This PD&E Study evaluated the widening of the Florida's Turnpike as well as milling and resurfacing, bridge construction, and interchange improvements. Interchange improvements were evaluated at SR 408, SR 429, SR 50 (Ocoee / Winter Garden), SR 50 (Clermont / Oakland), and a new interchange was evaluated at Avalon Road.

1.2 Purpose and Need

The purpose of the project is to reduce congestion and improve mobility on Florida's Turnpike mainline from south of SR 408 to SR 50 to accommodate current and future traffic volumes. A goal of the project is to enhance safety and improve emergency evacuation times.

The need for this project is to improve current and future peak period traffic operations and safety issues at the interchanges and throughout the corridor. The SR 408 to SR 429 segment of the project currently has a high volume of weaving and merging movements, with 45% of traffic from SR 408 exiting at SR 429 and 32% of northbound Florida's Turnpike traffic exiting at SR 429. This hinders the traffic operations and increases the concern for safety. The close proximity (1.3 miles) of these system-to-system interchanges causes merging and weaving conflicts. A total of 1,792 crashes were reported in the study limits between 2013 to 2017. Of those crashes, 60 percent occurred on the Florida's Turnpike mainline, seven percent on the SR 408 mainline, 11 percent on the SR 429 mainline, and 22 percent at the SR 50 (Clermont / Oakland) intersection. The proposed improvements will improve the travel time reliability, enhance safety, and improve emergency response and evacuation times.

2.0 PROJECT ALTERNATIVES

2.1 Alternatives Analysis Summary

The project is subdivided into three mainline segments and five interchanges:

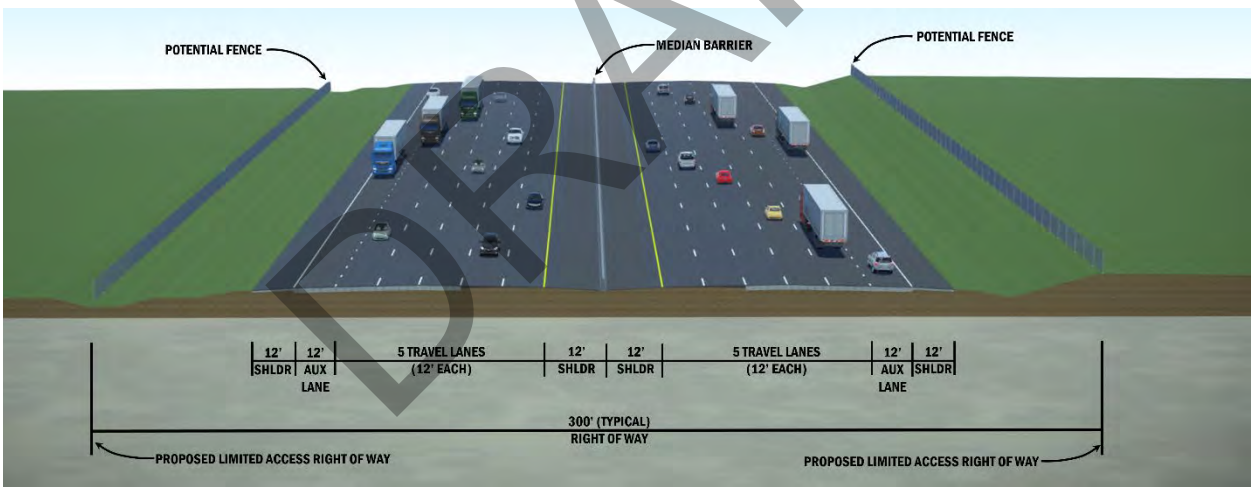

DRAFT

- Mainline:
    - Turkey Lake Service Plaza to SR 408;
    - SR 408 to SR 429; and
    - SR 429 to SR 50 (Clermont/Oakland).

- Interchanges:
    - SR 408;
    - SR 429;
    - SR 50 (Ocoee / Winter Garden) Connector;
    - Avalon Road (potential new interchange); and
    - SR 50 (Clermont / Oakland).

As described above, the Build Alternatives for Florida's Turnpike mainline are subdivided into three segments. The segment of Florida's Turnpike from Turkey Lake Service Plaza to SR 408 involves adding a total of two lanes in each direction for a total of five travel lanes and one auxiliary lane in each direction. **Figure 2A** shows the proposed typical section for Segment 1 of the Florida's Turnpike mainline.

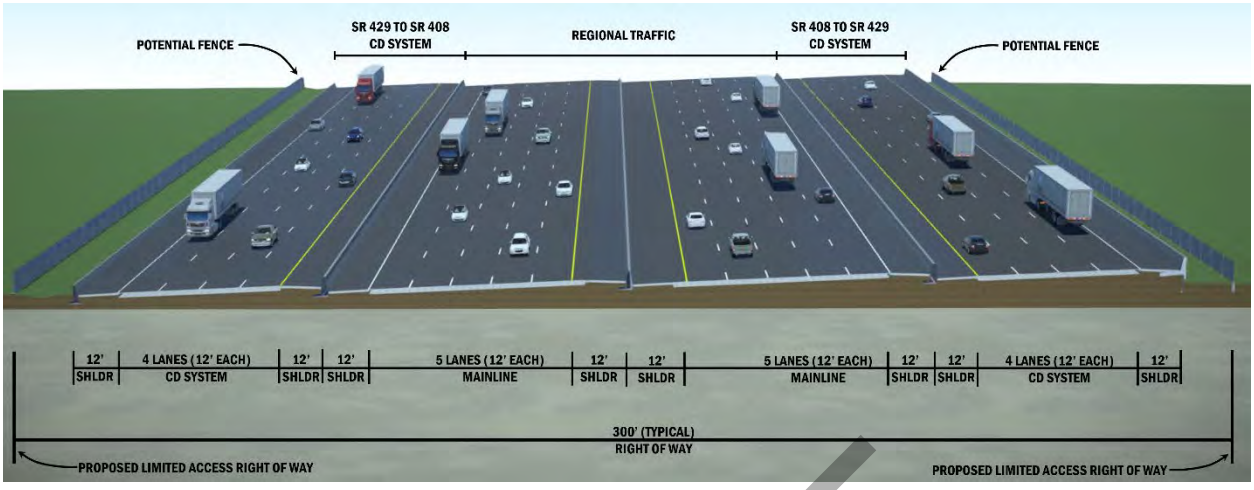

Figure 2A: Proposed Typical Section – Segment 1

The second segment, from SR 408 to SR 429, includes a collector-distributor (CD) system which consists of a separate roadway facility that will parallel Florida's Turnpike mainline. The purpose of the separate system is to minimize the weaving movements associated with the SR 408 and SR 429 interchanges from the high-speed mainline, thereby improving traffic operations and safety. Traffic travelling to either SR 408 or SR 429 will use the CD system comprised of four additional lanes in each direction. These lanes will be barrier separated from the regular mainline travel lanes. In addition, the mainline will be widened to five lanes in each direction to serve the regional traffic passing through this segment. **Figure 2B** shows the proposed typical section for the second segment.

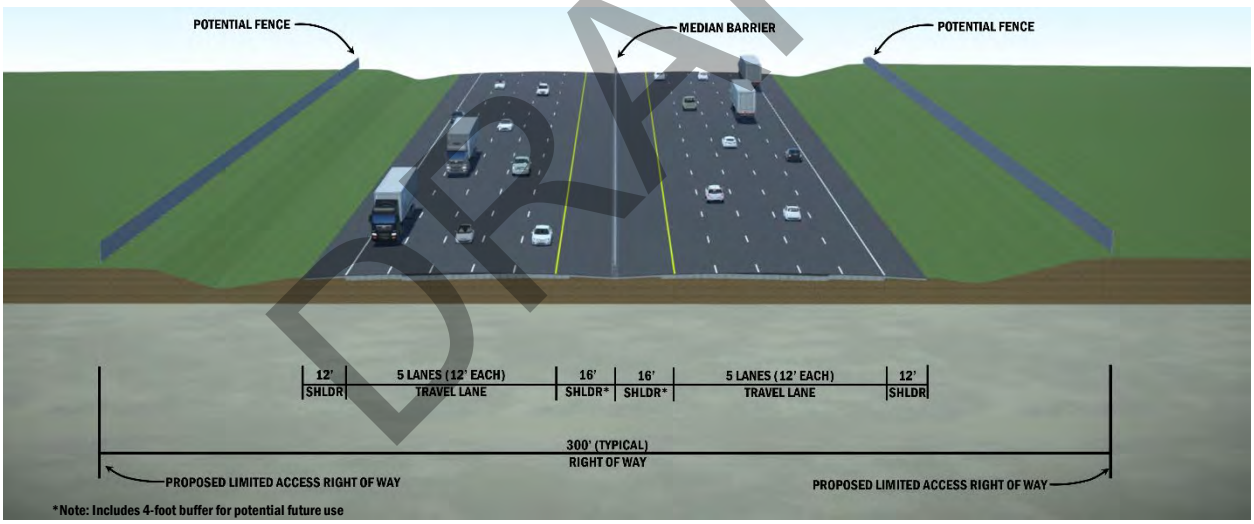

DRAFT

Figure 2B: Proposed Typical Section – Segment 2

The final segment of the study, from SR 429 to SR 50, consists of adding one through lane in each direction, for a total of five travel lanes in each direction. **Figure 2C** shows the proposed typical section for the third segment.

Figure 2C: Proposed Typical Section – Segment 3

DRAFT

The Build Alternatives for each interchange are described below.

SR 408 to SR 429

The proposed Build Alternative for SR 408 to SR 429 includes a C-D system that would increase capacity while improving driver safety. An additional lane in each direction will be added to the Florida's Turnpike mainline as well as three to four additional travel lanes in each direction as part of the C-D system. The C-D system allows for all traffic exiting at SR 408 or SR 429 to avoid the mainline lanes, thereby allowing for better free flow and fewer conflict points.

The SR 408 interchange will be reconstructed to provide direct connections to both the Florida's Turnpike mainline and the proposed C-D system. The Florida's Turnpike southbound exit ramp to SR 408 will be replaced with a new three-lane ramp designed for 55 mph.

The existing SR 429 interchange ramps will remain in their current configuration except for the northbound Florida's Turnpike to southbound SR 429 ramp. This ramp will be replaced with a new two-lane ramp designed to meet the required design criteria. Other minor modifications will be made to accommodate the connections to the new C-D system between SR 429 and SR 408.

SR 50 (Ocoee / Winter Garden) Connector

Two Build Alternatives were considered for this portion of the project: Option 1: Bridge Widening and Option 2: New Signalized Intersection.

- **Option 1: Bridge Widening** – This option widens the existing bridge to meet current design standards. This option includes a new eastbound right turn lane on SR 50 to meet with the exit ramp from Florida's Turnpike along SR 50 just before the Marshall Farms Road intersection. Motorists wishing to turn right onto Marshall Farms Road will need to make the decision before the overpass. The merge will be signal controlled.
- **Option 2: New Signalized Intersection** – This option provides a new single lane loop / bridge from SR 50 westbound to Florida's Turnpike. The loop ramp will merge with the SR 50 eastbound ramp exiting to Florida's Turnpike, similarly to the existing condition. The ramp from Florida's Turnpike to SR 50 widens to five lanes at a new signalized intersection, with three for SR 50 westbound and two for SR 50 eastbound.

Avalon Road Alternatives

As mentioned in the project description, the project evaluated the addition of a local access interchange to Florida's Turnpike. After considering various locations for a new interchange, Avalon Road was determined to be the most logical location for a proposed local access interchange. Three Build Alternatives were evaluated at Avalon Road. Each Build Alternative ties into Orange County's Avalon Road widening project, which extends from the Florida's Turnpike north to SR 50. The tie-in points vary depending on the interchange.

One interchange alternative is the **Tight Urban Diamond Interchange,** which includes diamond ramps in all four quadrants of the interchange with left- and right-turn lanes added to Avalon Road. This alternative requires the least amount of right-of-way.

The second alternative is the **Turbo Roundabout Interchange**. The difference between a "turbo" roundabout and a standard two-lane roundabout is the elimination of weaving while in the roundabout. This alternative introduces two turbo roundabouts, one at each entrance / exit ramp intersection, thereby allowing for more capacity than a standard roundabout and providing additional safety features by not requiring weaving in the roundabout. Similar to the Tight Urban Diamond Interchange, all ramp intersection movements are available to and from the southbound and northbound Florida's Turnpike mainline.

DRAFT

The third alternative is the **Diverging Diamond Interchange,** which allows for free-flowing turns when entering and exiting the mainline by eliminating the left turn against oncoming traffic and limiting the number of traffic signal phases. The design reduces congestion and conflict points creating a safer condition than a regular diamond interchange.

SR 50 (Clermont / Oakland) Alternatives

Three Build Alternatives were evaluated for the SR 50 (Clermont / Oakland) interchange:

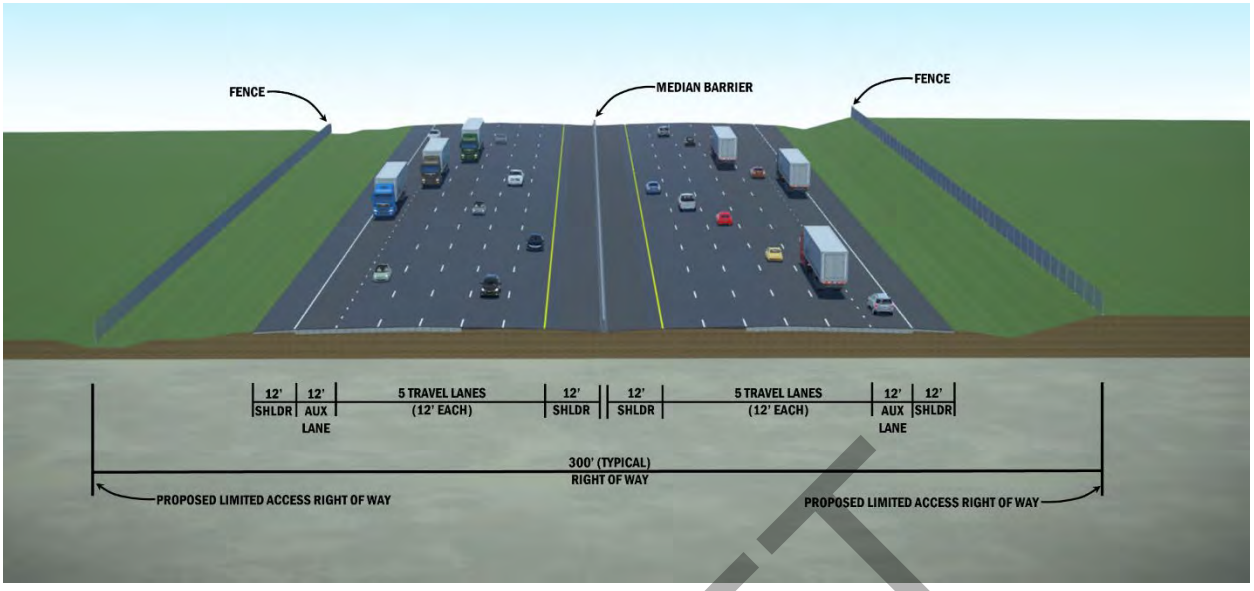

- The **Flyover Alternative** widens the ramps at the interchange and upgrades the mainline geometry to meet current requirements provided by FDOT. The Flyover Alternative provides an overpass from northbound Florida's Turnpike to westbound SR 50 that bypasses the local traffic at the intersection. The proposed traffic signals north and south of the mainline will remain in similar positions to the existing signals. This alternative improves safety by allowing for fewer conflict points and improves mobility by allowing the northbound mainline traffic traveling westbound on SR 50 to bypass the interchange.
- The **Parallel Flow Alternative** upgrades the mainline geometry in the northwest, southeast, and southwest quadrants of the interchange. The alternative splits the Florida's Turnpike northbound off-ramp to allow eastbound traffic on SR 50 to make a right turn, while the westbound traffic moves under the Florida's Turnpike mainline to bypass the northern junction. This alternative improves safety by allowing for fewer conflict points and improves mobility by bypassing the northern traffic signal on SR 50.
- The **Single Point Alternative** consists of extending the Florida's Turnpike overpass to provide access for a single point intersection for SR 50. The single point intersection allows for one signal to be placed at the intersection, thereby requiring only three signal phases at the interchange. This alternative improves mobility by combining the signals north and south of the mainline into one signal at the interchange.

2.2 Description of Preferred Alternative

The Preferred Alternative for Florida's Turnpike mainline are subdivided into three segments. The segment of Florida's Turnpike from Turkey Lake Service Plaza to SR 408 involves adding a total of two lanes in each direction for a total of five travel lanes and one auxiliary lane in each direction. Figure 1.4.1 shows the proposed typical section for Segment 1 of the Florida's Turnpike mainline.

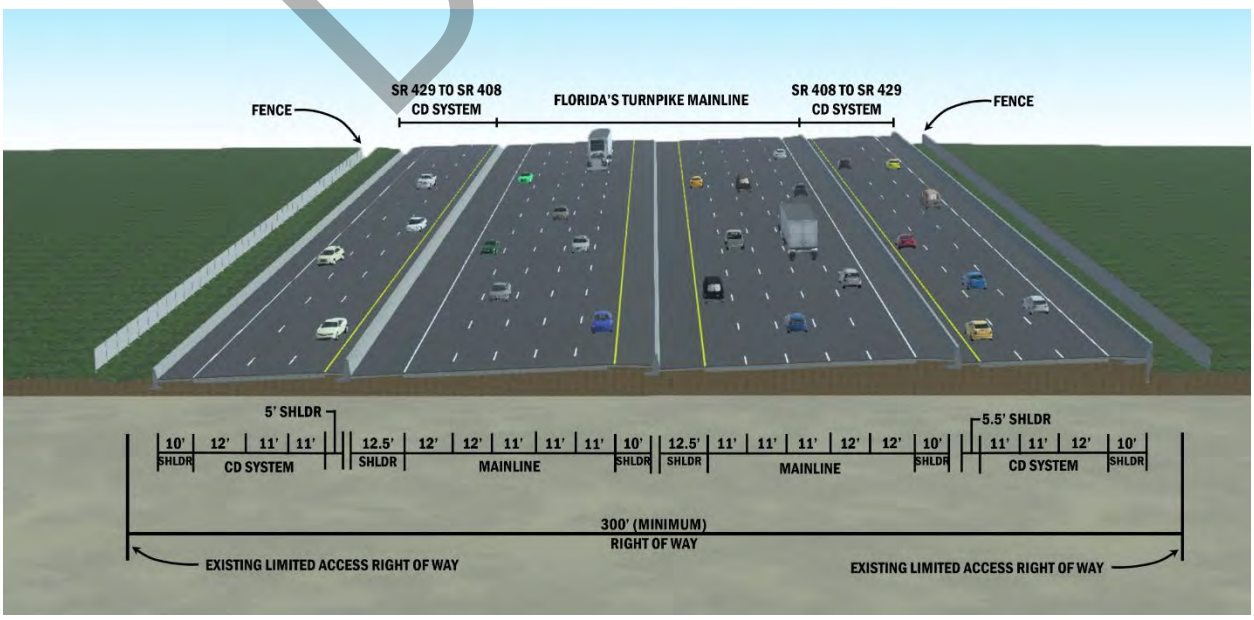

DRAFT

Figure 2D: Typical Section – Segment 1

The second segment, from SR 408 to SR 429, was updated after coordination with the City of Ocoee to minimize right-of-way impacts. This segment includes a C-D system consisting of a separate roadway facility that will parallel the mainline lanes of Florida's Turnpike. The purpose of the C-D system is to move the weaving movements associated with the interchanges from the high-speed mainline, thereby improving traffic operations and safety. Traffic traveling to either SR 408 or SR 429 will use the C-D system comprised of three additional lanes in each direction. These lanes will be barrier separated from the mainline travel lanes. In addition, the mainline will be widened to five lanes in each direction to serve the regional traffic passing through this segment. Figure 1.4.2 shows the proposed typical section for the second segment of Florida's Turnpike.

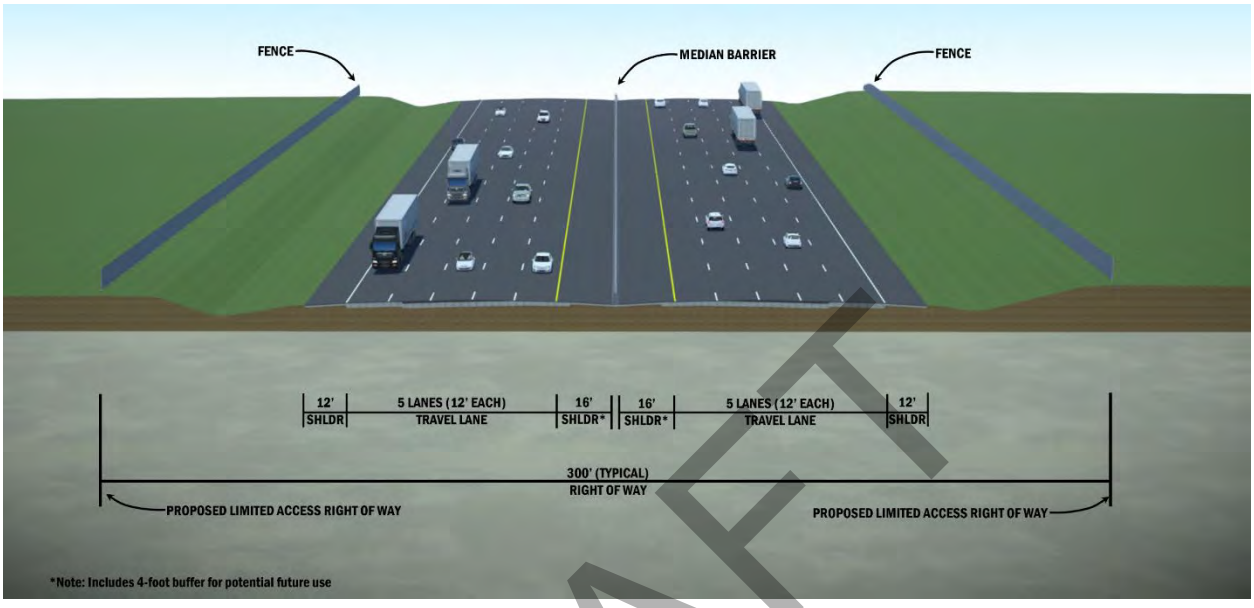

Figure 2E: Typical Section – Segment 2

DRAFT

The final segment of the study, from SR 429 to SR 50, consists of adding one through lane in each direction, for a total of five travel lanes in each direction. Figure 1.4.3 shows the proposed typical section for the third segment of Florida's Turnpike.

Figure 2F: Typical Section – Segment 3

The preferred interchange improvements are described below and pictured in **Appendix C**.

The SR 408 interchange will be reconstructed to provide direct connections to both the Florida's Turnpike mainline and the proposed C-D system. The Florida's Turnpike southbound exit ramp to SR 408 will be replaced with a new three-lane ramp designed for 55 mph.

The existing SR 429 interchange ramps will remain in their current configuration except for the northbound Florida's Turnpike to southbound SR 429 ramp. This ramp will be replaced with a new two-lane ramp designed to meet the required design criteria. Other minor modifications will be made to accommodate the connections to the new C-D system between SR 429 and SR 408.

At SR 50 (Ocoee / Winter Garden) Connector, the recommended alternative will widen the existing bridge over SR 50 to and from the Florida’s Turnpike to meet current design standards. This option includes a new eastbound right turn lane onto SR 50 that merges with the exit ramp from Florida's Turnpike along SR 50 just before the Marshall Farms Road intersection. Motorists wishing to turn right onto Marshall Farms Road will need to make that decision before the overpass. The merge will be signal controlled.

At SR 50 (Clermont / Oakland), the Parallel Flow Alternative is recommended to upgrade the mainline geometry in the northwest, southeast, and southwest quadrants of the interchange. The alternative splits the Florida’s Turnpike northbound off-ramp to allow eastbound traffic

DRAFT

on SR 50 to make a right turn, while the westbound traffic moves under the Florida's Turnpike mainline to bypass the northern junction. This alternative improves safety by allowing for fewer conflict points and improves mobility by bypassing the northern traffic signal on SR 50.

A new interchange was evaluated at Avalon Road, however, after considering public input, the No-Build Alternative was selected as the Preferred Alternative.

3.0 PROJECT AREA DESCRIPTION

3.1 Existing Land Use

The current land uses within the study area are shown on the South Florida Water Management District (SFWMD) Map on **Figures 6A-6F** and are summarized as follows:

- 1100 Residential – Low Density
- 1110 Fixed Single Family Units
- 1200 Residential – Medium Density

DRAFT

* - Indicates a land use which may have the potential to be a source of contamination. The concerns associated with these land uses are residual pesticide and herbicide constituents from years of agricultural chemical application. These land uses are correlated to sites listed in Tables 1 and 2; please refer to these tables for more information.

No improvements are proposed within the golf course boundaries; therefore, the golf course land use is not considered to present a contamination risk to this project.

The land uses of tree nurseries (2410) and ornamentals (2430) correlate to Site No. 68, historical areas of agriculture and citrus, and existing plant nurseries assigned Site Nos. 58 and 64, respectively. Potential contamination risks associated with these land uses are included in the site discussions in Table 9 and do not represent additional concerns outside of those discussed in the Table.

4.0 CONTAMINATION SCREENING METHODOLOGY

This evaluation was performed in general accordance with Chapter 20 of the FDOT PD&E Manual dated July 1, 2020. The study area in this project is defined by the following distances from the Study Area footprint and drainage alternatives:

- All sites within 500 feet;
- Non-landfill solid waste sites within 1,000 feet; and
- Solid waste landfills, CERCLA, or National Priorities List (NPL) sites within ½ mile.

We reviewed relevant information from the Florida Department of Environmental Protection (FDEP), United States Environmental Protection Agency (USEPA), and local agencies in Lake and Orange County to identify known or potential contamination sites within the study area. Historical aerial photographs and other published historical sources were reviewed as part of this CSER. We performed a site reconnaissance of the properties within the study area and attempted to interview individuals with knowledge of the study area's environmental status.

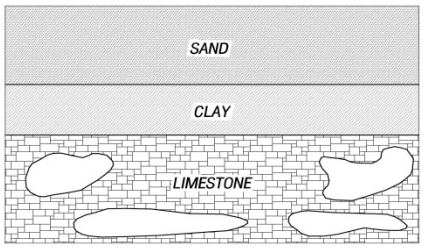

Based on the results of the contamination screening activities, we assigned Contamination Risk Ratings (CRRs) to sites as well as proposed drainage alternatives based on current and past land uses within the Study Area footprint. The risk rating system was developed by FDOT and incorporates four levels of risk: **No, Low, Medium and High**. For a description of the four risk levels please refer to **Appendix C.** Definitions of Common Report Terms are included in **Appendix B.**

Due to the quantity of proposed alternative stormwater ponds and the flood plain compensation areas (pond sites), these locations were screened by considering their locations relative to the potential contamination sites identified within this CSER. The pond sites are assigned the same CRRs as adjacent sites. If the pond site is adjacent to two sites with CRRs, the more conservative CRR is assigned. If no CRR sites are located adjacent to the pond site, it is assigned a CRR of **Low**.

DRAFT

5.0 CENTRAL FLORIDA GEOLOGY

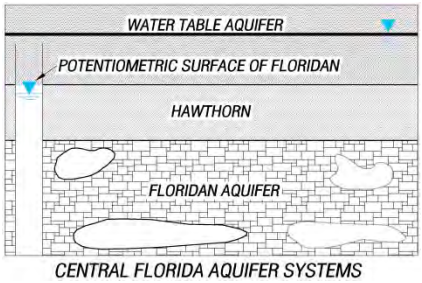

5.1 Geologic and Geographic Conditions

KARST GEOLOGY OF CENTRAL FLORIDA

Figure 3A

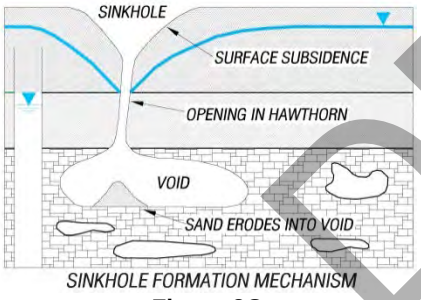

Due to its prevalent geology, referred to as karst, Central Florida is prone to the formation of sinkholes, or large, circular depressions created by local subsidence of the ground surface. The nature and relationship of the three sedimentary layers typical of Central Florida geology cause sinkholes. The deepest, or basement, layer is a massive, cavernous limestone formation known as the Floridan aquifer.

CENTRAL FLORIDA AQUIFER SYSTEMS

Figure 3B

The Floridan aquifer limestone is overlain by a silty or clayey sand, clay, phosphate, and limestone aquitard (or flow-retarding layer) ranging in thickness from nearly absent to greater than 100 feet and locally referred to as the Hawthorn Group (Hawthorn). The Hawthorn is in turn overlain by a 40 to 70-foot thick surficial layer of sand, bearing the water table aquifer. The likelihood of sinkhole occurrence at a given site within the region is determined by the relationship among these three layers, specifically by the water (and soil)-transmitting capacity of the Hawthorn at that location.

SINKHOLE FORMATION MECHANISM

Figure 3C

The water table aquifer is comprised of Recent and Pleistocene sands and is separated from the Eocene limestone of the Floridan aquifer by the Miocene sands, clays and limestone of the Hawthorn. Since the thickness and consistency of the Hawthorn is variable across Central Florida, the likelihood of groundwater flow from the upper to the lower aquifer (known as aquifer recharge) will also vary by geographical location.

DRAFT

In areas where the Hawthorn is absent, water table groundwater (and associated sands) can flow downward to cavities within the limestone aquifer, like sand through an hourglass, recharging the Floridan aquifer, and sometimes causing the formation of surface sinkholes. This process of subsurface erosion associated with recharging the Floridan aquifer is known as raveling. Thus, in Central Florida, areas of effective groundwater recharge to the Floridan aquifer have a higher potential for the formation of surface sinkholes. The water features located within the study area are the result of ancient sinkable formations. Please refer to the Report of Preliminary Geotechnical Investigation for the results of our soil borings concluded in these features.

The Geological Units of Florida layer for Google Earth shows the study area includes Holocene sediments known as the Cypresshead Formation, named by Huddlestun (1988).

The Cypresshead Formation overlies the clays of the Hawthorne formation. The Cypresshead Formation is comprised primarily of quartz sand, but it can also contain variable percentages of clay, feldspar and heavy minerals. The quartz sand ranges in size from fine to coarse with occasional quartz pebbles. Clay content ranges from a trace amount to as much as 50 percent. The upper portion of the Cypresshead Formation is typically orange to reddish in color with a mottled appearance due to weathering. The formation can be as much as 200 feet thick in parts of Florida.

Fossil burrows of marine shrimp and internal casts of mollusks are occasionally found in the Cypresshead Formation and reflect a marine depositional environment. The age of the Cypresshead Formation was determined based on its relationship to other adjacent and underlying formations of known age. For example, the Cypresshead Formation in Florida overlies formations of the Oligocene to Pliocene Hawthorn Group, and grades laterally into the early Pleistocene Nashua Formation to the east. Therefore, the Cypresshead Formation can be no older than late Pliocene to early Pleistocene (3.6 – 1.8 million years) based on these relationships.

5.2 USGS Quadrangle Maps

The study area has been transposed onto the Clermont East, Winter Garden, and Orlando West Quadrangle maps, as shown on **Figures 4A** through **4F** in **Appendix K.** The Quadrangle maps indicate rolling topography in the western two miles of the corridor with natural grades generally ranging between +100 feet and +150 feet National Geodetic Vertical Datum (NGVD). The topography then remains level, between +100 and +120 feet NGVD until east of SR 429. East of SR 429, natural grades steadily increase to +140 feet NGVD near the SR 408 interchange; they subsequently drop to +110 feet NGVD in the vicinity of Lake Olivia/Lake Steer, then increase to +180 feet NGVD at the Turkey Lake Service Plaza.

Groundwater depth is based on the localized topography and ranges from the ground surface at or adjacent to lakes and ponds within the project footprint to >20 feet below the ground surface in the western portion of the study area. On-site groundwater flow direction cannot be determined based solely upon the quadrangle map. Groundwater flow can be influenced by many factors including stormwater retention ponds, drainage canals, exfiltration trenches, and construction dewatering. Installation of piezometers and measurements of groundwater elevations would be required to determine actual groundwater flow direction.

Large areas of citrus groves are visible adjacent to the Turnpike for much of the study area. Several excavated areas are depicted on the maps along the Turnpike, east of SR 429. These excavated areas are currently retention ponds.

No landfills, quarries, or other features are depicted that would appear to represent potential contamination concerns on, or in the immediate vicinity of, the study area, which were not identified by other sources.

DRAFT

5.3 Natural Resource Conservation Service (NRCS) Soil Survey Review

The Natural Resource Conservation Service (NRCS) Soil Surveys of Lake County and Orange County, Florida was reviewed for information regarding near-surface soil conditions within the project limits, as shown on **Figures 5A** through **5F** in **Appendix K**. The following soil types were identified within the study area:

Table 4: Lake County NRCS Soil Table

Unit No.	Soil Name
9	Candler sand, 5 to 12 percent slopes
99	Water

Table 5: Orange County NRCS Soil Table

Unit No.	Soil Name
1	Arents
2	Archbold fine sand, 0-5 percent slopes
3	Basinger fine sand, frequently ponded, 0 to 1 percent slopes
4	Candler fine sand, 0 to 5 percent slopes
5	Candler fine sand, 5 to 12 percent slopes
6	Candler-Apopka fine sand, 5 to 12 percent slopes
17	Floridana mucky fine sand, frequently ponded, 0 to 1 percent slopes
20	Immokalee fine sand
22	Lochloosa fine sand
26	Ona fine sand, 0 to 2 percent slopes
28	Florahome fine sand, 0 to 5 percent slopes
33	Pits
34	Pomello fine sand, 0 to 5 percent slopes
37	St. Johns fine sand
39	St. Lucie – Urban land complex, 0 to 5 percent slopes
40	Samsula muck, frequently ponded, 0 to 1 percent slopes
41	Samsula-Hontoon-Basinger association, depressional
42	Sanibel muck
43	Seffner fine sand
44	Smyrna-Smyrna, wet, fine sand, 0 to 2 percent slopes
45	Smyrna fine sand – Urban land complex, 0 to 2 percent slopes
46	Tavares fine sand, 0 to 5 percent slopes
47	Tavares-Millhopper fine sand, 0 to 5 percent slopes
48	Tavares fine sand – Urban land complex, 0 to 5 percent slopes
51	Wabasso fine sand, 0 to 2 percent slopes
53	Wauberg fine sand
54	Zolfo fine sand, 0 to 2 percent slopes

DRAFT

Unit No.	Soil Name
55	Zolfo – Urban land complex
99	Water

An area of Arents is shown on the east side of SR 429, south of Story Road in the auto auction parking area. This was a sod farm or pasture prior to earth moving activities visible in the 1984 aerial photographs. The site was used for auto parking in 1990. Obvious contamination concerns were not identified relative to this area of Arents.

An area of Pits (Orange County Soil Unit No. 33), surrounded by an area of Arents, is shown about 1,375 feet southwest of the intersection of SR 408 and Old Winter Garden Road; this is the location of the former Luscian Hills Landfill (**Site No. 57**). Aerial photographs show a wetland feature adjacent to an area of disturbed land known as the former landfill. This area is currently beneath the SR 408 travel lanes.

An area of Arents (Orange County Soil Unit No. 1) is shown to the southwest of the West Colonial Drive and Maguire Road intersection. This is a rectangular area of disturbance in the 1954 aerial photograph. It is currently heavily wooded area and does not appear to have been developed. Obvious contamination concerns were not identified relative to this area of Arents.

Other than the Arents and Pits discussed above, no landfills, borrow pits, quarries, or other conditions are depicted that would represent potential contamination concerns on, or in the immediate vicinity of, the study area which were not identified by other sources. Due to the lack of apparent sources of potential contamination at the areas of Arents soils not related to **Site No. 57**, these areas have not been assigned a CRR.

Information contained in the NRCS Soil Survey is very general and may be outdated. It may not therefore be reflective of actual soil and groundwater conditions, particularly if recent development in the site vicinity has modified soil conditions or surface/subsurface drainage.

DRAFT

6.0 HISTORICAL DATA REVIEW

6.1 Historical Aerial Photographs

Historical aerial photographs of the study area were reviewed to evaluate past land use and to identify features that may indicate hazardous material or petroleum contamination. Available historical aerial photographs of the study area were accessed from Google Earth, the FDOT, and the University of Florida websites. Aerial photographs for the following years were reviewed: 1941 (western portion), 1947, 1954, 1969, 1974, 1978, 1984, 1990, 1995, 1999, 2006, 2010, and 2021. Full coverage of the study area was available in each of the years reviewed except 1941 where only the westernmost portion of the study area was available. Aerial Photographs are included in **Appendix A,** and a summary of relevant findings is included as **Table 10** in **Appendix L.**

1941

- Old Highway 50 is visible at the far west end of the study area. Several rail lines (**Site No. 69**) are also visible. Dominant land use is citrus (**Site No. 68**) with a few rural residences.

1947

- No significant changes are visible along the western 2.5 miles of the study area. Land use remains dominated by citrus (**Site No. 68**).
- The area of the future SR 429 corridor is primarily undeveloped land, with uses being citrus and some rangeland.
- The Luscian Landfill (**Site No. 57**) is visible northwest of Fischer Lake under the current SR 408 alignment and adjacent residences.

1954

- SR 50 (West Colonial Drive) has been constructed by 1954 and is visible along the entirety of the study area.
- Dominant land use along the corridor remains citrus (**Site No. 68**). The former Killarney Fruit Company (**Site No. 3**) site is visible.

1969

- The Turnpike is visible beginning in 1969 along the study area including the Turkey Lake Plaza (**Site No. 65**).
- While most land use remains citrus groves (**Site No. 68**), residential and commercial development is growing along the central and eastern portions of the study area.

1974-1978

- Residential and commercial development continues to grow along the study area with citrus remaining prevalent on the eastern and western ends of the study area.
- Roper Parkway and Enterprise Road are under construction in 1974.
- The Dunbar Street landfill area (**Site No. 23**) is in operation.
- Land use along the future SR 429 corridor consists of commercial/light industrial properties and citrus.

1984-1990

- Residential and commercial development continues to grow along the study area.
- The ABC Bus Company (**Site No. 5**) site is visible.
- SR 408 is under construction.
- The Manheim auto auction facility (**Site No. 43**) is visible.

1995-1999

- Large portions of the citrus groves (**Site No. 68**) have been cleared or replanted, due to heavy regional frosts and freezes in the late 1980s.
- **Site No. 1**, Creative Auto Boutique, is visible at the west end of the study area.

DRAFT

- Several residential subdivisions are visible between SR 50 and the Turnpike from east of Avalon Road to Beulah Road, to the southwest of the SR 408 interchange, and from just west of Apopka Vineland Road to the east end of the study area.
- Commercial development along the central portion of the study area, adjacent to SR 50 near the future SR 429 interchange, has increased. Several sites along that area are now visible.
- SR 408 has been completed.
- The West Orange Park soccer fields (**Site No. 47**) are visible in 1999.
- The barns and structures at the two Heller Groves sites (**Site Nos 54 and 55**) have been demolished and the sites are vacant agricultural land in 1999.
- By 1999, the former Luscian Landfill facility (**Site No. 57**) has been excavated and the current residential neighborhood is under construction.

2006

- Several residential neighborhoods are visible along the southern side of SR 50 and the Turnpike at the western end of the alignment, and along the southern portion of the SR 429 alignment.
- SR 429 has been constructed.
- Fire Station #33 (**Site No. 62**) is visible.
- Additional residential and commercial growth is replacing land previously planted with citrus.

2010-2021

- Development along the eastern end of the study area, from the interchange of the Turnpike with SR 429 eastward consists primarily of residential properties, with commercial uses such as utility properties, including the electrical substation (**Site No. 59**) and AT&T tower yard (**Site No. 63**), Westbrooke Elementary School (**Site No. 56**), landscaping/nurseries (**Site Nos 58 and 64**), visible along the corridor.
- In 2021, the Inspired Living facility (**Site No. 48**) is visible, as well as the apartment complex which was constructed on the former Heller Groves site (**Site No. 55**).

Potential contamination sites shown in bold print in the above historical aerial photograph review are included in the Potential Contamination Site Descriptions in **Table 9** in **Appendix L**. The historical aerial photographs are provided in **Appendix A**, and a summary of findings from the photographs is provided as **Table 10** in **Appendix L**.

6.2 City Directories

City Directories are historical listings of businesses and residences in a given area, similar to a standard telephone book. The site occupant and addresses listed for previous years can identify past land uses. Environmental Data Resources (EDR) was contracted to provide a city directory review for the study area. EDR researched city directories from 1964 through 2017 at approximately 5-year intervals.

Table 11 summarizes the historical city directory listings within the study area and their applicable CRR Site Numbers. The CRR Site Numbers correspond to the CRR Sites

DRAFT

described in **Table 9**. The city directories included the cities of Clermont, Winter Garden, and Ocoee. The street numbers changed in some instances and not others, making it difficult to identify additional contamination sites. As such, the city directory review did not reveal any gas stations or other commercial/industrial land uses that were not identified in the site reconnaissance, environmental database searches, or historical aerial photograph reviews. The EDR City Directory Report is included in **Appendix D.**

6.3 Fire Insurance Maps

Fire insurance maps are used by insurance companies in assessing fire risk. These maps contain details about building construction, business type, building contents, fuel storage tanks, and other factors affecting fire risk.

Historical fire insurance maps were not available for the study area. The fire insurance map search confirmation is included in **Appendix E**.

6.4 Historical Quadrangle Maps

Historical quadrangle maps were reviewed at the www.Historicaerials.com website. The maps for 1964, 1972, 1981, 1987, 2012, 2015, and 2018 (Clermont East), 1957, 1964, 1968, 1972, 1981, 1987, 2012, 2015, and 2018 (Winter Garden), and 1957, 1964, 1967/68, 1972, 1981, 2000, 2012, 2015, and 2018 (Orlando West) were reviewed.

- Citrus groves (**Site No. 68**) dominated land uses in the vicinity of the study area from 1957 through 1981/1987.
- SR 50 (West Colonial Drive) was visible across the study area on all maps reviewed; the Turnpike was first visible on the 1972 maps.
- SR 408 and SR 429 were first visible on the 2012 maps.
- Several rail lines(**Site No. 69**), including the Seaboard Air (Coast) Line and the Atlantic Coast Line, are visible on the maps from 1957 through 1981/1987.
- No buildings or land uses are depicted on the 2012 through 2018 maps.
- A clay pit (**Site No. 57**) is shown northwest of Fischer Lake, under the current SR 408 alignment in the 1957 and 1968 maps and as an area of excavation in 1972.
- The landfill at Bethune Avenue on the west side of SR 426 (**Site No. 23**) is first visible as an area of excavation in 1972. This landfill falls partially under SR 429.
- A large commercial building (**Site No. 3**) and associated railroad tract is visible in 1964-1987 at the corner of SR 50 and Oakland Avenue on the western portion of the alignment.

Aside from the conditions described above, the historical quadrangle maps do not depict landfills, additional clay pits or quarries, or other conditions that would represent potential contamination concerns on, or in the immediate vicinity of, the study area. No contamination sites were identified on the historical quadrangle maps that were not identified through other records or sources.

DRAFT

6.5 Historical Contamination Screening Evaluation Report

No historical Contamination Screening Evaluation Reports were available for the study area.

7.0 PUBLIC RECORD REVIEW

A review of the public record was conducted for the study area including information obtained from the USEPA and the FDEP. As a part of our review, we subcontracted with EDR for a regulatory database search. The EDR information was reviewed with respect to the search distances described in **Section 4.0**, Contamination Screening Methodology. The EDR Radius Map Report is included in **Appendix F**.

7.1 Florida Department of Environmental Protection (FDEP) Databases

The FDEP has compiled several databases that are useful in identifying potential sources of hazardous material or petroleum product contamination. The FDEP databases reviewed for this study and their common abbreviations are provided in **Appendix G.**

7.2 United States Environmental Protection Agency (USEPA) Databases

The federal government has compiled several databases that are useful in identifying potential sources of hazardous material or petroleum product contamination. The federal databases reviewed for this study and their common abbreviations are provided in **Appendix H**.

7.3 FDEP OCULUS Document Management System, Map Direct Website, and Nexus Portal

The FDEP uses the OCULUS Electronic Document Management System, Map Direct Website, and Nexus Portal to provide public record information for petroleum or hazardous material releases to the environment, generators of hazardous waste, and solid waste facilities. Information contained in this data management system includes the status of active and abandoned storage tanks, tank inspection reports, tank closure reports, environmental assessment reports, remedial action reports, hazardous waste generator compliance details, and solid waste facility compliance details.

We reviewed the OCULUS Electronic Document Management System, Map Direct Website, and Nexus Portal within the search distances provided in Section 5.0. The sites identified in our OCULUS review have been incorporated in the Potential Contamination Site Descriptions in **Table 9.** The FDEP OCULUS, Map Direct and Nexus Portal Information can be found in **Appendix I**.

7.4 EDB Delineated Areas

The Florida Legislature had the FDEP implement the Delineated Areas Program in 1988 under Chapter 62-524, FAC. The purpose of the program was to protect public health and groundwater resources by regulating potable water well construction and testing standards

DRAFT

for areas of known groundwater contamination. During the period 1962 to 1980, the Florida Department of Agriculture and Consumer Services (FDACS) conducted widespread applications of ethylene dibromide (EDB), an agricultural pesticide, to control nematodes in citrus groves. In 1983, the FDEP began testing groundwater in potable wells throughout Florida due to the discovery of EDB in wells in other states. The delineated areas of EDB groundwater contamination are shown on the FDEP Map Direct website. The potable wells, agricultural or residential, with confirmed impacts were shown on the website with a 1,000-foot buffer zone in an attempt to project future migration of contaminants. However, this does not mean that there is not EDB contamination outside of that 1,000-foot zone.

After reviewing these EDB-delineated areas on the FDEP Map Direct website in the vicinity of the study area, EDB was detected in one or more potable or irrigation wells within the study area. These sites are residential properties constructed in areas of former citrus (**Site No. 68**). These properties are located to the adjacent north of the Turnpike and to the adjacent south of SR 50, at the far western end of the study area. Proposed pond sites Basin DSR 50N Alternatives 1, 2, and 3, Basin E Alternatives 1, 2, and 3, Basin D Alternatives 1 and 2, and Basin B Alternative 3 are located within the FDEP-mapped areas. Additionally, Basins SR429S Alternatives 3 and 4 are located within FDEP-mapped EDB areas, on the southern end of the SR 429 footprint. The EDB-delineated areas, where intersecting the study area and roadway footprints, have been assigned as **Site No. 70**.

EDB delineated areas are not reflective of surface or near surface conditions; however, they do confirm pesticide uses at citrus groves in the study area. The EDB zones are documented with respect to drinking water well permitting and are not documented in the soil or surficial groundwater. Therefore, EDB is not expected to impact the project construction.

7.5 Agricultural Land Use

Agricultural land uses identified in the study area include citrus groves and cattle grazing pastures and rangeland. These areas are described as **Site No. 68** in **Table 9** in **Appendix L**.

Although there were no obvious signs of environmental impacts observed on the agricultural properties during the site reconnaissance, residual impacts to the soil or groundwater could exist based on historical agricultural chemical usage at those properties within the study area.

Many of the proposed pond sites and floodplain compensation areas are located within current or former citrus grove areas. These sites were assigned Contamination Risk Ratings of Medium due to the potential for encountering historical agricultural impacts. The areas of citrus groves that have been selected as potential pond sites will need to be evaluated for residual agricultural chemicals due to years of application. The constituents of concern include pesticides, herbicides, and arsenic.

DRAFT

7.6 Railroad Corridors

Three rail lines are known to have intersected with the study area. Two Seaboard Coast Rail Lines were previously located along the western portion of the study area, to the north of SR 50 (West Colonial Drive). These lines were reportedly constructed in the 1890s and early 1900s. Portions of these rail lines have been converted into the West Orange Trail, a paved pedestrian recreational trail. One branch of the Seaboard Coast Rail Line intersects SR 429 at the north end of the study area, and is still operational. A spur extended off of this rail line and extended south between the existing rail line and Story Road on the west side of SR 429.

The third Seaboard Coast Rail Line to intersect the east end of the study area, crossing Old Winter Garden Road, SR 408, and the Turnpike, was reportedly constructed in the 1880s. It appears to have been abandoned by the 1970s. The railroads are discussed as **Site No. 69** in **Table 9** in **Appendix L**.

7.7 Cattle Dip Vats

Cattle dip vats were a response to cattle tick fever in the 1890s. The United States Department of Agriculture (USDA) initiated the cattle dip vat program in 1906 and approximately 3,200 cattle dip vats had been constructed by 1940.

No cattle dip vats were identified within the study area through public record and database review, historical aerial photograph review, or site reconnaissance.

8.0 INTERVIEWS

On October 19, 2021, an email was sent to Mr. Tom Lubozynski with FDEP regarding a request for additional information for **Site No. 59**, Progress Energy Hempel Substation. A second email was submitted to Mr. Shane Gibbs with FDEP on February 18, 2022 requesting information on the Progress Energy facility. On February 21, 2022 Mr. Reggie Phillips responded on behalf of FDEP that no additional records were available for the facility.

On October 20, 2021, Ms. Ruth Rauenzahn, Environmental Program Supervisor with Orange County Environmental Protection Division (OCEPD), was interviewed via email regarding **Site No. 19**, Ranger Construction Industries. OCEPD oversees the Orange County Tank and Cleanup Programs. Ms. Rauenzahn provided additional assessment documentation, which is discussed in **Table 9**.

An email request to OCEPD for additional information regarding the physical removal of previously closed-in-place USTs at **Site No. 65**, Turkey Lake Plaza, was submitted on October 21, 2021. Mr. Glen Becker responded on October 22, 2021.

DRAFT

On October 21, 2021, we submitted a request for information to Mr. Shane Gibbs, Representative of FDEP's Central District, regarding several spill sites (**Site Nos. 16, 17, 18, 45, and 66**). Documents provided by Mr. Gibbs indicate that the spill incidents within the study area are considered "closed".

No additional interviews were performed in the preparation of this assessment. The interview documentation is included in **Appendix J**.

9.0 SITE RECONNAISSANCE

A representative of GEC performed a reconnaissance of the study area on October 15, 18, and 19, 2021. The purpose of the reconnaissance was to document existing conditions and evaluate whether current land uses could result in hazardous material or petroleum product contamination of environmental media.

The properties within the project study area were visually inspected for evidence of contamination such as stressed vegetation, underground tank vent and fill pipes, dumping, accumulated areas of debris, evidence of buried materials, and ground staining.

Our observations during site reconnaissance are explicitly identified in the Potential Contamination Site Descriptions in **Table 9**. Photographs obtained for each potential contamination site are also included in **Table 9.**

10.0 POTENTIAL PROJECT IMPACTS

This CSER has identified the **70** sites that, in GEC's opinion, have some risk of contamination impacts to this project. The site locations are shown on **Figure 7A through 7F**. **Table 9** summarizes the findings for each rated site.

10.1 Potential Contamination Sites

Table 1: Low Risk Sites (50)

Site No.	Site Name	Site Address	Risk Potential
1	Creative Auto Boutique	17949 West State Road 50	Low
4	Toms Interstate Inc.	17530 West State Road 50	Low
5	ABC Bus Companies Inc.	17469 West State Road 50	Low
6	Rachels Collision Center	917A West Oakland Avenue	Low
10	West Orlando Powersports	16333 West Colonial Drive	Low
14	Dewitt Excavating	14463 West Colonial Drive	Low
15	Wesmere Cleaners	1291 Winter Garden Vineland Road	Low

DRAFT

Site No.	Site Name	Site Address	Risk Potential
16	Yellow Freight Diesel Spill	Turnpike MM 269	Low
17	Florida's Turnpike Mile Post #269 Spill	Turnpike MM 269	Low

DRAFT

A total of 66 stormwater pond and flood plain compensation alternative locations are under consideration to address stormwater management as shown on **Figures 8A – 8F**. A total of 35 pond and flood plain compensation locations are assigned a **Medium Risk** due to historical citrus grove land use, adjacent **Medium Risk** sites, historical railroads, and historical landfill concerns.

10.2 Conclusions

Due to this project being in the PD&E Study phase, no Level II Impact to Construction Assessments (Level II ICAs) are recommended at this time.

This CSER should be updated once the project reaches the design stage and preferred pond sites are known. Level II ICAs may be required for the 20 **Medium Risk** sites and the 35 **Medium Risk** pond sites that may be impacted by the roadway improvements, depending on design and construction requirements.

10.3 CSER Update

This CSER should be updated if new drainage alternatives or right-of-way areas are to be acquired, to determine if additional assessment is warranted due to significant changes in site conditions or project design.

DRAFT

11.0 USE OF THIS REPORT

GEC has prepared this report for the exclusive use of our client, RS&H and FTE, and for application to our client's project. We will not be held responsible for any other party's interpretation or use of this report's data or recommendations without our written authorization.

We performed the services described in this report in a manner consistent with that level of care and skill ordinarily exercised by members of our profession currently practicing in Central Florida. No other representation is made or implied in this document.

The conclusions and recommendations should be disregarded if the final project design differs from the project description in this report. If such changes are contemplated, we should be retained to review the new plans to assess the applicability of this report in light of proposed changes.

12.0 SIGNATURES

This Contamination Screening Evaluation Report was prepared and reviewed by the following GEC employees:

Lisa T. Messing.
Environmental Scientist

Richard P. McCormick, P.G.
Chief Geologist

Gary L. Kuhns, P.E.
Chief Engineer

APPENDIX B: Definitions of Common Report Terms

DRAFT

Aboveground Storage Tank (AST) - A storage tank that is situated on the ground surface and may or may not be installed on a concrete pad with secondary spill containment.

Active Remediation (AR) - Implementation of an approved Remedial Action Plan.

Contamination - The presence of any material or chemical contained within the soil, surface water, sediment, or groundwater on or adjacent to the project corridor, that may require assessment, remediation, or special handling, or that has a potential for liability.

Contamination Risk Rating (CRR) - Site risk rating system defined in Chapter 20 of the FDOT PD&E Manual.

Engineering Control (EC) - A modification to a site to reduce or eliminate the potential for migration of, and exposure to, contaminants of concern. Examples of ECs include slurry walls, sheet pile walls, and engineered liners to prevent exposure.

Hazardous Material - Any solid, liquid, or gas that has the potential to harm people, other living organisms, property, or the environment, either by itself or through interaction with other factors. Hazardous material may be radioactive, flammable, explosive, toxic, corrosive, biohazardous, an oxidizer, an asphyxiant, a pathogen, an allergen, or may have other characteristics that render it hazardous in specific circumstances. These materials may threaten workers through occupational exposure and the general public in their homes, communities, and general environment. Exposure to these materials can occur near the site of generation, along the path of its transportation, or near their ultimate disposal sites. Hazardous materials are often subject to laws and regulations on the use and handling of such materials and may differ depending on the activity or status of the material.

Institutional Controls (IC) - A restriction on use of, or access to, a site to eliminate or minimize exposure to contaminants of concern. Examples of ICs include deed restrictions, use restrictions, or restrictive zoning.

Natural Attenuation Monitoring (NAM) - A means of conducting site rehabilitation in which natural degradation of media contaminants are monitored for extended periods of time provided that human health, public safety, and the environment are protected.

No Further Action with Conditions (CNFA) - No further assessment or remediation is required at a site provided that certain conditions are met as approved by the lead regulatory agency. Conditional No Further Actions can be granted to sites that employ ICs and/or ECs as part of the site rehabilitation strategy.

DRAFT

No Further Action without Conditions (NFA) - No further assessment or remediation is required at a site. No contaminants are present at the site above default or approved alternative clean-up standards.

Petroleum Products - Liquid crude oil derivatives that are derived by distillation, cracking, hydro forming and/or other petroleum refinery processes falling under the description of either "Gasoline Analytical Group," "Kerosene Analytical Group" or "Used Oil" as defined in Florida Administrative Code (FAC) 62-770.200(24), (29) and (64), respectively. These materials include, but are not limited to: leaded and unleaded gasoline, gasohol, aviation and jet fuels, diesel fuel, kerosene, new or used motor oil, hydraulic fluid, and gear oil.

Potential Hazardous Material or Petroleum Contamination Site - A potential hazardous material or petroleum contamination site is a parcel of land upon which hazardous materials or petroleum products are produced, stored, accumulated, used, or disposed of. These sites typically include existing or former gasoline stations, dry cleaners, auto repair facilities, and other businesses where hazardous substances or petroleum product are present. The presence of hazardous substances and/or petroleum products does not mean that contamination is present, but merely indicates that the potential for contamination exists if the materials are not handled or disposed of properly.

Remedial Action Plan (RAP) - A plan that details a means by which contamination may be cleaned up.

Site Assessment Report (SAR) - Summarizes all tasks that were implemented pursuant to the Contamination Assessment.

Site Rehabilitation Complete Report (SRCR) - A report that describes that cleanup goals have been met.

Site Rehabilitation Completion Order (SRCO) - An order issued by the lead regulatory agency that approves the SRCR. No further assessment or remediation activities need to be conducted at the site once an SRCO has been issued unless a new release is discovered.

Source Removal (SR) - The removal of free petroleum product or excessively contaminated soil.

Underground Storage Tank (UST) - A storage tank that has been installed below the ground surface that may or may not contain secondary containment or leak detection systems. The FDEP has compiled several database lists that are useful in identifying potential sources of hazardous material or petroleum product contamination.

DRAFT

APPENDIX C: Contamination Risk Potential Rating Descriptions

DRAFT

The contamination potential risk rating system was developed by FOOT and is included in Part 2, Chapter 20 of the PD&E Manual, dated July 1, 2020. The rating system incorporates four levels of risk:

1. **No** - A review of available information on the property and a review of the conceptual or design plans indicates there is no potential contamination impact to the project. It is possible that contaminants have been handled on the property. However, findings from the Level I evaluation indicate that contamination impacts are not expected.

2. **Low** - A review of available information indicates that past or current activities on the property have an ongoing contamination issue; the site has a hazardous waste generator identification (ID) number, or the site stores, handles, or manufactures hazardous materials. However, based on the review of conceptual or design plans and/or findings from the Level I evaluation, it is not likely that there would be any contamination impacts to the project.

3. **Medium** - After a review of conceptual or design plans and findings from a Level I evaluation, a potential contamination impact to the project has been identified. If there is insufficient information (such as regulatory records or site historical documents) to make a determination as to the potential for contamination impact, and there is reasonable suspicion that contamination may exist, the property should be rated at least as a "Medium". Properties used historically as gasoline stations and which have not been evaluated or assessed by regulatory agencies, sites with abandoned in place underground petroleum storage tanks or currently operating gasoline stations should receive this rating.

4. **High** - After a review of all available information and conceptual or design plans, there is appropriate analytical data that shows contamination will substantially impact construction activities, have implications to ROW acquisition or have other potential transfer of contamination related liability to the FDOT.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Certified Sanborn® Map Report

10/11/21

Site Name:

FTE From SR 408 To SR 50
FTE From SR 408 To SR 50
Winter Garden, FL 34787
EDR Inquiry # 6697469.5

Client Name:

Geotechnical & Env. Cons., Inc
919 Lake Baldwin Lane
Orlando, FL 32814-0000
Contact: Lisa Messing

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Geotechnical & Env. Cons., Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 9769-47EA-95F5

PO # 4471E

Project 4471E

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 9769-47EA-95F5

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Geotechnical & Env. Cons., Inc (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D018
Waste Description:	BENZENE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

DRAFT

ABC BUS COMPANIES INC (Continued) **1000105582**

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
AIR MINOR
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Registry ID: 110006494016

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource

DRAFT

PAVEX CORP (Continued) **1000841114**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
OSHA ESTABLISHMENT
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code: D014
Waste Description: METHOXYCHLOR (1,1,1-TRICHLORO-2,2-BIS [P-METHOXYPHENYL] ETHANE)

Waste Code: D015
Waste Description: TOXAPHENE (C10 H10 CL8, TECHNICAL CHLORINATED CAMPHENE, 67-69 PERCENT CHLORINE)

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D017
Waste Description: 2,4,5-TP SILVEX (2,4,5-TRICHLOROPHENOXYPROPIONIC ACID)

Waste Code: D018
Waste Description: BENZENE

Waste Code: D019
Waste Description: CARBON TETRACHLORIDE

Waste Code: D020
Waste Description: CHLORDANE

Waste Code: D021
Waste Description: CHLOROBENZENE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D023
Waste Description: O-CRESOL

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D025
Waste Description: P-CRESOL

Waste Code: D026
Waste Description: CRESOL

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DRAFT

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

DRAFT

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

SHWS: Florida's State-Funded Action Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

BROWNFIELDS AREAS: Brownfields Areas Database
A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

BSRA: Brownfield Site Rehabilitation Agreements Listing
The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

DRAFT

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

DRAFT

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Environmental Protection

Hazardous Waste Inspection Report

FACILITY INFORMATION:

Facility Name: Creative Auto Boutique LLC

On-Site Inspection Start Date: 01/26/2017 **On-Site Inspection End Date:** 01/26/2017

ME ID#: 31066 **EPA ID#:** FLR000221739

Facility Street Address: 17949 W SR 50, Killarney, FL 34740

Contact Mailing Address: Missing FCCT in FIESTA

County Name: LAKE

NOTIFIED AS:

N/A

INSPECTION TYPE:

Routine Inspection for CESQG (<100 kg/month) facility

INSPECTION PARTICIPANTS:

Principal Inspector: John E. White, Inspector

Other Participants: Omar Alli, Manager

LATITUDE / LONGITUDE: Lat 28° 32' 48.4166" / Long 81° 39' 27.6369"

SIC CODE: Data is missing from FIESTA

TYPE OF OWNERSHIP: Private

Introduction:

On January 26, 2017, John White, Florida Department of Environmental Protection, inspected Creative Auto Boutique for compliance with state and federal hazardous waste regulations. The inspection was prompted by a fire at the facility on January 23, 2017. The facility manager, Omar Alli, was on-site at the time of inspection.

The facility is located at 17949 West Colonial Drive, Oakland, Lake County, Florida. The facility is located just inside the Lake County side of the border between Lake and Orange Counties.

Process Description:

Creative Auto Boutique is an automotive electronics installer and custom paint shop. The business consists of two structures, the main warehouse/installation building where electronics, such as radios, are installed and the paint shop. The main building is the structure that burned on January 23, 2017. Vehicles inside the shop at the time of the fire were completely destroyed. The walls of the building had buckled during the fire. The separate paint shop was unaffected by the fire.

Wastewater generated by fire crews flowed to two small dry ponds located on the east side of the property. It was recommended to the business owner that he discuss the potential contamination of the ponds as a result of the fire with his insurance company at the same time he is discussing the business loss.

On January 30, 2017, the inspection results were discussed with Bret LeRoux, Manager of the DEP's Waste Cleanup Program, and it was determined no further action is required by the Department at this point.

Conclusion:

Creative Auto Boutique was inspected as a conditionally exempt small quantity generator of hazardous waste based on painting operations conducted on the property. Based on the inspection, the fire in the electronics

DRAFT

shop did not result in any known hazardous waste releases, the separate paint shop building was not affected. No further action is required at this time.

DRAFT

1.0 - Pre-Inspection Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Item No.	Pre-Inspection Review	Yes	No	N/A
1.1	Has the facility notified with correct status? 262.12			✔
1.2	Has the facility notified of change of status? 62-730.150(2)(b)			✔
1.3	Did the facility conduct a waste determination on all wastes generated? 262.11			✔

DRAFT

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C.

Site Visit Comments

12/09/2020
12/09/2020 09:05 hrs., KW/TCI – Met Nestor Kaibigan, Technician, 7G Environmental, on site for a Routine Compliance Inspection of two underground storage tank (UST) systems for vehicular fueling.

Inspection Comments

12/09/2020
Note:

The Underground Storage Tank Systems Chapter 62-761, Florida Administrative Code (F.A.C.), has been revised, effective January 11, 2017. Please see the following link for access to the new Rule and Forms: https://floridadep.gov/waste/permitting-compliance-assistance/content/storage-tank-compliance.

Tanks/Piping:

- (1) 16,000-gallon and (1) 15,000-gallon, USTs.
- (3) STP sumps appear to be clean, dry and intact;
- Secondary piping appears open to the sumps;

- (2) Double-walled spill containment buckets;
- Overfill protection – overfill prevention devices;

Dispensers:

- (6) Dispensers checked;
- Hoses/nozzles checked, appear in good condition;
- Secondary piping appears open to the liner;
- No obvious signs of leakage noted;

Records:

- Current Storage Tank Registration Placard and facility registration information is current and accurate;
- Financial Responsibility: Ironshore Insurance Company, from 12/01/2018 to 12/01/2019 and Navigators Specialty Insurance from 12/01/2019 to 12/01/2020 and 12/01/2020 to 12/01/2021;
- Certification of Financial Responsibility Forms (CFR) – are present, current and accurate;
- Monthly release detection monitoring records reviewed: 02/26/2018 to 12/09/2020; monthly release detection records were performed once a month but not greater than 35 days apart.

- In-Line Leak Detector test were performed on 04/16/2019 and 03/18/2020 with passing results; the next test is due by 03/18/2021.

- Operability tests of the Veeder-Root alarm panel and associated electronic were performed on 04/16/2019 and 03/18/2020 with passing results; the next test is due by 03/18/2021.

- Operability test of the overfill prevention devices were performed on 04/16/2019 (failure), 05/01/2019 (new), 03/18/2020 with passing results; the next test is due by 03/18/2021.

Note:

Per the Rule revision, effective January 11, 2017, periodic testing of storage tank system components shall occur according to the following schedule: a) single-walled spill buckets - by January 11, 2018, and every 12 months thereafter; b) piping and dispenser sumps - by October 13, 2018, and every 3 years thereafter, and; c) double-walled spill buckets - by October 13, 2018, and every 3 years thereafter.

- Breach of Integrity test of the spill containment buckets were performed on 04/18/2018 with passing results; the next test is due by 04/18/2021.

-Operability test of visual gauges for the spill buckets were performed on 04/16/2019 and 03/18/2020 with passing results; the next test is due by 03/18/2021.

- Breach of Integrity test of the dispenser liners were performed on 07/09/2018 (all except 3/4) 09/07/2018 (only ¾) 09/09/2020 (all) with passing results; the next test is due by 07/09/2021 and 09/07/2021 and 09/09/2023 (all).

- Breach of Integrity test of the STP sumps were performed on 07/09/2018 with passing results and 09/09/2020 (all) failed;

- Operator and Training Certifications - The Class A/B/C Operator training certifications were available for review. Per 40 CFR 280 Subpart J, United States Environmental Protection Agency (USEPA), all UST owners were to have designated and trained operators (Class A, B, & C) by October 13, 2018. Please see the following website (http://www.dep.state.fl.us/waste/categories/tanks/pages/op_train.htm) for further information.

Final inspection report e-mailed to Graham Biggs at: gbiggs@circlek.com.

Stationary Tank Registration/Notification Form

Form 17-1.218(2)

NAME: KILLARNEY FRUIT COMPANY
MAIL ADDRESS: P O BOX 157
CITY/STATE: KILLARNEY FL 32740

FACILITY LOCATION
ADDRESS: 100 SR 438
CITY/STATE: KILLARNEY, FLA

(Make corrections to name and addresses here)
1. Facility/Addressee name: _____
Facility address: _____
Mailing address: _____

Use this form to comply with the following requirements of the Stationary Tank Rule Chapter 17-61, Florida Administrative Code.

1. Each owner or operator shall register the following with the department.
   a. All existing facilities by December 31, 1984. (Questions 1-19)
   b. All new storage systems or facilities at least 10 days prior to the start of installation of tanks except in the cases of emergency replacement. (Questions 1-19)
   c. A non-pollutant containing installation which is to be converted to a facility, at least 10 days prior to the placement of pollutants in such a facility. (Questions 1-19)
2. Each owner or operator shall notify the department of the following.
   a. All storage systems within 10 days of abandonment. (Questions 1-12, 16, 20)
   b. Facility sale within 10 days of sale. Notice shall be made by the seller. (Answer questions 1-7, and 11. Question 7 about the new owner.)
   c. Retrofitting within 10 days of completion. (Questions 1-19)
3. You may notify the department of a change of operator. (Questions 1-6)

Agency Use Only

PLEASE PRINT OR TYPE

2. Facility number (DER will provide this number): 48852152 3. Date: 12/12/84
4. Federal Employment Identification (number used to file IRS forms): 59-0542017
5. County Code (see enclosed letter): 48 ~~ORANGE~~
6. Operator of facility: KILLARNEY FRUIT CO
   Effective date (only for change of operator): _____ Telephone number: (305) 656-1234
7. Company/Person owning tanks and piping: KILLARNEY FRUIT CO
   Address: P.O. BOX 157 KILLARNEY, FLA 32740
   Contact person: Charles W. TARRANT III Telephone number: (305) 656-1234
   Effective date (only for change of owner): _____
8. How many tanks at this location have an individual storage capacity of greater than 550 gallons and store vehicular fuel made from petroleum?
   _____ Underground 3 Aboveground
9. Facility location: Latitude ° ' " Longitude ° ' " Section: 30 Township: 22 SOUTH Range: 27 EAST
   This information is listed on property deeds, and in the offices of the property appraiser and tax assessor.
10. Sketch the facility on a separate page showing the APPROXIMATE location of buildings, tanks, and dispensers.
    A. Draw a line from tank to dispenser to show which are connected by piping.
    B. Label each tank as Tank 1, Tank 2, etc.
    C. Write the date and your facility number, if known, or name and address exactly as it appears above.
    D. Keep a copy of your sketch.

REFER TO TANKS BY THESE LABELS IN ANY COMMUNICATION WITH THE DEPARTMENT.
DESCRIBE PIPING BY THE NUMBER OF THE TANK IT IS ATTACHED TO.

11. TO THE BEST OF MY KNOWLEDGE AND BELIEF ALL INFORMATION SUBMITTED ON THIS FORM IS TRUE, ACCURATE, AND COMPLETE

DER FORM 17-1.218(2) (1/94) (12/92)

INSTRUCTIONS: Use one row across for each tank counted in question 8. The tank number must agree with the number on the sketch of your facility. A new tank installed where a registered tank was removed should be given the number of the removed tank with an R and a number added. Example. Tank 3R1 is first replacement for tank 3. It is in the same place where tank 3 was. Tank 3R2 is the second replacement for tank 3. Attach extra pages if necessary. Write your facility number, if known, or name and address, exactly as it appears on the front of the form, on all extra pages.

(12) Tank Number	(13) Tank Size in Gallons	(14) Tank Contents (see List 14 below)	(15) Tank Installation Date. Month/Year (put X if unknown)	(16) Underground or Aboveground Tank (write U or A)	(17) Tank Construction Specifics (see List 17U or 17A below)	(18) Integral Piping System Construction Specifics (see List 18 below)	(19) Monitoring System Type (see List 19)	(20) Tank Disposal Method (see List 20)
1	10,000	(D)IESEL	X	A	PS	A	B	
2	10,000	A	X	A	PS	A	B	
3	5,000	A	X	A	PW	A	B	

ENTER THE LETTERS WHICH APPLY TO EACH TANK IN THE BOXES ABOVE. **WRITE ALL THAT APPLY.**

List 14

Tank contents are:

A. leaded gasoline.
B. unleaded gasoline.
C. Alcohol enriched gasoline.
D. diesel fuel.
E. aviation fuel.
Z. other.

List 17U
UNDERground Tanks

Underground tank:

A. has overfill protection.
B. is interior lined.
C. is painted/asphalted steel.
D. is of unknown type.
E. is fiberglass type.
F. is fiberglass-clad steel.
G. is sacrificial anode type.
H. is impressed current type.
I. is double walled.
J. is concrete.
K. is in secondary containment.
N. is or has none of the above.

List 17A
ABOVEground Tanks

Aboveground tank:

O. has overfill protection.
P. is surrounded by impervious dike.
Q. is surrounded by earth dike.
R. rests on an inpervious base.
S. rests on a earth/gravel base.
T. has interior lined bottom.
U. is cathodically protected.
V. is built of/coated with corrosion resistant materals.
W. is supported above the soil.
Z. is or has none of the above.

List 18

Integral Piping System has:

A. no parts in contact with the soil.

Parts contacting the soil which are:

B. unprotected metal.
C. built of corrosion resistant materials.
D. corroson resistant coated.
E. cathodically protected.
F. double-walled.
G. within a secondary containment.
H. interior lined.
M. none of the above.

List 19

Monitoring system is:

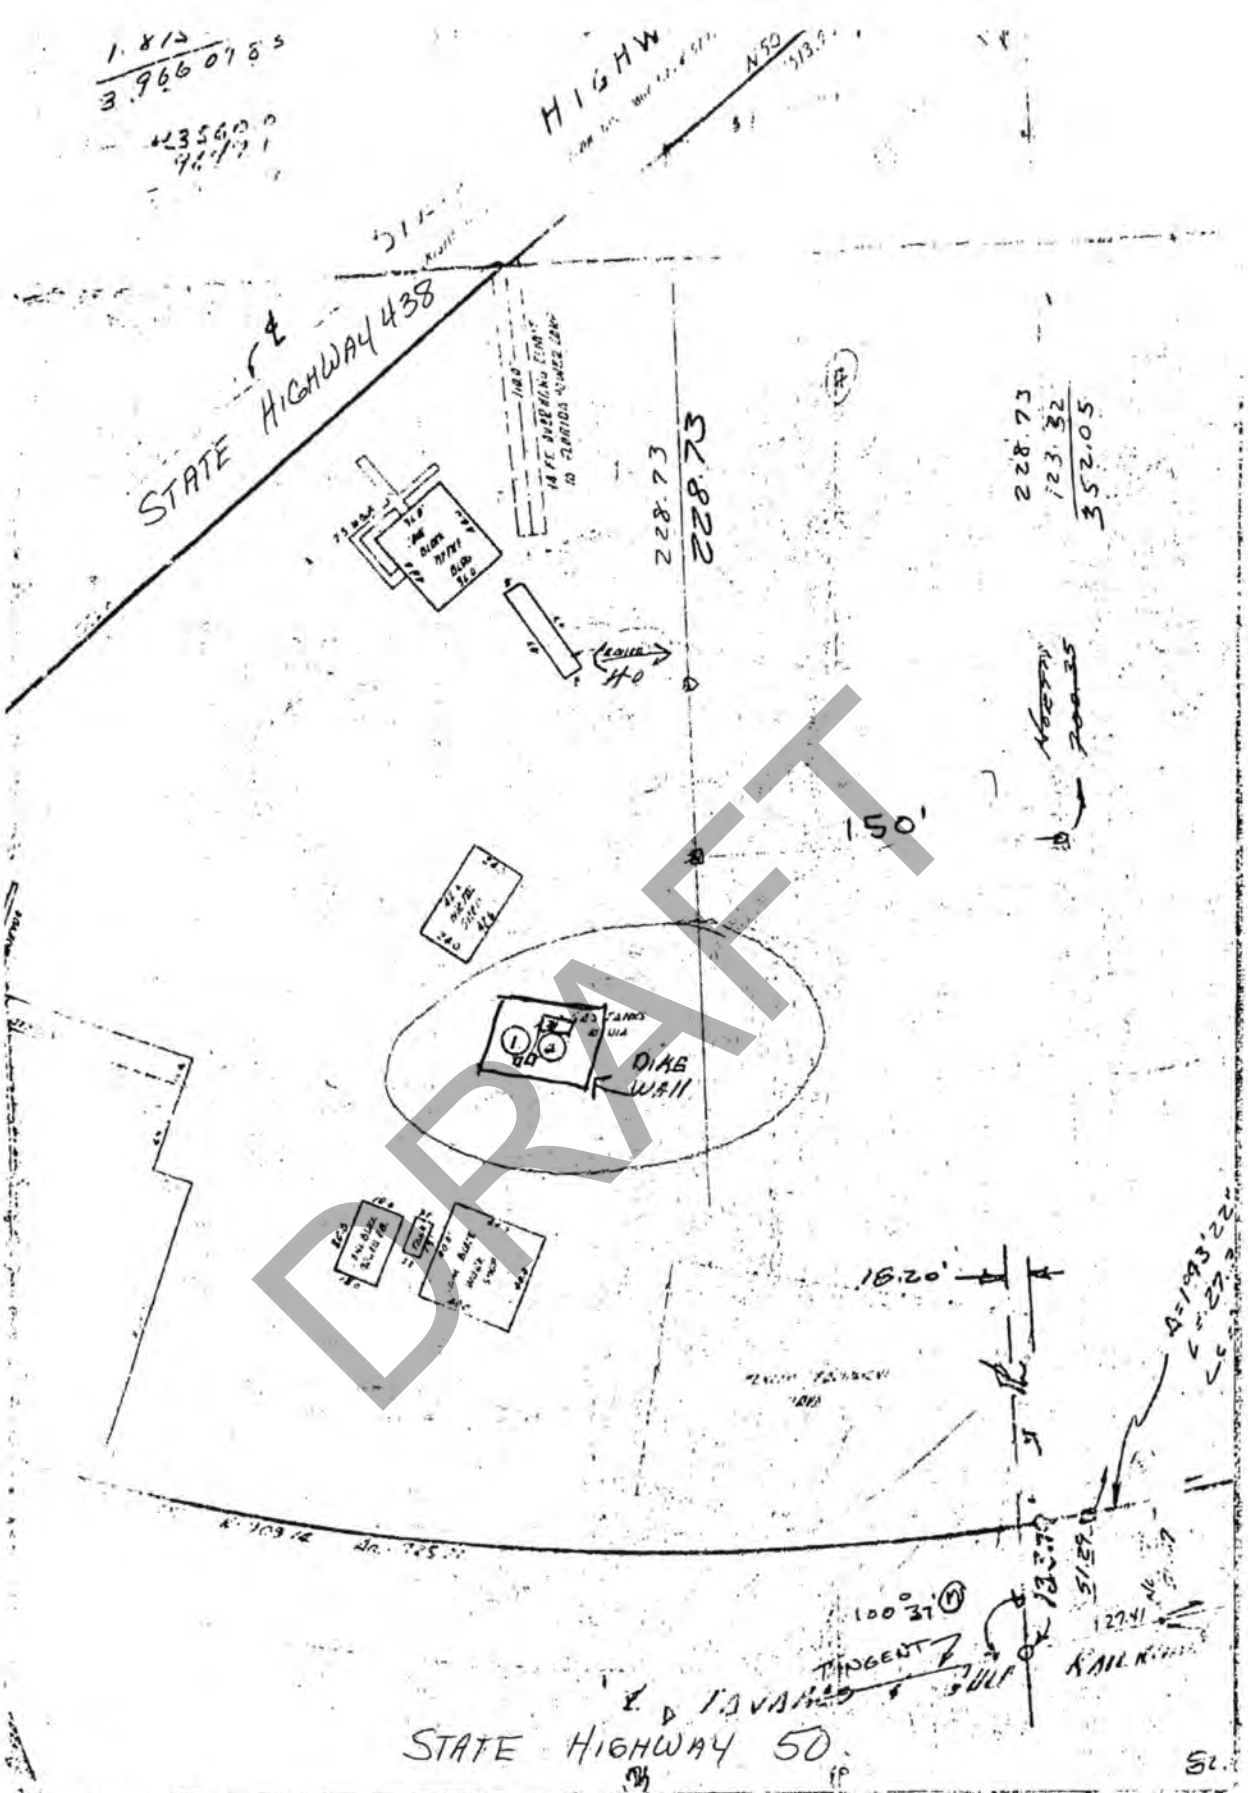

A. automatically sampled well(s).
B. manually sampled well(s).
C. groundwater monitoring plan.
D. SPCC plan.
E. well/detector in secondary containment.
F. in-ground detector.
G. within walls of double-walled tank.
H. continuous in piping.
I. not required.
N. none of the above.

List 20

Tank disposal method.

A. Filling.
B. Removal.
C. Retrofitting.
F. Other.

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.

The Florida Department of Environmental Protection has reviewed your form 8700-12FL notification for a new hazardous waste DEP/EPA Identification Number or status/information change. Based on the information received you must use the following identification number for all manifests or reports for **ABC Bus Companies Inc** located at **17469 W Colonial Dr. Oakland, FL 34787-9710**

FLD062440870

Your facility notified FDEP requesting the following hazardous waste status/activities which **do not require a separate submission: Small Quantity Generator.**

Your facility is **currently registered** for the following activities: **None.**

Your facility is **currently permitted/active** as: **No Active Hazardous Waste Treatment, Storage, or Disposal Permit.**

If you have pending program registrations/certifications or permits, these will be mailed separately. You are required to notify us on form 8700-12FL if there is any change in your operations which would affect your status, activity or contact information. The form is found here: http://www.dep.state.fl.us/waste/categories/hwRegulation/pages/NotificationRegulatedWaste.htm.
To review the details of your status, visit: https://fldeploc.dep.state.fl.us/www_RCRA/Reports/handler_results.asp?epaid=FLD062440870.

LATITUDE / LONGITUDE: Lat 28° 32' 51.69" / Long 81° 38' 51.8"

SIC CODE: 7538 - Services - general automotive repair shops

TYPE OF OWNERSHIP: Private

Introduction:

On August 16, 2010, John White, Danielle Bentzen and Lauren Staly, Florida Department of Environmental Protection (FDEP), inspected ABC Bus, Inc. for compliance with state and federal hazardous waste regulations. ABC Bus, located at 17469 West Colonial Drive, Oakland, Florida 34787, has operated at this location since 1976. The facility employs approximately 150 people and operates Monday through Friday from 7:00 a.m. to 5:00 p.m.

ABC Bus initially notified as a SQG on September 11, 1986. The company last updated its hazardous waste notification as a small quantity generator on September 7, 2001.

INSPECTION HISTORY

On April 15, 1987, the facility was inspected as a Small Quantity Generator of hazardous waste and was not in compliance. During the inspection, the following deficiencies were noted: failure to label hazardous waste storage containers with the words "hazardous waste" and an accumulation start date, failure to make arrangements with local authorities, failure to post emergency numbers by telephones and failure to develop a contingency plan.

On October 8, 1987, a follow up inspection was conducted on the facility in order to verify all corrective actions had taken place. The facility was in compliance at the time of the inspection.

On April 17, 2001, the facility was inspected as a large quantity generator of hazardous waste and was not in compliance. Violations cited included: failure to conduct a waste determination; failure to properly label and date containers; failure to file a biennial report; failure to train personnel; and failure to make arrangements with local authorities. The enforcement case was settled through a Short Form Consent Order, OGC File number 01-1379 executed on September 14, 2001, that included assessment of $18,360.00 in costs and penalties.

DRAFT

Process Description:

ABC Bus, Inc. purchases buses from Vanhool, a Belgian coachbuilder. The buses arrive at the Florida facility painted white. ABC Bus modifies the base model according to customer request. These modifications include the addition of audio and video equipment, custom seating, and custom graphics and paint. Additionally, the facility also conducts routine maintenance and repair service.

The facility is composed of six buildings. Each building is designated for specific operations. Building A houses mechanical repair service, the audio and video installation, the oil water separator and the detail shop. Building B is used for graphics production. Building C is the frame shop and repair shop. Building D houses the paint and body shop. Building E is used to store bus parts and does not generate any hazardous waste. Building F is the bus wash/detail shop.

Building A
Building A is used for pre-delivery inspection of buses, upholstery work, tire work, and maintenance and mechanical repair. The pre-delivery area contained a yellow can for shop rags and a can for spent aerosol cans. In the upholstery area, the upholstery of buses is modified to customer specifications. Glues and contact adhesives are used in this area. No hazardous waste is generated. In the rebuild/rehabilitation area, a rolling oil caddy was in use for collection of used oil. The caddy was properly labeled with the words "Used Oil." There was also a pump tank for removing fuel from buses for maintenance. Also in this area were containers for spent aerosol cans and used shop rags.

One large bay is used as a bus wash where four to six buses each day are washed. Water contained in floor sumps are pumped to a series of seven above ground storage tanks. The tanks range is size from 500 to 1,000-gallons and have a combined capacity of 4,650 gallons. Water flows through the tanks and when the water level in the tank number six gets high a light is activated. When the water level in the tank number seven gets high, an audible high level alarm is activated. Safety-Kleen pumps the water out and manages it as industrial wastewater. Sludge generated by floor sumps is also managed by Safety-Kleen. Analytical results document the non-hazardous waste status of the waste water and sludge.

The rebuild area is used for storage of engines and transmissions. The parts are just shipped in and out, no engine work is conducted in this area. Along an outside wall adjacent to the rebuild area were three accumulation dumpsters/containers. One was for used absorbents and two were for used oil filters. All three were properly labeled and managed. In a product storage area was a flat, rolling used oil caddy. No label was evident on the rolling oil caddy [40 CFR 279.22(c)]. The container was properly labeled before the inspection was completed. An antifreeze tank was located in one corner of the product storage area. The tank was properly labeled and managed.

In the area where mechanical repairs and routine maintenance are conducted two Safety-Kleen parts washers are in use. Two maintenance bays have used oil tanks set in below ground vaults. The two 500-gallon tanks were properly labeled and managed. A used oil collection container was also located next to a bay door. The container was properly labeled "Used Oil." A sink located along one wall held a screen to allow used oil filters to drain. The sink drains to one of the used oil tanks. Once drained, the used oil filter is placed in a bucket hanging below the sink and taken to the used oil filter container outside. One work bay had a rolling, 100-gallon used oil container. The container was properly labeled with the words "Used Oil."

Building B
The graphics department located in Building B produces letters for the buses out of vinyl sheeting. Two graphics printers are in use. No hazardous waste is generated in this building.

Building C
This area is used for straightening bus frames. Additionally, the metal shop is located in this building. One Safety-Kleen parts washer was in use in this area.

Building D
This building houses the Paint and Body shop. Buses are completely painted in one of three paint

DRAFT

booths and vinyl lettering is applied in one of 4 bays. Additionally, repair work is conducted on bus bodies. Paint booth filters are replaced on a monthly cycle and disposed of with the non-regulated solid waste. A Safety-Kleen automatic paint gun cleaner was in use in the area. Clean solvent is pumped from one 5-gallon can into the unit and waste solvent, containing toluene, methyl ethyl ketone, acetone, and xylene is discharged to a second 5-gallon container. The 5-gallon satellite accumulation container was not properly labeled with the words "Hazardous Waste" or with other words to describe the container contents [40 CFR 262.34(c)(1)(ii)]. A Safety-Kleen solvent distillation unit was located adjacent to the paint gun cleaner. The distillation unit processes five gallons of solvent about every two days. A 30-gallon satellite accumulation drum was staged next to the distillation unit for accumulation of waste paint solids (distillation bottoms). On the wall over the drum was a hazardous waste label in a plastic sleeve; however, the label was not on the drum [40 CFR 262.34(c)(1)(ii)]. The drum and 5-gallon container were properly labeled before inspectors left the area.

Record Review
Records reviewed included hazardous waste manifests, used oil and oil filter disposal receipts, fluorescent lamp shipping papers, and land disposal restriction notification forms from 2009 and 2010. No violations were noted. Safety-Kleen is the hazardous waste and used oil transporter and TSD facility used by ABC Bus, Inc. However, fluorescent lamps are transported by Safety-Kleen to AERC.COM in Melbourne, Florida. Batteries are managed by Battery USA.

The sump waste was last sampled on December 9, 2009, and was determined to be non-hazardous. The last employee training event was conducted on June 11, 2010. It was found that the emergency information posted did not have the emergency contact information required. Mr. Harmon is the emergency coordinator for the facility and his telephone number was added to the document before the inspection was completed.

DRAFT

New Potential Violations and Areas of Concern:

Checklist Independent Potential Violations and Areas of Concern

Type:	Area Of Concern
Rule:	262.34(c)(1)(ii)
Explanation:	Satellite accumulation containers must be marked either with the words "Hazardous Waste" or with other words that identify the contents of the containers. A 30-gallon container of distillation bottoms and a 5-gallon container of paint solvent were not properly labeled.
Corrective Action:	Containers must be properly labeled. The 30-gallon container and the 5-gallon pail were labeled before inspectors left the area.

Type:	Area Of Concern
Rule:	279.22(c)(1)
Explanation:	Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil." A flat, rolling used oil collection container in the product storage area was not properly labeled.
Corrective Action:	The container was properly labeled before completion of the inspection.

Type:	Area Of Concern

Rule: 262.34(d)(5)(ii)(A)

Explanation: The name and telephone number of the emergency coordinator must be posted. Mr. Harmon is the emergency coordinator for the facility and his contact information was not posted.

Corrective Action: Mr. Harmon's contact information was posted with the facility layout and emergency information prior to completion of the inspection.

DRAFT

Conclusion:

ABC Bus, Inc. was inspected as a Small Quantity Generator of hazardous waste and was no in compliance at the time of this inspection; however, all violations found were corrected before the inspection was completed.

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.

Dear Mr. Cornell:

An inspection on April 15, 1987 was conducted by the Department to determine whether your facility is in compliance with rules of the State of Florida, Chapter 17-30, Part III, Standards for Generators and Transporters of Hazardous Waste and Owners and Operators of Hazardous Waste Facilities. The attached RCRA Compliance Inspection Report indicates that your facility classified as a small quantity generator and is not in compliance with hazardous waste management regulations.

Therefore, you are hereby placed on notice that the Department has reason to believe that you are presently operating in violation of Section 403.151 and 403.161(b), Florida Statutes and department rules, as noted in the attached RCRA inspection report, referenced above.

Accordingly, you are hereby advised to correct the specific violations within thirty (30) days from receipt hereof in the manner and time frames specified in Item 10 of the inspection report.

Failure to achieve compliance within the specified time frames may result in additional enforcement actions which could include civil penalties of up to $50,000 per day for each violation.

Please direct your response and any questions concerning this Warning Notice to E. Sainten or J. Jarmolowski, Enforcement Section at 305/894-7555 or at the above address.

Sincerely,

A. Alexander, P.E.
District Manager

Enclosure - RCRA Inspection Report

DRAFT

WARNING NOTICE
OWN-87-0088
June 29, 1987

Rules Violated:

Section 403.721(1) - Florida Statutes, Standards, requirements, and procedures for generators and transporters of hazardous waste and owners and operators of hazardous waste facilities.
Florida Administrative Code Rule 17-30.160, Standards applicable to generators of Hazardous Waste.
40, Code Federal Regulations, Sections 261, through 266, as noted on the attached inspection report.

Remarks (e.g., explanatory statement):

A hazardous waste compliance inspection conducted by the Department on April 15, 1987 documented violations of Chapter 403, Florida Statutes; Florida Administrative Code Rule 17-30, and 40, Code of Federal Regulations, Sections 261, through 266.

Accordingly, you are requested to correct these Class II violations listed in Item 9, in accordance with the manner and time frames specified in Item 10 of the RCRA Inspection Report.

REGULATION	CORRECTIVE ACTION
(a) 40 CFR 262.34(a)(2)	Immediately mark the two (2) drums identified in item 9(a) with accumulation start dates and within 30 days submit proof to the department that such action has been taken.
(b) 40 CFR 262.34(a)(3)	Immediately label the two (2) drums identified in item 9(b) with the words "Hazardous Waste" and within 30 days submit proof to the department that such action has been taken.
(c) 40 CFR 262.34(c)(1)(ii)	Immediately label the 55-gallon satellite accumulation drum of thinner still bottom and waste paint with the words "Hazardous Waste" or other words that identify the contents of the container and within 30 days submit proof to the department that such action has been taken.
(d) 40 CFR 262.34(d)(5) (e) 40 CFR 265.37	Within 30 days submit proof to the department of compliance with the violations listed in items 9(d) and 9(e).

DRAFT

NARRATIVE:

I. INTRODUCTION

On April 13, 1987 Neil Medlin (FDER) accompanied by Ed Sainten (FDER) and ABC Bus Inc. Parts Manager Bob Burnard inspected the facility for compliance with hazardous waste standards. The facility, located at 17469 West Highway 50 in Winter Garden, Florida, sells and leases new buses and buses which have been refurbished at the facility. The facility which opened in 1987, occupies five buildings on 17 acres and currently has a total of 30 employees. ABC Bus Inc.'s headquarters is located in Faubault, Minnesota. This was the first inspection of ABC Bus Inc.'s Florida facility, which notified as a generator.

II. CURRENT PROCESS DESCRIPTION

Production at ABC Bus is geared to the refurbishing of buses (coaches). The five general steps of refurbishment are mechanic, frame work, body work, interior conversion, and upholstering. Of the company's five buildings; one is used for administration, and another, known as the main shop, contains the sales office, parts office, mechanics bay, a paint room and a panel assembly area. A third building is used as a body shop and the fourth contains the upholstering area and the frame work area. The Southern Classic Coach Conversion Company is also located in this building. The fifth building is now used mainly for storage but was once used to rebuild engines and transmissions for the coaches.

The coaches are usually first inspected and serviced by the mechanics. Two tank-type parts washers are used in the mechanic bays to clean engine and other parts. A third tank-type parts washers located in the old rebuild building is rarely used. The sequence of remaining steps in the refurbishing process the coaches go through depends on activity at the facility and the specifications prescribed for the individual coaches. Interior work is done on the coaches in the upholstery area. If it is needed, the frame straightening area is located in the same building as upholstery. In the body shop building, major body work is performed and rebuilt engines are installed in the coaches. A drum-type parts washer is located in the bay where the engines are installed.

Body work done in the main shop building includes the replacing of damaged aluminum panels with new ones and the painting of the coaches. Before being painted, old paint is removed from the coaches using a Mantek stripping solution. The stripper is applied to the coach and allowed to sit for 30

DRAFT

minutes before being worked in with a brush and then rinsed off. After the coaches dry they are cleaned and degreased with a reducer before painting. The reducer is poured onto a rag and applied to the coach. A clean second rag is then used to wipe the coach, picking up the dirt, grease, and any excess reducer. After painting, the paint guns are cleaned with paint thinner in a small room beside the panel replacement bay. The thinner is collected in 5-gallon containers and then reclaimed using a 5-gallon still.

III. WASTE STREAMS

Hazardous waste streams generated at ABC Bus are the spent naphtha from the four parts washers, and the paint thinner still bottoms and waste paint from the painting and paint gun cleaning operations. The rinse water from the stripping process is considered to be nonhazardous based on product knowledge.

Type of Waste	EPA HW I.D.#	Generation Rate
Naphtha	D001	118 gal/mo.
Paint Thinner Still Bottoms and Waste Paint	D001	15 gal/mo.

DRAFT

IV. WASTE MANAGEMENT PRACTICES

All of ABC Bus's parts washers are serviced by Sparkle Parts. The naphtha in the parts washers is continuously used until Sparkle Parts's servicemen arrive. The used naphtha in the tank-type parts washers is pumped out by the servicemen and replaced with fresh naphtha. On the drum-type parts washer, the drum of used naphtha is simply replaced with a drum of fresh material. The used naphtha picked up by Sparkle Parts is reclaimed at their reclamation facility.

The thinner still bottoms and waste paint are collected in a 55-gallon satellite accumulation drum beside the reclamation still. Once the drums are filled, they are dated and moved to the side of the room. This small room where the still and drums are located has a concrete floor and joins both the gun cleaning room and panel assembly bay. The still bottoms and waste paint are shipped off site.

Transporter/Disposal/Reclamation facilities servicing ABC Bus Inc. are:

Transporter:	Sparkle Parts	FLD 981 755 937
	Sparkle Parts	FLD 076 813 302
	Chemical Conservation Corp.	FLD 980 559 728
Reclamation:	Sparkle Parts	FLD 076 813 302
Disposal:	Seaboard Chemical	NCD 071 574 164

V. INSPECTION

ABC Bus was inspected as a small quantity generator based on the facility generating a total of 133 gallons of hazardous waste per month. Areas inspected where no compliance items were noted were upholstery, frame, body shop building and its parts washer, and the old rebuild building and the parts washer in it. In the main shop building the mechanic bays, along with the two parts washers, the paint booth, and panel assembly areas were observed. No violations were found in these areas. Present at the time of the inspection in the hazardous waste accumulation section of the reclamation still room was one (1) 55-gallon drum of thinner still bottoms and waste paint. The drum was properly labeled and dated. Also present in the room was a recently started 55-gallon satellite accumulation drum of the same wastes. The drum was not labeled with the words "Hazardous Waste" or other words identifying its contents.

Drums of new mineral spirits used to prime fuel pumps and filters were kept outside on the asphalt lot near one of the back corners of the main shop. Near these drums of new material were two (2) drums of contaminated and unusable mineral spirits which were considered waste. These two drums were not marked with accumulation start dates and were not labeled with the words "Hazardous Waste".

Other violations noted during the inspection were the company's failure to attempt make arrangements with local authorities, failure to designate an emergency coordinator, and failure to have the required information posted near the telephone.

VI. CONCLUSION

Upon conclusion of the inspection, a debrief was conducted with Bob Burnard of the facility. It was suggested the company store the drums of new mineral spirits in an area of less vehicle traffic than their present location to reduce the risk of the drums being damaged. ABC Bus, Inc. is a small quantity generator and was not in compliance at the time of the inspection.

RCRA INSPECTION REPORT
SMALL QUANTITY GENERATOR'S CHECKLIST

DRAFT

Note: On multiple part questions, check those not in compliance.

Section A - Site Identification No.

1. Site Name: ABC Bus Inc.

Section B - Hazardous Waste Determination (262.11)

1. Does generator generate hazardous waste(s) listed in Subpart D (261.30 - 261.33 - List of Hazardous Waste)?

   __ Yes ✓ No

   a. If yes, list wastes, EPA numbers & quantities.

2. Does generator generate solid waste(s) that exhibit hazardous characteristics? (corrosovity, ignitability, reactivity, EP toxicity) (261.20 - 261.24 - Characteristics of Hazardous Waste)

   ✓ Yes __ No

   a. If yes, list wastes, EPA numbers, and quantities.

   b. Does generator determine characteristics by testing, by product knowledge, or by applying process knowledge? product knowledge

      (1) If determined by testing, did generator use test methods in Part 261, Subpart C (or equivalent)?

      __ Yes __ No N/A

      (2) If equivalent test methods used, attach copy of equivalent methods used.

Section C - Manifest (262.20-.23)

1. Has generator shipped hazardous waste off-site since Sept. 22, 1986? (Subpart B - The Manifest) ✓ Yes __ No

   a. If no, do not fill out Section C and D.
   b. If yes, identify primary off-site facilities. List facilities in narrative report.

2. Does generator use manifest? (262.20 - General requirements) ✓ Yes __ No

   If yes, inspect manifest at random. Do all manifests reviewed include the following information? (262.21 - Required information) (Check items not on manifest)

   a. Manifest Document No. ✓ Yes __ No

   b. Generator's Name, Mailing Address, Tel. No. ✓ Yes __ No

   c. Generator EPA I.D. No. ✓ Yes __ No

   d. Transporter(s) Name and EPA I.D. No. ✓ Yes __ No

   e. Facility Name, Address and EPA I.D. No. ✓ Yes __ No

   f. DOT description of the waste ✓ Yes __ No

   g. (1) Quantity (weight or volume) ✓ Yes __ No
      (2) Containers (Type and number) ✓ Yes __ No

   h. Emergency Information (optional) (Special handling instruction, Phone No.) ✓ Yes __ No

   i. Is the following certification on each manifest form? ✓ Yes __ No

      This is to certify that the above named materials are properly classified, described packaged, marked and labeled and are in proper condition for transportation according to the applicable regulations of the Department of Transportation and the EPA.

   j. Is the EPA waste Number on the manifest? ✓ Yes __ No
      (Note: Proposed requirement by FDER only)

   k. Signature and dates

      (1) Generators ✓ Yes __ No
      (2) Transporter ✓ Yes __ No
      (3) Disposer (returned copy) ✓ Yes __ No

DRAFT

l. Indicate number of manifests inspected and number of violations. Note type of violation in report — 7 / 0

m. If copy of manifest from facility was not returned within 45 days, did generator file an exception report? (262.42 - Exception reporting) (Note: Proposed requirement by FDER only) — __ Yes __ No N/A

If yes, did it contain the following information?
Legible copy of manifest — __ Yes __ No N/A
AND
Cover letter explaining generators efforts to locate waste — __ Yes __ No N/A

n. Does (will) generator retain copies for 3 years — ✓ Yes __ No

Section D - Pre-Transport Requirements (262.30-34) _____ N/A

1. Does generator package waste for transport — ✓ Yes __ No

If no, skip to question 8.
If yes, complete the following questions.

2. Does generator package waste in accordance with 49 CFR 173, 178, and 179 (DOT requirements)? (262.30 - Packaging) — ✓ Yes __ No

3. Inspect containers to be shipped.

a. Are containers to be shipped in good condition? (Describe containers and condition; i.e., leaking or corroding or bulging.) — ✓ Yes __ No

b. Is there heat evidence of heat generation from incompatible wastes in the containers? — __ Yes ✓ No

4. Before shipping, does the generator use DOT labeling requirements in accordance with 49 CFR 172 (263.31-Labeling) — ✓ Yes __ No

5. Does the generator mark each package in accordance with 49 CFR 172 (262.32 - Marking) — ✓ Yes __ No

6. Is each container of 110 gallons or less marked with the following label? (262.32 - Marking) — ✓ Yes __ No

Label saying: HAZARDOUS WASTE - Federal Law Prohibits Improper Disposal. If found, contact the nearest police or public safety authority or the U.S. Environmental Protection Agency.

Generator's Name and Address _____

_____

Manifest Document Number _____

DRAFT

7. If there are any vehicles present on site loading or unloading hazardous waste, inspect for presence of placards. Note this instance on narrative explanation sheet. (262.33 - Placarding)

   a. Does the generator have the appropriate placards to offer the initial transporter? __ Yes ✓ No

   b. If no, who provides placards? transporter

8. Accumulation Time (262.34 - Accumulation Time)

   a. Is facility a permitted storage facility? __ Yes ✓ No
   If yes, skip to question #9.

   If no, answer rest of question #8

   b. Does the facility comply with the 180-day accumulation limit or the 270-day accumulation limit if the facility must transport waste 200 miles or more? (261.34(d)(e)) ✓ Yes __ No
   (Note: The FDER is proposing to limit the maximum accumulation time to 180 days only)

   c. Does the facility comply with the 6000 kg. maximum accumulation of hazardous waste? (261.34(d)) ✓ Yes __ No

   d. Are containers used to store wastes? (262.34(a)(1) ✓ Yes __ No

   If yes, complete Containers Storage Checklist for Small Quantity Generators.

   Is the beginning date of accumulation time clearly indicated (262.34(a)(2)) __ Yes __ No

   e. Are tanks used to store wastes? (262.34(a)(1) __ Yes ✓ No

   If yes, complete Tanks Checklist for Generators

   f. While being accumulated, is each container or tank clearly marked "Hazardous Waste"? (262.34(a)(3) ✓ Yes __ No

9. Describe storage area. Use photos and narrative.

DRAFT

Section E - Recordkeeping and Records (262.40-43) __ N/A Explain _____

1. Is generator keeping the reports of test results where applicable? (262.40(c)) ✓ Yes __ No

2. Where are records kept (at facility or elsewhere)? facility

3. Who is in charge of keeping the records?

Name Bob Burnard Title Parts Manager

4. Any additional reporting? (262.43 - Additional Reporting) __ Yes ✓ No

If yes, describe in narrative.

Section F - Special Condition (262.50 - International Shipments) ✓ N/A

Explain _____

1. Has generator received from, or transported to a foreign source any hazardous waste? __ Yes __ No

   a. If yes, has he filed a notice with the Regional Administrator? __ Yes __ No

   b. Is this waste manifested and signed by Foreign consignee __ Yes __ No

   c. If generator transported wastes out of the country, has he received confirmation of delivered shipment? __ Yes __ No

Section G - Preparedness and Prevention (265.30-37)

1. Is there evidence of fire, explosion or contamination of the environment? (265.31 - Maintenance and Operation of Facility) __ Yes ✓ No

   If yes, use narrative explanation.

2. Is the facility equipped with (265.32 - Required equipment)

   a. Internal communications or alarm system? ✓ Yes __ No
      Is it easily accessible in case of emergency? ✓ Yes __ No

   b. Telephone or two-way radio to call emergency response personnel? ✓ Yes __ No

   c. Portable fire extinguishers, fire control equipment, spill control equipment and decontamination equipment? ✓ Yes __ No
      Is this equipment tested to assure its proper operation? ✓ Yes __ No

      How frequently? yearly

DRAFT

d. Water of adequate volume for hoses, sprinklers or water spray system? ✓ Yes __ No

(1) Describe source of water well

(2) Indicate flow rate and/or pressure and storage capacity, if applicable. adequate

3. Is there sufficient aisle space to allow unobstructed movement of personnel and equipment? (e.g., adequate aisle space in between barrels to check for leakage, corrossion and proper labeling, etc.) (265.35 - Required Aisle Space) ✓ Yes __ No

4. Has the owner/operator made arrangements with the local authorities to familiarize them with characteristics of the facility? (Layout of facility, properties of hazardous waste handled and associated hazards, places where facility personnel would normally by working, entrances to roads inside facility, possible evacuation routes.) (265.37 - Arrangements With Local Authorities) __ N/A __ Yes ✓ No

If N/A, explain

5. In the case that more than one police or fire department might respond, is there a designated primary authority? (265.37 - Arrangements with Local Authorities) __ N/A ✓ Yes __ No

If yes, indicate primary authority Orange County
Is the fire department a city or volunteer fire department? Full-time

6. Does the owner/operator have phone number of and agreements with state emergency response teams, emergency response contractors and equipment suppliers? (265.37 - Arrangements with Local Authorities) __ Yes ✓ No

Are they readily available to the emergency coordinator? __ Yes ✓ No

7. Has the owner/operator arranged to familiarize local hospitals with the properties of hazardous waste handled and types of injuries that could result from fires, explosions, or releases at the facility? (265.37 - Arrangements with Local Authorities) __ Yes ✓ No

If no, has the owner/operator attempted to do this?

8. If the State, or local authorities decline to enter into the above referenced agreements, has this been documented in the operation record? (265.37 - Arrangements with Local Authorities) __ Yes __ No N/A

DRAFT

Section H - Modified Contingency Plan and Emergency Procedure (262.34(d)(4))

1. Is there an emergency coordinator on site or within short driving distance of the plant at all times? ___ Yes ✓ No

2. Who is the emergency coordinator? none

3. Is the following information posted near the telephone:

   a. Name and telephone number of emergency coordinator? ___ Yes ✓ No

   b. Location of fire extinguishers, spill control material and, if present, fire alarm? ___ Yes ✓ No

   c. Telephone number of fire department if no direct alarm? ___ Yes ✓ No

4. Are all emplyees thoroughly familiar with proper waste handling and emergency procedures as relevant to their responsibilities during normal facility operations and emergencies? ✓ Yes ___ No

5. Does the emergency coordinator or his designee know what is the required response in the event of a fire, a spill which can be contained, or a fire, explosion or other release which could threaten human health outside the facility or reach surface water? ___ Yes ___ No

Dear Ms. Karamsadkar:

We have reviewed your response(s) to Non-Compliance Letter OCD-HW-11-214, dated August 12, 2011. All potential non-compliance items outlined in the letter have been addressed and no further action is necessary on your part.

Please be advised that Rachel's Collision Center, LLC must continue to maintain compliance with all Department rules and regulations and an unannounced follow up inspection may be conducted at your facility at a later date. If you have any questions, please contact me at 407/897-4308 or at michael.eckoff@dep.state.fl.us.

Sincerely,

Michael Eckoff

Hazardous Waste Inspection Report

FACILITY INFORMATION:

Facility Name: Rachels Collision Center

On-Site Inspection Start Date: 06/24/2011 **On-Site Inspection End Date:** 06/24/2011

ME ID#: 57331 **EPA ID#:** FLR000117515

Facility Street Address: 917a W Oakland Ave, Oakland, Florida 34760

Contact Mailing Address: PO Box 1237, Oakland, Florida 34760-1237

County Name: Orange **Contact Phone:** (407) 905-2885

NOTIFIED AS:

SQG (100-1000 kg/month)

INSPECTION TYPE:

Complaint Inspection for CESQG (<100 kg/month) facility

INSPECTION PARTICIPANTS:

Principal Inspector: Michael Eckoff, Inspector

Other Participants: Danielle Owens, Environmental Specialist; Gary Faulkner, Manager

LATITUDE / LONGITUDE: Lat 28° 32' 57.51" / Long 81° 38' 45.34"

SIC CODE:

TYPE OF OWNERSHIP: Private

Introduction:

On June 24, 2011, Michael Eckoff and Danielle Owens, Florida Department of Environmental Protection (FDEP), accompanied by Gary Faulkner, Rachel's Collision Center (RCC), conducted a complaint inspection at RCC. The complainant alleged the facility's paint mixing system is out in the open, supposed to be in a room with a fire suppresant system, and waste thinner is not labeled or disposed of correctly.

The facility has been on-site for six years and has five employees. Operating hours are from 7:30 AM to 5:30 PM Monday to Friday. The facility is connected to the municipal potable water system and has a septic system. The property is owned by S and A Industrial, LLC, P.O. Box 783665, Winter Garden, Florida 34778-3665.

INSPECTION HISTORY
The facility has never been inspected by the Department for compliance with state and federal hazardous waste and used oil regulations.

Process Description:

The facility is an auto body repair and paint shop.

Vehicles are repaired and prepared for painting in the Prep Area. Final cleaning with either a rag and water or a tack rag prior to painting.

Occasionally vehicles are taken to Media Blasting for paint removal, usually for older vehicles.

Used oil was stored in an unlabeled 55-gallon drum [40 CFR 279.22(c)(1) and 62-710.401(6), Florida Administrative Code (F.A.C.)].

Used antifreeze was stored in an unlabeled 55-gallon drum. The inspectors recommended the facility properly label the drum.

DRAFT

Scrap metal was stored outside the building. Used tires were stored inside the building.

The facility has one paint booth. Waste paint thinner is recycled in a Sidewinder solvent still. Waste paint thinner was stored in a 55-gallon drum. Waste paint was stored in a 5-gallon container. Recycled thinner is stored in 5-gallon containers. The facility had a paint gun cleaner that is not used and appeared to be empty. Paint guns are cleaned with thinner that is sprayed into the waste paint thinner drum.

Paint booth filters are changed every two to three weeks and disposed in the trash [40 CFR 262.11]. Pearl coat paints were found to contain chromium hydroxide.

RECORDS
Hazardous waste is picked up by Robbie D Wood, ALD067138891, and transported to Perma-Fix, GAD093380814.

Scrap metal is picked up by TMR.

Records for used oil and used antifreeze disposal were not available [40 CFR 262.11].

New Potential Violations and Areas of Concern:

Checklist Independent Potential Violations and Areas of Concern

Type:	Violation
Rule:	262.11
Explanation:	A person who generates a solid waste, as defined in 40 CFR 261.2, must determine if that waste is a hazardous waste. Specifically, RCC failed to conduct a proper waste determination on the waste paint booth filters, used oil, and used antifreeze prior to disposal.
Corrective Action:	RCC shall conduct a proper waste determination on the waste paint booth filters, used oil, and used antifreeze prior to disposal. Please provide a copy of the results to the Department within 30 days from the date of your receipt of this Non-compliance Letter. If any of these wastes are known to be hazardous waste, please indicate this, and when available provide a copy of the manifest documenting removal of these wastes from the property.

Type:	Violation
Rule:	279.22(c)(1), 62-710.401(6)
Explanation:	Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil." Specifically, RCC failed to label the 55-gallon drum of used oil with the words "Used Oil."
Corrective Action:	RCC shall label all containers storing used oil with the words "Used Oil." Please provide documentation of the drum properly labeled to the Department within 30 days from the date of your receipt of this Non-compliance Letter.

Summary of Potential Violations and Areas of Concern:

Potential Violations

Rule Number	Area	Date Cited	Explanation
Checklist Independent Violations			

DRAFT

Rule Number	Area	Date Cited	Explanation
262.11		06/24/2011	A person who generates a solid waste, as defined in 40 CFR 261.2, must determine if that waste is a hazardous waste. Specifically, RCC failed to conduct a proper waste determination on the waste paint booth filters, used oil, and used antifreeze prior to disposal.
279.22(c)(1), 62-710.401(6)		06/24/2011	Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil." Specifically, RCC failed to label the 55-gallon drum of used oil with the words "Used Oil."

Areas of Concern

No Areas of Concern

Conclusion:

Rachel's Collision Center was inspected as a conditionally exempt small quantity generator of hazardous waste and a generator of used oil and was not in compliance at that time.

DRAFT

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.

NON-COMPLIANCE LETTER
OCD-HW-11-214

Ms. Rachel Karamsadkar, Managing Member
Rachel's Collision Center, LLC
917A West Oakland Avenue
Oakland, Florida 34760

Orange County-HW
Rachel's Collision Center, LLC
FLR000117515

DRAFT

Dear Ms. Karamsadkar:

A hazardous waste and used oil compliance inspection was conducted at your facility located at 917A W. Oakland Ave., Oakland, on June 24, 2011. The inspection was conducted under the authority of Section 403.091, Florida Statutes (Fla. Stat.) and Chapter 403, Part IV, Fla. Stat. in order to determine the compliance status of your facility with Title 40 Code of Federal Regulations (CFR) Parts 260 - 268 and 279. The provisions of 40 CFR Parts 260 through 268 and 279 have been adopted by reference as the state hazardous waste and used oil rules in Chapters 62-730 and 62-710, Fla. Admin. Code, respectively.

During this inspection, possible violations of Chapter 403 Fla. Stat. and Chapter 62-730 or 62-710 or both, Florida Administrative Code (Fla. Admin. Code) were noted by Department of Environmental Protection specialists. Section 403.721(1), Fla. Stat. requires persons who generate hazardous waste and/or used oil to comply with rules adopted by the Department. The purpose of this letter is to seek your cooperation in resolving these matters.

Please see the attached inspection report for a full account of Department observations

PLEASE BE ADVISED that this Non-Compliance Letter is part of an agency investigation preliminary to agency action within the meaning of Section 120.57(5), Fla. Stat. We request that you review the potential violations noted and respond in writing within 30 days of receipt of this Non-Compliance Letter. Your written response should either describe what you have

done to comply, or provide evidence (photographs, etc.) to support a claim that the violations did not occur.

It is the Department's intention to allow you to document compliance or corrective actions, so that this matter can be closed without further enforcement. Your failure to respond promptly in writing may result in the initiation of formal enforcement proceedings.

Please address your response to Michael Eckoff at the Central District office address noted on the letterhead above. If you have any questions you may contact Mr. Eckoff at (407)897-4308 or electronically at michael.eckoff@dep.state.fl.us. We look forward to your cooperation in completing the investigation and resolution of this matter.

Sincerely,

Janine Kraemer

Envirotrac

1.0 INTRODUCTION

On April 28, 2009 EnviroTrac was onsite at Sunoco Station #0977-1627 located at 17100 West Colonial Drive, Oakland, Orange County to perform source removal activities associated with minor soil impact discovered previously during the removal and replacement of the fill-spill bucket on the regular-grade underground storage tank (UST). A copy of the associated Spill Bucket Closure Report filed with the Orange County Environmental Protection Division in August 2008 is included in **Appendix A.**

The scope of work included cutting out the concrete pavement surrounding the regular spill bucket to expose soils, a sand and pea-gravel mix, within an approximate 5' foot x 5' foot excavation area. The exposed soils were then excavated to the top of the regular UST at a depth of approximately 4.5' feet below land surface (BLS) and placed into Florida Department of Transportation (FDOT) approved 55-gallon steel drums for off-site transport and disposal at an approved Sunoco disposal facility. The excavation area allowed for the assessment and removal of soil in direct contact with the bucket assembly and the immediate surrounding area. Representative soil samples were then collected from the extent of the excavation for laboratory analysis. Soil samples were collected as per Chapter 62-770 Standard Operating Procedures PCS-004.

2.0 FACILITY DESCRIPTION

Presently, the subject site is an active Sunoco-branded convenience food sales and fuel facility located near the southeast corner of the Remington Road and Colonial Drive (State Road 50) intersection within Oakland, Orange County, Florida. A review of the "Clermont East," Florida United States Geological Survey (USGS) 7.5-minute quadrangle map indicates that the site is located approximately 0.25 miles south of the Florida Turnpike within Section 30 of Township 22 South, Range 27 East. Topography across the site is relatively flat with a ground elevation of approximately 145 feet National Geodetic Vertical Datum (NGVD). A copy of the USGS topographic site vicinity map is included as **Figure 1.**

The site layout consists of a single-story building situated at a south-central property location and serving as a convenience store and facility office. Six (6) fuel dispensers sheltered by a canopy are positioned north of the convenience store building. A drive-thru car wash structure is located along the western property boundary. The majority of the site consists of impervious asphalt or concrete surfaces, with the remainder consisting of landscaped grassy areas. The UST field is situated near the northeast corner of the property and currently consists of two (2) 15,000-gallon USTs containing various grades of unleaded gasoline and one (1) 10,000-gallon UST for the storage of vehicular diesel.

DRAFT

According to the Florida Department of Environmental Protection (FDEP) Storage Tank Registration Database, the USTs were installed in December 2002 and are constructed of doubled-walled fiberglass with spill containment bucket and flow shut-off overfill/spill protective features. Approximate site layout and significant property features are illustrated on **Figure 2**. The FDEP storage tank registration information is included in **Appendix B**.

3.0 FACILITY HISTORY

According to general property information obtained from the Orange County Property Appraiser's office, the on-site building was built during 2003 along with related property improvements. The subject site appears to have been developed from land that was historically engaged in citrus cultivation.

On June 18, 2008, EnviroTrac was onsite to replace the regular-grade unleaded gasoline UST fill/spill bucket and to determine the extent (if any) of petroleum hydrocarbons in the soil. The single wall bucket was replaced due to damage to the accordion collar noted during a compliance inspection. Laboratory analysis of the soil sample collected indicated benzene, toluene, ethylbenzene, and xylene (BTEX) compounds and total recoverable petroleum hydrocarbons (TRPH) above the respective Soil Cleanup Target Levels (SCTLs) listed in Chapter 62-777, F.A.C. (effective August 5, 1999, revised April 17, 2005). Accordingly, EnviroTrac on behalf of Sunoco submitted a Discharge Report Form (DRF) on July 23, 2008. A copy of the July 2008 DRF is provided in **Appendix B**.

In response to the July 2008 DRF, site assessment activities conducted in October and December 2008, and February 2009 included the installation of three (3) soil borings and five (5) monitoring wells in the vicinity of the USTs and dispensers. A Site Assessment Report (SAR) was submitted to Orange County on April 6, 2009. The location of the soil borings and monitoring wells (MW-1 through MW-5) completed during the SAR activities are illustrated on **Figure 2**. Soil samples collected during the assessment did not yield any soil vapor concentrations and laboratory analysis of soil samples confirmed the absence of any impacts above SCTLs. Groundwater analytical results did not report any concentrations in excess Groundwater Cleanup Target Levels (GCTLs), listed in Chapter 62-777, F.A.C. (effective August 5, 1999, revised April 17, 2005). Soil analytical results are included on **Table 1** and **Table 2**. A groundwater analytical summary is included in **Table 3** and **Table 4**.

4.0 SOURCE REMOVAL ACTIVITIES

Source removal activities took place on April 28, 2009. EnviroTrac personnel mobilized on site to provide oversight while Diversified Environmental Construction (DECON) of Riverview, Florida (PSSC# PCC-056720) conducted source removal activities around the previously described regular grade spill bucket.

DRAFT

Source removal activities consisted of the following:

- Obtain all necessary permits
- Barricade entire work area
- Saw-cut, remove, and dispose of approximately an 5' x 5' section of the concrete tank pad around the existing spill bucket
- Hand-dig impacted soil to the top of the UST (approximately 4.5 feet BLS) and place into FDOT approved 55-gallon drums
- Collect a total of four (4) laboratory soil samples from the representative sidewalls of the excavated area for analysis using EPA Methods 8021B (BTEX & MTBE), 8310 (Polynuclear Aromatic Hydrocarbons [PAHs]) and FL-PRO (TRPHs).
- Install new double-walled spill bucket manufactured by Fairfield Industries (FDEP ID#: EQ-639)
- Supply new clean fill for excavation
- Supply and finish 4000 psi concrete to finish excavated area flush with the existing ground surface
- Transport and disposal of impacted soil through Clark Environmental (six drums total)
- Clean site of all related construction debris
- Install new double-walled spill bucket manufactured by Fairfield Industries (FDEP approval ID: EQ-639)

The approximate location and dimension of the source removal area is illustrated on **Figure 2.**

5.0 SOURCE REMOVAL ASSESSMENT AND LABORATORY ANALYSIS

A mix of sand and pea-gravel was encountered surrounding the spill bucket and down to the top of the UST. Samples of the sand/pea-gravel mix were collected at various depths throughout the excavation for soil vapor field screening until the top of the regular grade UST was reached, approximately 4.5' BLS. The samples were placed in sixteen- (16) ounce glass jars, leaving approximately half of the jar as a headspace in which organic vapors could accumulate. The openings of the jars were sealed with aluminum foil. The headspace was allowed to equilibrate approximately five- (5) minutes before analysis. The samples were analyzed using a PhotoVac MicroFID Organic Vapor Analyzer/Flame Ionization Detector (OVA/FID). The OVA/FID was calibrated prior to use according to manufacturer's specifications using a 100-ppm isobutylene standard. Samples were field screened using headspace reading procedures specified in Rule 62.770.200(19), F.A.C. The soil gas survey was conducted in accordance with the FDEP June 1994 document "Guidelines for Assessment and Remediation of Petroleum Contaminated Soils". OVA/FID results were detected during the field screening ranging from less than 10 parts per million (ppm) to 235 ppm. Samples were collected as the excavation was expanded out from the bucket and fill pipe. OVA/FID screening results are summarized in **Table 5.** The excavation area is illustrated on **Figure 2.**

DRAFT

On April 28, 2009, a total of four (4) laboratory samples of the sand/pea-gravel mix were collected from within the excavation area, representative of the north, south, east, and west side walls of the excavated area. The samples were designated NORTH, SOUTH, EAST, and WEST and where a composite of each respective sidewall collected between 2 ' and 4' BLS. The samples were sent to Southern Petroleum Laboratories (SPL) of Scott, Louisiana and analyzed by EPA Method 8260B (BTEX & MTBE & Naphthalene). Laboratory analysis of the soil samples did not indicate the presence of hydrocarbon constituents above their respective SCTLs. Minor concentrations of Benzo(a)pyrene equivalents were detected in each sample, all below SCTLs. Benzo(a)pyrene Conversation Tables were completed as per Chapter 62-770 and did not report any total equivalent concentrations above the Residential Direct Exposure SCTL. The laboratory analytical results are summarized on **Table 1** and **Table 2**, and illustrated on **Figure 2**. A copy of the laboratory report is provided in **Appendix C**. The Benzo(a)pyrene Conversation Tables are included in **Appendix D**.

During the source removal event, the excavated soils were place into six (6) FDOT approved 55-gallon drums. The drums were transported to Clark Environmental Inc. (Clark) at their facility located in Mulberry, Florida for disposal on May 28, 2009. A copy of the waste disposal manifest will is included in **Appendix B**.

Although there was no indication the existing spill bucket was breached during the source removal activities, Sunoco elected to have DECON install a new double walled spill bucket manufactured by Fairfield Industries, Inc. (FDEP ID#: EQ-639) for the regular-grade UST prior to backfilling and completion of the area. A copy of the completed Underground Storage System Installation and Removal Form for Certified Contractors is included in **Appendix D**.

DRAFT

6.0 CONCLUSIONS

- Soil surrounding the excavation area was limited to the top of the regular UST; soils within the 5' x 5' x 4.5' excavation area were subsequently removed. All excavated soil was transferred to a total of six (6) FDOT approved 55-gallon drums. The drums were transported to Clark Environmental for thermal treatment/disposal.

- Laboratory analytical data collected from the sidewalls at the excavation area did not identify any petroleum hydrocarbon constituents above FDEP established SCTLs; furthermore the majority of parameters tested were reported below the laboratory MDLs. Based on this laboratory data, it appears that all impacted soil associated with the regular spill bucket has been effectively removed.

- The site assessment activities performed for completion of this Source Removal Report have properly addressed the documented petroleum hydrocarbon soil impacts associated with the previously replaced regular UST spill bucket. Furthermore, sampling completed during the recent site assessment did not report any absorbed phase impacts to the soil outside the USTs and no dissolved phase impact to site groundwater. As such, EnviroTrac on Sunoco requests a No Further Action (NFA) determination for the July 23, 2008 DRF.

DRAFT

CERTIFICATION

I certify that I have prepared this Spill Bucket Source Removal Report, June 2009, for Sunoco Station #0977-1627 located at 17100 West Colonial Drive, Oakland, Orange County, Florida, FDEP Facility Number 48/9805476 with information gathered from qualified personnel who properly evaluated the information submitted. The applicable portions of this technical document and associated work comply with standard professional practices, rules of the FDEP and any other laws and rules governing the profession. The information submitted is, to the best of my knowledge and belief, true, accurate, and complete.

Discharge Date: July 02, 2009 (Non-program)

Dear Mr. McPherson:

DRAFT

The Orange County Environmental Protection Division (OCEPD), on behalf of the Florida Department of Environmental Protection (Department), has reviewed the Site Assessment Report (SAR) and No Further Action Proposal (NFAP) dated March 01, 2011 (received March 07, 2011), prepared and submitted by EnviroTrac Environmental Services, Ltd. for the petroleum product discharge referenced above. All the documents submitted to date are adequate to meet the site assessment requirements of Rule 62-770.600, Florida Administrative Code (F.A.C.). In addition, documentation submitted with the SAR/NFAP confirms that criteria set forth in Subsection 62-770.680(1), F.A.C., have been met. Please refer to the attached map of the source property and analytical summary tables. The SAR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharge referenced above, except as set forth below.

(1) In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Department may require site rehabilitation to reduce concentrations of petroleum products'

contaminants of concern to the levels approved in the SAR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

(2) Additionally, you are required to properly abandon all monitoring wells, except compliance wells utilized to meet the release detection requirements of Chapter 62-761 or 62-762, F.A.C., within 60 days of receipt of this Order. The monitoring wells must be plugged and abandoned in accordance with the requirements of Subsection 62-532.500(5), F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SAR/NFAP you do not have to do anything. This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

DRAFT

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from R.D. Keene Trust, shall mail a copy of the request to R.D. Keene Trust at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from R.D. Keene Trust, shall mail a copy of the petition to R.D. Keene Trust at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;

(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;

(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;

(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;

DRAFT

(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

DRAFT

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding the OCEPD's review of your SAR/NFAP should be directed to Matthew N. Green, P.G. at (407) 836-1431. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 489805476. Please use this identification on all future correspondence with the Department or the OCEPD.

Sincerely,

Charles T. Williams, Acting Chief
Bureau of Petroleum Storage Systems

1.0 Introduction and Scope of Work

Petroleum-impacted pea gravel was encountered on January 2, 2013, when the overspill buckets (OSBs) and vapor buckets (VBs) were replaced by Petroleum Equipment and Construction, Inc. (PEC). Shaw Environmental, Inc. (Shaw), a CB&I company, conducted environmental field testing activities during the replacement of the OSBs and VBs. A total of six pea gravel samples were collected. 7-Eleven, Inc. (7-Eleven) filed a Discharge Report Form (DRF) on January 10, 2013 (upon receipt of the analytical results), and contracted Shaw to conduct site assessment activities in accordance with Chapter 62-770, Florida Administrative Code (FAC). A copy of the Overspill Bucket Closure Report dated February 26, 2013, containing a copy of the DRF, is provided in **Appendix A**.

Four monitor wells, each with an associated soil boring, were installed and sampled during the course of this assessment.

DRAFT

2.0 Background

2.1 Area of Investigation

7-Eleven Store No. 34286 is located within Section 30, Township 22, Range 27, of the United States Geological Survey, Clermont East, Florida, Topographic Quadrangle. The ground surface elevation around the site is approximately 144 ft above mean sea level. A site location map is provided as **Figure 1**.

7-Eleven Store No. 34286 was constructed in 2003 on an approximately 1.41-acre parcel. The 3,168-sq ft retail building is located on the northern quarter of the property. The site is primarily covered by asphalt with grass landscaping at the perimeter. The underground storage tank (UST) area is located on the northeast quarter of the site, just east of the canopy. A site layout map is provided as **Figure 2**.

2.2 Previous Assessment Activities

A review of the Florida Department of Environmental Protection (FDEP) OCULUS online database revealed there was a Site Assessment Report (SAR) completed on April 6, 2009, and March 1, 2011, for two separate incidents involving damaged OSBs. The first assessment was in response to a DRF filed July 23, 2008, at the Sunoco station that occupied the site prior to 7-Eleven. A Site Rehabilitation Completion Order (SRCO) was issued February 18, 2010, for the June 2008 Discharge. A DRF was filed on March 3, 2010, for a discharge that occurred on July 2, 2009. A site assessment was initiated and a SAR was filed on March 1, 2011. On April 13, 2011, a SRCO was issued for the July 2, 2009 discharge.

2.3 Site Chronology

The following is a chronological summary of recent environmental activities performed at the facility:

Date	Environmental Activity
January 2, 2013	Compromised OSB discovered during OSB replacement activities. Pea gravel samples submitted for laboratory analysis
January 10, 2013	Shaw receives pea gravel analytical results. Results indicate exceedances of Soil Cleanup Target Levels (SCTLs). The next day, 7-Eleven files a DRF with Orange County Environmental Protection Division (OCEPD)
January 24, 2013	Shaw submits Site Assessment Initiation Notice to OCEPD on behalf of 7-Eleven
February 26, 2013	Overspill Bucket Closure Report submitted to OCEPD to satisfy requirements of Chapter 62-761, FAC
June 24 through 26, 2013	Soil assessment and installation of MW-1 through MW-4

DRAFT

Date	Environmental Activity
July 1, 2013	MW-1 through MW-4 sampled. Groundwater analysis reports no exceedances
July 9, 2012	Aquifer ("slug") test is conducted on MW-2, MW-3, and MW-4
August 21, 2013	Groundwater elevations recorded for MW-1 through MW-4

DRAFT

3.0 Site Assessment Activities and Results

3.1 Water Well Survey and Area Land Use

Shaw utilized the Florida Department of Health (FDOH) Bureau of Environmental Health EHWATER database to create a radius map displaying known supply wells in the vicinity of the subject site. The map indicated the existence of two public supply well's located within a ½-mile radius of the site. The map also indicated there are five private wells located within a ¼ -mile radius. A water well survey summary is provided in **Table 1**.

Shaw utilized the FDOH EHWATER website database to search for nearby petroleum or dry-cleaning facilities within a ½-mile radius of the site. The search listed one site:

- Florida Department of Transportation Turnpike (SR 50 & HWY 91) (FAC ID: 9201702). This site is currently closed. However, a search of the FDEP's OCULUS database did not reveal any documents indicating a release. Two 600-gallon emergency diesel USTs were installed May 1, 1992. They were removed from the site in 2004.

The FDOH Facilities Inventory search results are summarized in **Table 2** and depicted on **Figure 3**.

Shaw reviewed aerial photographs and utilized field-verification to determine land use in the vicinity of the site. The area within ½ mile of the site includes commercial, industrial, municipal, and residential zoning classifications. The area land use is shown on **Figure 4**.

3.2 Initial Investigation

On January 2, 2013, Shaw conducted environmental oversight activities during the replacement of the OSBs. Two overspill buckets, #1 PUL (premium unleaded) and #2 RUL (regular unleaded) failed the hydrostatic test. During the field activities, pea gravel samples were collected from around the two OSBs. The samples were screened on site for organic vapors using a Photovac® MicroFID organic vapor analyzer (OVA) in accordance with the procedure outlined in Chapter 62-780.600(15), FAC. The OVA readings ranged from less than 1 to 1,475.2 ppm (parts per million). Six confirmation samples were collected from both OSB excavations and sent to Acctuest Laboratories Southeast in Orlando, Florida (FDOH# E83510) for analysis for benzene, toluene, ethylbenzene, and total xylenes (collectively known as BTEX) and methyl tert-butyl ether (MTBE) by United States Environmental Protection Agency (EPA) Method 8260B; polynuclear aromatic hydrocarbons (PAHs) by EPA Method 8310; and total recoverable petroleum hydrocarbons (TRPH) by FDEP Method FL-PRO. The sample #1 N PUL @ 1 ft reported that total xylenes exceeded the SCTLs for Leachability Criteria, but below the Residential Criteria. Analysis of the sidewall confirmation samples indicated that no impacted

DRAFT

pea gravel remained in the excavation. A copy of the Overspill Bucket Closure Report detailing the January 2013 field activities and analytical results is included as **Appendix A**.

3.3 Well Installation

On June 25 and 26, 2013, Shaw supervised the installation of four groundwater monitoring wells (MW-1 to MW-4). The well locations are depicted on **Figure 2**. The wells were installed in accordance with FDEP BPSS standards using a conventional truck-mounted rig to a total depth of 45 ft below land surface (bls) with 15 ft of 2-inch-diameter schedule 40 polyvinyl chloride (PVC) machine-slotted 0.010-inch screen surrounded by a 20/30 sand filter pack. Prior to each well construction, a soil boring was completed to evaluate lithology and field organic vapors. Soil borings ranged from 8 to 46 ft bls. SB-5 was installed to the north of the tank pit to provide soil lithology and OVA readings in order to evaluate the soil at the north side of the UST area. Soil grab samples were collected at 1-ft intervals and field screened, in accordance with Chapter 62-780.200(15), FAC, with a MicroFID OVA equipped with a flame ionization detector (FID). The OVA-FID was calibrated on site to 500 ppm methane and zero gas sources prior to the sample screening activities.

The field screening results indicated net organic vapor readings ranging from less than 1 to 0.4 ppm. OVA field readings and lithologic descriptions are presented in **Table 3**. Copies of the FDEP boring logs, FDEP well construction and development logs, and equipment calibration records are provided in **Appendix B**.

Shaw collected one soil sample (SB-2.30) for laboratory analysis. The sample was submitted to Accutest for analysis of BTEX and MTBE by EPA Method 8260B, PAHs by EPA Method 8310, and TRPH by FDEP Method FL-PRO. Note: soil impact had been sufficiently delineated during the OSB closure assessment. It was not considered necessary to advance soil borings to total depth for monitor wells MW-1, MW-3, and MW-4. Soil borings SB-5 and SB-6 were advanced solely to evaluate the soil in those areas and were therefore continued to the water table. Historical groundwater flow calculations suggested that impact would most likely have migrated to this location.

Groundwater monitoring well placement was based on historical groundwater flow direction. Historical maps depict groundwater flow to the southwest. Although site groundwater flow seems to have changed, the installation of additional monitor wells was deemed unnecessary because no Chapter 62-777, FAC, Table I, Groundwater Cleanup Target Level (GCTL) exceedances were reported in the groundwater samples.

The laboratory analytical report indicated that no SCTL exceedances were detected in the soil analytical sample. The soil analytical results are summarized in **Table 4** and a map summarizing

DRAFT

the soil assessment is provided as **Figure 5**. Copies of the laboratory analytical reports and chain-of-custody documentation are provided in **Appendix C**.

3.4 Groundwater Sample Collection and Results

On July 1, 2013, Shaw returned to the site to sample the wells. Well purging and groundwater sampling activities were conducted in accordance with FDEP *SOP 001/01, FS 2200, Groundwater Sampling*, revised March 31, 2008, (effective December 3, 2008), and FDEP *SOP-PCS-005 Groundwater Sampling SOP Variances and Clarifications for Bureau of Petroleum Storage System Sites*, May 2, 2005. A variable-speed electronic submersible pump and clean polyethylene tubing were used for purging and sampling activities; the pump was decontaminated between each well. Electronic water quality meters were used to track water quality parameters during purging activities. FDEP groundwater sampling logs were used to document well purging time, volume, and rates; depth to groundwater; monitored water quality parameters (hydrogen-ion concentration [pH], temperature, conductivity, dissolved oxygen [DO], turbidity, color, and odor); and sampling data for each well. The samples were collected in laboratory-supplied bottles and couriered to Accutest. Laboratory analytical results indicated no concentrations in excess of the Chapter 62-777, FAC, Table I, GCTLs in monitor wells MW-1 to MW-4.

Monitor well construction data is presented in **Table 5**; groundwater analytical results are summarized in **Table 6**; **Figure 6** shows groundwater analytical results next to their corresponding wells. Laboratory analytical reports are provided in **Appendix C**. Copies of the FDEP groundwater sampling logs, well construction and development logs, and field instrument calibration records are provided in **Appendix B**.

3.5 Water Level Measurements

Prior to each groundwater sampling event, depth-to-water measurements from below top-of-casing (btoc) for each of the existing wells was recorded. On July 1, 2013, depth-to-water measurements ranged from 32.72 to 33.60 ft btoc.

Relative top-of-casing elevations were surveyed by qualified Shaw personnel and calculated with depth-to-water measurements before sampling. Water table elevation contours representative of the groundwater surface on July 1, 2013, indicate a groundwater gradient of 0.011 feet per foot (ft/ft) towards the northwest.

Shaw returned to the site on August 21, 2013, to record the groundwater elevations. Water table elevation contours representative of the groundwater surface on August 21, 2013, indicate a groundwater gradient of 0.012 ft/ft towards the northwest. Free-phase product was not encountered during any event.

DRAFT

A groundwater elevation summary is provided in **Table 7**. Groundwater elevation maps showing groundwater elevation contour intervals from July 1, 2013 and August 21, 2013 are provided as **Figure 7** and **Figure 8** respectively.

3.6 Site Lithology

Data collected during the assessment activities indicates that the site is underlain by fine to medium grained sand, which is underlain by clayey sand, which is underlain by sandy clay. A geologic cross-section showing the site lithology is illustrated on **Figure 9**. Copies of the boring logs, describing site lithology, are in **Appendix B**.

3.7 Slug Tests and Results

On July 9, 2013, Shaw performed slug tests on MW-2, MW-3, and MW-4 to assess the shallow aquifer characteristics beneath the facility. During the slug tests, a volume of water was instantaneously removed from the well and the groundwater recovery rate was monitored by a Mini Troll® Level-Logger. The recovery rate was recorded logarithmically for the entire test. The data was then analyzed using AQTESOLV for Windows by Hydrosolv Inc.™ The Bouwer and Rice 1976 Method for unconfined aquifers was chosen from AQTESOLV to calculate the range of hydraulic conductivity values associated with the aquifer. The hydraulic conductivity values were within acceptable ranges for unconsolidated deposits as found in R. Allen Freeze and John A. Cherry's 1979 Groundwater and C.W. Fetter's 1988 Applied Hydrogeology Second Edition. The estimated average linear groundwater velocity (V) for the surficial aquifer was calculated using the equation V=KI/n, where K=Hydraulic Conductivity, I=Hydraulic Gradient, and n=effective porosity. Aquifer characteristics are summarized in the following table.

DRAFT

Well ID	Screened Interval (ft)	Hydraulic Gradient (I) (ft/ft)	Effective Porosity (n) (%)	Hydraulic Conductivity (K) (ft/day)	Linear Groundwater Velocity (V) (ft/yr)
MW-2	30-45	0.011	0.30	0.972	**13.01**
MW-3	30-45	0.011	0.30	34.130	**456.77**
MW-4	30-45	0.011	030	4.486	**60.04**

Slug test results and aquifer characteristic calculations are summarized in **Appendix D**.

4.0 Summary and Recommendation for No Further Action

- OSB replacement activities conducted on January 2, 2013, indicated that SCTLs were exceeded, but that the impacted pea gravel had been entirely removed from the excavation.
- Seven supply wells were located within ½ mile of the facility. One closed petroleum facility and one dry cleaning facility were reported as being within ½ mile of the site.
- Vadose zone OVA readings collected during the installation of the monitor wells and soil borings ranged from less than 1 ppm to 0.4 ppm during the assessment.
- No soil contamination was found during the installation of the monitoring wells.
- One groundwater sampling event was conducted during the assessment of this site.
- Based on depth-to-water measurements recorded, groundwater flow was towards the northwest with a gradient calculated to be 0.011 ft/ft on July 1, 2013, and towards the northeast with a gradient calculated to be 0.012 ft/ft on August 21, 2013.
- Free product was not encountered during site assessment activities.
- The site is underlain mostly by fine to medium sand, underlain clayey sand with sandy clay at MW-2 and SB-5.
- No contaminant concentrations were reported in exceedance of Chapter 62-777, FAC, Natural Attenuation Default Concentrations (NADCs) or GCTLs for constituents analyzed in MW-1 through MW-4.

Since soil and groundwater analytical results report no exceedances of SCTLs or GCTLs, Shaw recommends that a SRCO be issued for the site in accordance with the No Further Action criteria of Rule 62-770.680(1), FAC, and as specified on page 4 of FDEP's February 1, 2011 *Soil Cleanup Target Levels Application to Site Rehabilitation Decision* guidance document.

Subject: Site Rehabilitation Completion Order
7-Eleven Store #34286
17100 West Colonial Drive
Oakland, Orange County
FDEP Facility ID# 489805476
Discharge Date: January 10, 2013 (Non-program)
Discharge Score: 0

Dear Mr. McPherson:

The Orange County Environmental Protection Division (OCEPD), on behalf of the Florida Department of Environmental Protection (Department), has reviewed the Site Assessment Report (SAR) and No Further Action Proposal (NFAP) dated October 01, 2013 (received October 03, 2013) prepared and submitted by Shaw Environmental, Inc. for the petroleum product discharge referenced above. All the documents submitted to date are adequate to meet the site assessment requirements of Rule 62-780.600, Florida Administrative Code (F.A.C.). In addition, documentation submitted with the SAR/NFAP confirms that criteria set forth in Subsection 62-780.680(1), F.A.C., have been met. Please refer to the attached maps of the source property and analytical summary tables. The SAR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharge referenced above, except as set forth below.

(1) In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Department may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the SAR/NFAP or otherwise allowed by Chapter 62-780, F.A.C.

DRAFT

(2) Additionally, you are required to properly abandon all monitoring wells, except compliance wells utilized to meet the release detection requirements of Chapter 62-761 or 62-762, F.A.C., within 60 days of receipt of this Order. The monitoring wells must be plugged and abandoned in accordance with the requirements of Subsection 62-532.500(5), F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SAR/NFAP you do not have to do anything. This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Windermere RP, LLC, shall mail a copy of the request to Windermere RP, LLC at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

DRAFT

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Windermere RP, LLC, shall mail a copy of the petition to Windermere RP, LLC at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;

(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;

(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;

(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;

(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

DRAFT

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding the OCEPD's review of the SAR/NFAP should be directed to Matthew N. Green, P.G. at (407) 836-1431. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

DRAFT

The FDEP Facility Number for this facility is 489805476. Please use this identification on all future correspondence with the Department or the OCEPD.

Sincerely,

Valerie K. Huegel
Program Administrator

Stillwater Project No. 621-001

September 25, 2018

Nam T. Phu
Project Scientist

Barry D. Robertson, P.G.
Principal

Section 1.0
Introduction

Stillwater, on behalf of New Start Convenience Stores LLC (New Start), is pleased to provide the Orange County Environmental Protection Division (OCEPD) with the 2nd Semi-Annual Natural Attenuation Monitoring Report (NAM). The NAM was conducted based on the findings from a Site Assessment Report (SAR) prepared by Stillwater on March 7, 2016.

The purpose of this NAM is to outline the findings from the groundwater sampling conducted for the site. Stillwater's scope of work consisted of the following:

- Collection of groundwater samples from monitoring wells MW-3 and MW-5;
- Collection of groundwater elevation data from all existing monitoring wells;
- Analysis of collected groundwater samples for BTEX and MTBE using EPA method 8260; and
- Preparation of a Monitoring Report (including tables and graphs as needed).

DRAFT

Section 2.0
Background Information

2.1 Site Location and Description

The site is located at 16131 West Colonial Drive Oakland, Florida 34787. The site is an active Chevron Gas Station with 3 underground storage tanks. Dispensers are located west and south of the tank farm. The site is surrounded with commercial offices and residential properties. A Site Location Map is included as **Figure 1**.

2.2 Previous Work by Others

A Closure Assessment Report (CAR) was performed by Hy-Tech on November 2014 to address a crack in the primary corrugated plastic wall of the premium unleaded spill containment bucket (SCB). Subsequent hydrostatic testing was also performed on the two other tanks which resulted in the replacement of all the SCB's. Soil impacts were identified in the closure assessment.

A SAR was performed by Stillwater on March 7, 2016 to address the soil impacts identified in the CAR report. The SAR identified no soil impacts but found groundwater impacts in monitoring well MW-3.

On January 3, 2017 Stillwater conducted the 1st Quarter NAM event. Benzene was detected in monitoring well MW-3 at a concentration of 11ug/L, which exceeds the FDEP Groundwater Cleanup Target Level (GCTL) of 1 ug/L.

On April 19, 2017 Stillwater conducted the 2rd Quarter NAM event. Benzene was detected in monitoring well MW-3 and MW-5 at a concentration of 9.1 ug/L and 3.1 ug/L, which exceeds the FDEP GCTL of 1 ug/L.

On July 10, 2017 Stillwater conducted the 3rd Quarter NAM event. No analyzed chemicals were detected above GCTLs.

DRAFT

On October 9, 2017 Stillwater conducted the 4th Quarter NAM event. Benzene was detected in monitoring well MW-3 at a concentration of 4.8 ug/L, which exceeds the FDEP GCTL of 1 ug/L. This event marked the end of the approved NAM plan.

On December 19, 2017 OCEPD approved a Semi-Annual NAM plan for the site.

On March 1, 2018 Stillwater conducted the 1st Semi-Annual NAM event. No constituents were detected at concentrations above the GCTLs in monitoring wells MW-3 and MW-5.

DRAFT

Section 3.0
Groundwater Monitoring

3.1 Groundwater Elevations

On September 5, 2018 depth to water elevations were collected from the 5 monitoring wells to determine groundwater flow direction. Monitoring well MW-5 was determined to be the Temporary Point of Compliance (TPOC) well. The groundwater elevations and flow direction is illustrated on **Figure 2**. A Groundwater Elevation Summary is included in **Table 1**.

3.2 Groundwater Sampling

On September 5, 2018 Stillwater collected groundwater samples from MW-3 and MW-5. Prior to collecting the groundwater sample, the monitoring well was purged using a peristaltic pump. During purging, the required physical parameters (pH, temperature, specific conductance, dissolved oxygen, turbidity, and depth to water) were monitored for stabilization. Once the field parameters stabilized, the groundwater sample was collected by applicable flow techniques. The samples were then placed on ice with a completed chain of custody and delivered to SRL in Orlando, Florida for analysis. Copies of the groundwater sampling and calibration logs are contained in **Appendix B**.

3.3 Groundwater Analysis

The groundwater samples from MW-3 and MW-5 were analyzed for BTEX and MTBE using EPA Method 8260. Benzene was detected in monitoring well MW-3 at a concentration of 1 ug/L, which is at the FDEP GCTL of 1 ug/L. No other constituents were detected at concentrations above the GCTLs. This is the 2nd event that the analyzed chemicals have not been above GCTLs. A Groundwater Analytical Summary is included in **Table 2** and a copy of the laboratory report is included in **Appendix A**. The groundwater concentrations are illustrated on **Figure 3**.

DRAFT

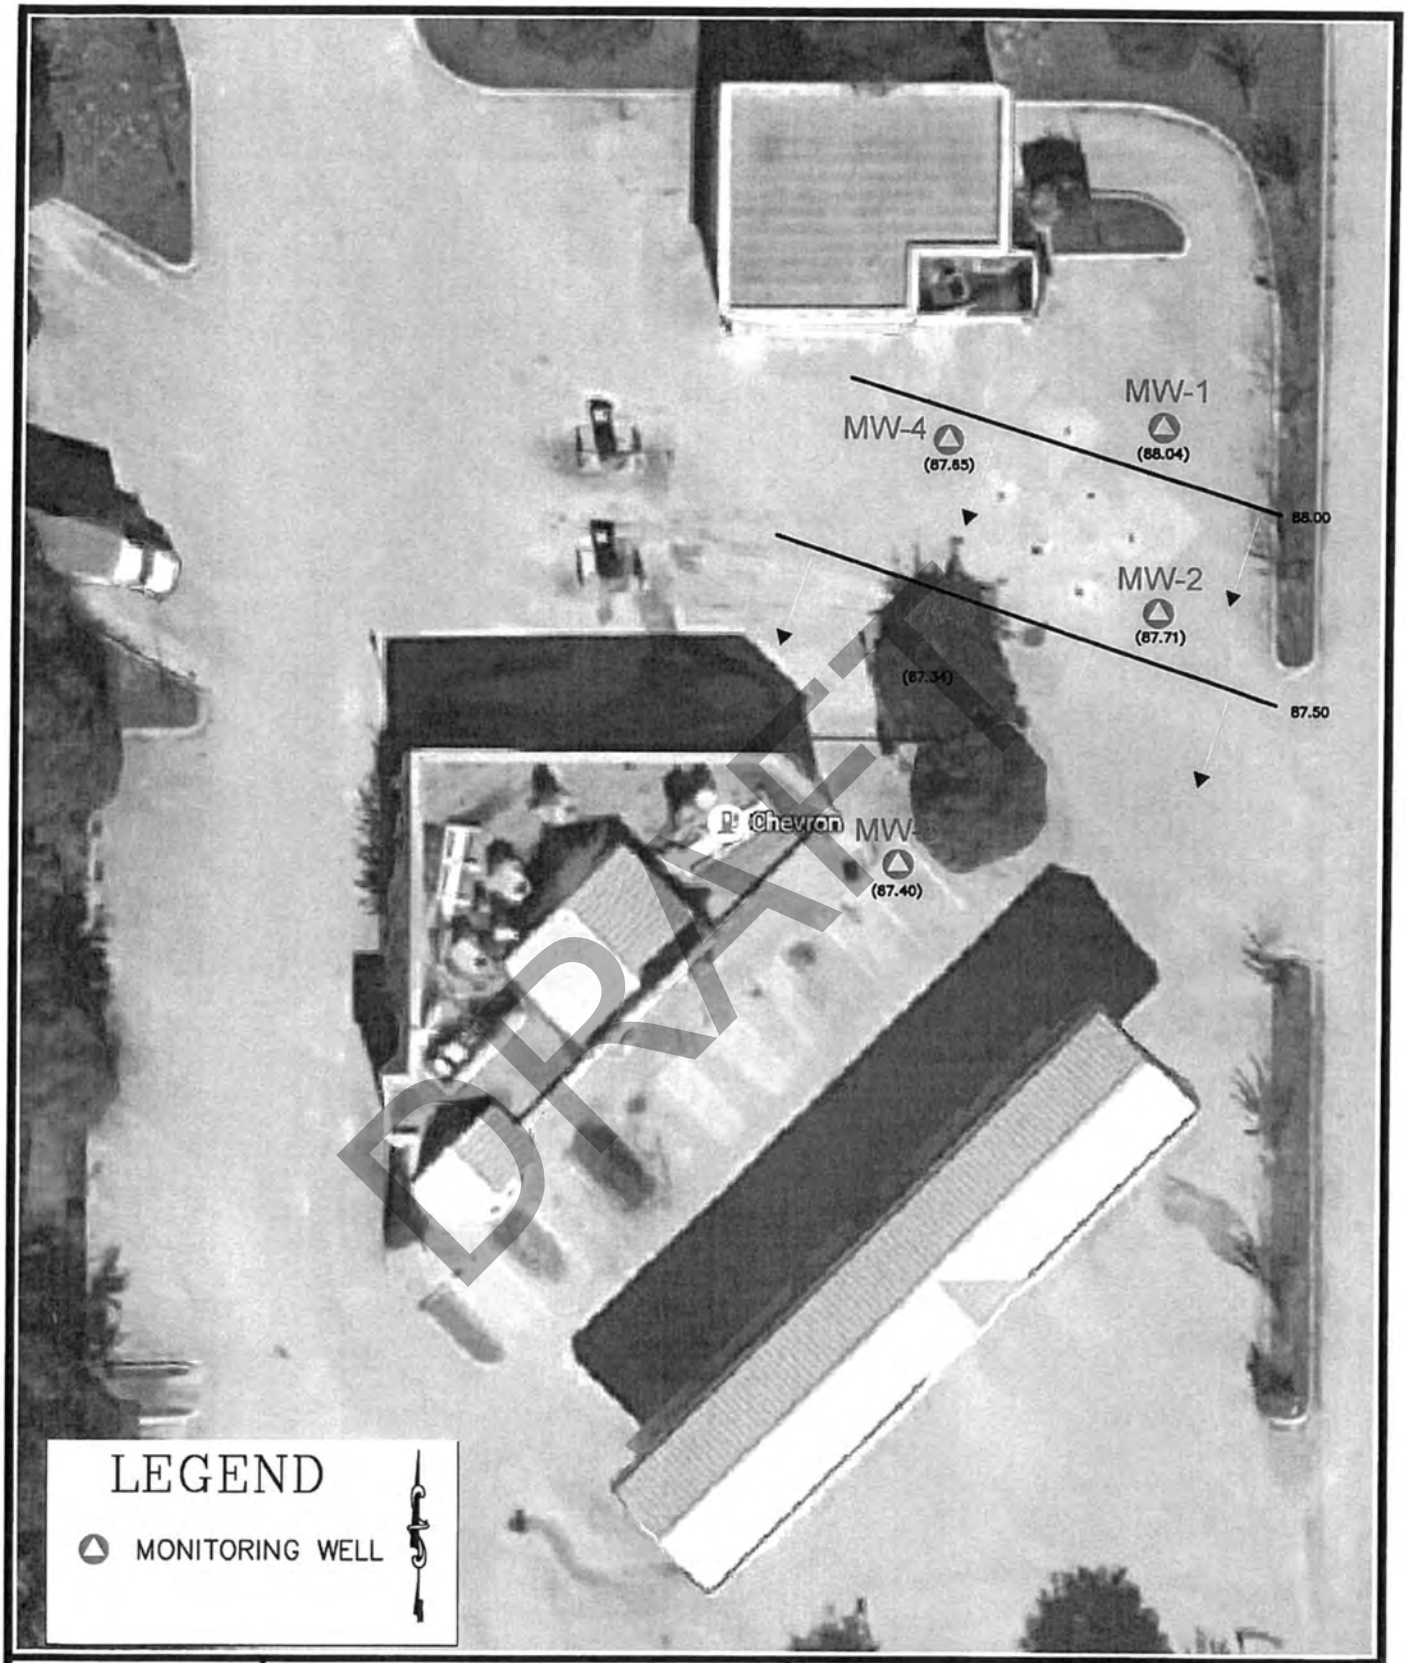

Section 4.0
Conclusions and Recommendations

Having completed the NAM event, Stillwater concludes:

- Groundwater elevations indicated a southeast flow direction; and
- No constituents were detected at concentrations above the GCTLs.

Stillwater recommends that the site receive a No Further Action (NFA) order based on the analyzed chemicals not exceeding GCTLs for two consecutive sampling events.

RE: **Natural Attenuation Monitoring Report**
Chevron-Oakland PC#144
16131 W. Colonial Dr.
Oakland, Orange County, FL
FDEP Facility ID # 489805042
Discharge Date: November 6, 2014 (Non Program)
Site Priority Score: 85

To Whom It May Concern:

The Orange County Environmental Protection Division (OCEPD), on behalf of the Florida Department of Environmental Protection (FDEP), Petroleum Restoration Program (PRP), has reviewed the *Natural Attenuation Monitoring Report (NAM Report)* dated September 25, 2018, received October 8, 2018. Your environmental consultant, Stillwater Technologies Inc. (Stillwater) submitted this NAM Report on your behalf. We found this report to be adequate in documenting the work performed at the above-referenced site in conjunction with Chapter 62-780, Florida Administrative Code (F.A.C.).

The benzene in MW-3 is at 1.1 µg/L. By FDEP rounding guidelines this value is rounded down to 1, meeting Groundwater Cleanup Target Levels (GCTL). With two successive groundwater sampling events finding the analytes of interest at or below GCTLs, the site meets the closure criteria for Site Rehabilitation Completion without conditions. The OCEPD concurs with your consultant's conclusion that the site qualifies for Site Rehabilitation Completion/No Further Action without conditions. A Site Rehabilitation Completion Order will be submitted to FDEP, PRP under separate cover.

We look forward to hearing from you. If you should have any questions, please contact me at (407) 836-1548.

Sincerely,

Roger Clark

B.	Residence	H.	Local government	N.	Indian land
C.	Fuel user/non-retail	I.	County government	T.	Coastal bulk petroleum or chemical storage
D.	Inland bulk petroleum storage	J.	Collection station	V.	Marine fueling facility
E.	Industrial plant	K.	Inland bulk chemical storage	Z.	Other: _____
F.	Federal government	L.	Chemical user		

#6 - FINANCIAL RESPONSIBILITY CODES

A. State Program - Third party liability/State contractor (FPLIPA/AIG).
B. State Program - Third party liability/Self insurance with other carrier; other federal financial responsibility mechanism.
C. Other coverage meeting federal financial responsibility requirements.
D. None

#11 - CONTENT CODES

A.	Leaded gasoline	H.	Fuel - generator or pump	R.	Ammonia compound
B.	Unleaded gasoline	K.	Kerosene	S.	Chlorine compound
C.	Gasohol	L.	Waste oil	T.	Hazardous substance (CERCLA)
D.	Vehicular diesel	M.	Fuel oil: on-site heat use only; all USTs or ASTs < 30K gals	U.	Mineral acid
E.	Aviation gasoline	N.	Fuel oil: distribution or on-site heat use ASTs > 30K gals	V.	Grades 5 & 6, bunker 'C' residual oils
F.	Jet fuel	O.	New & lube oil	W.	Petroleum-base additive
G.	Fuel - emergency generator	Q.	Pesticide	X.	Other, miscellaneous petroleum-base product

#13 - TANK PLACEMENT CODES

A = Aboveground tank
U = Underground tank
C = Aboveground Compression Vessel
D = Underground Compression Vessel

#14 - TANK CONSTRUCTION CODES - choose one primary construction and all other codes that apply

Primary Construction:	C.	Steel			
	D.	Unknown		X.	Concrete
	E.	Fiberglass		Y.	Polyethylene
	F.	Fiberglass-clad steel		Z.	Other DER approved tank material
Overfill/Spill:	A.	Ball check valve		M.	Spill containment bucket
	N.	Flow shut-off		P.	Level gauges, high-level alarms
	O.	Tight fill		Q.	Other DER approved protection method
Corrosion Protection:	G.	Cathodic protection - sacrificial anode		H.	Cathodic protection - impressed current
Secondary Containment:	I.	Double wall construction: single material; outer tank material same as primary (inner) tank material			
	R.	Double wall construction: dual material; outer tank constructed of concrete, approved synthetic material or tank "jacket"			
	J.	Synthetic liner in tank excavation			
	K.	Concrete, synthetic material, and/or offsite clays beneath AST and in containment area			
	S.	Other DER approved secondary containment system			
Miscellaneous attributes:	B.	Internal lining		T.	Small use tank
	L.	Compartmented		U.	Field erected tank

#15 - PIPING CONSTRUCTION CODES - choose one primary construction and all other codes that apply

Primary Construction:	B.	Steel or galvanized metal		Y.	Unknown
	C.	Fiberglass		Z.	Other DER approved piping material
	N.	Approved synthetic material			
Corrosion Protection:	D.	External protective coating			
	E.	Cathodically protected with sacrificial anode or impressed current			
Secondary Containment:	F.	Double wall construction: single material; outer pipe material same as primary (inner) pipe material			
	M.	Double wall construction: dual material; outer pipe constructed of approved synthetic material or pipe "jacket"			
	G.	Synthetic liner or box/trench liner in piping excavation or pipe containment area			
Miscellaneous attributes:	A.	Aboveground, no contact with soil		K.	Dispenser liners
	I.	Suction piping system		L.	Bulk product system
	J.	Pressurized piping system		H.	Airport/seaport hydrant system

#16 - LEAK DETECTION METHODS - choose all that apply

Site/general:	A.	Automatically sampled wells		B.	Manually sampled wells
	C.	Groundwater monitoring plan		D.	SPCC Plan
	N.	Groundwater monitoring		O.	Vapor monitoring
	I.	Not required - see rule for exemptions		X.	None
	Y.	Unknown		Z.	Other DER approved monitoring method
Tank monitoring:	E.	Interstitial space - tank/liner		L.	Automatic tank gauging
	F.	Interstitial space - double wall tank		M.	Manual tank gauging
Piping monitoring:	G.	In-line detector, auto shut off		J.	Interstitial space - piping/liner
	H.	In-line flow restrictor		K.	Interstitial space - double wall piping

#17 - TANK STATUS & DISPOSAL CODES

A. Properly closed in place - UST filled with sand, concrete or other inert material; AST rendered unusable
B. Removed from the site
* A or B: Closure Assessment required after 12/10/90 (UST); 03/12/91 (AST) - EDI sites excluded
F. Unmaintained tank - not in use or to be used, and not properly disposed
T. Temporarily out-of-service
U. In-service

Stationary Tank Registration/Notification Form

Form 17-1.218(2)

(L)

(Make corrections to name and addresses here)

1. Facility/Addressee name _____

Facility address 15389 (W) SR 50
Oakland, Fl 32760

Mailing address _____

NAME: Ross Grove Service
MAIL ADDRESS: P O Box 167
CITY/STATE: Oakland Fl 32760

FACILITY LOCATION

ADDRESS: ~~P O Box 167~~
CITY/STATE: Oakland Fl 32760

Use this form to comply with the following requirements of the Stationary Tank Rule Chapter 17-61, Florida Administrative Code.

1. Each owner or operator shall register the following with the department
   a. All existing facilities by December 31, 1984 (Questions 1-19)
   b. All new storage systems or facilities at least 10 days prior to the start of installation of tanks except in the case of emergency replacement (Questions 1-19)
   c. A non-pollutant containing installation which is to be converted to a facility at least 10 days prior to the placement of pollutants in such a facility (Questions 1-19)
2. Each owner or operator shall notify the department of the following
   a. All storage systems within 10 days of abandonment (Questions 1-12, 16, 20)
   b. Facility sale within 10 days of sale. Notice shall be made by the seller. (Answer questions 1-7 and 11. Question 7 about the new owner.)
   c. Retrofitting within 10 days of completion (Questions 1-19)
3. You may notify the department of a change of operator. (Questions 1-6)

   Effective date (only for change of operator) _____ Telephone number ( )
7. Company/Person owning tanks and piping Ross Grove Service, Inc.
   Address P.O. Box 167, Oakland, FL 32760
   Contact person Jack H. Ross Telephone number 305 656-3702 OK BD
   Effective date (only for change of owner) _____
8. How many tanks at this location have an individual storage capacity of greater than 550 gallons and store vehicular fuel made from petroleum?
   XX 1 Underground 0 Aboveground
9. Facility location Latitude ° " Longitude ° " Section 21 Township 22 Range 27
   This information is listed on property deeds, and in the offices of the property appraiser and tax assessor
10. Sketch the facility on a separate page showing the APPROXIMATE location of buildings, tanks, and dispensers.
    A. Draw a line from tank to dispenser to show which are connected by piping.
    B. Label each tank as Tank 1, Tank 2, etc.
    C. Write the date and your facility number if known, or name and address exactly as it appears above.
    D. Keep a copy of your sketch.

REFER TO TANKS BY THESE LABELS IN ANY COMMUNICATION WITH THE DEPARTMENT
DESCRIBE PIPING BY THE NUMBER OF THE TANK IT IS ATTACHED TO

11. TO THE BEST OF MY KNOWLEDGE AND BELIEF ALL INFORMATION SUBMITTED ON THIS FORM IS TRUE, ACCURATE, AND COMPLETE

DER FORM 17-1.218(2)

DRAFT

INSTRUCTIONS: Use one row across for each tank counted in question 8. The tank number must agree with the number on the sketch of your facility. A new tank installed where a registered tank was removed should be given the number of the removed tank with an R and a number added. Example: Tank 3R1 is first replacement for tank 3. It is in the same place where tank 3 was. Tank 3R2 is the second replacement for tank 3. Attach extra pages if necessary. Write your facility number, if known, or name and address, exactly as it appears on the front of the form, on all extra pages.

(12) Tank Number	(13) Tank Size in Gallons	(14) Tank Contents (see List 14 below)	(15) Tank Installation Date. Month/Year (put X if unknown)	(16) Underground or Aboveground Tank (write U or A)	(17) Tank Construction Specifics (see List 17U or 17A below)	(18) Integral Piping System Construction Specifics (see List 18 below)	(19) Monitoring System Type (see List 19)	(20) Tank Disposal Method (see List 20)
1	560	A	1955	U	C	C	N Y	

DRAFT

ENTER THE LETTERS WHICH APPLY TO EACH TANK IN THE BOXES ABOVE. **WRITE ALL THAT APPLY.**

List 14

Tank contents are:

A. leaded gasoline.
B. unleaded gasoline.
C. Alcohol enriched gasoline.
D. diesel fuel.
E. aviation fuel.
Z. other.

List 17U
UNDERground Tanks

Underground tank:

A. has overfill protection.
B. is interior lined.
C. is painted/asphalted steel.
D. is of unknown type.
E. is fiberglass type.
F. is fiberglass-clad steel.
G. is sacrificial anode type.
H. is impressed current type.
I. is double walled.
J. is concrete.
K. is in secondary containment.
N. is or has none of the above.

List 17A
ABOVEground Tanks

Aboveground tank:

O. has overfill protection.
P. is surrounded by impervious dike.
Q. is surrounded by earth dike.
R. rests on an inpervious base.
S. rests on a earth/gravel base.
T. has interior lined bottom.
U. is cathodically protected.
V. is built of/coated with corrosion resistant materals.
W. is supported above the soil.
Z. is or has none of the above.

List 18

Integral Piping System has:

A. no parts in contact with the soil.

Parts contacting the soil which are:

B. unprotected metal.
C. built of corrosion resistant materials.
D. corroson resistant coated.
E. cathodically protected.
F. double-walled.
G. within a secondary containment.
H. interior lined.
M. none of the above.

List 19

Monitoring system is:

A. automatically sampled well(s).
B. manually sampled well(s).
C. groundwater monitoring plan.
D. SPCC plan.
E. well/detector in secondary containment.
F. in-ground detector.
G. within walls of double-walled tank.
H. continuous in piping.
I. not required.
N. none of the above.

List 20

Tank disposal method.

A. Filling.
B. Removal.
C. Retrofitting.
F. Other.

CODES LIST FOR DER STORAGE TANK REGISTRATION FORM 17-761.900(2)

#2 - FACILITY TYPE

- A. Retail station
- B. Residence
- C. Fuel user/non-retail
- D. Inland bulk petroleum storage
- E. Industrial plant
- F. Federal government
- G. State government
- H. Local government
- I. County government
- J. Collection station
- K. Inland bulk chemical storage
- L. Chemical user
- M. Agricultural
- N. Indian land
- T. Coastal bulk petroleum or chemical storage
- V. Marine fueling facility
- Z. Other; please specify

#6 - FINANCIAL RESPONSIBILITY

- A. State Program - Third party liability/State contractor (FPLIPA/AIG).
- B. State Program - Third party liability/Self insurance with other carrier; other federal financial responsibility mechanism.
- C. Other coverage meeting federal financial responsibility requirements.
- D. None

#9 - TANK ID NUMBER
(number sequentially, 1,2,3; or provide specific identifying name or number; 6 characters, maximum)

#10 - TANK SIZE IN GALLONS

#11 - CONTENT

- A. Leaded gasoline
- B. Unleaded gasoline
- C. Gasohol
- D. Vehicular diesel
- E. Aviation gasoline
- F. Jet fuel
- G. Fuel - emergency generator
- H. Fuel - generator or pump
- K. Kerosene
- L. Waste oil
- M. Fuel oil: on-site heat use only; all USTs or ASTs < 30K gals
- N. Fuel oil: distribution, or on-site heat use ASTs > 30K gals
- O. New & lube oil
- Q. Pesticide
- R. Ammonia compound
- S. Chlorine compound
- T. Hazardous substance (CERCLA)
- U. Mineral acid
- V. Grades 5 & 6, bunker 'C' residual oils
- W. Petroleum-base additive
- X. Other, miscellaneous petroleum-base product

#12 - INSTALLATION DATE (mm/yy)

#13 - TANK PLACEMENT

A = Aboveground tank
U = Underground tank
C = Aboveground Compression Vessel
D = Underground Compression Vessel

#14 - TANK CONSTRUCTION - choose one primary construction and all other codes that apply; primary is inner tank construction for double wall tanks

Primary Construction:
- C. Steel
- D. Unknown
- E. Fiberglass
- F. Fiberglass-clad steel
- X. Concrete
- Y. Polyethylene
- Z. Other DER approved tank material

Overfill/Spill:
- A. Ball check valve
- N. Flow shut-off
- O. Tight fill
- M. Spill containment bucket
- P. Level gauges, high-level alarms
- Q. Other DER approved protection method

Corrosion Protection:
- G. Cathodic protection - sacrificial anode
- H. Cathodic protection - impressed current

Secondary Containment:
- I. Double wall construction: single material; outer tank material same as inner tank material
- R. Double wall construction: dual material; outer tank constructed of concrete, approved synthetic material or tank "jacket"
- J. Synthetic liner in tank excavation
- K. Concrete, synthetic material, and/or offsite clays beneath AST and in containment area
- S. Other DER approved secondary containment system

Miscellaneous attributes:
- B. Internal lining
- L. Compartmented
- U. Field erected tank

#15 - PIPING CONSTRUCTION - choose one primary construction and all other codes that apply; primary is inner pipe construction for double wall piping

Primary Construction:
- B. Steel or galvanized metal
- C. Fiberglass
- N. Approved synthetic material
- Y. Unknown
- Z. Other DER approved piping material

Corrosion Protection:
- D. External protective coating
- E. Cathodically protected with sacrificial anode or impressed current

Secondary Containment:
- F. Double wall construction: single material; outer pipe material same as inner pipe material
- M. Double wall construction: dual material; outer pipe constructed of approved synthetic material or pipe "jacket"
- G. Synthetic liner or box/trench liner in piping excavation or pipe containment area

Miscelleneous attributes:
- A. Aboveground, no contact with soil
- I. Suction piping system
- J. Pressurized piping system
- K. Dispenser liners
- L. Bulk product system
- H. Airport/seaport hydrant system

#16 - LEAK DETECTION METHODS - choose all that apply

Site/general:
- A. Automatically sampled wells
- B. Manually sampled wells
- C. Groundwater monitoring plan
- D. SPCC Plan
- N. Groundwater monitoring system
- O. Vapor monitoring system
- I. Not required - see rule for exemptions
- X. None
- Y. Unknown
- Z. Other DER approved monitoring method

Tank monitoring:
- E. Interstitial space - tank/liner
- F. Interstitial space - double wall tank
- L. Automatic tank gauging
- M. Manual tank gauging

Piping monitoring:
- G. In-line detector, auto shut off
- H. In-line flow restrictor
- J. Interstitial space - piping/liner
- K. Interstitial space - double wall piping

#17 - TANK STATUS &/or TANK DISPOSAL

- A. Properly closed in place - UST filled with sand, concrete or other inert material; AST rendered unusable
- B. Removed from the site
- * A or B: Closure Assessment required after 12/10/90 (UST); 03/12/91 (AST) - EDI sites excluded
- F. Unmaintained tank - not in use or to be used, and not properly disposed
- T. Temporarily out-of-service
- U. In-service

#18 - GALLONS LEFT in out-of-service tank

#19 - LAST USED DATE (mm/yy) or date of permanent closure

The Hazardous Waste Management Program has reviewed your application for a hazardous waste DER/EPA I.D. Number.

Based on the information received you have been issued the following identification number for the facility at 1240 US HWY 545 , WINTER GARDEN

Facility ID # FLD984250753

Your facility status is the following:
Conditionally exempt small quantity generator.

If any of the information on the Hazardous Waste activity form changes, please notify us in writing at the letterhead address. For further assistance, please call 904/488-0300.

RE: Site Assessment Report
Circle K #7490
14990 Colonial Drive
Winter Garden, Orange County, Florida
Facility ID #48/8521892
Work Order#2012-48-W96664
Site Priority Score: 46 (PLIRP)
Discharge Date: August 18, 1989

DRAFT

Dear Mr. Green:

Environmental Compliance Services, Inc. (ECS), on behalf of Circle K Stores Inc., has completed site assessment activities at the Circle K Store #7490 located at 14990 Colonial Drive in Winter Garden, Florida in accordance with the Florida Department of Environmental Protection (FDEP) Site Assessment Rules established by Chapter 62-770.600 Florida Administrative Code (FAC). A site map is presented as **Figure 1**. A copy of the FDEP Work Order #2012-48-W96664 and associated verbal change orders (VCOs) is provided in **Appendix A**.

Facility Information
The facility formerly operates as a retail petroleum station and a convenience store. The storage tank system consists of four 10,000-gallon capacity fiberglass underground storage tanks (USTs) that were installed in 1985, and upgraded with Parabeam fiberglass liner in August 2008. Three of the tanks hold unleaded gasoline and one holds diesel fuel. A current USGS topographic map including the quadrangle name and scale identifying the site in relation to the surrounding area is presented as **Figure 1**. A site plan is provided as **Figure 2**.

Site History
A discharge was reported for the site on August 21, 1989, which was determined to be eligible for the Florida Petroleum Liability Insurance and Restoration Program (PLIRP) on November 17, 1989. A Contamination Assessment Report (CAR) was submitted on September 14, 1994 with an addendum recommending a monitoring only plan completed on July 28, 1995. The monitoring only plan was approved in August of 1995 but was put on hold due to the site's low priority score. Level 3 Site Assessment Reports (SARs) were submitted for the site on January 20, 2000 and May 3, 2000. A Level 2 SAR with No Further Action Proposal was submitted on August 9, 2000 and subsequently approved. The

site was granted a Site Rehabilitation Completion Order (SRCO) on December 19, 2000.

Between August 4, 2008 and August 25, 2008, Circle K Stores Inc. upgraded the facility's UST system to meet the secondary containment standards. In order to install secondary containment within the existing USTs, a well point system was installed and the area was dewatered on August 6, 2008. Subsequent to the dewatering activities and the completion of the UST upgrade, petroleum impacted groundwater was discovered in two temporary monitoring wells placed directly outside of the tank pit. A Closure Assessment Report was submitted to the Orange County Environmental Protection Division on October 14, 2008.

ECS submitted an SRCO Rescission Request on November 10, 2008, recommending that the SRCO issued on December 19, 2000 be rescinded so that additional Site Assessment activities can be continued under the FDEP Pre-approval program for the August 21, 1989 PLIRP eligible discharge. In a letter dated December 9, 2008, the FDEP rescinded the December 19, 2000 SRCO.

On January 6, 2012, ECS received the Work Order Notification for Work Order No. 2012-48-W96664. The work order required a deliverable of a Site Assessment Report with a due date of February 14, 2012. The first availability to schedule the direct push rig was February 9, 2012, so ECS submitted VCO #1 to request a 45-day extension of the due date to March 30, 2012.

On February 27, 2012, ECS submitted a Site Assessment Report, detailing the soil assessment conducted around the UST area. Eight soil borings (SB-1 through SB-8) were installed and three laboratory soil samples were collected. The soil assessment showed no contaminant concentrations above soil cleanup target levels (SCTLs). A copy of the report is included in **Appendix B**.

Area Use and Potable Well Survey
The area surrounding the site consists primarily of commercial areas. An area use map is presented as **Figure 3**.

A potable well search was performed by visual reconnaissance and well construction permit search from the Saint Johns River Water Management District (SJRWMD). The SJRWMD e-permitting website allow for a search of water well construction permits issued within a given section, township and range (STR). A search of the database revealed one domestic well within ¼ mile of the site, and five irrigation wells within a ¼ mile of the site. No public supply wells were found within a ½ mile of the site.

The Department of Health's (FDOH) Potable Well Survey identified nine small potable wells with the ¼ mile and no large (>150,000 gallons per day) public supply wells within a ½ mile radius of the facility. The water supply well at the Circle K 7490 is considered a small public supply well (<150,000 gallons per day). The FDOH Potable Well Survey is provided in **Appendix C**. The known well details are listed on **Table 1**, and a potable well search map is provided as **Figure 4**.

Monitoring Well Installation and Site Lithology
On May 3, 2012, ECS mobilized to the facility to supervise Preferred Drilling Solutions, during the installation of three permanent monitoring wells (MW-1, MW-2 and MW-3) for groundwater monitoring. The wells were installed utilizing hollow stem augers and were constructed with thirteen feet of 2-inch diameter, schedule 40 PVC, 0.01-inch slotted well screen, and approximately two feet of schedule 40 PVC riser. The wells were completed with 8-inch diameter manholes. All monitoring wells were developed for until the development water was free of sediment. Monitoring well construction diagrams are presented in **Appendix D** and monitoring well construction and development logs are presented in **Appendix E**. Soil lithology was logged during the installation of

DRAFT

the monitoring wells. Soil samples consisted brown/grey fine grained silty sand from land surface to approximately 6 feet followed by grey sandy clay from 6 feet to 15 feet bls. The soil boring logs are provided in **Appendix F** and a geologic cross section is provided as **Figure 5**.

Soil samples were collected at each monitoring well location and screened for organic vapors. Soil vapor headspace analysis was conducted using a MicroFid organic vapor analyzer (OVA) in accordance with Chapter 62-770.200(19), F.A.C. The OVA was calibrated in the field in accordance with the manufactures instructions using 100 parts per million (ppm) methane calibration gas. Instrument calibration documentation is provided in **Appendix G. Table 2** summarizes the soil vapor headspace screening results and indicates that net positive OVA readings (OVA reading greater than 10 ppm) in the vadose zone soils were recorded at MW-1 and MW-2. A peak net OVA map is provided as **Figure 6**. The soil analytical data collected during the February 2012 field event is provided on **Table 3** and shown on **Figure 7**.

Site Hydrogeology

On May 3, 2012, ECS surveyed the top of casing elevations the newly installed monitoring wells MW-1, MW-2 and MW-3. On May 10, 2012,ECS and collected depth to water readings from MW-1, MW-2 and MW-3. The depth to water readings, well casing elevations and corresponding water table elevations are displayed on **Table 4**. A water table elevation contour map (**Figure 8**) developed from the May 10, 2012, monitoring data, displays the groundwater in the surficial aquifer flowing in a easterly direction with an approximate hydraulic gradient of 0.007 ft/ft. The historical groundwater flow direction has been to the east.

Groundwater Sampling

Groundwater samples were collected from monitoring wells MW-1, MW-2 and MW-3 on May 10, 2012. All groundwater samples were collected in accordance with the FDEP Standard Operating Procedures for Field Activities. At each well, dedicated tubing was positioned at a selected elevation within the screened interval of the well and attached to a peristaltic pump located near the wellhead. Depth to water, temperature, pH, turbidity, dissolved oxygen and conductivity readings were measured using a depth to water indicator, a YSI Multi-meter and a LaMotte 2020 Turbidimeter. Instrument calibration documentation is provided in **Appendix G**. The groundwater samples were stored on ice and shipped overnight to Environmental Science Corporation in Mt. Juliet, Tennessee. Groundwater sampling purge logs are presented in **Appendix H**.

The collected groundwater samples from MW-2 and MW-3 were analyzed for the presence of benzene, toluene, ethylbenzene, total xylenes and methyl tert-butyl ether by (BTEX/MTBE) by EPA Method 8260, and for polycyclic aromatic hydrocarbons (PAHs) by EPA Method 8270. The collected groundwater sample from MW-1 was analyzed for the presence of constituents listed in Chapter 62-770 Table B, BTEX/MTBE, 1,2-dichloroethane and other volatile organic halocarbons (VOHs) by EPA Method 8260, for PAHs by EPA Method 8270, for total recoverable petroleum hydrocarbons (TRPHs) by FDEP Method FL-PRO, for 1,2-dibromoethane (EDB) by EPA Method 8011 and for Total Lead by EPA Method 6010. The groundwater analytical results are summarized on **Table 5** and indicate contaminant concentrations were all below either the laboratory detection limits or below the Groundwater Cleanup Target Levels (GCTLs) established under Chapter 62-777, FAC. Copies of the groundwater laboratory analytical reports are presented in **Appendix I.** A groundwater contaminant concentration map is provided as **Figure 9**.

CONCLUSIONS

The following conclusions are based on the site assessment activities performed at the Circle K #7490 located at 14990 W. Colonial Drive in Winter Garden, Florida.

DRAFT

- Free product is not present.
- The soil analytical results indicate that petroleum hydrocarbon impacted soil is not present beneath the site.
- Three shallow monitoring wells were installed on-site to define the horizontal extent of groundwater contamination.
- The depth to water at the facility ranged from 13.00 feet bls to 13.02 feet bls on May 10, 2012. The direction of groundwater flow in the surficial aquifer is to the east at an average hydraulic gradient of 0.007 feet per foot (ft/ft).
- The groundwater analytical results indicate that petroleum hydrocarbon impacted groundwater is not present beneath the site.

5.0 RECOMMENDATIONS

Based on the site assessment results, ECS proposes no further action, and recommends that a Site Rehabilitation Completion Order be issued for the August 18, 1989 discharge.

If you have any questions or comments concerning this Site Assessment Report, please contact me at your earliest convenience.

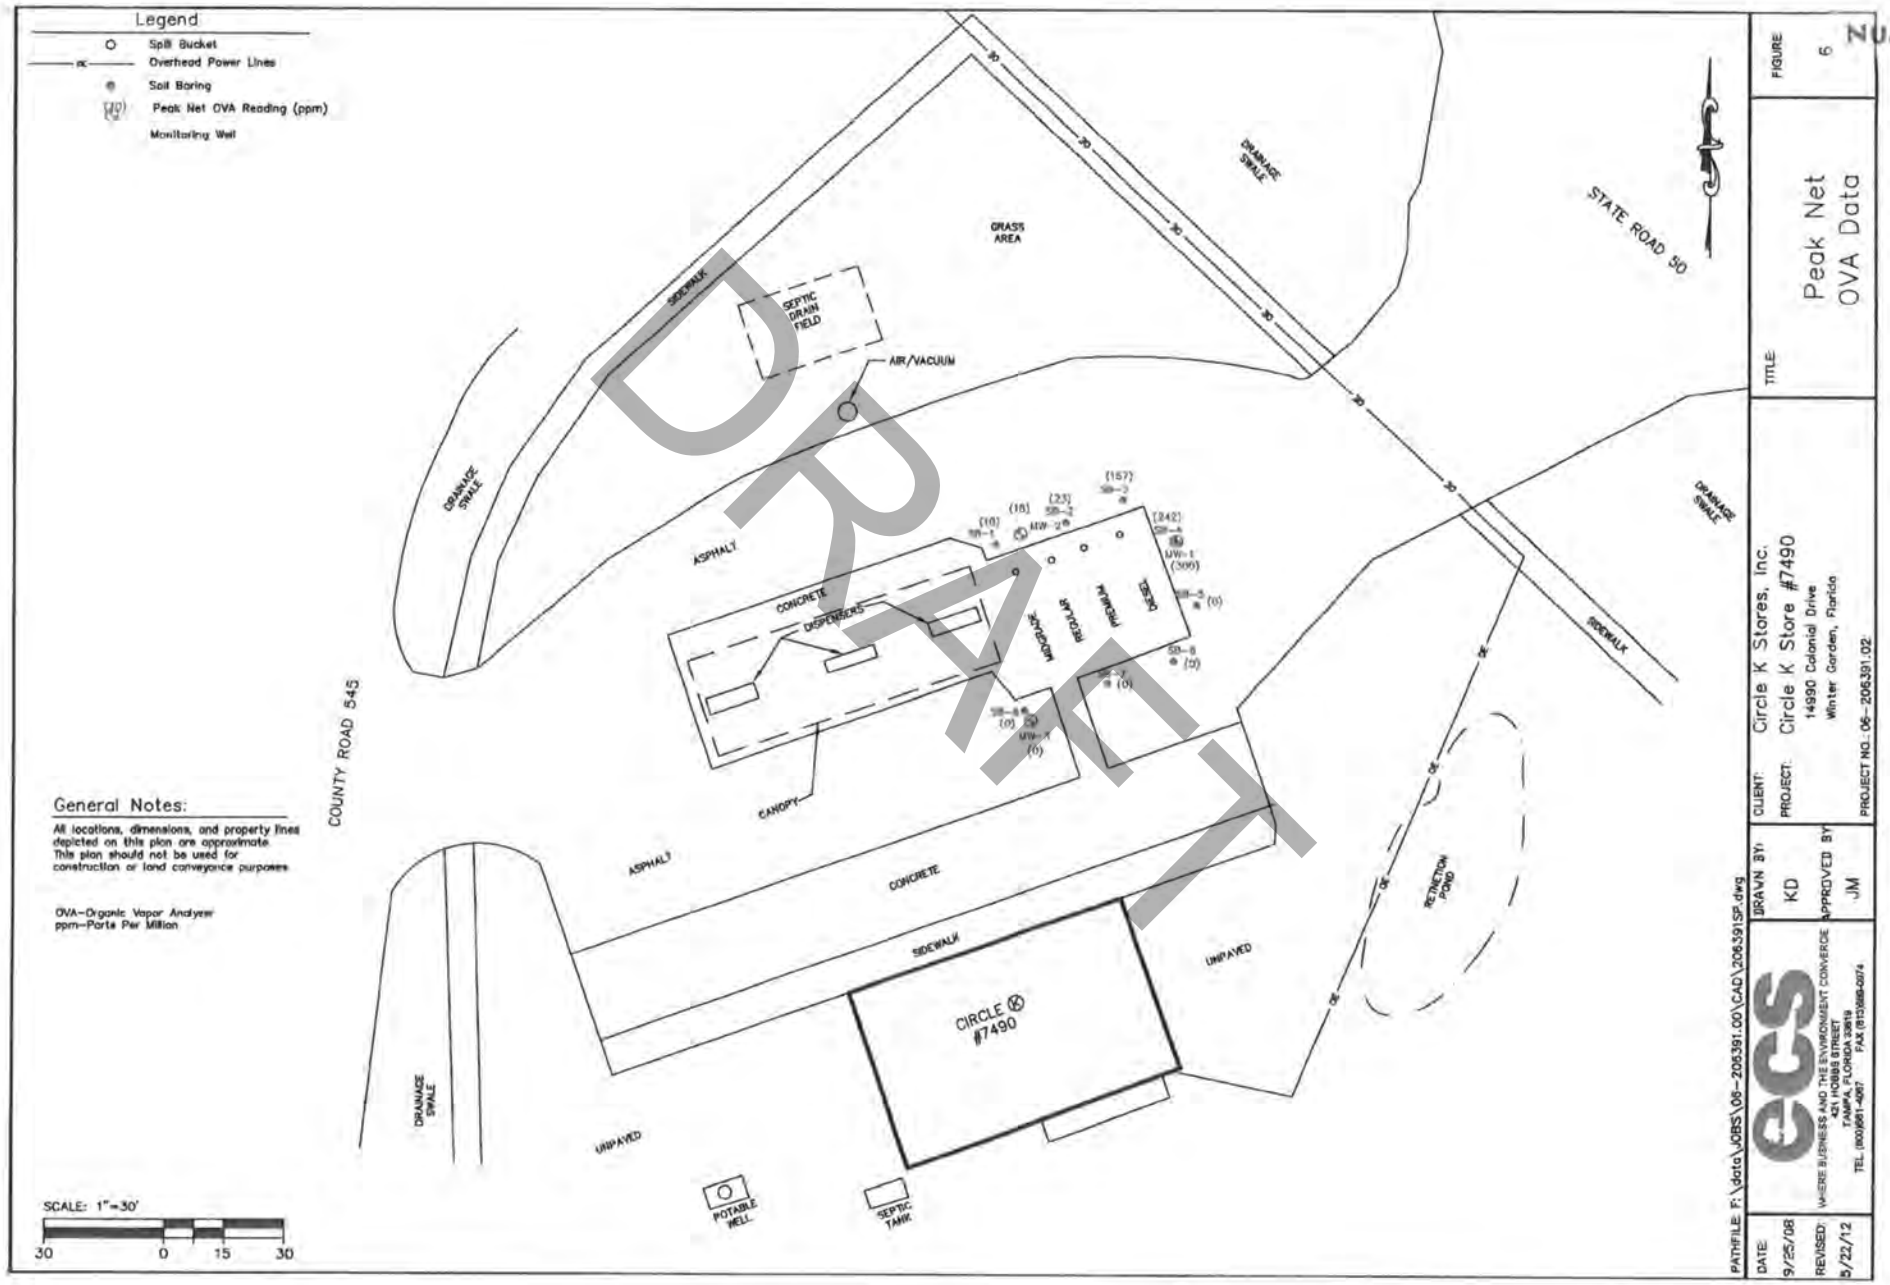

Sincerely,
Environmental Compliance Services, Inc.

Subject: Site Rehabilitation Completion Order
Circle K #7490
14990 Colonial Drive
Winter Garden, Orange County
FDEP Facility ID# 488521892
Discharge Date: August 18, 1989 (PLRIP)
Discharge Score: 46

Dear Mr. Stieben:

The Orange County Environmental Protection Division (OCEPD), on behalf of the Florida Department of Environmental Protection (Department), has reviewed the Site Assessment Report (SAR) and No Further Action Proposal (NFAP) dated May 29, 2012 (received May 30, 2012), and the Monitoring Well Abandonment Report dated August 27, 2012 (received August 28, 2012), prepared and submitted by Environmental Compliance Services, Inc. for the petroleum product discharge referenced above. All the documents submitted to date are adequate to meet the site assessment requirements of Rule 62-770.600, Florida Administrative Code (F.A.C.). In addition, documentation submitted with the SAR/NFAP confirms that criteria set forth in Subsection 62-770.680(1), F.A.C., have been met. Please refer to the attached map of the source property and analytical summary table. The SAR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharge referenced above, except as set forth below.

In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Department may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the SAR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

DRAFT

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SAR/NFAP you do not have to do anything. This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

DRAFT

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Circle K Stores, Inc., shall mail a copy of the request to Circle K Stores, Inc. at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Circle K Stores,

Inc., shall mail a copy of the petition to Circle K Stores, Inc. at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;

(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;

(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;

(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;

(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

DRAFT

This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal.

The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding the OCEPD's review of your SAR/NFAP should be directed to Matthew N. Green, P.G. at (407) 836-1431. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 488521892. Please use this identification on all future correspondence with the Department or the OCEPD.

Sincerely,

Robert C. Brown, P.E.
Chief, Bureau of Petroleum Storage Systems

SITE MANAGER SUMMARY REPORT

Facility ID#	488521892
Facility Name:	Circle K #7490
Facility Address:	14990 Colonial Dr. Winter Garden

Discharge 1

Lead Agency:	LP
Score:	46
Technical Status	SRCO

A Discharge Notification Form was submitted 8/89 in response to evidence of leaded or unleaded gasoline contamination discovered due to a sheen and slight odors in the monitoring wells. Assessment was initiated 3/94 and finalized 9/94. An 8-hour pump test was conducted 11/94. A Soil Vapor Extraction pilot test was conducted 1/95. A Monitoring Only Plan was submitted 7/95 and approved 8/95. The approved MOP was not implemented in response to Senate Bill 1290. Source removal activities were conducted 1/98 during which 156.15 tons of petroleum contaminated soils were removed. Supplemental assessment was initiated 12/99 and finalized 8/00. Well abandonment activities were conducted 11/00. The discharge was granted Site Rehabilitation Completion status 12/19/00. Spill bucket replacement activities were performed 8/08 during which 4.46 tons of petroleum impacted soils were removed. Due to the discovery of elevated contamination levels during spill bucket replacement, a request to rescind the Site Rehabilitation Completion Order (SRCO) was submitted 11/08. The request was approved and the SRCO was rescinded 12/08. An Incident Notification Form was submitted 11/11 in response to the discovery of diesel product in the sump during routine inspection. Tests and repairs were scheduled. Supplemental assessment activities were initiated 2/12 and finalized 5/12. Well abandonment activities were conducted 8/12. The discharge was granted Site Rehabilitation Completion status 10/29/12.

01/21/2021
01/21/2021 13:01 hrs., KW/TCI – Met Gordy Ivey, Equipment Manager, on site for a Routine Compliance Inspection of three aboveground storage tank (AST) system for vehicular fueling

Inspection Comments

01/21/2021
Tanks/Piping:

- (1) 12,000-gallon (Diesel), (1) 4,000-gallon (Diesel), (1) 2, 000-gallon (Regular), single-walled, steel, ASTs. The ASTs rest in a sealed, concrete, secondary containment.
The tanks are equipped with:
- Product labels;
- Normal vents;
- Tank exterior coatings appear to be in good condition;
- Bottom-mounted fill ports;
- Overfill protection – secondary containment act as primary overfill protection;
- Secondary containment appears to be clean and dry; sealants appear to be in good condition.
- Electrical grounding wires are present;
- No obvious signs of leakage;

Records:

- Current Storage Tank Registration Placard and facility registration information current and accurate;
- Financial Responsibility: ACE Insurance Company, from 05/01/2019 to 05/01/2020 and Crum and Forster Insurance Company, from 05/01/2020 to 05/01/2021;
- Certification of Financial Responsibility Forms (CFR) – current and accurate;
- Monthly release detection monitoring records reviewed: 06/06/2018 to 01/04/2021; monthly release detection records were performed once a month but not greater than 35 days apart.

Final inspection report e-mailed to Gordy Ivey at: gordy@dewittexc.com.

DRAFT

SEQUENCE OF EVENTS

On Sunday, May 28, 2000, Mr. Bill Parker of Haz-Mat Response contacted the **ACT** Emergency Response Coordinator to request assistance with a diesel spill from a Yellow Freight Systems Inc. tractor-trailer. The incident reportedly involved the release of an estimated 25 to 50 gallons of diesel fuel onto the asphalt roadway and soil of the shoulder of southbound Florida Turnpike at MM 269 near the Daniels Road overpass in Winter Garden, Orange County, Florida.

A member of the **ACT** Emergency Response Team (**ERT**) was dispatched to the scene. Upon arrival at the site at approximately 5:30 pm, the **ACT-ERT** member was briefed by Mrs. Susan Larson with the Orange County Environmental Protection Department (EPD). Mrs. Larson reported that tractor-trailer was traveling southbound on the Turnpike when a tire failed. The rubber separated and propelled into the fuel line causing it to rupture. The ruptured fuel line released an estimated 25 to 50 gallons of diesel fuel in a trailer on the asphalt roadway and onto the soil on the roadway shoulder.

The **ACT-ERT** member collected a representative sample of the diesel contaminated soil for laboratory analysis of the necessary disposal parameters. The soil sample was collected in accordance with **ACT**'s Florida Department of Environmental Protection (FDEP)-approved Comprehensive Quality Assurance Plan (CompQAP) #890550G. The **ACT-ERT** then covered the diesel contaminated soil with 6-mil polyethylene sheeting and departed the site.

The soil sample (#14363) was transferred with a completed chain-of-custody form to STL Precision, an FDEP-approved analytical laboratory in Miramar, Florida. As outlined in the Chapter 62-713 of the Florida Administrative Code (FAC) and Chapter 62-770 FAC, disposal (preburn) analyses were conducted for Purgeable Halocarbons by EPA Method 8021, Total Recoverable Petroleum Hydrocarbon (TRPH) by the Florida Petroleum Range Organics (FL-PRO) Method, and 4 RCRA Total Metals analyses utilizing Series 7000 EPA Methods.

Analytical results confirmed that the soil was within thermal treatment acceptance criteria and excavation activities were scheduled. In accordance with the Florida Underground Facility Damage Prevention and Safety Act (556), the Sunshine State One-Call of Florida, Inc. Call Center ("Call Sunshine") was notified of **ACT**'s intent to perform excavation work along the

DRAFT

roadway shoulder. Ticket #15204313 was issued to **ACT** and utility owners in the area were notified to locate all underground utilities in the impacted area prior to proposed excavation activities.

The **ACT- ERT** returned to the site on Friday, June 2, 2000 to excavate the contaminated soil using a rubber-tired backhoe. The excavation was guided by soil sampling and field screening with a Foxboro™ Organic Vapor Analyzer with a Flame Ionization Detector (OVA-FID) in accordance with protocols specified by **ACT**'s CompQAP.

The OVA-FID is an effective field analytical instrument that detects volatile organic compounds (VOC's) in the soil as gas equivalent units (geu) and is read as parts per million (ppm) VOC's. To discriminate between naturally occurring methane and fuel related VOC's (both of which are detected and reported in total OVA-FID readings), the OVA-FID is fitted with an activated carbon filter that removes the petroleum products from the sample stream and allows only methane to be measured. Total VOC readings from the OVA-FID, adjusted for methane values, result in a calculated net VOC concentration. The net result is directly attributable to volatile fuel-related compounds. The OVA-FID readings are summarized in Table 1.

DRAFT

An area approximately 17-feet long by 18-feet wide by 3-feet deep was excavated near the road. The contaminated soil was loaded into one (1) dump truck for delivery to the disposal facility. The excavation was backfilled and compacted to grade.

The load of contaminated soil (20.36 tons) was delivered to C.A. Meyer Paving & Construction, an FDEP-permitted soil thermal treatment facility in Clermont, Florida. The petroleum contaminated soil will be treated in a rotary kiln / thermal treatment unit in accordance with FAC 62-713 and FDEP permitting and regulatory requirements. After soil treatment and post-burn analyses confirm that the treated soil has met the clean soil criteria identified in Rule 62-777, Meyers officials advise **ACT** that the treated soil will be used only as a road-base material. Manifest #38575 accompanied the load for tracking. The manifest and associated weigh ticket is included as attachments to this report.

CONCLUSIONS

A "Discharge Report" Form and "Source Removal Report" Form were completed by **ACT** and submitted to FDEP South District by facsimile. Copies of both forms and supporting documentation are included as attachments to this report.

A review of final OVA-FID soil field screening results indicates that the levels of VOC's detected following excavation were below the recommended level of 10 ppm. According to FDEP-Bureau of Emergency Response Guidance Document "Implementation Guidance with Respect to Immediate Responses" dated December 11, 1998; no laboratory confirmation soil sample was required to be collected. Based on the observations made during this project, the timely response, the quantity of soil removed, and the OVA-FID field screening results, **ACT** concludes that this environmental clean-up, disposal, and restoration project has met the "Source Removal" criteria established in Rule 62-770.300 FAC and the "No Further Action" criteria cited in Rule 62-770.680 (1) FAC. **ACT** recommends **"No Further Action"** for this release.

Re: Diesel Spill, Florida Turnpike Mile Marker 269 Southbound @ Daniels Road Overpass, Winter Garden, Orange County, Florida
FDEP ID # 489803174
Non-Program Site

Dear Mr. Travis:

On October 10, 2000, the Orange County Environmental Protection Division (OCEPD) received a copy of the No Further Action letter dated September 13, 2000, written by Mr. Guy Hadley of the Florida Department of Environmental Protection (FDEP) the Division of Law Enforcement and theBureau of Emergency Response.

Based on the contents of this letter OCEPD is obligated to concur with the FDEP decision. As stated in the September 13, 2000, letter FDEP does not certify that the site is uncontaminated and reserves the right to require future actions if necessary.

If you should have any questions, please contact me at (407) 836-1420.

Sincerely,

Dana Taylor

SOURCE REMOVAL REPORT AND NO FURTHER ACTION REQUEST

Florida's Turnpike, MP 269 – Traffic Accident
Winter Garden, Orange County, Florida

INTRODUCTION

Handex of Florida, Inc. (Handex) has been authorized by the Florida Department of Transportation (FDOT) Turnpike Enterprise to conduct remedial activities and prepare an Source Removal Report (SRR) for the referenced site. This report is submitted as required by the Florida Department of Environmental Protection (FDEP) under chapter 62-770 Florida Administrative Code (F.A.C.) for the release reported on December 17, 2002 at Milepost 269 on the Florida Turnpike. A copy of the Discharge Report Form (DRF) and the FDOT correspondence to the FDEP is presented in **Appendix A.**

The site is located on the Florida Turnpike at Milepost 269 in the grass median in Winter Garden, Florida. On the United States Geological Survey (USGS) Winter Garden, Florida 7.5 minute topographic quadrangle map the site is located in southeast quarter of the northwest quadrant of Section 25, Township 22 South, Range 27 East. The site location is shown on the area location map, **Figure 1**.

SITE DESCRIPTION AND HISTORY

An accident involving a truck during a rainstorm occurred at approximately 10:20 PM Thursday December 12, 2002. During the accident, the fuel tanks ruptured and an estimated 100 gallons of diesel fuel were discharged into the grass median.

INITIAL RESPONSE

The initial response was performed by the Orange County Fire Department. At the time of the accident, a small bermed area down gradient of the spill area was dug and absorbent material was placed along the berm to inhibit flow of the release. On Friday, December 13, 2002 Handex was notified of the spill and was requested by FDOT to conduct a preliminary assessment and, as necessary, remediation. Handex personnel mobilized to the site to perform preliminary abatement activities and to assess if recovery of additional liquid phase hydrocarbons (LPH) was possible. Absorbent pads and booms were used at the drain entrance and culvert area. Diesel odor was noted in the center of the grass median from the drain area to the accident location. No visual evidence of remaining LPH was observed in the median with the exception of sheen on water located in tire-tracks at the accident location running to the berm (source area). An area approximately 10 feet wide and 90 feet long was placed under visqueen to prevent further runoff. Photographs of the preliminary abatement activities are included in **Appendix B.**

DRAFT

SOIL EXCAVATION

On January 10, 2003, Handex personnel supervised the excavation of approximately 21.13 tons of soil. Handex excavated soils visually impacted by diesel fuel or exhibiting hydrocarbon vapors. The excavated soil was removed from the site by Star Trucking, Inc. and was disposed of by Soil Treatment Services, Inc. A copy of the disposal manifest is included in **Appendix C**.

SOIL SCREENING AND SAMPLING

During the soil excavation, a Handex employee, using a hand auger, collected soil samples from approximately 6 to 8 inches below the excavation area. The target areas that were screened included the initial spill area, the center median drain area and the bermed area at the downgradient limit of the excavation. The headspace of each sample was analyzed in the field using a Foxboro Model 108 organic vapor analyzer (OVA) equipped with a flame ionization detector (FID). Each soil sample that returned an unfiltered OVA reading of above 10 parts per million (ppm) was screened with an inline activated charcoal filter to detect methane vapors. The filtered reading was subtracted from the unfiltered reading to yield a corrected value of detected hydrocarbon vapors. A total of eight soil samples (SS-1 through SS-8) were collected from the excavation limits and were screened. The results of the OVA/FID screening are summarized in **Table 1**.

SOIL QUALITY

Handex collected five confirmation soil samples at the limits of the excavation. The soil samples were analyzed by ELab, Inc. of Ormond Beach, Florida using USEPA Method 8260 for volatile organic aromatic (VOA) compounds (benzene, toluene, ethylbenzene and total xylenes) and methyl tert-butyl ether (MTBE), United States Environmental Protection Agency (USEPA) Method 8310 for polynuclear aromatic hydrocarbons (PAHs), and FL-PRO for total recoverable petroleum hydrocarbons (TRPH). Hydrocarbon concentrations exceeding the soil cleanup target levels (SCTLs) groundwater leachability standards as stated in Chapter 62-777, F.A.C., Table II, were not reported in any of the soil samples submitted for laboratory analysis.

Soil sample OVA and analytical data are presented in **Tables 1** and **2,** respectively. The soil sample locations are presented on **Figure 2.** A soil concentration map showing the analytical results is presented as **Figure 3**. The soil laboratory analytical report and chain of custody documentation are included in **Appendix D.**

GROUNDWATER SAMPLING

On January 9, 2003, Handex installed two borings to obtain groundwater samples (GP-1 and GP-2) using a direct push probe unit. The water table was observed to be approximately 24 to 26 feet below land surface (bls). A four foot drop screen was pushed to a depth of 28 feet bls. The screen was then opened (slotted section from 24 to 28 feet), and a sample was acquired using a peristaltic pump. Boring logs are provided in **Appendix E**. The boring locations are shown on the site plan in **Figure 2**.

DRAFT

Once groundwater sampling was completed, the drop screens were removed and each boring location was backfilled with native soil and covered with sod.

GROUNDWATER QUALITY

Groundwater samples were collected from each of the two direct push borings and analyzed by ELab using USEPA Method 8021 for VOAs and MTBE, USEPA Method 8310 for PAHs and FL-Pro for TRPH. Dissolved hydrocarbon concentrations exceeding the groundwater cleanup target levels (GCTLs) standards as stated in Chapter 62-777, Florida Administrative Code, were not reported in any of the groundwater samples submitted for laboratory analysis. Copies of the groundwater laboratory analytical report are presented in **Appendix D**. A groundwater concentration map is presented as **Figure 4** and the concentration data are summarized in **Table 3.**

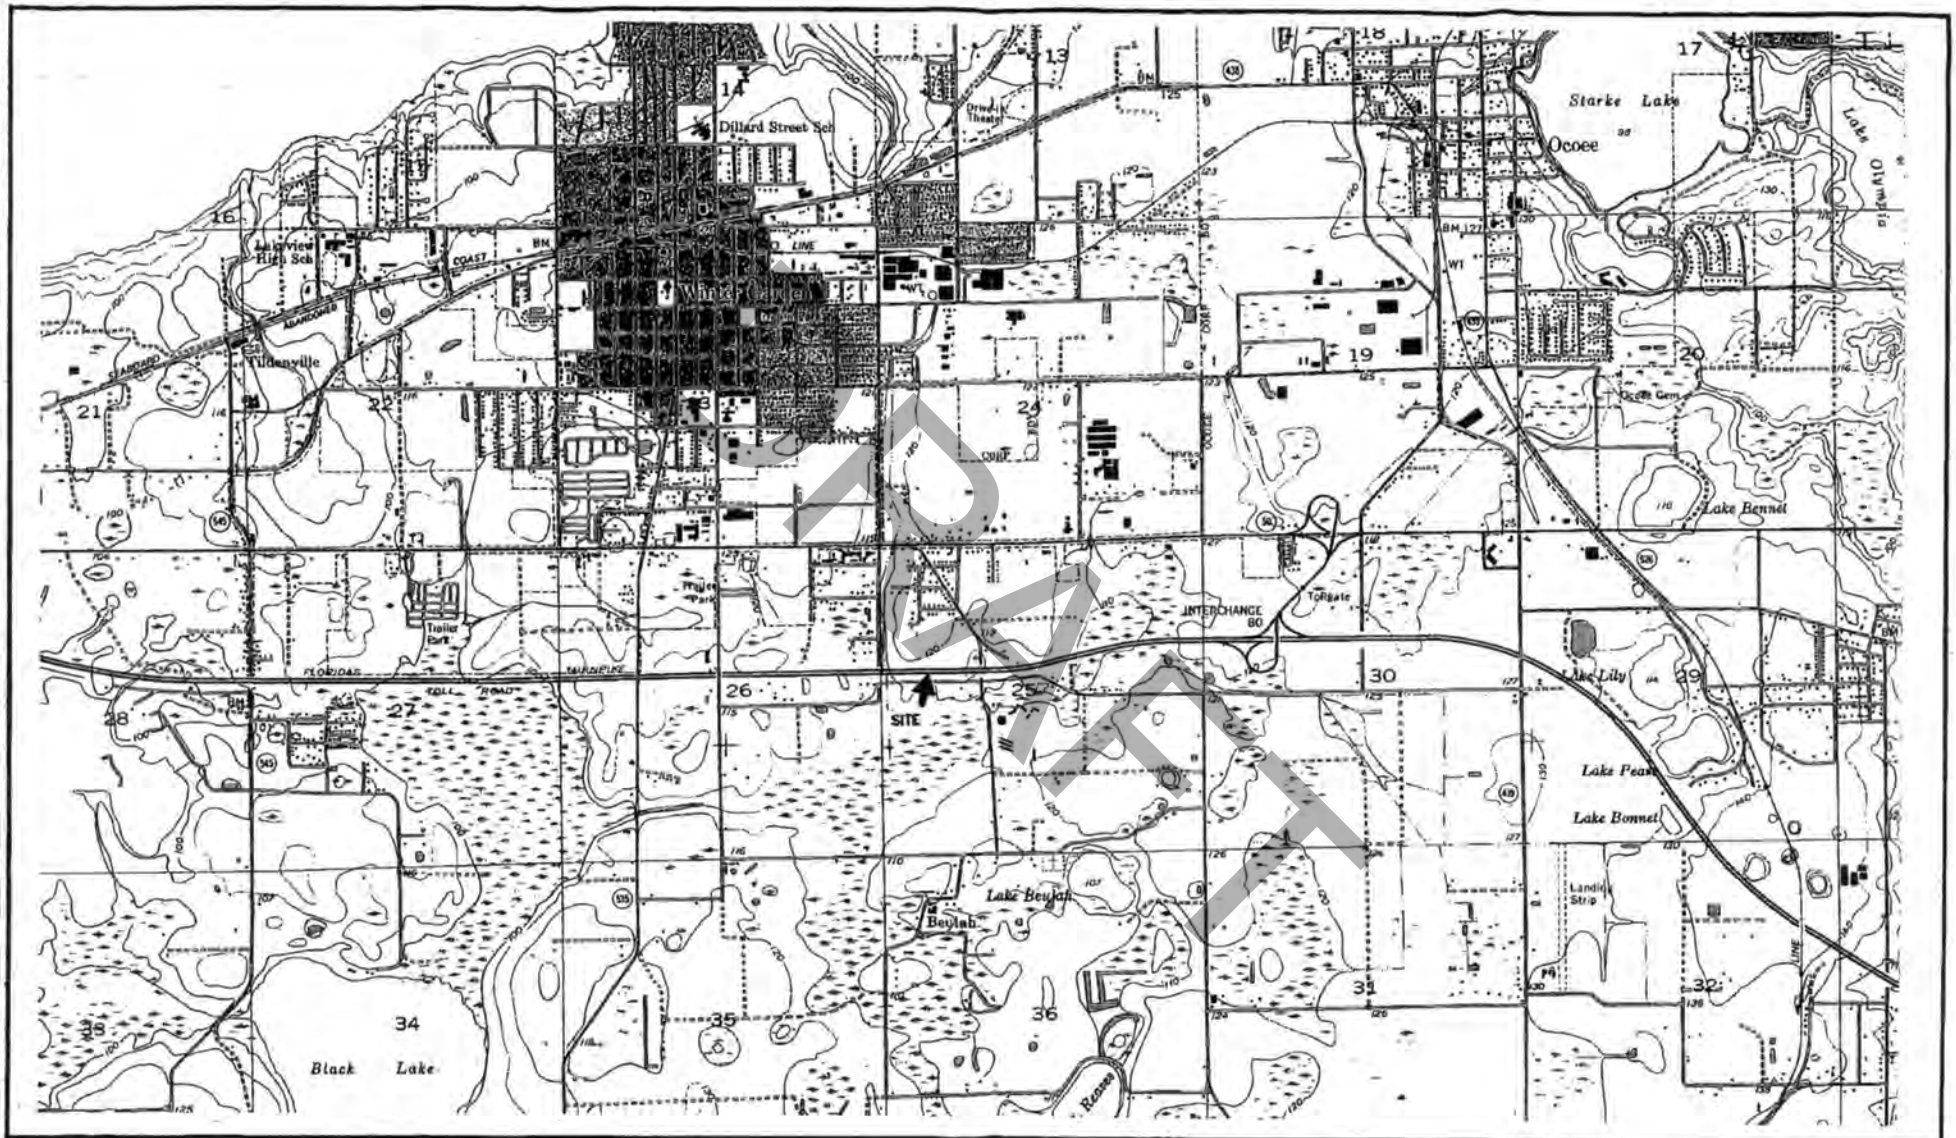

SUMMARY AND RECOMMENDATIONS

- The source removal was successful in removing the petroleum hydrocarbon impacted soil from the spill location. The work performed to complete the remedial activities involved the removal and thermal treatment of 21.13 tons of soil and collecting confirmatory soil and groundwater samples for laboratory analysis.
- The OVA/FID screening of soil samples collected from below the excavation reported no detection of petroleum hydrocarbons vapors in the soil.
- Laboratory analysis of soil samples reported concentrations of petroleum hydrocarbon compounds below SCTL groundwater leachability standards.
- Laboratory analysis of groundwater samples reported dissolved hydrocarbon concentrations to be below the GCTLs.
- Based upon the results obtained during this investigation, Handex recommends that a No Further Action (NFA) order be approved for this site.

Narrative:
Approximately 120 gallons of diesel spilled due to a vehicle crash involving a tractor trailer. No waterways were affected and Handex has been hired to conduct cleanup. Handex has hired SWS to do the field work for the clean-up. The fuel reportedly leaked from the saddletanks of a tractor trailer onto the grassy shoulder adjacent to the bridge abutment below.

Incident Narrative:

3.5.08-SWS John Lucarelli reported that they are just now being able to obtain DOT permits to conduct this work along the right-of-way.
4.8.08 - Per John again, the excavation has gotten into groundwater. There appears to be free product and water coming from under the bridge footer against the west wall back into the excavation. The rest of the area is reportedly clean. Not sure if this is groundwater or perched surface water. There may be existing contamination at this location due to previous construction as the contamination is registering as TRPH but below cleanup standards. Sample B-5 exceeds the Benzo-A-Pyrene conversion standards. OBER had to do conversions as they were not provided by contractor. It also seems like a small amount of contaminated soil removed for area of excavation but also the 120 gallon reported release. Due to possible groundwater issue, contamination under the footer and possible pre-existing contamination, OBER is forwarding this case to BPSS for further review. This location is also on deck for roadway renovation in the near future.
Having forwarded this case to BPSS, I recommend that this case be closed.

Re: BER Incident #: 2007-7I-38668Z Date: 12/27/2007
Location: Southbound on Florida Turnpike at mile marker 269, Winter Garden, Orange County, Florida

Dear Sirs,

The Florida Department of Environmental Protection (FDEP), Bureau of Emergency Response (BER), Orlando District Office, has reviewed the information for the above referenced incident. Based upon the information received, BER has concluded in accordance with Chapter 62-770.300, Florida Administrative Code, the following:

Due to remaining contamination under bridge footer and possible groundwater contamination, BER is hereby referring to the case FDEP Bureau of Petroleum Clean Up & Storage Tanks for follow-up. They will provide further direction for any additional action necessary to bring the incident to closure. Please send any additional information pertaining to this case to:

Ms. Rebecca Lockenbach
FL Dept. of Environmental Protection
Division of Waste Management
Twin Towers Office Building, MS 4590
2600 Blair Stone Road
Tallahassee, FL 32399

The BER appreciates your timely response to address the environmental impact from this incident and your cooperation in this matter as well as your efforts to mitigate this release. Please call me or one of my staff at (407) 893-3337, if there are any questions.

Sincerely,

Terry L. Edwards

Terry L. Edwards,

EXECUTIVE SUMMARY

RELEASE DISCOVERY

On December 26, 2007, a tractor-trailer owned/operated by Gotto Go Transport, LLC was involved in a vehicle accident in which the fuel tank was ruptured. As a result of the accident, one hundred and twenty (120) gallons of diesel fuel was discharged. The vehicle reportedly was hanging over the turnpike overpass and the fuel ran over the bridge and along the bridge footer impacting the soils below. Upon arrival at the accident scene, the tractor-trailer was not on the scene. The Fire Department had already left the scene. No further information could be obtained at that time

CONTRACTOR INFORMATION/SCOPE OF WORK

SWS First Response was employed by Gotto Go Transport, LLC c/o AIG Insurance to provide project management, delineation, remediation, sampling, transportation, disposal, and site restoration as required. This report and attachments have been prepared for Gotto Go Transport, LLC c/o AIG Insurance review and dissemination to the appropriate parties and/or agencies.

FREE PRODUCT RECOVERY

No free product was recovered.

CONTAMINATED SOIL REMOVAL

The horizontal and vertical extent of the contamination was delineated by Organic Vapor Detector (OVD) Flame Ionization Detector (FID) (OVD-FID) screening of soil samples. The samples were taken by hand auger borings at depths of one (1'), two (2'), and three (3') foot vertical intervals. (Please see Attachment B).

Having identified the vertical and horizontal extent of the contamination, excavating equipment was dispatched to the site on March 19, 2008, to commence removing excessively contaminated soil. Soils were excavated as shown in Attachment B. All of the excavated excessively contaminated soil total 16.83 tons, were placed into dump trucks and transported to Clark Environmental Inc. located in Mulberry, Florida. Copies of manifests and weight tickets (Attachment D) are included with this report.

DRAFT

SOIL QUALITY

In accordance with Florida Administrative Code (F.A.C.) 62-770, the screening technique described above was utilized to determine the horizontal and vertical extent of impact to the soil. Split soil samples were placed in pint size jars and sealed. Using the standard closed headspace method, the samples were screened with an OVD/FID unit (unfiltered and filtered) per F.A.C. 62-770 and DEP-SOP-001/01 soil sampling procedures, A target level of 10.0 ppm or less by OVD/FID screening was used as the goal to meet FDEP clean-up criteria. The excessively contaminated soil was concentrated in the area indicated on Attachment B, Figure # 1.

Post excavation soil samples demarcated as: B, B2, B3, B4, B5, B6, B7, NW1, SW1, and EW1; (Please see Attachment B, Figure #1) were collected on March 19, 2008, at the horizontal plane of the excavation site by SWS First Response personnel. Soil samples were collected in compliance with 62-770.400, 62-160, 62-160.300 F.A.C pursuant to Florida Department of Environmental Protection (DEP) Standard Operating Procedures (SOP) for Field Activities, DEP-SOP-001/01.

The samples were stored on ice, and submitted to Environmental Conservation Laboratories (ENCO) for Polynuclear Aromatic Hydrocarbon (PAH) (EPA Method 8270), BETX/MTBE (5035/8260), and Petroleum Range Organics by Method FL-PRO. Using the current EPA SW845, and Florida Department of Environmental Protection Standard Operating Procedures (DEP-SOP) [DEP-SOP-001/01 FA1200, FA3100, FA3200, FC1000, FS 3000, Section 5 "volatile organic analyses"] sampling protocols. ENCO holds an Environmental Laboratory Certification from the Florida Department of Health (DOH) Environmental Laboratory Certification Program (ECLP) in accordance with the National Environmental Laboratory Certification Conference (NELAC) standards.

The samples were analyzed to confirm OVD-FID readings per FAC 62-770, and to confirm removal of excessively contaminated soil. The final area of excavation measured fifteen (15') feet in length by ten (10') feet in width, and an average depth of five (5') feet below the existing land surface. A surface scrape was performed at B2, B3, B4, B5, B6, and B7, which measured fifty (50') feet in length by fifteen (15') in width at an average depth of one and one half (1'-1.5') feet below existing land surface. This area was just south of the excavation area. The west wall could not be excavated because of the concrete bridge footer which measured five (5') in depth. Free product was leaking from the concrete wall footer under the bridge. However, further excavation would undermine the integrity of the road and bridge.

DRAFT

OVA readings were performed at the west wall just beneath the footer, and petroleum related constituents were detected above the State of Florida Soil Criteria Standards, FAC 62-770. It was also noted by the FDOT representative on site that there is an existing asphalt base in the entire excavation area, which may have contributed to the free product, and additionally, the results of the Confirmation samples B2, B3, B4, B5, B6 and B7 having petroleum related constituents above the State of Florida Soil Criteria Standards, FAC 62-770. Please refer to analytical laboratory results located in attachment E for confirmatory soil samples tested. Background samples were not taken due to the existing asphalt base located in the entire excavation site. The excavated area was back-filled and compacted to Department of Transportation (DOT) standards using approved clean fill.

GROUNDWATER QUALITY

Groundwater was not impacted. The depth to groundwater was determined utilizing a stainless steel hand auger and was not encountered at a depth of six (6) feet below the existing land surface.

SURFACE WATER QUALITY

Surface water was not impacted.

RECOMMENDATION

In reference to the Gotto Go Transport, LLC spill, based upon the post excavation soil organic vapor readings, removal of petroleum hydrocarbon impacted soil, and soil confirmatory testing SWS would support that a request for "NO FURTHER ASSESSMENT" be approved.

The material and data in this report has been reviewed and compiled under the supervision and direction of the undersigned.

P.G. CERTIFICATION

The Bureau of Emergency Response Incident Report and No Further Action Proposal dated February 10, 2009 (received February 11, 2009), for GOTTA GO Transport BER 07-7I-38668Z located at Beulah Road & Florida Turnpike Overpass, South side of Eastbound @ Mile Marker #269 SB, Winter Garden, Florida, FDEP Facility ID# 489810856.

I hereby certify that in my professional judgment, the components of this Supplemental Site Assessment Report/No Further Action Proposal prepared for the December 26, 2007, petroleum product discharge discovered at the above-referenced facility satisfy the requirements set forth in Chapter 62-770, Florida Administrative Code (F.A.C.), and that the conclusions in this report provide reasonable assurances that the site rehabilitation objectives stated in Chapter 62-770, F.A.C., have been met.

SITE HISTORY & BACKGROUND

On December 26, 2007, a vehicular accident occurred at mile post 269 southbound bridge on Florida's Turnpike resulting in a release of approximately 120 gallons of diesel fuel along Beulah Road below. Southern Waste Services (SWS) was contracted by the responsible party (Gotta Go Transport) to complete assessment and remedial efforts. SWS conducted source removal activities and submitted the subsequent report on April 8, 2008. In review of the report, the case was referred to OCEPD from the Bureau of Emergency Response (BER) on November 7, 2008 for follow up. HCR was contracted by FTE to complete further site assessment activities in January 2009. During the time from the initial source removal to present, a temporary bridge was constructed through the area of concern resulting in limited access along the western right-of-way of Beulah Road.

Following discussions between the FTE and OCEPD on January 12, 2009, HCR scheduled drilling activities to include the installation of two temporary monitoring wells for the collection of groundwater samples. A copy of the site location map is presented as **Figure 1**.

MONITORING WELL INSTALLATION

On January 19, 2009, Environmental Drilling Services completed the installation of two one-inch diameter pre-packed temporary monitoring wells TW-1 and TW-2 via direct push technology (DPT). The wells were installed to a depth of 8.5 feet below land surface (bls) with five feet of .010 inch slotted screen and 4.5 feet of one inch PVC casing. The wells were completed to one foot above grade and capped. The approximate static water level during installation was measured at 5.5 feet bls.

Soil samples were collected at each location from the surface to seven feet bls using a four-inch diameter hand auger. The headspace of each sample was analyzed in the field using a Microfid Model Flame Ionization Detector (FID). Each soil sample that returned an unfiltered FID response above 10 parts per million (ppm) was screened with an inline activated charcoal filter to detect methane vapors. The filtered response was subtracted from the unfiltered response to yield a corrected value of detected hydrocarbon vapors. Soil samples were reported below 10 ppm or non-detect. No liquid-phase hydrocarbons (LPHs) were encountered or detected during this investigation.

DRAFT

A copy of the site plan depicting the well locations is included as **Figure 2**. Copies of the well construction logs are included in **Appendix A**.

GROUNDWATER QUALITY MONITORING

On January 21, 2009, groundwater samples were collected from TW-1 and TW-2 for laboratory analysis. Samples were submitted to Pace Analytical Services (PACE) of Ormond Beach, Florida [NELAC Certificate No. E83079] for analysis by United States Environmental Protection Agency (USEPA) Methods 8021 for benzene, toluene, ethylbenzene, total xylenes (BTEX) including methyl tertiary-butyl ether (MTBE), 8270 for polynuclear aromatic hydrocarbons (PAHs), and Florida Petroleum Range Organics (FL-PRO) for total recoverable petroleum hydrocarbons (TRPHs).

Dissolved hydrocarbon concentrations in TW-1 and TW-2 were reported below Groundwater Cleanup Target Levels (GCTLs) as specified in Table I, Chapter 62-777, Florida Administrative Code (F.A.C.) and/or laboratory method detection limits. A groundwater analytical concentration map is included as **Figure 3**. Groundwater analytical data are presented in **Table 1**. Copies of the laboratory analytical report, groundwater sampling logs, and field instrument calibration records are included in **Appendix B**.

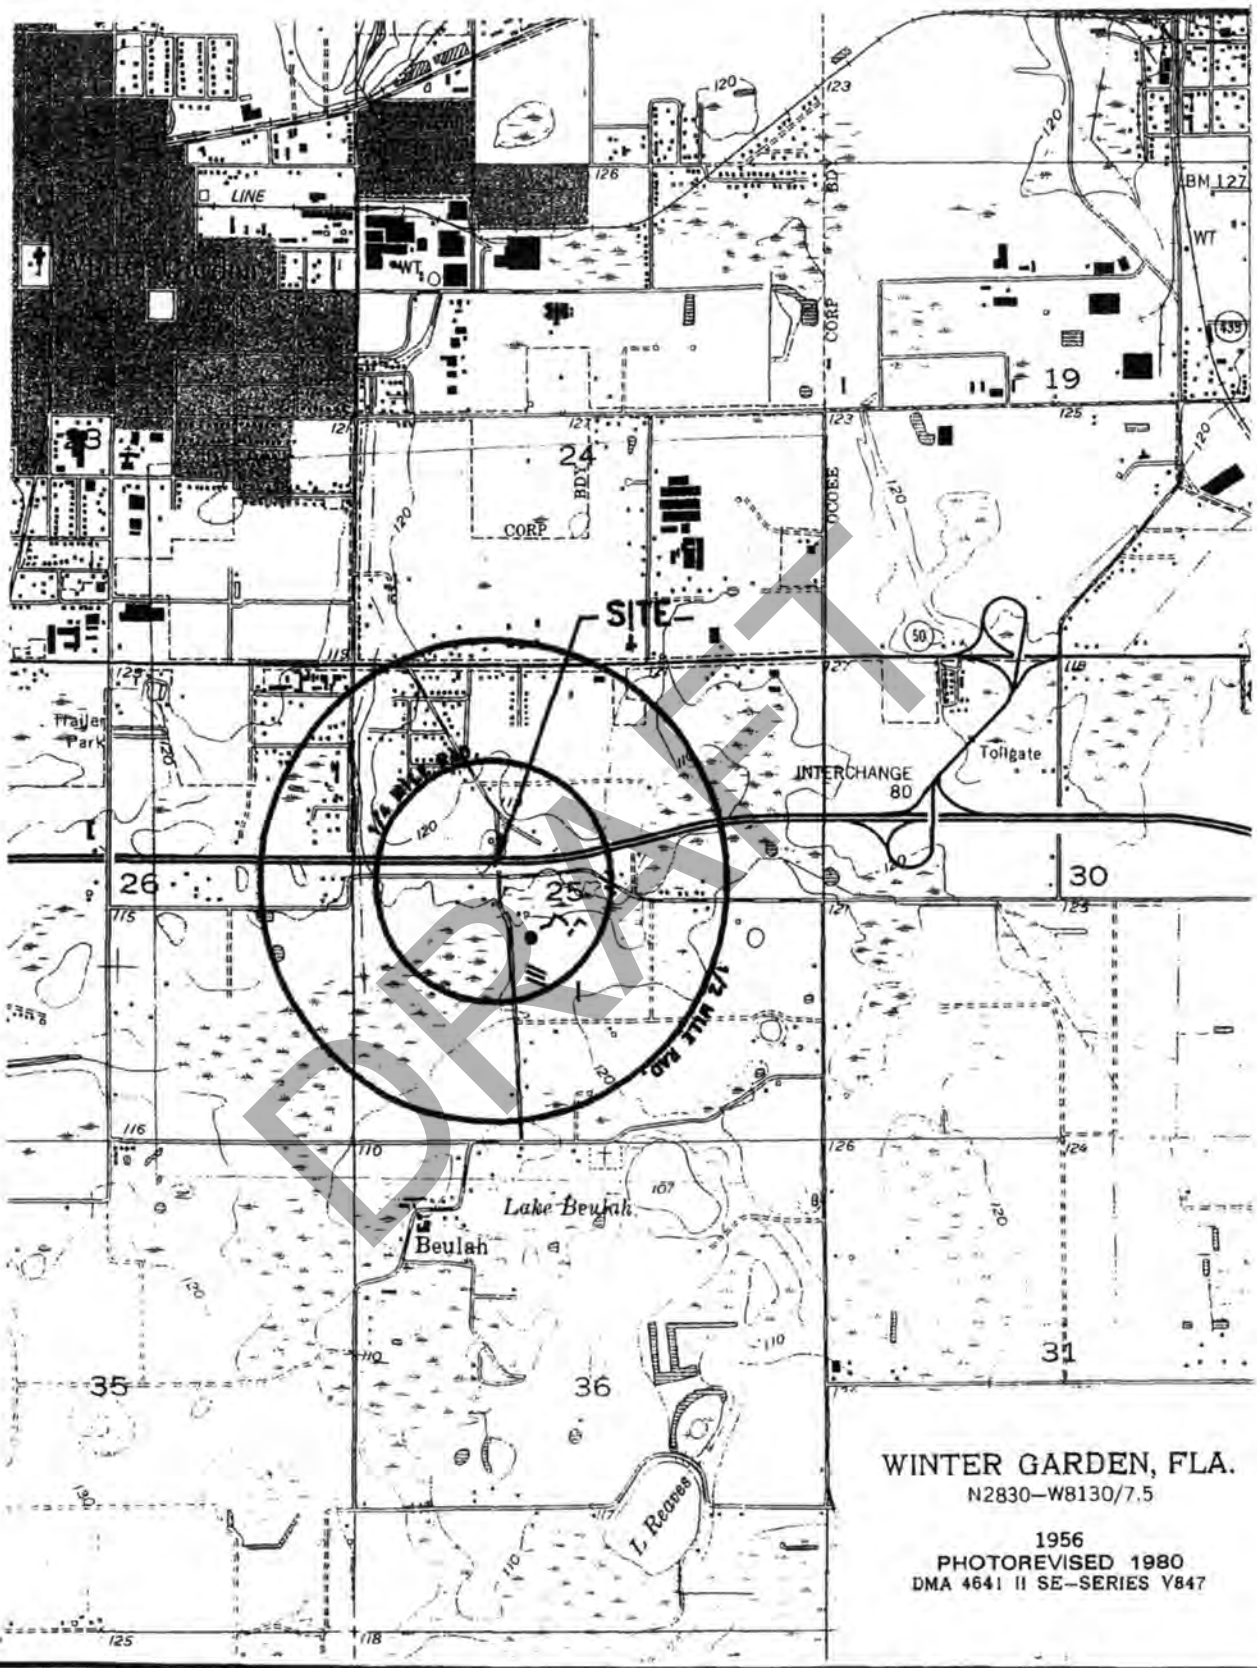

DRAFT

SUMMARY AND RECOMMENDATIONS

- On January 19, 2009, HCR oversaw the installation of two temporary monitoring wells to 8.5 feet bls via DPT. Soil samples collected through each of the respective borings were reported below 10 ppm and./or non-detect with the FID;
- On January 21, 2009, HCR personnel collected groundwater samples from TW-1 and TW-2 for laboratory analysis. Upon completion of the sampling event, the wells were removed from the ground;
- Dissolved hydrocarbon concentrations in TW-1 and TW-2 were reported below GCTLs and/or laboratory method detection limits;
- No liquid-phase hydrocarbons were encountered during this investigation.

Based on the results collected during field activities and laboratory analytical data, HCR recommends no further action is required at this site.

Subject: Site Rehabilitation Completion Order
GOTTA GO Transport BER 07-7I-38668Z
Beulah Road & Florida Turnpike Overpass, Mile Marker 269 SB
South Side of the Eastbound Lane
Winter Garden, Orange County, Florida
FDEP Facility ID# 489810856
Discharge Date: December 26, 2007 (Non-Program)

Dear Ms. Pence:

Orange County Environmental Protection Division, on behalf of the Florida Department of Environmental Protection (Department) has reviewed the Bureau of Emergency Response Incident Report and Supplemental Site Assessment Report / No Further Action Proposal (BER/SSAR/NFAP) dated December 27, 2007 and February 10, 2009 (received May 6, 2008, and February 11, 2009) prepared and submitted by Handex Consulting & Remediation, LLC for the petroleum product discharge referenced above. All the documents submitted to date are adequate to meet the site assessment requirements of Rule 62-770.600, Florida Administrative Code (F.A.C.). In addition, documentation submitted with the BER/SSAR/NFAP confirms that criteria set forth in Subsection 62-770.680(1), F.A.C. have been met. Please refer to the attached maps of the source property and analytical summary tables. The BER/SSAR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order. Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharge referenced above, except as set forth below.

In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Department may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the BER/SSAR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of

DRAFT

receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the BER/SSAR/NFAP you do not have to do anything. This Order is final and effective as of the date on the top of the first page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

DRAFT

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Orange County Risk Management, shall mail a copy of the request to Orange County Risk Management at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Orange County Risk Management, shall mail a copy of the petition to Orange County Risk Management at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;
(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;
(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;
(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;
(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and
(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective as of the date on the top of the first page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

DRAFT

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding Orange County Environmental Protection Division's review of your BER/SSAR/NFAP should be directed to Mark A. Naughton at (407) 836-1424. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 489810856. Please use this identification on all future correspondence with the Department or Orange County Environmental Protection Division.

Sincerely,

Michael E. Ashley, Chief
Bureau of Petroleum Storage Systems

Ruth,
No OER did not receive any data or report for this event....I didn't open a case for this as we referred it to Orange County. I believe Seth was the inspector to go out and inspect the tank situation and instruct the clean-up company on how to proceed beyond what I had initially instructed them to do. Please let me know if I can further assist or if you need any contact information

Hello Ruth,
Find attached for a heat transfer oil release that occurred at the Ranger Construction facility/site in Winter Garden yesterday. This location is in Lake County.
The spoil event was described to me by Mike and Jason with PetroTech SE as:
The release reportedly occurred at the asphalt plant portion of the facility. The heat transfer oil pipe reportedly broke or developed a leak releasing 45 gallons of the oil to secondary containment. Unfortunately with the heavy rains, the secondary containment overflowed spreading the oil and oil/water across the pavement parking lot and into the storm-drain(s) that lead to the on-site retention pond.
Petrotech SE has been recovering the oil from the pond and I'm presuming from the storm-drain pipes as well.
They have placed skirted boom around the weir/overflow structure to protect it from the oil overflowing the structure to the wetlands beyond the pond. There is 2-feet of freeboard before the pond would overflow.
The wind has driven the oil to both sides of the pond which is heavily populated with cattails and heavy vegetation.
Petrotech and Ranger staff are going to remove the cattails and vegetation and collect it into roll-off box for proper disposal.....this may be the only way to get the thick oil out of the weeds.
I requested that TRPH and PAH sampling be conducted at each end of the pond where the vegetation will be removed, at the soil/shoreline soil/water interface.
As a rule we do not request surface water samples be collected for these events, as the pond appears to collect the runoff from the entire facility.

I wanted to share this information with you to determine if this incident should remain with OER or be turned over to the tanks/clean-up program.

Thank you for your time in reviewing this incident.

Orange County – Storage Tanks

DRAFT

Dear Mr. Rehyansky,

The Orange County Tanks Program, on behalf of the Florida Department of Environmental Protection, personnel issued a Non-Compliance Letter to the above-referenced facility on February 16, 2018. Based on the information provided February 21, 2018, the facility was determined to have returned to compliance with the Department's Storage Tank rules and regulations.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Charles Cox at 407-558-1619 or charles.cox@ocfl.net.

Sincerely,

Charles Cox

Site Visit Comments

02/04/2021

02/04/2021 11:00 hrs, KW/Routine - Met Tom Rehyansky, Environmental Manager, on site for a Routine Compliance Inspection of three aboveground storage tank (AST) system.

Inspection Comments

02/04/2021

Tank/Piping:

(2) 12,000-gallon, double-walled, ASTs containing diesel for vehicular fueling. AST rests on a concrete pavement and is equipped with:

- Product labels, normal and emergency vents;
- Interstices appears dry per the Krueger gauges;
- End-mounted remote fill and dispensing cabinet - clean and dry;
- Overfill protection - Morrison Brothers clock gauges;
- Nozzle/hose appear to be in good condition;
-Dispenser liner is clean and dry;
- Electrical grounding wire is present;
- No obvious signs of leakage noted;

(1) 12,000-gallon, single-walled, steel, AST. The AST rests in a sealed, concrete, secondary containment. The tank is equipped with:
- Product label;
- Normal vent;
- Tank exterior coating appears to be in good condition;
- Side-mounted fill port;
- Overfill protection – secondary containments act as primary overfill protection;
- Secondary containments appear to be clean and dry; sealants appear to be in good condition.
- Electrical grounding wires are present;
- No obvious signs of leakage;

Records:

- Current Storage Tank Registration Placard and facility registration information current and accurate;
- Facility registration information current and accurate;
- Financial Responsibility: Tokio Marine Insurance Company, from 04/14/2019 to 04/14/2020 and 04/14/2020 to 04/14/2021;
- Certification of Financial Responsibility Forms (CFR) are present, complete, and accurate;
- Monthly release detection monitoring records reviewed: 01/30/2019 to 01/12/2021;

- Annual operability test of the Krueger gauge (interstitial) was performed on 09/20/2020 with passing results; next test due by 09/20/2021. However, the 2018 and 2019 test results were not available. The violation will be resolved with issuance of the Compliance Assistance Offer Letter.

- Initial Operability tests of the overfill prevention device Morrison Clock gauge was performed on 09/20/2020 with passing results; next test due by 09/20/2021. However, the 2018 and 2019 test results were not available. The violation will be resolved with issuance of the Compliance Assistance Offer Letter.

Final inspection report e-mailed to Tom Rehyansky at: Tom.Rehyansky@RangerConstruction.com.

Compliance Evaluation Inspection

DRAFT

Dear Mr. Ramnauth:

A hazardous waste compliance inspection was conducted at your facility located at 12270 West Colonial Drive, Winter Garden, Florida, on August 10, 2012. The inspection was conducted under the authority of Section 403.091, Florida Statutes (Fla. Stat.) and Chapter 403, Part IV, Fla. Stat. in order to determine the compliance status of your facility with Title 40 Code of Federal Regulations (CFR) Parts 260 through 268. The provisions of 40 CFR Parts 260 through 268 have been adopted by reference as the state hazardous waste rules in Chapter 62-730, Florida Administrative Code (Fla. Admin. Code).

Your facility was inspected as a conditionally exempt small quantity generator of hazardous waste. No violations were noted at the time of the inspection and no further action is necessary on your part. An inspection report is attached for your records.

If you have any questions, please contact me at (407)897-4307 or electronically at danielle.d.owens@dep.state.fl.us.

Sincerely,

Hazardous Waste Inspection Report

FACILITY INFORMATION:

Facility Name: Alpha & Omega Dry Cleaners

On-Site Inspection Start Date: 08/10/2012 **On-Site Inspection End Date:** 08/10/2012

ME ID#: 105800 **EPA ID#:** FLR000193938

Facility Street Address: 12270 W Colonial Dr, Winter Garden, Florida 34787-4103

County Name: Orange

NOTIFIED AS:

N/A

INSPECTION TYPE:

Routine Inspection for CESQG (<100 kg/month) facility

INSPECTION PARTICIPANTS:

Principal Inspector: Danielle Owens, Environmental Specialist

Other Participants: Janine Kraemer, Environmental Manager; Chaitram Ramnauth, Owner

LATITUDE / LONGITUDE: Lat 28° 33' 4.5972" / Long 81° 33' 46.5588"

SIC CODE:

TYPE OF OWNERSHIP: Private

Introduction:

On August 10, 2012 Danielle Owens and Janine Kraemer, Florida Department of Environmental Protection (FDEP), inspected Alpha & Omega Dry Cleaners (Alpha) for compliance with hazardous waste regulations and dry cleaner standards.

Alpha has been at this location for twenty years. Water and sewer service are provided by the local municipality.

INSPECTION HISTORY
Alpha had not been previously inspected by the Department for compliance with hazardous waste regulations and dry cleaner standards.

Process Description:

Alpha operates two dry cleaning machines. Each machine uses Perchloroethylene as the solvent. Machine #1 is used for dry cleaning light colored clothes and Machine #2 is used for dry cleaning dark colored clothes. The two machines have a total of eight cartridge filters which are changed once per year. The spent filters are disposed of as a hazardous waste.

Separator water for both machines is plumbed directly to 5-gallon containers. The containers were within secondary containment. The separator water that is collected in the containers is manually transferred to the misting unit for treatment and disposal.

A 15-gallon drum of waste-containing solvent (approximately ¼ full) was located in the hazardous waste storage area and was within secondary containment.

The floor surrounding the dry cleaning machines and the hazardous waste storage area were properly sealed.

RECORDS

DRAFT

Manifests showing proper disposal of hazardous waste were available for review at the time of the inspection.

Alpha has registered with the Department's Dry Cleaner Solvent Cleanup Program (DCSCP) as a drycleaning facility.

Conclusion:

Alpha was inspected as a conditionally exempt small quantity generator of hazardous waste and was in compliance at the time of the inspection.

DRAFT

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.

Dear Mr. Laro:

Department personnel conducted a compliance inspection of the above-referenced facility on September 23, 2014. Based on the information provided during and following the inspection, the facility was determined to be in compliance with the Department's rules and regulations. A copy of the inspection report is attached for your records, and any non-compliance items which may have been identified at the time of the inspection have been corrected.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Daniel Hall at 407-897-4167 or via e-mail at Daniel.K.Hall@dep.state.fl.us.

Sincerely,

Aaron Watkins,, Manager

DRAFT

Introduction:

On September 23, 2014, Daniel Hall of the Florida Department of Environmental Protection (FDEP) and Miguel Laro of Motor Coach Industries (MCI) conducted a hazardous waste inspection at MCI Sales and Service, Inc. formerly known as Setra North America located at 1155 Elboc Way, Winter Garden, Florida.

MCI Sales and Service, Inc. has been at this location since 2012 and employs 21 staff. The facility is on City of Winter Garden water and sewer services.

EPA ID Number FLR000079731 was issued to Setra of Orlando on September 5, 2001 under the management of Ed Wells. On May 18, 2010, the number was reissued to Setra of North America under the management of Jennifer Holliday. MCI Sales and Service, Inc. has not notified the Department of its waste activities. As a Conditionally Exempt Small Quantity Generator of hazardous waste, MCI Sales and Service, Inc. is not required to notify the Department of its waste activity unless it is their intention to use EPA ID Number FLR982128019. If this facility intends to use EPA ID Number FLR982128019, please submit Form 8700-12FL Florida Notification of Regulated Waste to the DEP Waste Management Division, a copy of which is attached.

On January 16, 2015, Daniel Hall returned to the facility to inspect records not reviewed during the initial inspection and check on the compliance status of previously noted violations.

Inspection History:
This is the first inspection of this facility by the Department for compliance with state and federal hazardous waste regulations.

Process Description:

MCI Sales and Service, Inc. is a national corporation selling and repairing motor coaches (charter buses) and are the sole North America distributor for Setra, a division of Daimler AG. The Winter

Garden facility is one of 6 service centers in Canada and the United States.

MCI has 10 bays for servicing motor coaches. The facility does standard automotive maintenance as well as body, paint, and interiors. There is also one wall draft paint booth at the south end of the building, the facility paints parts primarily but a few times a year will paint an entire bus.

The service bays are equipped with two 30-gallon Safety Kleen parts washers (solvent based) and one Safety Kleen aqueous clamshell design parts washer.

There is also a new bead blast booth set up in the maintenance shop. The media has never been sampled or replaced.

Outside the maintenance shop at the northeast corner of the building is one 250 gallon used oil tank and one 250 gallon used antifreeze tank. Both tanks are located in shared secondary containment. The used oil tank was properly labeled as "Used Oil" but the used antifreeze tank was labeled as "Used Coolant". It is recommended used antifreeze containers must be labeled with the words "Used Antifreeze".

The maintenance shop is equipped with five rolling oil caddies, each caddie was labeled as "Used Oil".

Antifreeze is collected in a 50 gallon rolling garbage cans for certain repairs and then returned to the bus the coolant was removed from.

Used antifreeze removed from buses that will not be reused is captured in a large, flat rolling tray. The tray was not labeled "Used Antifreeze". The used antifreeze in the rolling tray is pumped out of the tray and into the used antifreeze tank.

Used oil filters are drained and collected for pickup by Safety Kleen.

Inside the paint mixing room was one 30-gallon drum labeled for waste paint. The label also listed waste codes F003, F005, D001, D005, D006, D007, D008, and D035. There was also a gun cleaner connected to a 5-gallon can of laquer thinner 6782. Per the MSDS this thinner is composed various amounts of toluene, ketones, benzenes, acetates, and alcohols. It may also contain methylene chloride and perchloroethylene.

Used batteries are collected on a pallet under cover to the south side of the building.

Next to the batteries was a tote cage for collecting aerosols. Per staff, aerosol cans are punctured in this area and allowed to drain into a small open container where the drained materials is left to cure or evaporate. [40 CFR 265.31] The aerosol propellants are vented to the atmosphere as part of this process. Staff were informed at the time of inspection that this process must be stopped. The January 16, 2015 follow-up found that aerosols were no longer being punctured and a proper can puncturing mechanism had been ordered.

Three boxes of spent fluorescent bulbs were noted in one area of the building. The boxes were labeled properly but were not dated. [40 CFR 273.15(c)] Additionally, four spent bulbs were noted propped up in a corner and ten more lying on a shelf. [40 CFR 273.13(d)] The January 16, 2015 follow-up found that all bulbs were properly boxed and were dated during the inspection.

RECORDS:
Records were reviewed during the January 16, 2015 follow-up inspection.

Safety Kleen handles MCI's used oil, used antifreeze, hazardous waste, and universal waste bulbs. The facility is part of Safety Kleen's solvent Continued Use Program (CUP) for the parts washers.

Since opening MCI has only shipped hazardous waste once in January 2015 when Safety Kleen removed 200 pounds of waste paint. The manifest was completed properly and MCI used "CESQG" as it's EPA ID Number.

DRAFT

Interstate Battery handles old lead acid batteries and the bills properly note the number of cores delivered and removed.

New Potential Violations and Areas of Concern:

Violations

Type:	Violation
Rule:	265.31
Explanation:	Maintenance and operation of facility. Facilities must be maintained and operated to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment. Specifically, MCI was puncturing aerosol cans and draining the contents into 1 gallon paint cans which were left open to dry or evaporate. The cans were punctured without the use of a carbon filter.
Corrective Action:	Immediately cease improper treatment/disposal of aerosol can contents. The January 16, 2014 follow-up inspection found that the facility has ceased puncturing aerosol cans and has ordered a puncturing rig with a carbon filter.

Type:	Violation
Rule:	273.13(d)(1)
Explanation:	A small quantity handler of universal waste must contain any lamp in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps. Such containers and packages must remain closed and must lack evidence of leakage, spillage or damage that could cause leakage under reasonably foreseeable conditions. Specifically, MCI stored bulbs unprotected on a shelf and propped up in a corner on the floor
Corrective Action:	Immediately box all waste mercury containing bulbs. The January 16, 2015 follow-up found all bulbs properly boxed and stored.

Type:	Violation
Rule:	273.15(c), 273.15(c)(1)
Explanation:	A small quantity handler of universal waste who accumulates universal waste must be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste or is received. The handler may make this demonstration by: Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received. Specifically, MCI had three boxes of waste mercury containing lamps with no dates.
Corrective Action:	Date all boxes of waste mercury containing lamps when the first lamp is added. The boxes were dated during the January 16, 2015 follow-up.

Used Oil Tank Removal
August 7, 1993

DRAFT

August 7, 1993

Attachment to the:
Florida Department of Environmental Protection
Discharge Reporting Form

Go Vacations America, Incorporated, located at 1681 Highway 50, Winter Garden, Florida is operating as a recreational vehicle sales, rental and service concern. As part of operations, a 1000 gallon, steel underground storage tank was used for waste oil collection prior to disposal. Upon an inspection by Orange County Environmental Control Department, it was determined that the tank has not been previously registered as required by Section 17-761 of the FAC. The facility immediately arranged to have the tank registered and properly closed.

During removal of the tank by ERC General Contracting Services, Incorporated, evidence of a potential release was noted in groundwater present at the bottom of the excavation. A sheen was noted at the southeastern portion of the excavation. No free-product was noted.

Inspection of the tank and appurtenances did not indicate any evidence of leakage. No visibly stained soils were evident around the fill pipe, vent line, product removal vault or soils excavated during removal. Upon backfill, a temporary monitor well was installed for the purpose of sample collection. No samples have been collected and analyzed at this time.

Faxed letter dtd. to Petro Serv 7/14/93

According to the operator, Mr. Barry Breckon, a qualified consultant will be retained for the purpose of evaluating potential impacts to groundwater and perform the required sampling and analysis per Section 17-770 of the FAC.

Dear Ms. Harbin:

Per our telephone conversation on October 19, 2006, responses to the request for additional information on the above referenced SA-LCAR have been included in this letter. Items that cannot be verbally addressed have been attached for your review. Please refer to the following comments and responses:

COMMENT: Well construction logs and lithologic logs were not provided in the report. Please provide the Division a well construction log for MW-1 and lithologic logs for soil borings AB-1 through AB-4.

RESPONSE: Please refer to the well construction log for MW-1 and the lithologic logs for soil borings AB-1 through AB-4 included with this response.

COMMENT: A groundwater sampling log was not provided for monitor well MW-1. Please provide the groundwater sampling log for the Division's review.

RESPONSE: Please refer to the groundwater sampling log for monitor well MW-1 included with this response.

COMMENT: OVA readings for soil borings AB-1 through AB-4 were provided on the hand-drawn figure in the report. However, the OVA readings for the monitor well in MW-1 were not observed. Please provide the OVA readings obtained during the field screening at MW-1 to the Division for review.

RESPONSE: Please refer to the revised hand-drawn figure showing the OVA readings obtained during the field screening at monitor well MW-1 included with this response.

Please note that we are currently in the process of obtaining a well abandonment permit from Orange County to properly abandon MW-1 so that this project may obtain a No Further Action status.

Thank you for your assistance with this project. If you have any questions concerning this response, please feel free to call me at 352-694-1799.

Sincerely,

Robert M. Couch III

Subject: Site Rehabilitation Completion Order
Former Go Vacations of America, Inc.
12201 West Colonial Drive (Formerly 1681 East Highway 50)
Winter Garden, Orange County
FDEP Facility ID# 489300846
Discharge Date: August 7, 1993 (Non-program)

DRAFT

Dear Mr. Bajalia:

The Orange County Environmental Protection Division has reviewed the Limited Contamination Assessment Report (LCAR) and No Further Action Proposal (NFAP), dated September 13, 2006 (received September 14, 2006) and LCAR Addendum (LCARA), dated October 19, 2006 (received October 20, 2006) and supplemental information received through November 3, 2006, prepared and submitted by Enviro-Tech, Inc. for the petroleum product discharge referenced above. Documentation submitted with the LCAR and LCARA confirms that criteria set forth in Subsection 62-770.680(1), Florida Administrative Code (F.A.C.), have been met. Please refer to the attached map of the source property and analytical summary tables. The LCAR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the site for petroleum product contamination associated with the discharge referenced above, except as set forth below.

In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Florida Department of Environmental Protection (Department) may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the LCAR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the LCAR/NFAP you do not have to do anything. This Order is final and effective as of the date on the top of the first page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

DRAFT

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Suncoast RV, shall mail a copy of the request to Suncoast RV at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must

contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Suncoast RV, shall mail a copy of the petition to Suncoast RV at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;
(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;
(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;
(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;
(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and
(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

DRAFT

This Order is final and effective as of the date on the top of the first page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable

filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding Orange County Environmental Protection Division's review of your LCAR/NFAP should be directed to Kristin Harbin at (407) 836-1528. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 489300846. Please use this identification on all future correspondence with the Department or Orange County Environmental Protection Division.

Sincerely,

Michael E. Ashey, Chief
Bureau of Petroleum Storage Systems

FROM: John D. McManamy JDm

DATE: July 29, 1977

SUBJECT: Orange County ~~D/F~~ SW
Winter Garden Trash Site
Chronological History of Events

DRAFT

Accept all types of waste except the garbage waste which is collected in the city and transported to Porter Transfer Station in Orange County.

1) On May 17, 1974 this site was inspected by John McManamy and placed on the solid waste inventory list. The site did not provide daily cover, has a high watertable, had shallow wells on north edge of the site, with homes less than 1,000 feet from the site. This site does not comply with Chapter 10D-12 and the proposed Chapter 17-7, F.A.C.

2) On August 9, 1974 a site inspection was made by John McManamy. There was no daily cover and no evidence of an cover for 2 to 3 weeks.

3) On August 12 1974 we received a letter from the City Manager, Mr. Baxter, regarding the site inspection of August 9, 1974 complaining that wer were requiring the city to apply for a permit which would place undue burden on the city since the site is used primarily for a trash site. The site has three drawbacks; lack of cover, the highwater table, and proximity of homes to site on shallow wells.

4) On September 12, 1974 a site inspection was made by John McManamy. The site needs a good cleaning up, daily cover, and is a fire hazard.

5) On December 6, 1974 and December 23, 1974 letters were received from Mr. Baxter, stating that all garbage and wet waste is hauled to the county transfer station. The site is used only for yard trash, white goods and building construction waste. Inspection has revealed presence of tires, asphalt waste for roofs, etc., disposed of at this site.

Continued.....

6) On December 31, 1974 we received a data form with permit applications and the review showed that the site conflicts with Chapter 17-7, F.A.C.

   A) Suitable cover is not available for daily cover as required by Chapter 17-7.05 (3)j.n., F.A.C.
   B) The watertable is 2 to 3 feet, the swamp to the north/west and west of the site; a five foot differential must be maintained between waste and water per Chapter 17-7.05 (3)b., F.A.C.
   C) Residents on shallow well within 1,000 feet of the site is prohibited per Chapter 17-7.04 (2)h., F.A.C.
   D) Solid waste cannot dump in water per Chapter 17-7.04 (2)a, and f., F.A.C.

7) On January 21, 1975, aerial flight 15; photos shows distance from home to site and swamp area.

8) On January 22, 1975 a letter was sent to Mr. Baxter from Charles M. Collins stating the site conflicts with Chapter 17-7, F.A.C. and is not suitable for landfill and alternate method of disposal, such as incineration, etc. should be pursued.

9) On Feburary 7, 1975 a letter was received from Mr. W. R. Fritz, P.E., stating that the city only uses the site for trash and would a permit is issued, the water is be supplied to homes. NOTE: Chapter 17-7, F.A.C., does not distinguish the difference between garbage and trash.

10) On February 10, 1975 a site inspection was made by John McManamy. No daily cover was present; there was no final cover the area that already had some cover, and no equipment was available on the site.

11) On March 5, 1975 a site inspection was made by John McManamy. Violation #3/5/75-1 was written for dumping in the water. There was no daily cover. See Photo CX30 (2-5).

12) On March 10, 1975 a letter was received from Mr. Olson, City Attorney, addressed to W.D. Frederick, Jr., Chairman of the DPC Board, stating that DPC's basic request is prohibited under the city's present budget. Mr. Frederick requested that Mr. Olson contact Mr. A. Senkevich for a meeting to iron out difference.

13) On February 10, 1974 a letter was received from Orange County DPC, comments of the site stating that it was lacking the many essential areas covered in Chapter 17-7, F.A.C., and they had very little to add to the list of comments made by C. M. Collins in his letter to Mr. Baxter dated January 22, 1975.

DRAFT

14) On March 26, 1975 reference is made to the minutes of the meeting held March 20, 1975 between A. Senkevich and C.M. Collins of DPC and Mr. Baxter and Mr. Olson of Winter Garden and Mr. N. Fritz, P.E., City Manager.

A) Options were open to the city other than dewatering such as utilizing the Florida Highrise method, or the Florida Wetland method of operation.
B) The proximity of homes with shallow wells have made this site impossible to permit under the present conditions.
C) It was agreed to move the site to a location that did not conflict with Chapter 17-7, F.A.C.
D) It was agreed that approximately 24 months would be allowed to operate and that the closing of the site would follow Chapter 17-7.07, F.A.C., "Dump Closing".
E) A TOP would be issued with the increments of progress to be agreed upon at a later date. The requirements for daily cover were waived as long as only trash and tree limbs were disposed of.

15) On March 28, 1975 a TOP to close the site by May 1, 1977 was issued with two increments of progress:

1) By February 1, 1977 the city must provide us with proof of intent to divert the waste material from this site to the proposed site and apply for its permit.
2) By May 1, 1977 the site must be closed following Chapter 17-7.07, F.A.C., "Dump Closing".

16) On May 8, 1975 a site inspection was made by John McManamy. There was evidence of garbage, see photo CX34(1), violation of agreement of March 26, 1975 and site is a fire hazard.

17) On May 15, 1975 we received a letter from Mr. R. Olson, City Attorney, complaining of the inspection of May 8, 1975 site inspection check list. He stated that the department is starting this harassment all over again and that the city is staying with its commitments and, he expects the department to do the same. Check list item #11 indicates that no 6" of daily cover, and no 24" two (2) feet of completed cell cover. This site is a fire hazard due to no daily cover.

18) On June 10, 1975 a letter was sent from C. M. Collins stating that the site check list is a managerial/operation requirement for a landfill and the site inspection is required every 60 days. This agency is aware of the city's temporary operating permit and will not consider enforcement action for violation of

RE: Consent Order Number 86

Dear Mr. Senkevich:

This is to advise that the City Commission for the City of Winter Garden has declined to authorize the signing of Consent Order Number 86, as requested in your letter of October 5, 1977.

We believe that an inspection of our city dump, at the present time, will verify that the post-closing work on the dump has been far greater than required by existing regulations for dump closings.

We would welcome a determination by your crew of the extent of covering provided and the quality of reclamation work in this area. The area is now rough graded and would support growth.

We believe we have more than complied with the spirit of Section 17-7.07 of the Florida Administrative Code.

We respectfully request that you immediately inspect our work and withdraw your demand for a Consent Order.

Sincerely,

Denver F. Baxter
City Manager

Dear Mr. Baxter:

Orange County SW
Winter Garden Consent Order #86

An inspection of the Winter Garden city dump was held on October 21, 1977 by Mr. John McManamy of the Department of Environmental Regulation, and Mr. Ray Creech of the City of Winter Garden Public Works Department.

Approximately 80% of the site has the final two feet of cover. The remainder has at least six inches of cover. Please let us know within fourteen (14) days, your completion schedule of the project.

If you have any questions, please do not hesitate to contact me. We appreciate your cooperation.

Very truly yours,

A. Senkevich, P. E.
District Manager

A RESOLUTION OF THE CITY OF WINTER GARDEN, DESIGNATING THE WINTER GARDEN DOWNTOWN COMMUNITY REDEVELOPMENT AREA AS A BROWNFIELD AREA; ESTABLISHING THE COMMUNITY REDEVELOPMENT ADVISORY BOARD AS THE BROWNFIELD ADVISORY BOARD; AUTHORIZING THE CITY PLANNER TO NOTIFY THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION OF SAID DESIGNATION; PROVIDING FOR AN EFFECTIVE DATE.

DRAFT

WHEREAS, on June 11, 1992, the City of Winter Garden adopted Resolution 92-04, which established the downtown area of Winter Garden as a Community Redevelopment Area (CRA); and

WHEREAS, on June 25, 1992, the City adopted Ordinance 92-49, approving the Winter Garden Community Redevelopment Plan; and

WHEREAS, the Brownfields Redevelopment Act, Sections 376.77 – 376.85, F.S., and as such maybe amended, the "Act" provides for local governments to designate areas as brownfields; and

WHEREAS, said CRA qualifies for designation as a brownfield area under the Act; and

WHEREAS, such brownfield designation will allow for accelerated environmental assessment and if necessary, remediation of the property, as well as access to job-related bonus monies; and

WHEREAS, the intent of the Act is consistent with the CRA objectives and the adopted Redevelopment Plan; and

WHEREAS, redevelopment of the CRA is consistent with the City's Comprehensive Growth Management Plan.

NOW THEREFORE, in accordance with the Act, as amended, and after the required public noticing and public hearings, **BE IT RESOLVED BY THE CITY OF WINTER GARDEN FLORIDA**:

SECTION I - The foregoing recitals are true and correct and are incorporated herein.

SECTION II -

The incorporated portions of the Winter Garden Community Redevelopment Area and the Winter Garden Community Redevelopment Reserve Area as identified in ATTACHMENT "A" are

hereby designated as brownfield areas pursuant to the Brownfields Redevelopment Act, Sections 376.77 - 376.85, F.S., and as such may be amended, and are hereby formally identified as the Winter Garden Downtown Brownfield Area.

SECTION III –

The Community Redevelopment Advisory Board is hereby appointed as the Winter Garden Downtown Brownfield Area Advisory Committee as required by Section 376.80(3), F.S.

SECTION IV –

The City Planner is hereby authorized to notify the Florida Department of Environmental Protection of the City of Winter Garden's decision to designate a Brownfields site for remediation, rehabilitation an economic development for the purposes set forth in Sections 376.77-376.84, F.S., as may be amended.

SECTION V

This resolution shall take effect immediately upon its final adoption by the Winter Garden City Commission.

DRAFT

RESOLUTION NO. 2018-012

A RESOLUTION OF THE CITY OF OCOEE, FLORIDA, CREATING THE OCOEE DOWNTOWN BROWNFIELD AREA; FOR THE PURPOSE OF ENVIRONMENTAL REMEDIATION, REHABILITATION AND ECONOMIC REDEVELOPMENT; AUTHORIZING THE CITY CLERK TO NOTIFY THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION OF SAID DESIGNATION AS REQUIRED; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the State of Florida has provided in Ch. 97-277, Laws of Florida, codified as Sections 376.77-376.86, Florida Statutes, as amended, "Brownfield Redevelopment Act:" for the designation by resolution of certain lands as a "Brownfield Area", and for the corresponding provision of environmental remediation, rehabilitation, and economic redevelopment for such areas; and

WHEREAS, the City of Ocoee shall notify the Florida Department of Environmental Protection of its decision to designate a Brownfield Area for remediation, rehabilitation and economic redevelopment including the required map, as set forth in the Act; and

WHEREAS, such brownfield designation will allow for accelerated environmental assessment and, if necessary, remediation of the property; and

WHEREAS, such brownfield designation will allow access to job-related bonus monies thereby encouraging job creation; and

WHEREAS, the proposed brownfield area warrants economic development and has a reasonable potential for such activities; and

WHEREAS, the proposed area to be designated represents a reasonably focused approach and is not overly large in geographic coverage; and

WHEREAS, the proposed area of designation has the potential to interest the private sector in participating in rehabilitation; and

WHEREAS, the designation of the proposed area is consistent with the Goals, Objectives and Policies the City of Ocoee's Comprehensive Plan;

WHEREAS, the City of Ocoee has complied with the procedures set forth in Section 166.041, Florida Statutes (2016), including notice and public hearing(s) in accordance with Sections 376.80 (1) and 166.041 (3) (c) 2, Florida Statutes (2016).

NOW THEREFORE, BE IT RESOLVED BY THE CITY OF OCOEE, FLORIDA:

SECTION ONE, RECITALS. The recitals set forth in the whereas clauses to this Resolution are hereby adopted as the legislative and administrative findings of the City Commission.

DRAFT

SECTION TWO, AREA AND CONDITIONS. That the mapped area described in Exhibit 'A', attached hereto and incorporated herein by reference, is hereby designated as included in the Ocoee Downtown Brownfield Area for environmental remediation, rehabilitation, and economic redevelopment as set forth in the Act under the following terms and conditions:

a. The City of Ocoee shall, as soon as practical, designate the entity or entities responsible for the remediation and rehabilitation of the Brownfield Area, or specific portions thereof, pursuant to Section 376.80 (3), Florida Statutes. The designation of a responsible entity shall not render the City of Ocoee responsible for the costs and liabilities associated with site remediation, rehabilitation, economic redevelopment or source removal, as those terms are defined in the Act unless the City of Ocoee specifically designates itself as the responsible person pursuant to said Section.

b. The designation of such Brownfield Area by this Resolution does not render the City of Ocoee responsible for the costs and liabilities associated with the site remediation, rehabilitation, economic redevelopment or source removal, as those terms are defined in the Act unless the City of Ocoee specifically designates itself as the responsible person pursuant to Section 376.80 (3), Florida Statutes (2016).

c. The designated Brownfield Area as authorized by this Resolution does not include any properties that are part of the Central Florida Expressway Authority (CFX) system. The Central Florida Expressway Authority has provided the City of Ocoee a written request that CFX properties are not to be included in the proposed Ocoee Brown Field Area (S.E.E.D), as provided for by Sections 376.80(1)(c) 3 , Florida Statutes, as amended, of the "Brownfield Redevelopment Act:".

d. Nothing in this Resolution shall be deemed to prohibit, limit, or amend the authority and power of the City of Ocoee, to designate any other property or properties as a Brownfield Site or Brownfield Area, or to modify, amend, or withdraw the designation established herein.

SECTION THREE, CLERK'S NOTIFICATION. In accordance with Section 376.80(1), Florida Statutes (2016), the City Clerk is hereby directed to notify the Florida Department of Environmental Protection of the City of Ocoee's designation of a Brownfield Area for rehabilitation for the purposes of Sections 376.77-376.86, Florida Statutes (2016).

SECTION FOUR, EFFECTIVE DATE. This resolution shall take effect immediately upon its final adoption by the City Commission of the City of Ocoee, Florida.

FDER Facility I.D. #489045868

DRAFT

Dear Mr. Gilliland:

In accordance with your request and authorization, Professional Service Industries, Inc. (PSI) is pleased to submit the Tank Closure Assessment for the removal of the former aboveground petroleum product storage tanks located at the above referenced Orange Bank property and the results of the Limited Soil Vapor Survey conducted.

PSI appreciates the opportunity to provide environmental services on this project. If you should have any questions or comments, please contact the undersigned at (407) 645-5560.

Sincerely,

TANK CLOSURE ASSESSMENT REPORT

Facility Name:	Orange Bank Property - West Orange Industrial Center
Facility Address:	Northwest Corner of Enterprise Avenue and Roper Parkway 452 Enterprise Avenue Ocoee, Orange County, Florida 34761 Site Vicinity and Location Plan are shown in Figure 1
Owner:	Orange Bank 65 North Orange Avenue Orlando, Florida 32801
Former Owner:	Yusuf Mohamad Excavation, Inc. FDER Facility #48-9045868
Tank Closure Date:	October 19, 1992
Tank Contractor:	Don Wood, Inc. (PSSC #045044), Orlando, Florida
Tank Closure Assessment Performed by:	Professional Service Industries, Inc. (PSI), Winter Park, Florida PSI Project No. 756-24218
Number of Tanks Closed:	A total of eight steel petroleum product storage tanks were closed. The tanks were positioned on ground surface in random locations in the central portion of the property. There were no product delivery piping systems associated with any of the tanks on the property. A description of each tank and its contents is provided in Table 1. The locations of the tanks are shown in Figure 2.

DRAFT

Tank Closure Activities: The tanks were cleaned and dismantled on-site by Don Wood, Inc. The petroleum product contents in three of the eight tanks closed were pumped and removed by Central Florida Fuels, Inc., Ocoee, Florida prior to the dismantling of the tanks. Upon completion of the dismantling activities, the tank scrap metal was transported to a local recycling facility (Commercial Shredding, Inc. of Orlando, Florida) for disposal. A copy of the certified manifest of product removed by Central Florida Fuels, Inc. and copies of the tare tickets from Commercial Shredding, Inc. are provided in Appendix A.

Soil Screening: Pursuant to the Florida Department of Environmental Regulation's (FDER) Closure Assessment requirements, soil organic vapor screening and visual/odor inspection were performed by PSI beneath and around the observed petroleum product storage tank locations. A Foxboro Century 128 Organic Vapor Analyzer (OVA) was utilized for soil screening activities. As required by the FDER guidelines, a minimum of five soil borings were installed at each tank location (except for Tanks #5 and #6, which were located in the wetlands) in order to determine the presence or absence of petroleum products in the soil.

A summary of the visual, odor and OVA screening observations and measurements recorded on the subject property is provided in Table 2. The locations of the soil boring locations are shown in Figure 2.

Elevated soil OVA readings were measured in soil borings HA-1, HA-2, HA-3, HA-4, HA-5, HA-6, HA-18 and HA-24. The elevated readings are believed to be due to the highly organic nature of the soils and the strong presence of muck in the subsurface. Visual and odor inspections of the soil samples collected did not indicate the presence of petroleum products.

An area of limited soil staining was observed at Tank #4 (waste oil). Approximately seven cubic yards of affected soils were excavated, placed on visqueen and covered pending disposal arrangements by Don Wood, Inc. The dimensions of the excavated area were 12-feet x 11-feet x 1.5-feet. Post excavation visual and odor inspection along with OVA screening indicated complete removal of the stained soils from this location. Refer to Table 3.

DRAFT

Groundwater Analyses:

On October 20, 1992, PSI personnel installed three temporary monitoring wells on-site in the former locations of the three tanks storing petroleum products. Temporary Well PW-1 was installed at Tank No. 2, Temporary Well PW-2 was installed at Tank No. 3 and Temporary Well PW-3 was installed at Tank No. 4 within the area of soil excavation. The temporary wells were placed in locations below the former tank positions.

On October 20, 1992, groundwater samples were obtained from the temporary monitoring wells by PSI personnel. Temporary monitoring wells PW-1 and PW-2 were sampled for Purgeable Aromatics (U.S. EPA Method 602) and Polynuclear Aromatics (U.S. EPA Method 610). Temporary monitoring well PW-3 was sampled for the waste oil analytical group parameters pursuant to Rule 17-770.600(8)(c), FAC. The parameters and corresponding U.S. EPA Methods are: Purgeable Aromatics (U.S. EPA 602), Purgeable Halocarbons (U.S. EPA 601), Polynuclear Aromatics (U.S. EPA 610), Priority Pollutant Volatiles (U.S. EPA 624), Base Neutral and Acid Extractables (U.S. EPA 625), Total Recoverable Petroleum Hydrocarbons (U.S. EPA 418.1), Arsenic (U.S. EPA 206.3), Cadmium (U.S. EPA 213.1), Chromium (U.S. EPA 218.1) and Lead (U.S. EPA 239.1). All field sampling activities were conducted in accordance with the guidelines detailed in the PSI Comprehensive Quality Assurance Plan.

The analytical laboratory report of the groundwater samples collected did not indicate any contaminant compounds present above Chapter 17-770, FAC target clean-up criteria. Methyl-Tert-Butyl Ether (MTBE) was reported at a level of 9 micrograms per liter (ug/L) in PW-1 and 35 ug/L in PW-2. Di-n-octylphthlate was reported at a level of 118 ug/L in PW-3. A summary of the analytical results is shown in Table 4 and the laboratory analytical report is provided in Appendix A.

Additional Assessments:

Three additional areas on the subject property were inspected as part of the activities performed by PSI. These areas are:

DRAFT

Area A — Vicinity of the single 55-gallon drum located about 20-feet of Tank No. 8. The 55-gallon drum reportedly contained waste oil. Slight surficial staining was observed at the base of the drum. The stained soil was removed by Don Wood, Inc. and included the remediated soils from Tank No. 4. PSI installed one soil boring (HA-7) adjacent to the drum in the area of staining for OVA screening.

Elevated hydrocarbon vapors were not detected in the soil. The waste oils were removed and pumped out by Central Florida Fuels, Inc. The certified manifest from Central Florida Fuels, Inc. is provided in Appendix A.

Area B — The former location of Tanks No. 5 and No. 6 in the west-central portion of the property (wetlands). Visual inspection of the standing water and vegetation in the former tank positions did not reveal any evidence of petroleum product releases thereupon. OVA screening was not undertaken due to the presence of standing water on ground surface.

Area C — Located in the southwestern portion of the property. Several old heavy equipment tires along with nine 55-gallon drums were observed at this location within the wetlands. Three of the nine drums were empty. The remainder reportedly contained waste oils scheduled to be pumped out by Central Florida Fuels, Inc. Visual inspection around the drums did not indicate soil contamination. Two soil borings were installed near the drum cluster (HA-16 and HA-17) and did not measure elevated levels of petroleum hydrocarbon vapors.

Conclusions:

1. The eight petroleum product storage tanks have been closed and removed in accordance with the requirements of Chapter 17-762, FAC.

DRAFT

2. Tank closure assessment activities completed by PSI were conducted in accordance with the requirements of Chapter 17-762 and 17-770, FAC.

3. All the observed surficial stained soils at former Tank No. 4 location and at the base of the 55-gallon drum located due east of Tank No. 8 were properly excavated, stockpiled and covered with visqueen pending disposal arrangements by Don Wood, Inc.

4. Groundwater quality sampling in the three former tank locations (PW-1, PW-2, PW-3) where petroleum products were stored, have indicated no evidence of groundwater contamination at levels above the Chapter 17-770 FAC target clean-up levels. One hydrocarbon compound, Di-n-octylphthalate, was measured at 118 micrograms per liter in PW-3. A maximum contaminant level (MCL) has not been established by the FDER for this compound at this time. MTBE was detected at levels of 9 ug/L and 35 ug/L in PW-1 and PW-2, respectively. The Target Clean-up Level for MTBE is 50 ug/L pursuant to Chapter 17-770, FAC.

5. The elevated soil OVA readings measured in soil borings HA-1 to HA-6, HA-18 and HA-24 are believed to be associated with the highly organic nature of the soils and the strong presence of muck in the subsurface at these locations. Visual and odor inspections of the soil samples did not indicated the presence of petroleum products. Therefore, no further assessment is required with respect to the eight tanks dismantled and removed from the Orange Bank property.

DRAFT

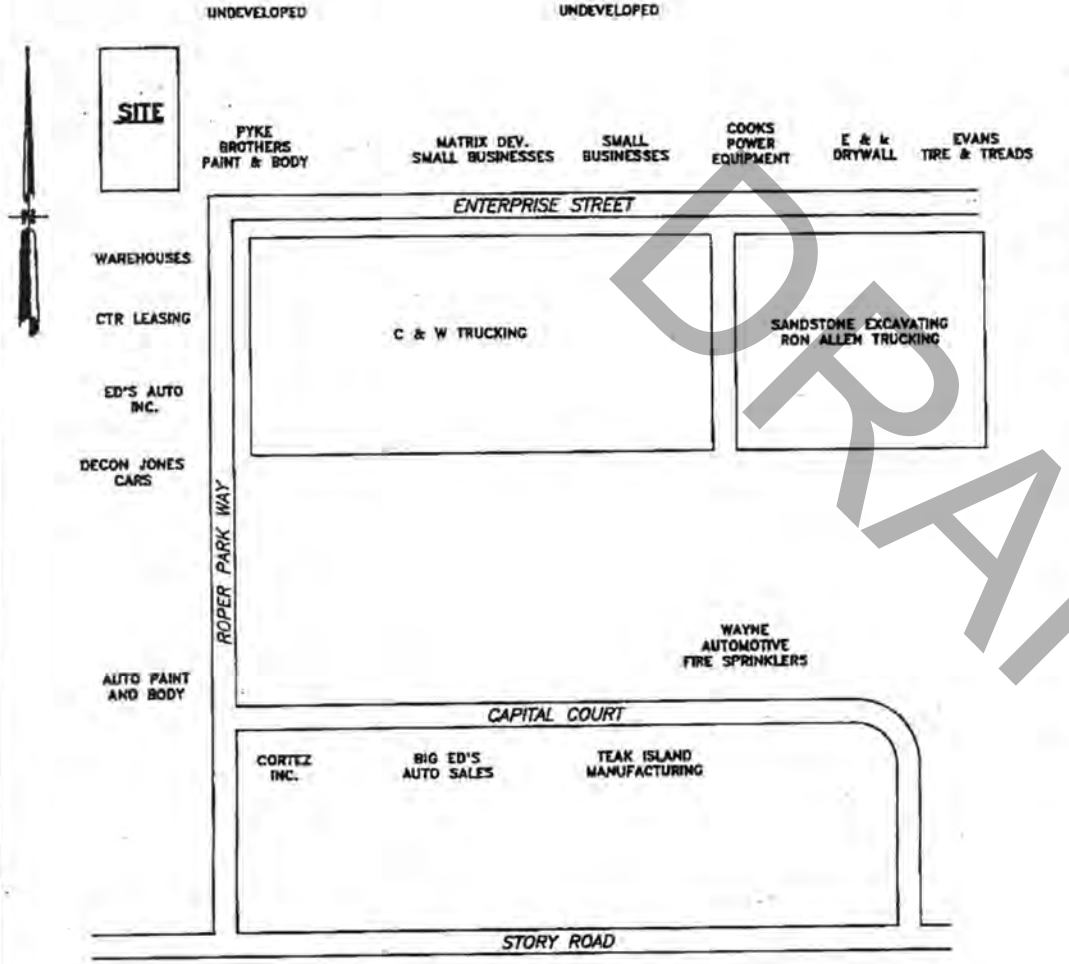

Recommendations:

1. Ensure prompt disposal of the stockpiled waste oil stained soils pursuant to the FDER's guidelines.

2. Ensure prompt removal and disposal of the 55-gallon drums and their contents and the old tires observed in the southwestern portion of the property in accordance with the FDER's guidelines.

LATITUDE / LONGITUDE: Lat 28° 33' 46.0085" / Long 81° 33' 26.3503"

SIC CODE:

TYPE OF OWNERSHIP: Private

Introduction:

On May 4, 2011, Michael Eckoff, Florida Department of Environmental Protection (FDEP), accompanied by Barry Brenton, Central Florida Automotive Group LLC (CFAG), inspected CFAG as a result of a complaint alleging washing and painting vehicles outside.

The facility has been on-site for approximately five years. Operating hours are from 8 AM to 5 PM, Monday to Friday, and there are four employees. The property is owned by Gage A Mark, 451 L F Roper Pkwy, Ocoee.

INSPECTION HISTORY
The facility has never been inspected by the Department for compliance with state and federal hazardous waste regulations.

Process Description:

The facility details vehicles, including washing, waxing, and interior cleaning. Only light touch-up painting is conducted on-site. Paint jobs are contracted to an outside vendor. Approximately six vehicles per week are detailed.

An area outside the building is used to rinse vehicles with water. The wastewater flows down the parking lot to a stormwater drain. Another wash area, which is under cover, is located next to the stormwater drain. Vehicles are washed and engines degreased in this area. The wastewater flows into the stormwater drain [403.087(1), Florida Statutes (F.S.), and 403.161(1)(b), F.S.]. The inspector informed Mr. Brenton that the vehicle washing and engine degreasing must cease immediately.

Near the washing area and next to a shed were two 55-gallon drums. Both drums were not labeled and open. Mr. Brenton did not know what was in the drums. The inspector informed Mr. Brenton that a waste determination must be conducted on the contents of the drums [40 CFR 262.11].

Inside the building was a paint prep and cleaning area. Two paint guns are used occasionally for

DRAFT

touch-up painting. The guns are cleaned with lacquer thinner, which was found to contain 60% toluene. The cleaning process involves spraying the lacquer thinner into the air [40 CFR 261.5(g)(3)]. Rags used for cleaning are disposed in the trash [40 CFR 262.11].

RECORDS
The facility had no disposal records to review [62-730.030(3). Florida Administrative Code (F.A.C.)].

New Potential Violations and Areas of Concern:

Checklist Independent Potential Violations and Areas of Concern

Type:	Violation
Rule:	262.11
Explanation:	A person who generates a solid waste, as defined in 40 CFR 261.2, must determine if that waste is a hazardous waste. Specifically, CFAG failed to conduct a proper waste determination on the contents of the two 55-gallon drums and the used rags prior to disposal in the trash.
Corrective Action:	CFAG shall conduct a proper waste determination on the contents of the two 55-gallon drums and used rags. Please provide a copy of the results of the waste determination to the Department within 30 days from the date of your receipt of this Non-compliance Letter. If any of these wastes are known to be hazardous waste, please indicate this and when available, provide a copy of the manifest documenting removal of these wastes from the property.

Type:	Violation
Rule:	261.5(g)(3)
Explanation:	A conditionally exempt small quantity generator may either treat or dispose of his hazardous waste in an on-site facility or ensure delivery to an off-site treatment, storage or disposal facility. Specifically, CFAG failed to properly dispose its waste lacquer thinner.
Corrective Action:	CFAG shall properly dispose all hazardous waste. Please provide documentation of proper disposal of waste lacquer thinner to the Department within 30 days from the date of your receipt of this Non-compliance Letter.

Type:	Violation
Rule:	62-730.030(3)
Explanation:	A conditionally exempt small quantity generator (CESQG) which chooses to send its hazardous waste to an off-site treatment, storage or disposal facility shall document delivery of its hazardous waste through written receipts and other records which are retained for at least three years. The written receipts and other records shall include names and addresses of the generator and the treatment, storage or disposal facility, the type and amount of hazardous waste delivered, and the date of shipment. Specifically, CFAG failed to document delivery of its hazardous waste to an off-site treatment, storage or disposal facility through written receipts and other records which are retained for at least three years.
Corrective Action:	CFAG shall document delivery of its hazardous waste to an off-site treatment, storage or disposal facility through written receipts and other records which are retained for at least three years. Please provide documentation that this requirement is being fulfilled to the Department within 30 days from the date of your receipt of this Non-compliance Letter.

DRAFT

Summary of Potential Violations and Areas of Concern:

Potential Violations

Rule Number	Area	Date Cited	Explanation
Checklist Independent Violations			
262.11		05/04/2011	A person who generates a solid waste, as defined in 40 CFR 261.2, must determine if that waste is a hazardous waste. Specifically, CFAG failed to conduct a proper waste determination on the contents of the two 55-gallon drums and the used rags prior to disposal in the trash.
261.5(g)(3)		05/04/2011	A conditionally exempt small quantity generator may either treat or dispose of his hazardous waste in an on-site facility or ensure delivery to an off-site treatment, storage or disposal facility. Specifically, CFAG failed to properly dispose its waste lacquer thinner.
62-730.030(3)		05/04/2011	A conditionally exempt small quantity generator (CESQG) which chooses to send its hazardous waste to an off-site treatment, storage or disposal facility shall document delivery of its hazardous waste through written receipts and other records which are retained for at least three years. The written receipts and other records shall include names and addresses of the generator and the treatment, storage or disposal facility, the type and amount of hazardous waste delivered, and the date of shipment. Specifically, CFAG failed to document delivery of its hazardous waste to an off-site treatment, storage or disposal facility through written receipts and other records which are retained for at least three years.

DRAFT

Areas of Concern

No Areas of Concern

Conclusion:

Central Florida Automotive Group LLC was inspected as a conditionally exempt small quantity generator of hazardous waste and was not in compliance at that time.

The vehicle washing and engine degreasing has been referred to the Department's Wastewater Compliance Enforcement Section for follow-up.

The complainants allegation of painting outside could not be confirmed.

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.

Orlando, Florida 32835

Orange County-HW
Central Florida Automotive Group, LLC
No EPA Identification Number

DRAFT

Dear Mr. Schreiber:

A hazardous waste compliance inspection was conducted at your facility located at 451 L F Roper Parkway, Ocoee, on May 4, 2011. The inspection was conducted under the authority of Section 403.091, Florida Statutes (Fla. Stat.) and Chapter 403, Part IV, Fla. Stat. in order to determine the compliance status of your facility with Title 40 Code of Federal Regulations (CFR) Parts 260 - 268. The provisions of 40 CFR Parts 260 through 268 have been adopted by reference as the state hazardous waste rules in Chapters 62-730, Fla. Admin. Code.

During this inspection, possible violations of Chapter 403 Fla. Stat. and Chapter 62-730, Florida Administrative Code (Fla. Admin. Code) were noted by Department of Environmental Protection specialists. Section 403.721(1), Fla. Stat. requires persons who generate hazardous waste to comply with rules adopted by the Department. The purpose of this letter is to seek your cooperation in resolving these matters.

Please see the attached inspection report for a full account of Department observations

PLEASE BE ADVISED that this Non-Compliance Letter is part of an agency investigation preliminary to agency action within the meaning of Section 120.57(5), Fla. Stat. We request that you review the potential violations noted and respond in writing within 30 days of receipt of this Non-Compliance Letter. Your written response should either describe what you have done to comply, or provide evidence (photographs, etc.) to support a claim that the violations did not occur.

It is the Department's intention to allow you to document compliance or corrective actions, so that this matter can be closed without further enforcement. Your failure to respond promptly in writing may result in the initiation of formal enforcement proceedings.

Please address your response to Michael Eckoff at the Central District office address noted on the letterhead above. If you have any questions you may contact Mr. Eckoff at (407)893-3323 or electronically at michael.eckoff@dep.state.fl.us. We look forward to your cooperation in completing the investigation and resolution of this matter.

Sincerely,

Janine Kraemer

TYPE OF OWNERSHIP: Private

Introduction:

On March 11, 2021, John White, Florida Department of Environmental Protection, conducted a site visit at Central Florida Automotive Group LLC to determine the facility's compliance with state and federal hazardous waste regulations. The facility is no longer in operation at this location. The site is now occupied by Premier Automotive.

Conclusion:

Florida Administrative Code 62-730.150(2)(b) requires generators notify the Department of all changes in status, including changes in facility name and location. As the notification information for this facility is no longer valid, the facility is considered closed at this location.

DRAFT

Central Florida Automotive Group LLC Inspection Report

Inspection Date: 03/11/2021

1.0: Pre-Inspection Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.

Item No.	Pre-Inspection Review	Yes	No	N/A
1.1	Has the facility notified with correct status? 262.18(a)			✓
1.2	Has the facility notified of change of status? 62-730.150(2)(b)			✓
1.3	Did the facility conduct a waste determination on all wastes generated? 262.11			✓

Dear Mr. Pyke:

The Hazardous Waste Management Program has reviewed your application for a hazardous waste EPA I.D. Number as a Small Quantity Generator. Based on the information received you have been issued the following identification number for the facility located at the above address:

FLD 01-935-0891.

Florida Administrative Code Rule 17-30 requires all generators of hazardous waste and all hazardous waste treatment, storage, or disposal facilities to file annual report of their hazardous waste activities with the DER. You are required to comply with this rule concerning the filing of an annual report by March 1 for the preceding calendar year. Additionally, all hazardous waste generators and facilities that are not subject to the annual report requirement but maintain an EPA/DER identification number are required to verify their status annually. This includes small quantity generators, generators that beneficially reuse or recycle all their waste, or generators and facilities either not handling waste during the reporting year or qualifying for another exemption. The annual report forms will be sent by the Department to the contact person at the address identified on the notification form.

If any of the information on the Hazardous Waste Activity form changes, please notify us in writing at the letterhead address. If I can be of further assistance, please call 904/488-0300.

Sincerely,

Maybin Simfukwe
Hazardous Waste Section

INSPECTION TYPE:

Site Visit Inspection for Closed facility

INSPECTION PARTICIPANTS:

Principal Inspector: Danielle Owens, Environmental Specialist

Other Participants: N/A

LATITUDE / LONGITUDE: Lat 28° 33' 46.79" / Long 81° 33' 20.11"

SIC CODE: 7532 - Services - top and body repair and paint shops

TYPE OF OWNERSHIP: Private

Introduction:

On June 24, 2011, Danielle D. Owens, Florida Department of Environmental Protection (FDEP), conducted a site visit at Ciscos Body Shop. Facility is closed.

Summary of Potential Violations and Areas of Concern:

Potential Violations

No Violations

Areas of Concern

No Areas of Concern

DRAFT

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C. The above noted potential items of non-compliance were identified by the inspector(s).

This is not a formal enforcement action and may not be a complete listing of all items of non-compliance discovered during the inspection.

DRAFT

EPA ID No. FLD982142267

9. Type of Regulated Waste Activity (Mark 'X' in the appropriate boxes):

A. Hazardous Waste Activities:

1. Generator of Hazardous Waste
(Choose only one of the following three categories.)

☐ a. Large Quantity Generator (LQG):
Generates in any calendar month 1,000 kilograms or greater per month (kg/mo) (2,200 lbs.) of *non-acute* hazardous waste; **or** Greater than 1 kg (2.2 lbs) of *acute* hazardous waste

☐ b. Small Quantity Generator (SQG):
Generates in any calendar month greater than 100kg/mo but less than 1,000 kg/mo (>220 to <2,200 lbs.) of *non-acute* hazardous waste and/or 1 kg (2.2 lbs) or less of acute hazardous waste

☒ c. Conditionally Exempt SQG (CESQG):
Generates in any calendar month 100 kg/mo or less (220 lbs.) of *non-acute* hazardous waste **and/or** 1 kg (2.2 lbs) or less of *acute* hazardous waste

In addition, indicate other generator activities (that apply).

☐ d. United States Importer of hazardous waste

☐ e. Mixed Waste (hazardous and radioactive) Generator

For Items 2 through 7, check all that apply.

2. ☐ **Treater, Storer, or Disposer of Hazardous Waste** (at your facility) Note: A hazardous waste permit may be required for this activity.

3. ☐ **Recycler of Hazardous Waste** (at your facility) Specify: ☐ Commercial; ☐ Non-Commercial. Note: A hazardous waste permit may be required for this activity.

4. ☐ **Exempt Boiler and/or Industrial Furnace**
☐ a. Small Quantity On-site Burner Exemption
☐ b. Smelting, Melting, and Refining Furnace Exemption

5. ☐ **Person Authorized to Manage Conditionally Exempt Waste generated at other facilities** - Check this management activity ONLY if you attach EITHER a copy of your application for such authorization OR the authorization you received from FDEP

6. ☐ **Underground Injection Control**

7. ☐ **Transporter of Hazardous Waste** Note: A Certificate of Liability Insurance is required along with this registration. Registration must be renewed annually. ☐ a. For own waste only; ☐ b. For Commercial Purposes

c. **Hazardous Waste Transporter Insurance Information:**
Insurance Company _____
Address _____
_____
Contact: _____ Telephone: _____
Policy Number: _____ Expiration date: _____

d. Transportation Mode: ☐ Air; ☐ Rail; ☐ Highway; ☐ Water; ☐ Other - specify _____

e. ☐ **Hazardous Waste Transfer Facility**: Storage Volume _____

B. Universal Waste Activities:

1. Indicate types of universal waste generated and/or accumulated at your facility (includes destination facilities). (check all boxes that apply)

	Generate	Accumulate
a. Batteries	☐	☐
b. Pesticides	☐	☐
c. Mercury Containing Thermostats	☐	☐
d. Mercury Containing Lamps	☐	☐
e. Mercury Containing Devices	☐	☐
f. Other (specify) _____	☐	☐
g. Other (specify) _____	☐	☐

2. Total quantity of universal waste on site at any time.

☐ a. 5,000 kg or more; Large Quantity Handler (LQH)

☐ b. More than 1 kg of acutely hazardous pharmaceutical waste ("P-listed") (LQH)

☐ c. Less than 5,000 kg (11,000 lbs); Small Quantity Handler (SQH)

3. ☐ **Destination Facility for Universal Waste**
Note: For this activity, a facility must treat, dispose or recycle a universal waste. A facility must either have a hazardous waste permit or recycle the universal waste without storing it.

DRAFT

EPA ID No. FLD982142267

9. Type of Regulated Waste Activity - continued (Mark 'X' in the appropriate boxes):

C. Used Oil Activities:

1. **Used Oil Transporter - Indicate type(s) of activity(ies)**
   - ☐ a. Transporter
   - ☐ b. Transfer Facility
2. **Used Oil Processor and/or Re-refiner - Indicate type(s) of activity(ies)**
   - ☐ a. Processor
   - ☐ b. Re-refiner
3. ☐ **Off-Specification Used Oil Burner**
4. **Used Oil Fuel Marketer - Indicate type(s) of activity(ies)**
   - ☐ a. Marketer who directs shipment of off-specification used oil to off-specification used oil burner
   - ☐ b. Marketer who first claims the used oil meets the specifications
5. ☐ **Used Oil Generator**

D. Other State Regulated Waste Activities: 1. ☐ **Used Oil Filter Handler** 2. ☐ **PCW Handler**
These activities may require additional submissions.

10. Waste Codes for Federally Regulated Hazardous Wastes: List the waste codes of the Federal hazardous wastes handled at your facility. List them in the order they are presented in the regulations (e.g., DOO1, DOO3, FOO7, U112). Hazardous waste transporters list codes **routinely** or **usually** transported. Use an additional page if more spaces are needed.

15	16	17	18	19	20	21
22	23	24	25	26	27	28

11. Other Status Changes (Mark 'X' in the appropriate boxes):

A. Non-Handler of Regulated Waste at this facility
- ☐ 1. Business no longer generates, transports, treats, stores, or disposes of hazardous waste.
- ☐ 2. Waste generated by business has been delisted.
- ☐ 3. Other (explain) _____

B. Facility Closed
- ☐ 1. Closed at this location and **moved or moving** to another - submit a new 8700-12FL for the new location if you will be handling regulated waste there.
- ☐ 2. Out of Business - Business closed on _____ (Date). Please provide a contact person, mailing address, and phone number where you can be reached after closing.
  Contact _____ Phone _____
  Address _____
  City, State, Zip _____

☐ **C. Property Tax Default** ☐ **D. Petition for Bankruptcy Protection**

Ocoee, FL 34461

The Hazardous Waste Management Program has reviewed your application for a hazardous waste DER/EPA I.D. Number.

Based on the information received you have been issued the following identification number for the facility at 411 ENTERPRISE DR , OCOEE FLD982143943

Facility ID # FLD982143943

Your facility status is the following:

Small quantity generator.

Florida Administrative code rule 17-30 requires all generators of hazardous waste and all hazardous waste treatment, storage, or disposal facilities to file an annual report of their hazardous waste activities with DER. You must comply with this rule concerning the filing of an annual report by March 1 for the preceding calendar year. Hazardous waste generators and facilities that are not subject to the annual report requirement but maintain an EPA/DER identification number are required to verify their status annually using the annual report form. The forms will be sent to the contact person. Businesses that generate less than 1000 kilograms of hazardous waste per month (small quantity generators) are not subject to these reporting or verification requirements.

If any of the information on the Hazardous Waste Activity form changes, please notify us in writing at the letterhead address. For further assistance, please call 904/488-0300.

Sincerely,

Michael X. Redig

Comments:

Comment Date	Comment
10/21/2003	No Occupational License
2/25/2008	Btr 3100-0566726 (Surcharge). Pond On Site Is Overgrown With Invasive/Nuisance Aquatic Vegetation; Outfall Is Full Of Sediment. Allowing 30 Days To Clear And Clean Out. (1.75)
2/25/2008	Dx = Used Oil Stencils & Labels
3/25/2008	Retention Pond Has Been Scarified And Is Perking Properly. Removed Approximately 65 Cy Of Dirt.
3/25/2008	Mr. Alderman Has Purchased A Universal Waste Box From Wm (Lamptracker.Com) To Collect Ldeb'S.
6/22/2010	Remains In Compliance; Used Oil Tank Area Requires Immediate Clenup Of Spills, Though, Rather Than Just Throwing Oil-Dry Down And Leaving It. Mr. Alderman Promised Immediate Correction.
3/7/2012	Site Is Vacant, Up For Sale/Lease.
3/26/2014	Entire Area Around Used Oil Tank Covered In Several Inches Of Saturated Oil-Dry -- Told Rp To Get Area Cleaned Up, Keep It Cleaned Up -- And When There Is A Spill, Oil-Dry Is To Be Collected As Soon As It'S Done It'S Job -- Not Left For Weeks. Also, When We Walked In There Was A Large Truck That Had A Bucket Underneath, But Also An Oil Spill ~8' In Diameter. Manager Laughed And Said "Yeah, The Rookie Did That Last Night, We'Ve Been Giving Him Grief All Morning". I Informed The Manager That Oil Spills Have To Be Cleaned Up Immediately, Not Left Overnight Or Any Length Of Time. Retention Pond (In Ocoee) -- Is Vastly Overgrown, Particularly At The Immediate Outlet Of The Concrete Solids-Stabilization Basin (Which Is A Bright Green -- Somewhat Acidic From Rinsing Of Concrete-Hauling Trucks).
12/5/2014	Rp Has Kept The Area Around The Used Oil Tank Clean. The Pond Was Thoroughly Cleaned Out And Restored To Npdes-Compliance.
3/8/2018	New General & Shop Management Brought In; Shop Is Much Improved In Cleanliness, Response To Spills. Facility Is In The Process Of Relamping To Led, But Needs To Properly Store And Dispose Of Spent/Waste Fluorescents In The Interim. Provided Stencils For Un-/Mis-Labeled Used Oil & Filter Containers. Pond Behind Washrack Is Clean, Facility Has Placed Oil-Sorb Sock To Keep Any Potential Oil From Entering, And Is Designing An Oil/Water Separator.

Re: Compliance Monitoring Well Gas Survey
C&N Trucking Terminal, Ocoee, Florida
FAC ID#: 488512715
for C&N Trucking, Inc.

DRAFT

Gentlemen:

Coastal Remediation Company (CRC) is pleased to present the results of a monitoring well gas survey conducted at the C&N Trucking Facility, Ocoee, Orange County, Florida. The survey was conducted at the request of Mr. Danny Alderman of C&N Trucking, Inc. as conveyed to Ms. Valerie Francisco of CRC.

BACKGROUND

C&N Trucking operates two 10,000 gallon diesel underground storage tanks used for fleet vehicle fueling. During a routine inspection conducted on October 27, 1992, by Mr. Richard S. Boike of Orange County Environmental Protection Department (OCEPD), elevated organic vapor readings of 50 and 110 parts per million (ppm) were reported in compliance monitoring wells MW-2 and MW-4, respectively. Compliance monitoring well locations are provided in Figure 1. As a result, OCEPD requested that C&N Trucking obtain an independent consultant to confirm the readings with an Organic Vapor Analyzer (OVA) equipped with a Flame Ionization Detector (FID).

WELL SURVEY

Visual Inspection

On January 8, 1993, Valerie Francisco of CRC visited the site to perform a confirmatory well gas survey. All four compliance wells were opened, visually inspected, and allowed to "breathe" for forty-five minutes. Visual inspection revealed a froth on the groundwater surface which was at approximately 4 feet below ground surface (bgs).

Well Gas Screening

A Heath Porta-FID II OVA was used to detect organic vapors rising from undisturbed groundwater inside the compliance wells. An extension was used on the sample intake port of the OVA to allow vapor samples to be collected from approximately 2 ft. bgs inside each well casing. A second reading was then taken using a charcoal filter to estimate the contribution of natural gases such as methane and ethane. The results of this well gas survey, conducted under undisturbed groundwater conditions, are provided in the following table:

ORGANIC VAPOR SCREENING RESULTS
DIESEL UST COMPLIANCE WELLS
UNDISTURBED GROUNDWATER CONDITIONS
for C&N Trucking, Inc.

Well Number	Location	Sampled Depth (ft bgs)	Total Headspace Organic Vapor Concen-tration (ppm)	Methane/ Ethane Concen-tration (ppm)	Total Organic Vapor Concen-tration minus Methane/E thane Concen-tration (ppm)	Time
1	NE	2	0	0	0	1450
2	SE	2	800	0	800	1535
3	NW	2	0	0	0	1448
4	SW	2	0	0	0	1540

DRAFT

Bailing Inspection

While CRC was on site, Mr. Alderman performed the monthly bailer inspection test to determine the presence or absence of free product. No free product was observed in water bailed from any of the four wells, however iron bacteria floc was prevalent which probably accounts for the froth observed on the groundwater surface upon the initial well inspection.

Repeated Well Gas Survey

Since the bailer test disturbed the groundwater in the wells and broke up the surface froth, the well gas survey was repeated for comparison with the original results. The following table presents the results of the well gas survey conducted under disturbed groundwater conditions:

ORGANIC VAPOR SCREENING RESULTS DIESEL UST COMPLIANCE WELLS DISTURBED GROUNDWATER CONDITIONS for C&N Trucking, Inc.						
Well Number	Location	Sampled Depth (ft bgs)	Total Headspace Organic Vapor Concen-tration (ppm)	Methane/ Ethane Concen-tration (ppm)	Total Organic Vapor Concen-tration minus Methane/E thane Concen-tration (ppm)	Time
1	NE	2	0	0	0	1600
2	SE	2	800	0	800	1615
3	NW	2	3	0	3	1610
4	SW	2	215	0	215	1620

DRAFT

CONCLUSION

The results of this well gas survey confirm that compliance monitoring wells MW-2 and MW-4 exhibit organic vapor readings above the 50 ppm threshold limit for diesel underground storage tank compliance wells. The presence of natural methane/ethane gas interferences was not detected. In accordance with CH 17-761.460 F.A.C., the detection of vapor levels in excess of 50 ppm in compliance wells at diesel sites constitutes a suspected release and C&N must report this suspected discharge on the DRF form within one day of receiving this report.

RECOMMENDATION

Although the results of this well gas survey indicate elevated well gas readings, a Contamination Assessment may not necessarily be the next step. The presence of these vapors is suspected to be caused by very small, isolated surface contamination events and affected groundwater is suspected to exist only within the stagnant well volume. For this reason, CRC would like to recommend further investigation to confirm the presence of the "suspected" release. It is recommended that compliance monitoring well MW-2 be purged of ten well volumes and a single groundwater sample be collected for analysis of the parameters listed in EPA Method 602. If the results of this sampling indicate that groundwater has not been significantly affected, no further testing shall be initiated except for the continuation of the monthly bailer tests for free product. If the sampling results do indicate groundwater contamination, a Contamination Assessement will be required per FAC 17-770.

* * * * *

Thank you for this opportunity to be of service to C&N Trucking, Inc. If you have any questions or problems regarding this well gas survey, please do not hesitate to call.

Yours very truly,

COASTAL REMEDIATION COMPANY

State Ground Water Target Levels That Affect A Pollutant Storage Tank System Closure Assessment

State ground water target levels are as follows:

1. For gasoline (EPA Method 602):
   a. Benzene — 1 ug/l
   b. Total VOA — 50 ug/l
      - Benzene
      - Toluene
      - Total Xylenes
      - Ethylbenzene
   c. Methyl Test-Butyl Ether (MTBE) — 50 ug/l

2. For kerosene/diesel (EPA Method 610):
   a. Polynuclear Aromatic Hydrocarbons (PAHS) (Best achievable detection limit, 10 ug/l maximum)

Ocoee, Florida
FDEP Facility I.D. #48/8512715

Gentlemen:

As requested, we have completed our preliminary assessment for the subject project. The purpose of this study was to observe the tank field excavation and former fuel dispenser pump locations for evidence of petroleum contamination, and to collect and analyze soil samples relative to petroleum following removal of the tanks and surrounding soils, and collect groundwater samples for laboratory analyses. The scope of our work was modified on-site due to the presence of petroleum contaminated soils encountered during tank removal operations. Our modified scope of work included monitoring preliminary Initial Remedial Action (IRA) activities which consisted of conducting soil gas analyses during removal of contaminated soil to assist in segregating contaminated soils from the excavation.

This report has been prepared for the exclusive use of Acts Construction, Inc. and their client, for specific application to this project in accordance with generally accepted geotechnical and hydrogeological engineering practices. No other warranty, expressed or implied, is made.

DRAFT

BACKGROUND INFORMATION

The subject site is located at 450 Enterprise Street in Ocoee, Orange County, Florida in the northwest quarter of Section 19, Township 22 S, Range 28 E. The approximate site location is shown superimposed on the 1956 Winter Garden, Florida, United States Geological Survey (USGS) quadrangle map (photorevised 1980) on Figure 1.

The subject tank field contained two 10,000-gallon steel underground diesel storage tanks. Two fuel dispenser pumps were formerly situated above the tank field and one dispenser pump was located approximately 20 feet west of the tank field. The approximate former positions of the underground storage tanks and fuel dispenser pumps prior to their removal are shown on the Sample Location Plan, Figure 2. The tanks and dispenser pumps were removed by Acts Construction, Inc. (DPR No. PCC 045038) on May 8, 1995.

The two underground storage tanks and fuel dispenser pumps were removed while an Ardaman and Associate's representative was on-site. The soils surrounding the storage tanks were removed and stockpiled on-site. Immediately following the removal of the tanks, the tank field excavation was approximately 950 square feet in plan area and was approximately 11 feet deep.

FIELD EXPLORATION

Our field program consisted of: 1) observing the underground storage tanks and fuel dispenser pumps excavation and removed tanks for evidence of petroleum contamination after removal of the tanks, 2) collecting soil samples at selected locations for soil gas analyses from the tank field excavation and the former fuel dispenser pump locations, 3) performing soil gas analysis on the soil samples obtained and 4) collecting groundwater samples for laboratory analyses from a temporary monitoring well installed in the tank field excavation. Additionally, Ardaman & Associates monitored excavation of "excessively contaminated" soils as Initial Remedial Action (IRA). Our field program was conducted on May 8 through 10, 1995.

Contamination was initially discovered at the tank field location following removal of the fuel dispenser pumps. Stained soil and a small amount of free petroleum product were noted beneath the fuel dispenser pumps after removal of the pumps. The impacted soil and free product were excavated during IRA.

The two tanks removed from the excavation appeared to be in relatively good condition, with exception of a small hole (approximately 3/8 inch diameter) noted in the bottom of the tank removed from the south side of the excavation. Petroleum odor was noted in exposed soils in the excavation at the former storage tanks locations following removal of the tanks and in the excavated over-burden soils.

Soil sample collection locations for soil gas analyses are shown on the Sample Location Plan (Figure 2). The soil sampling locations in the tank field excavation were selected based on visual inspection of the excavation and relative to the former positions of the tanks and dispenser pumps. Soil samples were obtained from the bottom and sides of the tank field excavation and from the former dispenser pump locations.

Soil samples for soil gas analyses were placed in clean 16-ounce sample jars (half filled). The gas in the head space above the soil in the jars was analyzed using a Foxboro Organic Vapor Analyzer (OVA), Model OVA 128, Serial Number 40751 with and without a charcoal filter. The OVA was allowed to pump the gas from the head space for 15 to 30 seconds. The meter on the OVA was visually monitored and the maximum reading obtained over the said time increment was recorded. In the survey mode, the OVA is calibrated to 95 parts per million methane in air and zero air.

Soil samples were obtained from the contaminated soil stockpiled on polyethylene sheeting for preincineration analysis of the virgin petroleum group. As specified in FAC Chapter 62-775, five composite preburn soil samples were obtained from the soil pile and submitted to a State approved analytical laboratory since the volume of contaminated soil was estimated to be approximately 1000 cubic yards (as discussed below).

DRAFT

Groundwater samples were obtained for laboratory analyses by EPA Methods 602 and 610 from a temporary monitoring well (TMW-1) installed within the tank field excavation. TMW-1 was installed in the bottom of the tank field excavation to a depth of approximately 18.5 feet below land surface (bls) and was screened between approximately 13 to 18 feet bls. It is noted that to install the temporary monitoring well in the bottom of the excavation, our field representative hand augered through approximately 4 feet of clay and clayey fine sand. The water table was encountered beneath the clay at a depth of approximately 17 feet below ground surface. The boring conducted to install the well was grouted after the well was sampled and removed.

Over 3 well volumes were purged from TMW-1 prior to obtaining the groundwater samples. The samples were submitted to a State certified laboratory for analyses. The location of TMW-1 is shown on the Sample Location Plan, Figure 2.

During our field activities, Mr. Richard Boik representing the Orange County Environmental Protection Department was present to observe the tanks and tank field excavation.

TEST RESULTS

The results of the soil-gas analyses are tabulated on Figure 2. Soil contamination in the tank field excavation was initially detected based on strong petroleum odor and stained soil in the excavation following removal of dispenser pumps and storage tanks and in the over-burden soils.

As shown on Figure 2, soil samples collected from the tank field excavation prior to soil removal as Initial Remedial Action (soil samples numbered 1 through 14, 17, 21, 22, 26, 32, 35 and 37) exhibited elevated organic vapor readings above background levels. "Excessively contaminated" soil is defined in Chapter 62-770, FAC, as soil exhibiting an OVA reading of 50 for the Mixed Product Analytical Group (includes diesel). Net OVA readings from soil samples collected from the tank field excavation prior to IRA varied from 20 to 1000+. Therefore, "excessively contaminated" soils were detected in the tank field excavation.

Upon discovery of "excessively contaminated" soils in the excavation, these soils were excavated and stockpiled on polyethylene sheeting as Initial Remedial Action (IRA) on May 8 through 10, 1995. OVA samples numbered 15, 16, 18, 19, 20, 23, 24, 25, 27 through 31, 34 and 38 through 43 were collected after termination of IRA. As shown on the table, these samples did not exhibit net OVA readings above 50. Therefore, no further IRA was conducted. Approximately 1,000 cubic yards of "excessively contaminated" soil were excavated and stockpiled as IRA. It is noted that all over-burden soil removed from the excavation to remove the tanks was also stockpiled on the polyethylene sheeting.

No soil Analyzed

The results of the preincineration analyses of the soil samples retrieved from the soil stockpiled as IRA are included in Appendix I. At the request of Mr. Danny Alderman with C&N Trucking, we submitted a copy of the preincineration results to CA Meyer Paving Company on May 18, 1995. It is our understanding that C&N Trucking intends to haul the soil to CA Meyer for thermal remediation of the soil.

Groundwater analytical results are presented in Appendix I. As shown in Appendix I, no EPA Methods 602 and 610 parameters were detected in the groundwater samples obtained from TMW-1.

DRAFT

CONCLUSIONS AND RECOMMENDATIONS

Based on the results of the soil-gas analyses and observation of the excavation and stockpiled soils, "excessively contaminated" soils were present in the tank field excavation. "Excessively contaminated" soils removed from the tank field excavation as overburden and by over excavation as IRA were stockpiled on polyethylene sheeting on-site as part of IRA initiated on May 8, 1995. Approximately 1,000 cubic yards of contaminated soils were excavated and stockpiled as IRA between May 8 and 10, 1995. Backfilling of the tank field excavation with clean soils was initiated by Acts Construction, Inc. on May 11, 1995.

No EPA Methods 602 and 610 parameters were detected in the groundwater samples obtained from Temporary Monitoring Well TMW-1 which was installed in the subject tank field excavation.

Due to the detection of "excessively contaminated" soils, the Florida Department of Environmental Protection and Orange County may require that additional Contamination Assessment in accordance with FAC Chapter 62-770 be conducted. Ardaman & Associates would be pleased to provide these services.

A Closure Assessment Form has been partially completed by us and is included in Appendix II. The owner of this facility should complete the Closure Assessment Form and sign it. A copy of this report should be sent, with the signed Closure Assessment Form, by the facility owner to: (1) Florida Department of Environmental Protection, 3319 Maguire Boulevard, Suite 232, Orlando, Florida 32803-3767, Attn: Stationary Tanks Program; and (2) Orange County Environmental Protection Department, 2002 E. Michigan Street, Orlando, Florida 32806. Also included in Appendix II is a copy of the IRA Report Form that has been completed by us and a copy of the Discharge Reporting Form submitted to Orange County Environmental Protection Department.

CLOSURE

The analysis and conclusion submitted in this report are based on the data obtained during our exploration. This study is a focus study limited to the specific methods of investigation. The results of soil analysis and groundwater sampling would only be applied to the sample locations and depths. Our findings do not warrant the study area against any conditions unrelated to petroleum.

It has been a pleasure assisting you with this project. Should you have any questions, or if you would like to discuss this report, please contact us.

Very truly yours,
ARDAMAN & ASSOCIATES, INC.

RETURN RECEIPT REQUESTED

Mr. Danny Alderman
C & N Trucking, Inc.
450 Enterprise Street
Ocoee, Florida 34761

Subject: Site Rehabilitation Completion Order
C & N Trucking
450 Enterprise Street
Ocoee, Orange County
FDEP Facility ID# 488512715
Discharge Date: January 26, 1993 (PCPP)
Discharge Score: 29

Dear Mr. Alderman:

The Orange County Environmental Protection Division (Division) has reviewed the Site Assessment Report (SAR) (and Addendum) and No Further Action Proposal (NFAP) dated September 20, 2006 (received September 22, 2006), prepared and submitted by Core Engineering & Construction, Inc. for the petroleum product discharge referenced above. Documentation submitted with the SAR/NFAP confirms that criteria set forth in subsection 62-770.680(1), Florida Administrative Code (F.A.C.), have been met. The SAR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the site for petroleum product contamination associated with the discharges referenced above, except as set forth below.

(1) In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the site, the Florida Department of Environmental Protection (Department) may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the SAR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

(2) Additionally, you are required to properly abandon all monitoring wells within 60 days of receipt of this Order. The monitoring wells must be plugged and

DRAFT

abandoned in accordance with the requirements of subsection 62-532.500(4), F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SAR/NFAP you do not have to do anything. This Order is final and effective as of the date on the top of the first page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to section 120.573, F.S., is not available.

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from C & N Trucking, Inc., shall mail a copy of the request to C & N Trucking, Inc., at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

DRAFT

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from C & N Trucking, Inc., shall mail a copy of the petition to C & N Trucking, Inc., at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under sections 120.569 and 120.57, F.S.

Pursuant to subsection 120.569(2), F.S. and rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;
(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;
(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;
(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;
(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and
(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective as of the date on the top of the first page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

DRAFT

Judicial Review

Any party to this Order has the right to seek judicial review of it under section 120.68, F.S., by filing a notice of appeal under rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding the Division's review of your SAR/NFAP should be directed to Carol White at (407) 836-1492. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this site is 488512715. Please use this identification on all future correspondence with the Department or the Division.

Sincerely,

Michael E. Ashey, Chief
Bureau of Petroleum Storage Systems

P. G. Certification

The No Further Action Proposal (NFAP) for C&N Trucking located at 450 Enterprise Street, Ocoee, Orange County, Florida, FDEP Facility ID No. 488512715 has been reviewed.

I hereby certify that in my professional judgment, the components of this NFAP satisfy the requirements set forth in Chapter 62-770, FAC and that the geological interpretations in this report provide reasonable assurances of achieving the assessment objectives stated in Chapter 62-770, FAC. However, I have not evaluated and do not certify aspects of the aforementioned documents that are outside my area of expertise.

___ I personally completed this review.

EPA ID No. FLR000021675

9. Type of Regulated Waste Activity (Mark 'X' in the appropriate boxes):

A. Hazardous Waste Activities:

1. Generator of Hazardous Waste
(Choose only one of the following three categories.)

☐ a. Large Quantity Generator (LQG):
Generates in any calendar month 1,000 kilograms or greater per month (kg/mo) (2,200 lbs.) of *non-acute* hazardous waste; **or** Greater than 1 kg (2.2 lbs) of *acute* hazardous waste

☐ b. Small Quantity Generator (SQG):
Generates in any calendar month greater than 100kg/mo but less than 1,000 kg/mo (>220 to <2,200 lbs.) of *non-acute* hazardous waste and/or 1 kg (2.2 lbs) or less of acute hazardous waste

☒ c. Conditionally Exempt SQG (CESQG):
Generates in any calendar month 100 kg/mo or less (220 lbs.) of *non-acute* hazardous waste **and/or** 1 kg (2.2 lbs) or less of *acute* hazardous waste

In addition, indicate other generator activities (that apply).

☐ d. United States Importer of hazardous waste

☐ e. Mixed Waste (hazardous and radioactive) Generator

For Items 2 through 7, check all that apply.

2. ☐ **Treater, Storer, or Disposer of Hazardous Waste** (at your facility) Note: A hazardous waste permit may be required for this activity.

3. ☐ **Recycler of Hazardous Waste** (at your facility) Specify: ☐ Commercial; ☐ Non-Commercial. Note: A hazardous waste permit may be required for this activity.

4. ☐ **Exempt Boiler and/or Industrial Furnace**
☐ a. Small Quantity On-site Burner Exemption
☐ b. Smelting, Melting, and Refining Furnace Exemption

5. ☐ **Person Authorized to Manage Conditionally Exempt Waste generated at other facilities** - Check this management activity ONLY if you attach EITHER a copy of your application for such authorization OR the authorization you received from FDEP

6. ☐ **Underground Injection Control**

7. ☐ **Transporter of Hazardous Waste** Note: A Certificate of Liability Insurance is required along with this registration. Registration must be renewed annually. ☐ a. For own waste only; ☐ b. For Commercial Purposes

c. **Hazardous Waste Transporter Insurance Information:**
Insurance Company _____
Address _____
_____
Contact: _____ Telephone: _____
Policy Number: _____ Expiration date: _____

d. Transportation Mode: ☐ Air; ☐ Rail; ☐ Highway; ☐ Water; ☐ Other - specify _____

e. ☐ **Hazardous Waste Transfer Facility**: Storage Volume _____

B. Universal Waste Activities:

1. Indicate types of universal waste generated and/or accumulated at your facility (includes destination facilities). (check all boxes that apply)

	Generate	Accumulate
a. Batteries	☐	☐
b. Pesticides	☐	☐
c. Mercury Containing Thermostats	☐	☐

Dear Mr. Musselwhite:

Department personnel conducted an inspection of the above-referenced facility on August 5, 2020 and August 7, 2020. Based on the information provided following the inspection, the facility was determined to be in compliance with the Department's rules and regulations. A copy of the inspection report is attached for your records, and any non-compliance items which may have been identified at the time of the inspection have been corrected.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Miranda Rothenberger at 407-897-4301 or via e-mail at Miranda.Rothenberger@FloridaDEP.gov.

Sincerely,

Daniel K. Hall, Manager

TYPE OF OWNERSHIP: Private

Introduction:

On August 5, 2020, Miranda Rothenberger, Florida Department of Environmental Protection (FDEP and Department), responded to a complaint at 651 L F Roper Way, Ocoee, Florida. The complaint received on July 31, 2020, claimed that a renter at the property, Daisy Automotive Repair, dumped a 55-gallon drum of used oil in the retention ditch behind the property and used a power washer to wash the concrete. The property is owned by Wayne Derrick Musselwhite, Chase Automotive LLC. Mr. Musselwhite was not present for the inspection. The property is 1.3 acres in size and consists of a single warehouse building with five work bays and one office. Each bay appears to be used by a separate tenant involved in automotive maintenance.

EPA identification number FLR000235689 was issued as a result of this inspection. This identification number is not authorized for use for the transport of hazardous waste until Form 8700-12FL is received by the Department.

Process Description:

On August 5, 2020, the Department noted three 55-gallon drums of oil and two 30-gallon containers of oil stored along the west side of the property. It was undetermined if the drums were product oil or used oil. There was one 275-gallon plastic tote that was busted at the corners to reveal a black sludge inside. The sludge appeared to have leaked out onto the pavement and soil. The contents of the container were undetermined.

On August 7, 2020, Miranda Rothenberger and John White, FDEP, and Special Agent St. Francis Smith, FDEP Law Enforcement, returned to the site for a follow up inspection. A video was observed that showed a drum on its side with what appeared to be used oil running across the asphalt behind the shops.

The inspectors spoke with the individual responsible for the release, James Roberson, Daisy Automotive Repair. According to Mr. Roberson, the former property owner's son, David Jones, left to go to Mississippi and drums were left in the bay he had occupied. The drums were moved to an outside area along the south fence line.

DRAFT

According to Mr. Roberson, when the drums were moved they were almost empty. While outside the drums filled with rainwater and were causing oil releases to the ground. Mr. Roberson was asked to clean the property up and he put the drums onto a pallet, secured them with a rope and moved them to Bay 655A. On Wednesday, July 29th, Mr. Roberson was attempting to move the drums from Bay 655A when the pallet failed and the drums fell over. Oily water was released to the asphalt and ran to the west fence [62-710.401(2), F.A.C.]. Mr. Roberson indicated that it was a little bit of oil and a lot of water. Mr. Roberson left to buy oil dry and cleaned up the release the following day. The used oil dry was placed in the dumpster which was emptied Thursday, August 6th. Mr. Roberson then used a pressure washer and a detergent to clean the asphalt. The property owner, Mr. Musselwhite, scraped the soil along the fence line to remove the visibly contaminated dirt. According to Mr. Musselwhite, the dirt was taken to a landfill. No visibly contaminated soil was observed by the inspectors and the asphalt behind the work bays was clean. On September 2, 2020 Mr. Musselwhite submitted a receipt from Universal Environmental Services, EPA identification number FLR000012906, for the shipment of used oil off site on August 20, 2020.

Located near the dumpster just outside the fence along L F Roper Parkway were two 275-gallon totes. One was empty and the second appeared to have contents, but the inspectors did not attempt to look into the container for safety reasons. Mr. Musselwhite was contacted by telephone and was asked to return the totes inside the fence and make arrangements for proper removal of any waste. He informed the Department that the totes were abandoned by a previous tenant. On September 2, 2020 Mr. Musselwhite submitted a photograph via email of the totes no longer along the fence. In an email sent September 1, 2020 the Department informed Mr. Musselwhite that if the used oil company would not accept the sludge in the totes that he would need to conduct a hazardous waste determination on the waste and dispose of the waste accordingly [40 CFR 262.11]. On September 23, 2020 Mr. Musselwhite submitted a receipt showing that the two tote were disposed of a solid construction and debris waste at the Orange County Land Fill. This determination was made based on tenant historical records and advise from a used oil transporter.

New Potential Violations and Areas of Concern:

Violations

Type:	Violation
Rule:	262.11
Explanation:	A person who generates solid waste, as defined in 40 CFR 261.2, must make an accurate waste determination as to whether that waste is a hazardous waste in order to ensure wastes are properly managed according to applicable RCRA regulations. The facility was unable to identify two 250-liter totes of waste.
Corrective Action:	The Department informed the facility of hazardous waste determination requirements and provided sampling resources. On September 23, 2020 Mr. Musselwhite submitted a receipt of disposal for the above mentioned waste. The waste was determined to be asphalt related waste and was permitted to be disposed of in the Orange County Landfill as construction and debris solid waste.

Type:	Violation
Rule:	62-710.401(2)
Explanation:	No person may discharge used oil into soils, sewers, drainage systems, septic tanks, surface or ground waters, watercourses, or marine waters. The facility spilled four 55-gallon drums of oily water onto an impervious surface that ran off into soil and potentially drained to a small creek.
Corrective Action:	Prior to the inspection, the facility had placed absorbent and dug up affected soils. As a result of the inspection the Department requested that the facility dispose of any remaining used oil on site. On September 2, 2020 Mr. Musselwhite submitted a receipt for the removal of used oil on

DRAFT

site dated August 20, 2020.

Conclusion:

Chase Automotive LLC was inspected for compliance with state and federal hazardous waste and used oil regulations and was found to be out of compliance at the time of this inspection. As of September 23, 2020 all corrective actions have been received.

DRAFT

1.0: Pre-Inspection Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.

Item No.	Pre-Inspection Review	Yes	No	N/A
1.1	Has the facility notified with correct status? 262.18(a)			✓
1.2	Has the facility notified of change of status? 62-730.150(2)(b)			✓
1.3	Did the facility conduct a waste determination on all wastes generated? 262.11			✓

The Florida Department of Environmental Protection has reviewed your form 8700-12FL notification for a new hazardous waste DEP/EPA Identification Number or status/information change. Based on the information received you must use the following identification number for all manifests or reports for **Orlando Gun Club West LLC** located at **11814 W Colonial Dr, SR 50, Ocoee , FL 34761-3329**

FLR000228684

Your facility notified FDEP requesting the following hazardous waste status/activities which **do not require a separate submission: Small Quantity Generator.**

Your facility is **currently registered** for the following activities: **None.**

Your facility is **currently permitted/active** as: **No Active Hazardous Waste Treatment, Storage, or Disposal Permit.**

If you have pending program registrations/certifications or permits, these will be mailed separately. You are required to notify us on form 8700-12FL if there is any change in your operations which would affect your status, activity or contact information. The form is found here: http://www.dep.state.fl.us/waste/categories/hwRegulation/pages/NotificationRegulatedWaste.htm.

To review the details of your status, visit:
https://fldeploc.dep.state.fl.us/www_RCRA/Reports/handler_results.asp?epaid=FLR000228684.
For further assistance, please contact me at (850) 245-8749 or email at Glen.Perrigan@dep.state.fl.us .

RCRA SUBTITLE C SITE IDENTIFICATION FORM

1. Reason for Submittal (Select only one.)

☐	Obtaining or updating an EPA ID number for an on-going regulated activity that will continue for a period of time. (Includes HSM activity)
☒	Submitting as a component of the Hazardous Waste Report for 2019 (Reporting Year)
	☐ Site was a TSD facility and/or generator of ≥ 1,000 kg of non-acute hazardous waste, > 1 kg of acute hazardous waste, or > 100 kg of acute hazardous waste spill cleanup in **one or more months of the reporting year** (or State equivalent LQG regulations)
☐	Notifying that regulated activity is no longer occurring at this Site
☐	Obtaining or updating an EPA ID number for conducting Electronic Manifest Broker activities
☐	Submitting a new or revised Part A Form

2. Site EPA ID Number

FLR000228684

3. Site Name

ORLANDO GUN CLUB RANGE

4. Site Location Address

Street Address	11814 W. SR50	
City, Town, or Village	OCOEE	County ORANGE
State FL	Country 34761 US	Zip Code 34761

5. Site Mailing Address ☐ Same as Location Address

Street Address		
City, Town, or Village		
State	Country	Zip Code

6. Site Land Type

☒ Private ☐ County ☐ District ☐ Federal ☐ Tribal ☐ Municipal ☐ State ☐ Other

7. North American Industry Classification System (NAICS) Code(s) for the Site (at least 5-digit codes)

A. (Primary) 713990	C.
B.	D.

10. Type of Regulated Waste Activity (at your site)

Mark "Yes" or "No" for all current activities (as of the date submitting the form); complete any additional boxes as instructed.

A. Hazardous Waste Activities

☒Y ☐N	1. Generator of Hazardous Waste—If "Yes", mark only one of the following—a, b, c	
☐	a. LQG	-Generates, in any calendar month (includes quantities imported by importer site) 1,000 kg/mo (2,200 lb/mo) or more of non-acute hazardous waste; or - Generates, in any calendar month, or accumulates at any time, more than 1 kg/mo (2.2 lb/mo) of acute hazardous waste; or - Generates, in any calendar month or accumulates at any time, more than 100 kg/mo (220 lb/mo) of acute hazardous spill cleanup material.
☒	b. SQG	100 to 1,000 kg/mo (220-2,200 lb/mo) of non-acute hazardous waste and no more than 1 kg (2.2 lb) of acute hazardous waste and no more than 100 kg (220 lb) of any acute hazardous spill cleanup material.
☐	c. VSQG	Less than or equal to 100 kg/mo (220 lb/mo) of non-acute hazardous waste.
☐Y ☒N	2. Short-Term Generator (generates from a short-term or one-time event and not from on-going processes). If "Yes", provide an explanation in the Comments section. *Note: If "Yes", you MUST indicate that you are a Generator of Hazardous Waste in Item 10.A.1 above.*	
☐Y ☒N	3. Treater, Storer or Disposer of Hazardous Waste—Note: Part B of a hazardous waste permit is required for these activities.	
☐Y ☒N	4. Receives Hazardous Waste from Off-site	
☐Y ☒N	5 Recycler of Hazardous Waste	
☐	a. Recycler who stores prior to recycling	
☐	b. Recycler who does not store prior to recycling	
☐Y ☒N	6. Exempt Boiler and/or Industrial Furnace—If "Yes", mark all that apply.	
☐	a. Small Quantity On-site Burner Exemption	
☐	b. Smelting, Melting, and Refining Furnace Exemption	

B. Waste Codes for Federally Regulated Hazardous Wastes. Please list the waste codes of the Federal hazardous wastes handled at your site. List them in the order they are presented in the regulations (e.g. D001, D003, F007, U112). Use an additional page if more spaces are needed.

D008						

C. Waste Codes for State Regulated (non-Federal) Hazardous Wastes. Please list the waste codes of the State hazardous wastes handled at your site. List them in the order they are presented in the regulations. Use an additional page if more spaces are needed.

D008						

DRAFT

11. Additional Regulated Waste Activities (NOTE: Refer to your State regulations to determine if a separate permit is required.)

A. Other Waste Activities

☐ Y ☒ N	1. Transporter of Hazardous Waste—If "Yes", mark all that apply.	
	☐	a. Transporter
	☐	b. Transfer Facility (at your site)
☐ Y ☒ N	2. Underground Injection Control	
☐ Y ☒ N	3. United States Importer of Hazardous Waste	
☐ Y ☒ N	4. Recognized Trader—If "Yes", mark all that apply.	
	☐	a. Importer
	☐	b. Exporter
☐ Y ☒ N	5. Importer/Exporter of Spent Lead-Acid Batteries (SLABs) under 40 CFR 266 Subpart G—If "Yes", mark all that apply.	
	☐	a. Importer
	☐	b. Exporter

B. Universal Waste Activities

☐ Y ☒ N	1. Large Quantity Handler of Universal Waste (you accumulate 5,000 kg or more) - If "Yes" mark all that apply. Note: Refer to your State regulations to determine what is regulated.	
	☐	a. Batteries
	☐	b. Pesticides
	☐	c. Mercury containing equipment
	☐	d. Lamps
	☐	e. Other (specify) _____
	☐	f. Other (specify) _____
	☐	g. Other (specify) _____
☐ Y ☒ N	2. Destination Facility for Universal Waste Note: A hazardous waste permit may be required for this activity.	

C. Used Oil Activities

☐ Y ☒ N	1. Used Oil Transporter—If "Yes", mark all that apply.	
	☐	a. Transporter
	☐	b. Transfer Facility (at your site)
☐ Y ☒ N	2. Used Oil Processor and/or Re-refiner—If "Yes", mark all that apply.	
	☐	a. Processor
	☐	b. Re-refiner
☐ Y ☒ N	3. Off-Specification Used Oil Burner	
☐ Y ☒ N	4. Used Oil Fuel Marketer—If "Yes", mark all that apply.	
	☐	a. Marketer Who Directs Shipment of Off-Specification Used Oil to Off-Specification Used Oil Burner
	☐	b. Marketer Who First Claims the Used Oil Meets the Specifications

DRAFT

D. Pharmaceutical Activities

☐Y ☒N		1. Operating under 40 CFR 266 Subpart P for the management of hazardous waste pharmaceuticals—if "Yes", mark only one. Note: See the item-by-item instructions for definitions of healthcare facility and reverse distributor.
	☐	a. Healthcare Facility
	☐	b. Reverse Distributor
☐Y ☒N		2. Withdrawing from operating under 40 CFR 266 Subpart P for the management of hazardous waste pharmaceuticals. Note: You may only withdraw if you are a healthcare facility that is no longer an LQG or SQG.

12. Eligible Academic Entities with Laboratories—Notification for opting into or withdrawing from managing laboratory hazardous wastes pursuant to 40 CFR 262 Subpart K.

☐Y ☒N		A. Opting into or currently operating under 40 CFR 262 Subpart K for the management of hazardous wastes in laboratories— If "Yes", mark all that apply. Note: See the item-by-item instructions for definitions of types of eligible academic entities.
	☐	1. College or University
	☐	2. Teaching Hospital that is owned by or has a formal written affiliation with a college or university
	☐	3. Non-profit Institute that is owned by or has a formal written affiliation with a college or university
☐Y ☒N		B. Withdrawing from 40 CFR 262 Subpart K for the management of hazardous wastes in laboratories.

13. Episodic Generation

☐Y ☒N	Are you an SQG or VSQG generating hazardous waste from a planned or unplanned episodic event, lasting no more than 60 days, that moves you to a higher generator category. If "Yes", you must fill out the Addendum for Episodic Generator?

14. LQG Consolidation of VSQG Hazardous Waste

☐Y ☒N	Are you an LQG notifying of consolidating VSQG Hazardous Waste Under the Control of the Same Person pursuant to 40 CFR 262.17(f)? If "Yes", you must fill out the Addendum for LQG Consolidation of VSQGs hazardous waste.

15. Notification of LQG Site Closure for a Central Accumulation Area (CAA) (optional) OR Entire Facility (required)

☐Y ☒N	LQG Site Closure of a Central Accumulation Area (CAA) or Entire Facility.
	A. ☐ Central Accumulation Area (CAA) or ☐ Entire Facility
	B. Expected closure date: _____ mm/dd/yyyy
	C. Requesting new closure date: _____ mm/dd/yyyy
	D. Date closed : _____ mm/dd/yyyy ☐ 1. In compliance with the closure performance standards 40 CFR 262.17(a)(8) ☐ 2. Not in compliance with the closure performance standards 40 CFR 262.17(a)(8)

DRAFT

16. Notification of Hazardous Secondary Material (HSM) Activity

☐ Y ☒ N	Are you notifying under 40 CFR 260.42 that you will begin managing, are managing, or will stop managing hazardous secondary material under 40 CFR 260.30, 40 CFR 261.4(a)(23), (24), (25), or (27)? If "Yes", you must fill out the Addendum to the Site Identification Form for Managing Hazardous Secondary Material.

17. Electronic Manifest Broker

☐ Y ☒ N	Are you notifying as a person, as defined in 40 CFR 260.10, electing to use the EPA electronic manifest system to obtain, complete, and transmit an electronic manifest under a contractual relationship with a hazardous waste generator?

18. Comments (Include item number for each comment)

WE ARE A GW RANGE THAT DISPOSES OF OUR PRE-FILTERS + HEPA FILTERS THROUGH CONTRACT WITH A HAZMAT SUB CONTRACTOR (ENVIRONMENTAL FIRM) AS TRANSPORTED BY WASTE MANAGEMENT TO EMELLE ALABAMA.

Subject: INITIAL / Orange / Potential Petroleum Release / DEM-Munoz
Date: Thursday, February 16, 2017 12:09:49 PM

Florida Division of Emergency Management
State Watch Office Incident Report

Main Information

Report #: 2017-1390

Status: Assigned

Reported to SWO on: 2/16/2017 12:02 ET

Severity: Local Incident

Description: Potential Petroleum Release

This situation involves: Petroleum Spill

Affected Sectors: DEP District - Central, DEP OER Orlando - Day

Initial Report: Orange County FR reports a potential petroleum release in Orlando. The release may have entered a storm drain, but no waterways were affected. Clean up actions have been taken.

Injuries: No

Fatalities (Unconfirmed by State Medical Examiner): No

Environmental impact: Yes

DEP callback requested: Yes

Contact: On-Scene Contact

Incident Occurred: 2/16/2017 12:02 ET

Most Recent Update Date/Time: 02/16/2017-12:10 ET

Most Recent Update: N/A

Affected Counties: Orange

Facility Name or Description:

Incident Location: *Address:* 11790 W Colonial Dr. *City:* Ocoee

Incident Narrative:

Responder Rain spoke with Officer Yancy. An Orange County school bus radiator overheated, resulting in a radiator fluid spill. Impermeable surface were impacted. Less than a gallon may have impacted a storm drain but it was difficult to discern, and no waterways were impacted. Kitty litter was used to absorb the fluid that impacted the pavement. It was collected for proper disposal. No further actions are required of OER at this time.

1.0 INTRODUCTION

1.1 OBJECTIVES

Valerie R. Francisco, P.G. (VRFPG) has completed closure assessment activities associated with the removal of TWO Aboveground Diesel/Gasoline Fuel Storage Tanks located at the Granite Construction Company, Inc. (Granite) mobile construction office trailer compound. Tank #1 is a 5,000 gallon combination Diesel fuel/Gasoline storage tank and Tank #2 is a 10,000 gallon Diesel Fuel tank. The tanks were removed from the site because Granite's construction project is concluded.

The objective of this report is to provide documentation of the tank removal and closure assessment activities conducted during the period from December 31, 2001 through July 1, 2002. This report has been prepared in accordance with Chapter 62-761, Florida Administrative Code (F.A.C.) and the Florida Department of Environmental Protection (FDEP) guidance document entitled "Storage Tank System Closure Assessment Requirements", revised April 1998.

1.2 BACKGROUND

The Granite facility is located at 12227 Marshall Farms Road, Winter Garden, Orange County, FL. A site location map is provided in **Figure 1.** At this facility, Granite stored and distributed gasoline and vehicular diesel fuel for use in highway construction vehicles and equipment. The facility consists of an office trailer and two Above Ground Storage Tanks (AST's) located inside a three-sided soil berm. The facility is temporary, and is set up to be a local management base and fueling facility for nearby relatively short-term highway construction projects. A generalized facility layout map showing the location of tank area within the subject facility is provided in **Figure 2.** Photos of the site are included in **Appendix A.**

The two AST's were registered to the site by Granite (Facility ID# 489803671) on March 7, 2001. The tanks were installed at the subject facility on January 27, 2001 and are constructed of double-walled steel with interstitial monitoring. A textile underlayment was placed beneath the tanks and a soil berm was constructed around three sides of the tank area, presumably to contain any large-volume potential accidental spills from easily entering the pond located to the west. The piping associated with the tank was constructed of double-walled steel, was pressurized, and was constructed all above-ground and had no contact with the soil.

In January 2003, the two tanks were removed and were not replaced A Storage Tank Registration Form revising the tank status to "closed" is provided in **Appendix B.**

Orange County tank inspector Ruth Rauenzahn visited the site on May 1, 2002 to perform the annual inspection and noted a "leaky drain valve on the tank's dispenser cabinet" had discharged onto the ground. Granite filed an Incident Report on May 1, 2002, a copy of which is provided in **Appendix C.** Upon re-inspection on May 17, 2002, Ms. Rauenzahn noted the cabinet had been cleaned and the drain valve repaired. At that time she requested that any impacted soil beneath the drain valve area be removed and properly disposed. The soil was excavated and removed to the County's satisfaction on July 3, 2002. It was transported to Petrotech Southeast Facility in Ocoee, FL. Documentation for soil removal and disposal, copies of the county tank inspectors reports, and other relevant correspondence from Orange County are provided in **Appendix C.**

DRAFT

2.0 TANK REMOVAL ASSESSMENT

2.1 SOIL SCREENING

On January 14, 2003, six (6) soil borings were installed in the area of the Above Ground Tanks. A soil boring log for temporary monitoring well TMW-1 is provided in **Appendix D** and is representative of site soils. A densely cemented iron-oxide hardpan was encountered at 5 ft bls. The hardpan was dark rusty-reddish to black in color and was near the hardness of concrete. It could not be penetrated by hand auger. During the installation of the temporary wellpoint (TMW-1) borehole, the hardpan was observed to extend from 5 ft bls to 12 ft bls in the area of TMW-1 (SB-2).

As required by CH. 62-761, F.A.C., soil borings SB-1 through SB-5 were completed near the center of each side of the concrete tank pad. One boring (SB-2) was also located nearest to the drain valve which had previously leaked. Soil boring SB-6 was located at the former center of the slab. Soil screening sample locations are shown in **Figure 3**. Soil screening samples SB-1 and SB 3 through SB-6 were collected at one foot intervals down to approximately 5 ft bls, where a dense, hardpan layer was encountered. Soil boring SB-2 was excavated to fourteen (14) ft bls with the aid of a backhoe. In the vicinity of SB-2, the hardpan layer was approximately 7 feet thick, so the hardpan layer was not breached at a majority of the other locations where it was encountered.

Soil samples were placed in clean glass jars and covered with foil lids to allow equilibration of soil gases into the jar headspace. Soil vapors were measured with a Thermo Environmental Instruments (TEI) 580B Organic Vapor Analyzer (OVA) equipped with a Photo Ionization Detector, following the procedures identified within Chapter 62-770.200(8) F.A.C. Since the two tanks held both diesel fuel and gasoline, soil samples exhibiting a net OVA response greater than 50 parts per million (ppm) were considered excessively contaminated, while soils with a net OVA response of 10 were considered impacted until confirmatory laboratory analytical results were received.

DRAFT

2.2 INITIAL SOIL SAMPLING

On January 14, 2003, when VRFPG personnel first visited the site, Granite Construction Personnel had already emptied the tanks and removed them from the bermed area.

Upon completion of the initial soil screening of soil samples collected from borehole locations, there was no indication of impacts. All final OVA readings were "No Response".

One soil sample (SS-1) for laboratory analysis was therefore collected from the most likely area impacted -- six inches below ground surface in the area of the former drain valve leak (near SB-2). On January 14, 2003, soil sample "SS-1 @ 6 " bls" was collected from a depth of 6 inches bls at the location of SB-2.

Boring locations and soil sample locations are shown in **Figure 3.**

2.3 SOIL EXCAVATION

After receiving the analytical results for soil sampled from location SS-1, it was identified that TPH impacts (530 mg/kg) exceeding the Florida Target Cleanup Goal Concentration (340 mg/kg) were present

in the vicinity of soil boring SB-2. Therefore, the site was re-visited on February 10, 2003 and additional soil was excavated in the vicinity of SB-2. The area of excavation was thirty-five (35) feet long, thirty-five (35) feet wide, and six (6) inches deep as shown on **Figure 4**. Soil was stored on-site on top of visqeen and covered with visqueen until it was transported to a permitted treatment facility.

2.4 SECONDARY SOIL SAMPLING

Subsequent to the removal of additional soil in the vicinity of SB-2, five additional soil samples (SS-2 through SS-6) were collected to confirm that impacted soil had been removed. Soil samples SS-2 through SS-6 were collected at approximately seven (7) inches bls (i.e.: from the surface of the ground after six inches of soil had been removed). These samples were analyzed for TPH only.

2.5 EXCAVATED SOIL TRANSPORT AND DISPOSAL

A virgin product pre-burn sample was collected from the stockpiled soil which had been excavated and was stored on site. The pre-burn sample was analyzed for Volatile Organic Halocarbons by EPA Method 8260 and for metals arsenic, cadmium, chromium and lead by EPA Method 6010.

Excavated excessively contaminated soil was removed from the site by Star Hauling and transported to the Clark Environmental, Inc. permitted thermal treatment facility in Mulberry, Florida. A total of 26.95 Tons of soil was generated from the excavation at the subject site. The soil disposal (thermal treatment) certificate is provided in **Appendix E.**

2.6 OCCURRENCE OF GROUNDWATER, TEMPORARY WELL INSTALLATION, AND GROUNDWATER SAMPLING

On February 10, 2003, one temporary well (TMW-1) was installed to a depth of 11.10 ft bls. Groundwater was encountered at the location of TMW-1 at a depth of 7.92 ft bls.

It is believed that local surficial groundwater depth is at approximately 7 ft bls, as can be estimated by the nearby surface water pond shown in **Figure 2**. A review of the elevation of the normal water level (112.00 ft NGVD) in the pond and the elevation of the pond bottom (102.00 FT NGVD) shows that there is generally ten feet of water in the pond. If we take the ground elevation to be 119.00 FT NGVD, the water level in the pond (112.00 NGVD) is approximately 7 ft bls. The pond is about seventeen feet deep and is assumed to be in hydraulic connection with the local surficial aquifer.

Groundwater monitoring well TMW-1 was installed near the location of the drain valve whose leak was the impetus for submittal of the previous Incident Notification Form dated May 1, 2002. A copy of the Incident Notification Form is provided in **Appendix C.**

The temporary well had to be installed by first digging through the hardpan with a backhoe, then installing the well and backfilling. Using the backhoe, a small trench was excavated to a depth of 14 ft bls and soil descriptions were logged. The well screen and casing were placed in the trench and native backfill was placed around it.

The well is constructed of 1-1/2 inch PVC casing with a 4-ft length of 0.010-inch slotted screen. The well is screened over the interval 7.10 ft bls to 11.10 ft bls, and therefore the water table (7.92 ft bls) is bracketed

DRAFT

within the screened interval. A well construction log is provided in **Appendix F**. The well was developed on February 10, 2003 using a peristaltic pump until the water was free from silt size particles. Groundwater samples from TMW-1 were collected on February 13, 2003 for analysis by EPA Method 8021 8310 (polynuclear aromatic hydrocarbons), and FLO-PRO. A groundwater sampling data sheet is provided in **Appendix G**. Samples were collected in accordance with VRFPG's approved Comprehensive Quality Assurance Plan # 980146 and in accordance with the new FDEP standard operating procedures which went into effect in April 2002. The groundwater sample was shipped to U.S. BioSystems Laboratories, Inc., Tampa/Fort Lauderdale, Florida for analysis.

3.0 SOIL AND GROUNDWATER ANALYTICAL RESULTS

3.1 SOIL SCREENING RESULTS

The soil from boreholes SB-1 through SB-5 surrounding the tank, and from SB-6 located directly beneath the center of the tank pad, were screened for organic vapors with the OVA. All OVA readings at all depths for all soil borings were NR (No Response). A summary of the OVA soil screening results is provided in **Table 1** and the location of the soil screening sampling points are illustrated in **Figure 3.**

Although soil screening results in the area of the AST's did not cause the OVA to respond, laboratory results for soil sample SS-1 collected in the vicinity of SB-2 indicated that soils were impacted with TPH above Florida Cleanup Goal Concentrations.

3.2 ANALYTICAL SOIL DATA

A summary of detected parameters reported for soil sample SS-1 through SS-6 are summarized on **Table 2** and the laboratory's reports of soil analytical data are provided in **Appendix H**. The soil sample locations are shown in **Figure 3**, while the extent of the excavated areas and final soil sampling results are shown in **Figure 4.**

The soil analytical results at soil sampling locations SS-2 (28 mg/kg), SS-3 (25 mg/kg), and SS-4 (25 mg/kg) showed traces of TPH at concentrations well below the Florida Soil Cleanup Goal (340 mg/kg). Soil analytical results at sample locations SS-5 and SS-6 indicated that TPH was below sample detection limits. Based on the level of investigation performed as part of this assessment it is concluded that all minor surficial impacts resulting from the presence and usage of the above-ground fuel storage tanks have been adequately removed by excavation.

3.3 ANALYTICAL GROUNDWATER DATA

The report of groundwater analytical results shows that all parameters reported for groundwater sampled from TMW-1 were below the laboratory sample detection limits. Since no analytes were detected in the groundwater sample collected from TMW-1, the individual analyte concentrations reported for the groundwater sample do not exceed the Florida Groundwater Cleanup Target Levels as listed in Chapter 62-777, F.A.C.

DRAFT

The laboratory's report of groundwater analytical data is provided in **Appendix H.** The well location is shown in **Figure 3.**

4.0 CLOSURE ASSESSMENT SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

4.1 SUMMARY

In February 2003, a closure assessment was performed for the removal of two above-ground fuel storage tanks [one (1) combination gasoline/diesel fuel tank and one (1) diesel fuel tank]. The soil surrounding the AST's and the soil underneath the concrete pad used as a tank base was screened for organic vapors with an OVA. Surficial soil vapor readings were "No Response" at all screening locations. One soil sample (SS-1) was collected to confirm the OVA readings.

A review of the analytical results for soil sampled from location SS-1 identified that TPH impacts (530 mg/kg) exceeding the Florida Target Cleanup Goal Concentration (340 mg/kg) were present in the vicinity of soil boring SB-2. Therefore, the site was re-visited on February 10, 2003 and additional soil was excavated in the vicinity of SB-2.

After a shallow excavation to six (6) inches bls was completed to remove the surface impacts, the confirmatory analytical soil sampling results for SS-2 through SS-6 show that soil in the vicinity of the tanks does not exceed the Florida Soil Cleanup Target Level concentrations for TPH. The **total volume of soil excavated** from the vicinity of the above ground storage tank was **26.95 tons.**

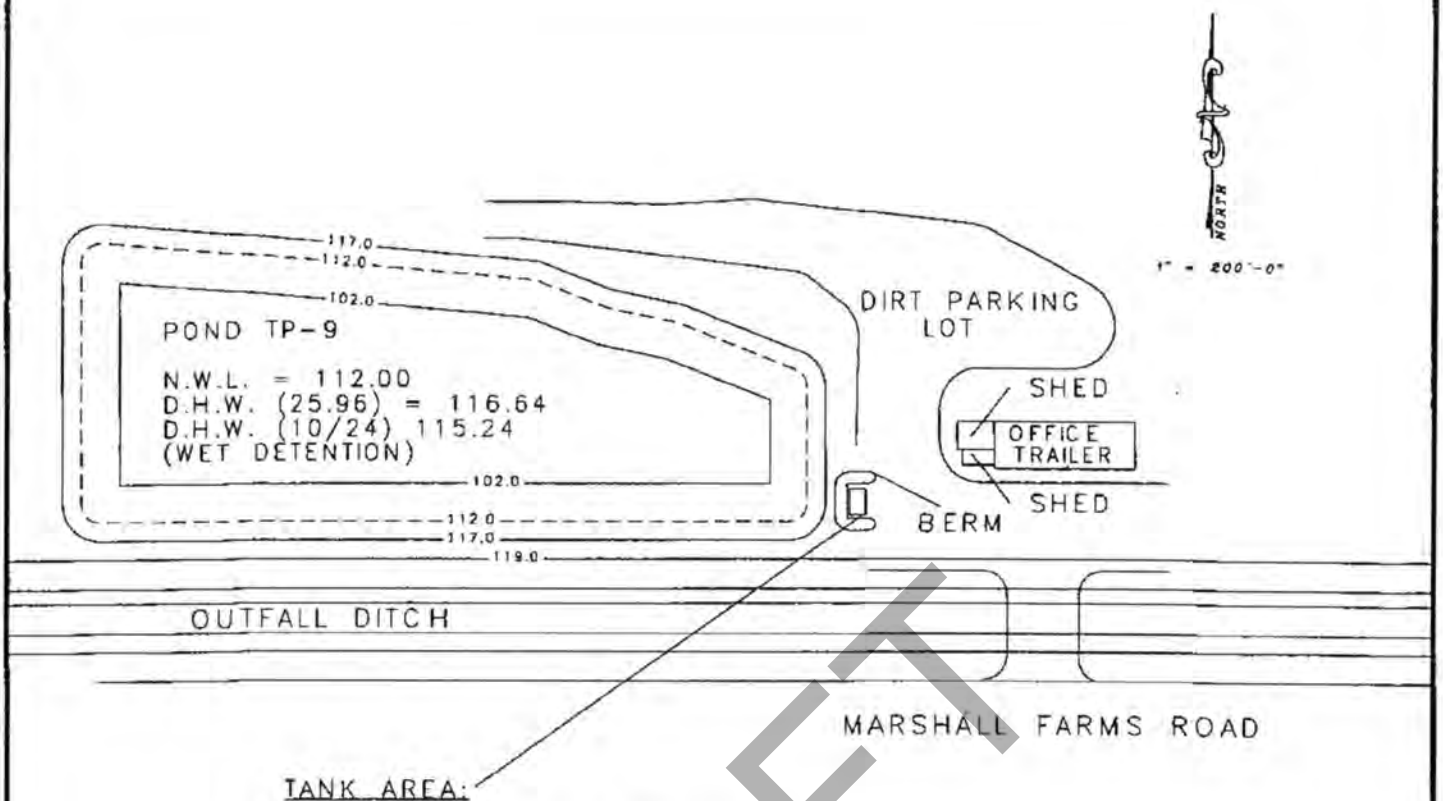

A groundwater monitoring well was installed near the soil-boring borehole where the highest OVA was recorded (SB-2). Ground water samples were analyzed by EPA Method 8021 (volatile organic aromatics), 8310 (polynuclear aromatic hydrocarbons), EDB, Pb, and FL-PRO. Groundwater sampled from TMW-1 reported no exceedances of Florida Groundwater Cleanup Target Levels (**FGCTL's**), in fact, all parameters were reported at concentrations below method detection limits.

DRAFT

4.2 CONCLUSIONS AND RECOMMENDATIONS

Based on the OVA soil screening measurements, the soil analytical data, and the groundwater analytical data collected as part of this investigation, no remaining petroleum impacts above Florida Cleanup Target Levels have been identified. The laboratory's report for groundwater samples collected from TMW-1, screened in a surficial aquifer zone, reported no parameters above method detection limits.

Therefore, based on the sampling done as part of this investigation, this tank removal assessment shows no remaining petroleum impacts to soil or groundwater in excess of Florida Cleanup Target Levels. Because soil and groundwater analytical data from final soil samples SS-2 through SS-6 and groundwater sample TMW-1 do not indicate any exceedances of Florida Cleanup Target Levels related to petroleum impacts, no further assessment is recommended.

RE: 2021 - Pre-Authorization for Disaster Debris Management Sites (DDMS)

Dear JENNIFER CUMMINGS

DRAFT

This is to notify you that on April 26, 2021, the Department of Environmental Protection (the Department) received your request for pre-authorization of a disaster debris management site(s) (DDMS) for 2021. Disaster debris includes hurricane/storm-generated debris and all other types of disaster debris.

The Department has evaluated your request for a DDMS at the following location(s):

Site Name: FAMLEE INVESTMENT CO 2-CITIZEN SITE-99951
Site Address: 6100 S. SEMORAN BLVD
Orlando, FL, 32812
Waste Planned for Management: Construction & Demolition Debris, Yard Trash
On-Site Contact: Jennifer Cummings
(407) 836-7795, jennifer.cummings@ocfl.net

Unless you receive a subsequent notification from the Department concerning the status of these sites, you may consider them pre-authorized as disaster debris management sites.

In the event of a major storm event or other disaster which results in the Department issuing an Emergency Final Order (the Order) for your county, you may begin using a temporary DDMS as necessary, while also requesting issuance of a field authorization from the Department. Once activated, a DDMS is subject to the following conditions, in addition to the requirements of the Order and Florida Statute 403.7071:

1) **The Department must be notified when the site is opened and begins accepting debris, and when the site is closed and all debris has been removed;**
2) Standing water must not be allowed to accumulate in or within 50 feet of areas used to store or process disaster debris;
3) Access must be controlled to prevent unauthorized dumping and scavenging;
4) A DDMS must have spotters to correctly identify and segregate waste types for appropriate management;
5) Once the site is open, a spotter must be located in the area where the waste is being deposited in order to spot and remove prohibited waste items;
6) A DDMS is limited to managing the waste identified above for each site; any putrescible waste received at the DDMS must be removed within 48 hours, and all other types of prohibited waste should be managed in accordance with the guidance document (see link below);
7) Unless otherwise approved by the Department in response to a written request from you, the DDMS must cease operation and all disaster debris must be removed from the sites on or before the expiration date of an Order that has been executed by the Department, unless it is modified or extended by further authorization.

Failure to comply with the conditions of the field authorization, or failure to adequately close a site by the required closure date, may result in enforcement action by the Department.

The Department has also prepared a guidance document on the establishment, operation, and closure of a DDMS for disaster debris. This guidance document includes recommended practices, which you are expected to follow as much as practicable, as well as additional requirements from the Order. A copy of this guidance document is available on the DEP website

https://floridadep.gov/waste/permitting-compliance-assistance/documents/guidance-establishment-operation-and-closure

This guidance is not a substitute for federal requirements and guidance, including those from the Federal Emergency Management Agency (FEMA).

DRAFT

Site Visit Comments

04/23/2019

On site for the routine compliance inspection. The facility is a nursing home with a 1,074 gallon double wall belly tank under a generator.
The tank's rupture basin is monitored electronically. The high level alarm is also electronic. There is no proof of testing of the monitoring system. Ysaac Veracarpio talked to the generator company and has added this requirement for testing of the rupture basin and high level alarm. Records are ok; Insurance, CFR, COI, placard and monthly visual inspections.
-Need proof of the testing of the rupture basin alarm and high level alarm. Forward proof of this testing to Orange County in the next 60 days.

RE: Return to Compliance
Inspired Living at Windermere
1061 Tomyn Blvd.
Ocoee, FL 34761
DEP Facility # 9814889
Orange County-Storage Tanks

Dear Mr. Veracarpio,

The Orange County Tanks Program, on behalf of the Florida Department of Environmental Protection, personnel issued a Non-Compliance Letter to the above-referenced facility on April 29, 2019. Based on the information provided May 20, 2019, the facility was determined to have returned to compliance with the Department's Storage Tank rules and regulations.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Charles Cox at 407-558-1619 or charles.cox@ocfl.net.

Sincerely,

Charles Cox
Sr. Environmental Specialist

RE: Closure Assessment
Florida's Turnpike
D.O.T. Mile Post #267
Ocoee, Florida

9400406

DRAFT

Dear Mr. Kruis:

As you requested, **Mevers & Associates, Inc.** has completed a closure assessment at the above referenced facility. Enclosed please find a completed closure assessment report with attachments that include photographs, a site sketch, sampling locations, and the groundwater results for the above-referenced site. Also included are the necessary forms for submittal to the appropriate agencies. As required, a discharge notification form has been submitted to the Department of Environmental Regulation (DER). We will submit the remaining paperwork to the appropriate agencies.

On December 8, 1993, one (1) 113-gallon leaded gasoline underground storage tank was removed from one (1) excavation by Prime Contractors, Inc. Upon inspection after removal, the tank appeared to be in rather poor condition. Small holes were observed in each end of the tank as well as the sides and along the bottom. The holes were apparently the source of the discharge. A site sketch showing the location of the tank is included on Plate 1. A closure assessment was conducted during the removal of the tank by **Mevers & Associates, Inc.** Some typical photographs of the removal are included in Appendix A.

2310 Tall Pines Drive • Suite 210 • Largo, FL 34641
(813) 530-3533 • Fax (813) 530-9673

During the removal of the underground storage tank, soil samples were collected and screened in the field with a Heathkit Detecto-Pak III organic vapor analyzer (OVA) following the guidelines set forth in DER's "SOP for QA/QC at Tank Closures" and Chapter 17-770 FAC. Section 17-770.200 (2) FAC defines "excessively" contaminated soils as soils which have a total petroleum hydrocarbon reading of 500 ppm (or greater) for the Gasoline Analytical Group or 50 ppm for Kerosene or mixed product analytical groups using a flame ionization detector. All soils were screened using the 500 ppm criteria to define "excessively" contaminated soils. During the headspace screening, duplicate soil samples were also tested for total methane vapor concentration using a charcoal filter. Hydrocarbon vapors were detected in 6 of the 9 soil samples collected. Slight methane vapors were detected in some of the soil samples collected. The soil sampling locations are indicated on Plate 2. The results of the OVA testing of the soils are given on Table 1.

DRAFT

After the removal of the tank, a groundwater sample was collected from a temporary well point installed in the underground storage tank excavation. The shallow groundwater table was encountered at a depth of about 9.0 feet below existing grade at the time of our assessment. The sampling was conducted following the sampling protocols outlined in our State approved CompQAP (#920043G). The groundwater sample was analyzed by a State certified laboratory for EPA Method 602.

Based on the groundwater analytical test results (included in Appendix B), a significant groundwater contamination problem was detected in the former gasoline tank area. A summary of the

significant results is included on Table 2. In addition, based on the OVA readings, a soil contamination problem was also discovered in the former gasoline tank area during closure.

At this time, in accordance with Chapter 17-770 FAC, the owner should initiate a contamination assessment to fully assess the contamination discovered on-site.

If you have any questions regarding this report please contact us. **Mevers & Associates, Inc.** has appreciated this opportunity to provide you with our environmental consulting services.

Sincerely,

MEVERS & ASSOCIATES, INC.

Dear Ms. Ann Blakeley,

The Florida Department of Environmental Protection would like to update their Hazardous Waste Generator Files. Review of the records has identified your facility as a Transporter of Hazardous Waste with EPA identification number FLD980840557. A Hazardous Waste Transporter is defined as a person who engages in the offsite transportation of hazardous waste by air, rail, highway or water. In order to update our files your assistance is needed to complete the enclosed form (EPA Form 8700-12) and mail it back to:

Hazardous Waste
3319 Maguire Boulevard
Suite 232
Orlando, FL 32803-3767

Also enclosed in this letter is information to assist you in determining your generator size. If you have any questions, please feel free to call me at (407) 893-3323.

Dear Mr. Naughton:

On behalf of Chevron Environmental Management Company (Chevron), ARCADIS is pleased to submit this Source Removal Report (SRR) to the Orange County Environmental Protection Division (Division). This SRR has been prepared in accordance with Chapter 62-770.300 Interim Source Removal, Florida Administrative Code (FAC) and the Division's April 30, 2008 Time Extension – Limited Scope Remediation Monitoring Plan letter, received by ARCADIS on May 12, 2008.

This SRR summarizes activities conducted at Former Chevron #307250 (the site) including monitoring well abandonment, mobilization and site preparation, excavation activities, health and safety concerns, and site restoration. The site is located at 11460 West Colonial Drive, Ocoee, Orange County, Florida. A site map is included as Figure 1.

Site History

The site currently operates as a Just Brakes auto repair facility. Formerly, the site operated as a retail petroleum service station. Previous assessment activities concluded that a shallow and weathered unleaded gasoline source in low permeability soil, was localized in the vicinity of the former dispenser islands. Impacts are primarily in the vadose zone (0 to 4 feet below ground surface [bls]) and extend to the base of the fluctuating water table (4 to 6 ft bls). Groundwater impacts

DRAFT

have been observed extending from the former dispenser islands to a monitoring well located in the right of way across West Colonial Drive.

Site assessment was completed in 2007 and approved by the Division's September 24, 2007 Supplemental Site Assessment Report review correspondence.

Excavation Overview

The purpose of this source removal was to remove identified vadose zone and smear zone petroleum-impacted soil from which groundwater impacts were emanating. A predetermined volume of soil to be removed from within the excavation area was referenced in the Site Assessment Report and subsequent addendums, which was approved by the Division. The scope of work completed below is, in part, a result of the November 8, 2007 Chevron Remedial Strategy Review Team (RSRT) meeting, which concluded that ARCADIS would implement a limited, pre-determined and fixed-extent excavation to address shallow soil impacts. Per the RSRT meeting, additional soil borings were installed onsite on December 17, 2007, and submitted for laboratory analysis. Laboratory analytical results obtained from the December 17, 2007 soil sampling event were used to further define the lateral and vertical extent of the excavation area..

DRAFT

Pre-Source Removal Activities

Prior to implementing excavation activities, onsite preparation was conducted beginning from July 3, 2008 through July 13, 2008. ARCADIS observed site preparation tasks performed by Groundwater Protection, Inc. (GPI) and Groundhound Utility Locate Services (Groundhound). Onsite preparation tasks included monitoring well abandonment and underground utility location. On July 3, 2008, ARCADIS observed Groundhound identify underground utilities at the site. On July 11, 2008, ARCADIS observed the abandonment of three monitoring wells (MW-6, MW-7R, and MW-11) located within and directly adjacent to the excavation area. GPI abandoned the three monitoring wells in accordance with applicable FDEP SOPs. Monitoring well abandonment reports provided by GPI are included as **Appendix A**.

In addition to onsite preparation tasks, on July 7, 2008, a pre-mobilization safety call was held between ARCADIS and the remediation subcontractor, Big Bend Environmental Services (BBES) to further discuss project set up and site logistics, verification of training documentation, health and safety measures including the site

specific HASP, Journey Management Plans (JMPs), various Job Loss Analysis (JLAs), and traffic control plans.

Source Removal Implementation

On July 13, 2008, an onsite pre-construction meeting was held between ARCADIS and BBES. Discussions further involved logistics of excavation activities, health and safety concerns, and estimated time frames of activity completion. Beginning July 14, 2008, Source Removal Activities began at the site.

A total of approximately 485 tons of potentially petroleum-impacted vadose and smear zone soil were removed from the site. Below is a daily summary of excavation activities at the site.

Day 1 – July 14, 2008

Prior completion of the General Permit to Work, an onsite, comprehensive review of the site specific HASP occurred with ARCADIS and BBES personnel in attendance. Health and safety precautions were discussed, JLAs were reviewed and modified as applicable, and emergency procedures were reviewed. In addition, site specific health and safety tests were completed by all onsite personnel to verify the level of understanding required to complete work at the site had been attained in accordance with specifications set forth by the LPS, the site specific HASP, and CEMC's HASP.

A certified electrician provided isolation of electric lines using lock out/tag out (LOTO) procedures extending to and within the area of the proposed excavation.

Water barricades were used to barricade the northern portion of the site nearest West Colonial Drive and the existing Just Brakes sign. Temporary steel fencing was erected to enclose the entire perimeter of the site. Site set up is illustrated on **Figure 2**.

Upon completion of LOTO activities and site safety set up of water barricades and temporary fencing, Big Bend Environmental Services, Inc (BBES) began removal of concrete and asphalt pavement from within the excavation area. Concrete and asphalt removed from the area was placed into roll-off dumpsters for offsite disposal.

DRAFT

Day 2 – July 15, 2008

Chevron personnel were present onsite, and conducted a Chevron Level III Safety Audit in regard to onsite activities performed by ARCADIS and BBES, including personnel work roles and tasks, and supporting documentation.

Continuation and completion of asphalt and concrete removal from within the excavation area was conducted by BBES. Concrete and asphalt removed from the area to be excavated was placed into roll-off dumpsters for offsite disposal.

Day 3 – July 16, 2008

Prior to commencement of source removal activities, excavation perimeter location points for purpose of air monitoring by use of an Organic Vapor Analyzer equipped with a Flame Ionization Detector (OVA-FID) were designated by ARCADIS personnel. A total of six initial points were selected for air monitoring. The determination of additional air monitoring points surrounding the perimeter of the exclusion zone was contingent upon wind direction and innermost exclusion zone air monitoring readings. During excavation activities, results obtained from OVA-FID air monitoring readings were assessed to determine if breathing zone impacts were in excess of action limits set forth in the site Health and Safety Plan (HASP); and if an upgrade from Level D personal protective equipment (PPE) and/or an implementation of engineering controls was necessary. In addition to OVA–FID air monitoring readings, Draeger tubes were used to indicate the potential presence of benzene within the breathing zone. Draeger tubes were drawn in accordance with the site specific HASP as air monitoring readings indicated necessary. The lower explosive limit (LEL) was also recorded from the excavation during source removal activities. Air monitoring perimeter points are illustrated on **Figure 3**. OVA-FID air monitoring logs including benzene draegger tube readings are provided within **Appendix B.**

Excavation activities began at the east end of the excavation area. Excavation limits were pre-determined by historical soil boring laboratory analytical data, confirmed by additional soil boring installation for laboratory analysis conducted December 17, 2007. During source removal activities, ARCADIS personnel were present within the exclusion zone, and acted as a spotter for activities performed by BBES, including vehicular maneuvering, loading of trucks, and excavating with respect to the overhead canopy. Personnel within the exclusion zone donned Level D PPE while conducting excavation activities.

DRAFT

Confirmatory side-wall soil screening was conducted using an OVA-FID post soil removal. Soil screening results indicate minimal detections of organic vapors within sidewall soil sample headspace; thus, the heaviest confirmed petroleum-impacted onsite soils had been removed as part of the predetermined excavation limits. Excavation limits and soil screening locations are illustrated on **Figure 4**. Soil screening results are summarized in **Table 1.**

Approximately 90 tons of impacted soil were hauled offsite, and disposed of at the Waste Management, Inc. (WMI) Okeechobee Landfill located in Okeechobee, Florida. Non-Hazardous Waste Manifests and load tickets are included as **Appendix E**.

Health and Safety concerns encountered during the source removal activities of Day 3 are as follows:

- During excavation activities, formerly unidentified product piping was uncovered. To verify if cutting the three former product pipes was safe, a small hole was drilled using very low rotations per minute and lubrication in order to prevent sparking. The OVA-FID probe and the LEL meter probe was inserted into each drilled hole. OVA-FID results indicate the vapors were concentrated to an extent which caused the flame of the OVA-FID to be smothered. Inserting the LEL probe into the unknown pipes indicated LEL readings were greater than 85% of the LEL, in excess of action limits set forth in the site specific HASP. In order to mitigate the potential for fire or explosion, prior to cutting the pipes for removal, an inert nitrogen gas was be placed into the pipes to displace vapors.

- During excavation activities, no air monitoring results were sustained above readings to exceed action limits set forth in the site specific HASP; however, peak readings were encountered to exceed action limits set forth in the HASP. In order to mitigate vapors, engineering controls were implemented during onsite excavation activities. Large industrial fans were strategically placed onsite, along the perimeter of the excavation, to displace any trapped volatile organic vapors within the work zone. Fans were positioned and moved as necessary, taking into consideration wind direction and speed. In addition, the excavation process was slowed in order to allow the dispersion of vapors originating from the excavation area. Engineering controls proved

DRAFT

successful in the mitigation to vapors, all personnel continued work in Level D PPE.

Day 4 – July 17, 2008

Excavation activities continued July 17, 2008. Preparation to remove the former product lines located within the excavation area on July 16, 2008, began with removing the threaded galvanized pipe fittings to further investigate the lines. Product was observed within the pipes upon removal of the fittings, and was absorbed with petroleum sorbent pads contained within a 5-gallon bucket. The sorbent pads were then combined with the impacted soil for offsite disposal. The former product lines were then purged with an inert nitrogen gas in order to ventilate and displace the fumes contained within. Post nitrogen application, LEL and oxygen readings were taken from the former product piping, and exhibited reading of less than 10% prior to cutting the piping. The former fuel lines were then removed from the surrounding soil. Two lines extended to approximately 5 feet east of the excavation, toward the former underground storage tanks (USTs); one line fully extended to the area of the former USTs. Product piping was disposed of within onsite roll-off dumpsters.

Air monitoring was conducted using an OVA-FID, benzene Draeger tubes, and LEL meter during excavation activities as referenced within descriptions of Day 3 activities. Due to wind speed and direction, two additional air monitoring points, numbers 7 and 8, were designated during July 17, 2008 excavation activities. Air monitoring locations are illustrated on **Figure 3**; air monitoring logs including benzene Draeger tube readings are provided as **Appendix B**.

Excavation activities continued, extending to the west end of the excavation area. Personnel within the exclusion zone donned Level D PPE while conducting and observing excavation activities. Confirmatory side-wall soil screening was conducted using an OVA-FID post soil removal. Soil screening results indicate the westernmost predetermined excavation sidewall exhibited elevated OVA-FID readings, thus an additional section of the westernmost sidewall was over excavated approximately 3 feet to the west, and extending to approximately 6 feet in length to remove potentially impacted soils in the vicinity. Subsequent to over-excavation, the adjusted westernmost soil sidewall was screened in the field using an OVA-FID. Based on screening results, it was determined the potential for petroleum-impacted soil within the westernmost sidewall was removed from the excavation area. Cumulative soil screening results indicate minimal detections of organic vapors within excavation

DRAFT

sidewalls remained; hence, the petroleum-impacted onsite soils had been removed as part of the excavation limits. Excavation Limits and OVA-FID soil screening results are illustrated on **Figure 4**. OVA-FID soil screening results are provided in **Table 1.**

A total of four confirmatory soil samples were collected on July 17, 2008 for laboratory analysis upon the cessation of excavation activities. One confirmatory soil sample was collected from each excavation sidewall; north, east, south and west walls. A confirmatory soil sample from the bottom of the excavation was not collected because water was present at the base of the excavation. Soil samples were collected in accordance with FDEP SOPs and submitted to TestAmerica Laboratories, Inc. (TestAmerica), Pensacola, Florida, for the analysis of benzene, toluene, ethylbenzene, total xylenes, and methyl tert-butyl ether (BTEX/MTBE) using EPA Method 8021B, for polynuclear aromatic hydrocarbon (PAH) compounds using EPA Method 8270C low level, and for total petroleum hydrocarbon (TPH) using the FL-PRO Method.

Analytical results indicate the soils collected during the July 17, 2008 sampling event did not exhibit concentrations of concern (COCs) exceeding the Soil Cleanup Target Levels (SCTLs) pursuant to Table II of Chapter 62-777, Florida Administrative Code (FAC). Locations and depths of soil samples, and laboratory analytical results of excavation soil sidewall sampling are illustrated on **Figure 5**. Tabulated soil analytical results are provided as **Tables 2A** and **2B**. Benzo (a) pyrene conversion sheets for equivalency of PAH compounds detected within the north and east soil sidewalls are provided as **Appendix C**. The complete laboratory analytical report and chain of custody are included as **Appendix D**.

DRAFT

On July 17, 2008 approximately 191 tons of impacted soil were hauled offsite and disposed of at the WMI Okeechobee Landfill located in Okeechobee, Florida. Non-Hazardous Waste Manifests and load tickets are included as **Appendix E**. Additional soil was stockpiled, overlain and underlain by bermed visqueen to prevent soil leaching during potential rainfall.

Day-5 July 18, 2008

Backfill activities commenced July 18, 2008. Investigation of soil underlying the former product lines was conducted. Soil samples were collected from the area and screened in the field using an OVA-FID. Screening results indicate no potential impacts were present within the soil underlying the product lines; thus, no additional

soils were excavated. Soil screening locations and results are illustrated on **Figure 4**. Soil screening results are summarized in **Table 1.**

Approximately 205 tons of impacted soil was hauled offsite and disposed of at the Okeechobee Landfill located in Okeechobee, Florida. Non-Hazardous Waste Manifests and load tickets are included as **Appendix E**. With completion of soil transport of Day 5 Source Removal Activities, a total of 485 tons of impacted soil had been removed and disposed of offsite.

Approximately 535 tons of clean fill (375 tons) and #57 stone (160 tons) was utilized to backfill the excavated area to grade. The bottom 3 feet of the excavation was filled with #57 stone wrapped below and above with filter fabric to prevent finder grained soil from migrating into void spaces to minimize setting. The backfill within the excavation was compacted on 1-foot lifts beginning at 3 feet bls. In addition, piping was connected to the roof drains of the building to divert rainwater away from the excavation.

On July 18, 2008, Universal Testing Services, Inc. (Universal) collected a proctor soil sample from the clean fill for use in calculation of future compaction testing. A composite soil sample was collected from the clean fill prior to backfilling the excavation. The clean fill soil sample was submitted to PC&B Environmental Laboratories, Inc. for analysis of arsenic. Laboratory analytical results indicate that arsenic was not detected in the soil sample above the Direct Exposure Residential Soil Cleanup Target Level listed in Table II of Chapter 62-777, Florida Administrative Code. Laboratory results for the analysis of arsenic within the clean fill are included as **Appendix F**. Clean fill load tickets are provided in **Appendix G.**

DRAFT

Site Restoration Activities

Beginning July 20, 2008, site restoration activities, including re-installation of electrical conduits and energizing of electric lines within the formerly excavated area, the re-installation of the air line located within the formerly excavated area, additional soil compaction, surveying of the formerly excavated area for final grading, compaction soil testing, re-assembly of former dispenser islands concrete curbing, concrete slab pour, monitoring well installation, and asphalt paving. The site was restored to its original condition by July 25, 2008.

On July 21, 2008, ARCADIS provided oversight for onsite activities conducted by various subcontractors. Activities conducted by BBES include additional soil

compaction and final grading. Universal conducted soil density testing at 0-1, 1-2, and 2-3 foot intervals on both the north and south end of the formerly excavated area. Results of the soil density testing indicate compaction exceeded the minimum criteria of 95 % compaction in the areas and intervals examined. Results of the soil density test performed by Universal are provided in **Appendix H.** Nolan Concrete, Inc. (Nolan) poured a six inch concrete slab approximately 28 X 50 feet, within the limits of the formerly excavated area. The concrete pad was poured in the location of the former concrete pad, which had been removed prior to excavation activities.

On July 22, 2008, ARCADIS provided oversight for installation of replacement electrical and air lines by the certified electrician and BBES.

On July 24, 2008, electric conduit installation was completed, including running of the electric lines, and subsequent energizing.

In addition, ARCADIS provided oversight for monitoring well installation activities performed onsite and offsite by GPI. Three replacement monitoring wells were installed onsite (MW-6R, MW-7RR, and MW-11R), two new monitoring wells were installed offsite, within the right-of-way of westbound SR 50 (MW-19 and MW-21), and one new monitoring well (MW-20) was installed within the Ralph Johnson's Used Cars property, located across SR 50 from the site. Prior to monitoring well installation, direct push technology was utilized to obtain sleeved soil for purpose of lithologic description.

The three replacement and three new monitoring wells were installed using a hollow stem auger to a total depth of 12 feet bls. The monitoring wells were constructed with 10 feet of 2" diameter 0.010 slot polyvinyl chloride (PVC) well screen, 2 feet of 2" diameter PVC well riser, 11 feet of 20/30 silica sand filter pack, 1 foot of fine sand seal, and grout to surface. The wells were completed with a locking cap, an 8" manhole cover and a 2 X 2 foot square concrete pad. Monitoring well installation locations are illustrated on **Figure 6.** Soil boring logs are included as **Appendix I.** Monitoring well construction logs, completed by GPI, and monitoring well construction and development logs completed by ARCADIS are provided in **Appendix J.**

On July 25, 2008, ARCADIS provided oversight activities conducted by Perma-Stripe of Apopka, Florida including surface preparation and asphalt paving. Asphalt paving of the formerly excavated area, and adjacent areas damaged by source removal activities was completed in one day.

DRAFT

A photographic log depicting source removal restoration activities conducted at the site is provided as **Appendix K**.

Recommendations

ARCADIS recommends the implementation of Post Active Remediation Monitoring as detailed in the July 23, 2008 Limited Scope Remediation Monitoring Plan (RMP) and the Division's RMP response dated August 14, 2008. ARCADIS will collect groundwater samples as recommended in the Division's RMP August 14, 2008 response and report the findings in a separate Groundwater Sampling Report, for final approval of the proposed RMP.

2014 Annual Natural Attenuation Monitoring Report

Former Texaco Station (Chevron #307250)
FDEP Facility ID #489808121
11460 West Colonial Drive
Ocoee, Orange County, Florida
FDEP No. 48-9808121

DRAFT

August 6, 2014

1. Introduction

On behalf of Chevron Environmental Management Corporation (CEMC), ARCADIS is pleased to submit this 2014 Annual Natural Attenuation Monitoring (NAM) Report for the above-referenced facility to the Orange County Environmental Protection Division (Division). This report documents groundwater sampling performed in accordance with the Florida Department of Environmental Protection (FDEP), Division of Waste Management, Bureau of Petroleum Storage System Standard Operating Procedures and the FDEP Amended NAM Plan Approval, dated October 12, 2012. This is the fifth year of NAM at this site. A site map is included as **Figure 1**.

2. Background

This former retail petroleum service station is currently a Just Brakes auto repair shop. Assessment activities concluded that a very shallow and weathered unleaded gasoline source in low permeability soil was localized in the vicinity of the former dispenser islands. Impacts were primarily in the vadose zone (0 to 4 feet below ground surface [bgs]) and extended to the base of the fluctuating water table (4 to 6 feet bgs).

2.1 Site Assessment History

Site assessment was completed in 2007, as documented in the Division's Supplemental SAR review correspondence, dated September 24, 2007.

Source removal was conducted from July 14 through July 18, 2008. ARCADIS observed Big Bend Environmental Services conduct an excavation of approximately 485 tons of petroleum-impacted vadose and smear zone soil. The excavation summary was detailed in the Source Removal Report, dated September 15, 2008.

Post-excavation groundwater sampling was performed on October 13, 2008. ARCADIS prepared a Groundwater Sampling-Post Source Removal Report, dated November 10, 2008, summarizing the finding and recommended further groundwater sampling. The Division concurred with the ARCADIS' recommendations for quarterly monitoring of groundwater quality sampling, for a maximum of 6 months (two-quarterly events). As a result, ARCADIS prepared a Groundwater Sampling Report (GSR) – Quarter 1 and the May 8, 2009 GSR – Quarter 2, dated February 9, 2009, which outlined a NAM Plan for the facility. The FDEP approved the NAM Plan in a SAR and NAM Plan Approval letter, dated June 23, 2009.

In the Year 1, Quarter 2 NAM Report, dated April 12, 2010, ARCADIS requested a modification of the FDEP SAR and NAM Plan Approval, dated June 23, 2009, to change the sampling frequency from quarterly to semi-annual. The Division approved the revised NAM Plan in the Year 1, Quarter 2 NAM Report Approval Letter, dated April 26, 2010, (received by ARCADIS on April 29, 2010). At the time that

DRAFT

ARCADIS received the correspondence, ARCADIS had already scheduled and performed the groundwater sampling at a quarterly interval, instead of the requested semi-annual frequency.

In the NAM Semi-Annual Report – Year 1, Quarter 4 and Year 2, Quarter 1, dated December 14, 2011, ARCADIS recommended preparation of a Limited Scope Remedial Action Plan (LSRAP) to address petroleum impacts in the vicinity of monitoring well MW-14. The Division's NAM Semi-Annual Report review, dated February 14, 2011, recommended a conference call prior to preparing an LSRAP. A conference call was conducted on March 30, 2011 between Anthony Larenas (ARCADIS) and Matt Green, Jose Gonzalez, and Carlos Gonzalez (all three from the Division). The Division's recommendation was to conduct another round of groundwater sampling (of monitoring wells MW-7RR, MW-9, MW-13, MW-14, MW-15, MW-18, MW-19, and MW-20) and to report the findings in a report to the Division.

ARCADIS prepared a NAM Semi-Annual Report – Year 2, Quarter 3 report, dated June 2, 2011 and a NAM Semi-Annual Report – Year 3, Quarter 1 report on December 22, 2011. The FDEP approved a modified NAM plan in a correspondence dated April 26, 2012.

ARCADIS prepared a Natural Attenuation Monitoring – Year 3/Quarter 3 and Natural Attenuation Monitoring Plan Amendment Proposal report, dated August 16, 2012. The NAM Plan Amendment Proposal recommended a switch to annual NAM sampling from semi-annual NAM sampling. The recommendation was based upon review of the site history and current conditions indicating that this facility met the criteria for implementation of Long Term NAM sampling. The Division approved the change the annual sampling, in the NAM Semi-Annual Report Review correspondence, dated September 6, 2012, and also required sampling of MW-7RR and MW-15 prior to issuance of a Site Rehabilitation Completion Order. The FDEP approved a modified NAM plan in a correspondence dated October 12, 2012.

DRAFT

3. Water-Table Elevation and Groundwater Flow Direction

On July 2, 2014, ARCADIS measured depth-to-water (DTW) in monitoring wells MW-7RR, MW-14, MW-15, MW-18, and MW-19. Using current and historical top-of-casing (TOC) elevation data and current DTW measurements, a water-table elevation contour map was developed to depict groundwater flow direction. On July 2, 2014, shallow groundwater appeared to flow towards the northeast, which is consistent with the historical groundwater flow. DTW measurements, TOC, and water-table elevation data are summarized in **Table 1**. Groundwater flow direction is shown on **Figure 2**.

4. Groundwater Sampling

On July 2, 2014, ARCADIS collected groundwater samples from monitoring wells MW-7RR, MW-14, MW-15, MW-18, MW-19, and MW-20. TestAmerica Laboratories, Inc (TestAmerica), Pensacola, FL, analyzed the groundwater samples for benzene, toluene, ethylbenzene, total xylenes, and methyl tert-butyl ether (BTEX/MTBE) using EPA Method 8021B. In addition, the groundwater samples form

monitoring wells MW-7RR and MW-15 were also analyzed for polycyclic aromatic hydrocarbons (PAH) using EPA Method 8270. Groundwater sampling was conducted in accordance with FDEP SOP 001/01 FS 2200.

The laboratory analytical results, from groundwater samples collected on July 2, 2014, indicated the following:

- Benzene and total xylenes were detected in the sample collected from monitoring well MW-19 (at 3.4 µg/L and 24 µg/L, respectively) above the Groundwater Cleanup Target Levels (GCTLs), listed in Table I of Chapter 62-777, Florida Administrative Code (FAC).

- Other contaminants of concern (COCs) were not detected above applicable GCTLs.

The current and historical groundwater analytical results are summarized in **Tables 2A** and **2B**. Current groundwater analytical results are shown on **Figure 3**. The laboratory analytical reports and chains of custody document are included in **Appendix B**. The FDEP equipment calibration and groundwater sampling logs are included in **Appendix C**.

5. Conclusions

Based on the July 2, 2014 groundwater sampling activities performed at this facility, and historic site assessment, ARCADIS provides the following conclusions:

- On July 2, 2014, shallow groundwater appeared to flow towards the northeast, which is consistent with the historical groundwater flow.

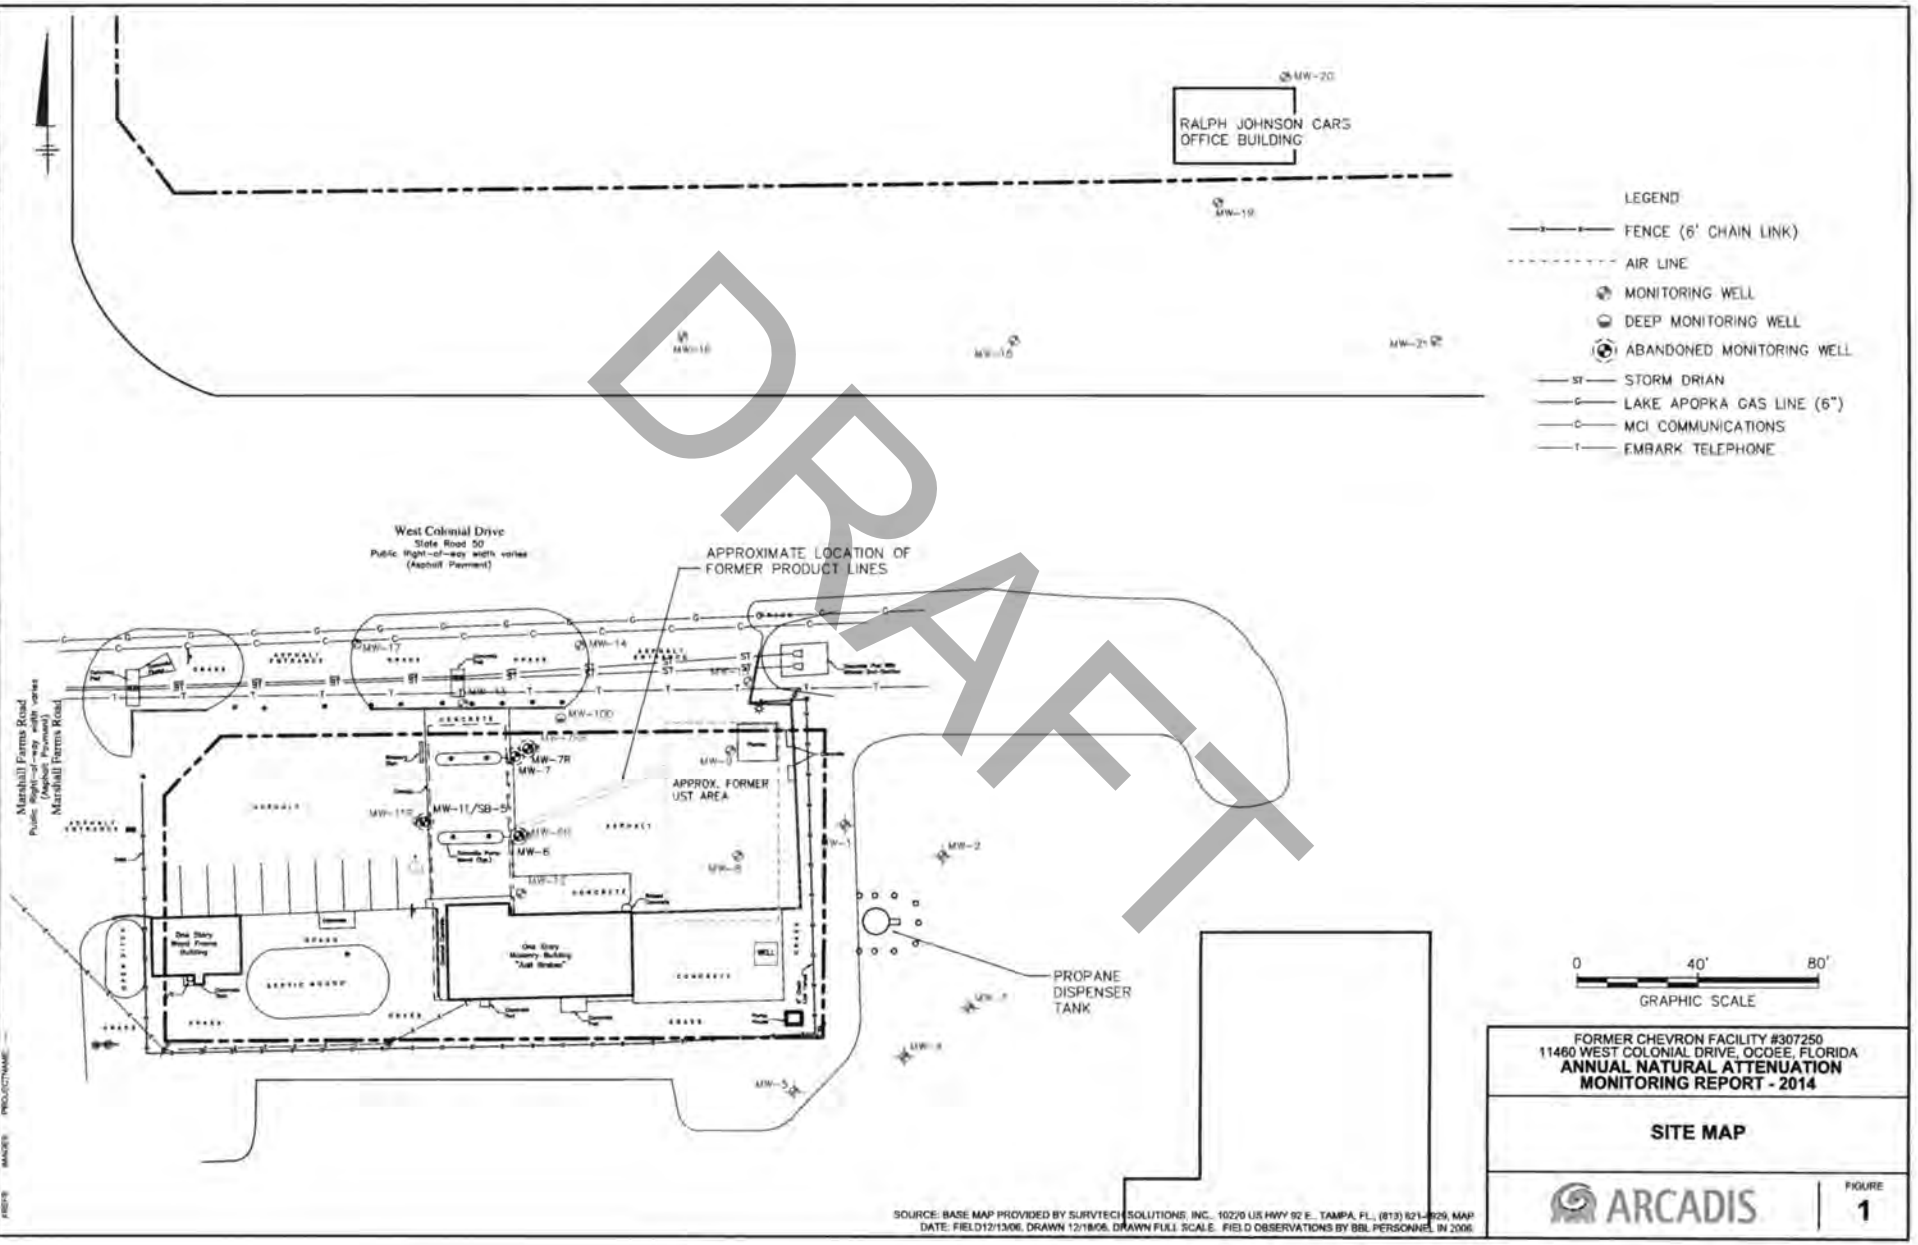

- July 2, 2014, groundwater laboratory analytical results indicated that benzene and total xylenes were detected in the sample collected from monitoring well MW-19 (3.4 µg/L and 24 µg/L, respectively) above the GCTLs.

    - Other COCs were not detected above applicable GCTLs.

6. Recommendations

Based on the July 2, 2014 groundwater sampling activities performed at this facility, ARCADIS recommends continuing annual NAM sampling. ARCADIS proposes that the next annual sampling event be conducted in July 2015.

N/A

WASTE ACTIVITIES:

Generator: CLOSED

INSPECTION TYPE:

Site Visit Inspection for Closed Facility

INSPECTION PARTICIPANTS:

Principal Inspector: John E. White, Inspector

Other Participants: N/H

LATITUDE / LONGITUDE: Lat 28° 33' 6.996" / Long 81° 32' 57.795"

NAIC: Data is missing from FIESTA

TYPE OF OWNERSHIP: Private

Introduction:

On March 11, 2021, John White, Florida Department of Environmental Protection, conducted a site visit at Ralph Johnson 24 Hour Wrecker Service to determine the facility's compliance with state and federal hazardous waste regulations. The facility is no longer in operation at this location. The site is now vacant.

Conclusion:

Florida Administrative Code 62-730.150(2)(b) requires generators notify the Department of all changes in status, including changes in facility name and location. As the notification information for this facility is no longer valid, the facility is considered closed at this location.

DRAFT

Ralph Johnson 24 Hour Wrecker Service Inspection Report

Inspection Date 03/11/2021

1.0: Pre-Inspection Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.

Discharge 1

Lead Agency: LP
Score: 45
Technical Status NFA

A discharge reporting form was submitted 6/92 in response to contamination discovered during tank closure activities. IRA activities were completed 8/92 where 1,122.78 tons of contaminated soils were removed. A Contamination Assessment Report was submitted 3/93 and deemed incomplete 12/93. A Contamination Assessment Addendum Report was submitted 11/94 and deemed incomplete 3/95. A Contamination Assessment Addendum Report was submitted and approved 5/96. A Level 3 General Report was submitted 4/00 and approved 5/00. A Health & Safety Plan was submitted 5/00. A Level 4 General Report was submitted 9/00 and approved 10/00. A Level 4 General Report was submitted 6/01 and approved 8/01. A General Site Assessment Report was submitted 2/02 and approved 3/02. A General Site Assessment Report was submitted 9/02 and approved 10/02. A RAP was submitted 6/03 proposing an air sparge/soil vapor extraction (AS/SVE) system utilizing 12 air sparge wells and 12 horizontal vapor extraction wells and deemed incomplete 7/03. A RAP Response to Comments was submitted 7/03 and approved 8/03. A Supplemental Site Assessment Report was submitted and approved 10/03. A Supplemental Site Assessment Report was submitted and approved 5/05. A Level 3 Limited Scope RAP was submitted 5/05 proposing excavation of contaminated soils and deemed incomplete 8/05. A Level 3 Limited Scope RAP Addendum was submitted 9/05 and approved 11/05. A Letter Report was submitted 11/05 and approved 12/05. A Letter Report (Pre-burn Analysis) Addendum was submitted 1/06 and deemed incomplete 2/06. A Response to Comments was submitted and approved 1/06. A General Report was submitted and approved 5/06. A RAP Modification Report was submitted and approved 10/06 requesting that the disposal of soil be changed from thermal treatment to landfilling. A Letter Report was submitted and approved 11/06. A Site Assessment Report (Backfill Sampling Report) was submitted and approved 12/06. A Well Abandonment Report was submitted and approved 12/06. Source removal activities were completed 11/06 where 2,843 tons of contaminated soils were transported to a landfill for disposal. A Source Removal Report was submitted 12/06 and approved 4/07. A Post Active Remediation Monitoring Plan was submitted 4/07 and approved 5/07. A Source Removal Report Response to Comments was submitted and approved 5/07. Post Active Remedial Monitoring was performed 3/07 through 12/07. A Site Rehabilitation Completion Report was submitted 7/08 and approved 8/08. The discharge was granted No Further Action status 8/29/08.

DRAFT

Dear Mr. Schneider:

Orange County Environmental Protection Division (Division) has reviewed the Site Rehabilitation Completion Report (SRCR) and No Further Action Proposal (NFAP) dated July 28, 2008 (received July 30, 2008), and the Monitoring Well Abandonment Report dated July 28, 2008 (received July 30, 2008), prepared and submitted by Shaw Environmental, Inc., for the petroleum product discharge referenced above. Documentation submitted with the SRCR/NFAP confirms that criteria set forth in Subsection 62-770.680(1), Florida Administrative Code (F.A.C.), have been met. Please refer to the attached map of the source property and analytical summary table. The SRCR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (SRCO). Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharges referenced above, except as set forth below.

In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Florida Department of Environmental Protection (Department) may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the SRCR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SRCR/NFAP you do not have to do anything. This Order is final and effective as of the date on the top of the first page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

DRAFT

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from ACEJ Holdings LLC, shall mail a copy of the request to ACEJ Holdings LLC, at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from ACEJ Holdings LLC, shall mail a copy of the petition to ACEJ Holdings LLC, at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;
(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;
(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;
(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;
(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and
(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective as of the date on the top of the first page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

DRAFT

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding Orange County Environmental Protection Division's review of your SRCR/NFAP should be directed to Carol White at (407) 836-1492. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 489201731. Please use this identification on all future correspondence with the Department or Orange County Environmental Protection Division (Division).

Sincerely,

Michael E. Ashey, Chief
Bureau of Petroleum Storage Systems

P.G. CERTIFICATION

Site Rehabilitation Completion Report/No Further Action Proposal dated July 28, 2008 (received July 30, 2008), for Former Miller's Garden Shop, located at 11301 West Colonial Drive, Ocoee, FDEP Facility ID# 489201731.

I hereby certify that in my professional judgment, the components of this Site Rehabilitation Completion Report/No Further Action Proposal prepared for the June 2, 1992 petroleum product discharge discovered at the above-referenced facility satisfy the requirements set forth in Chapter 62-770, Florida Administrative Code (F.A.C.), and that the conclusions in this report provide reasonable assurances that the site rehabilitation objectives stated in Chapter 62-770, F.A.C., have been met.

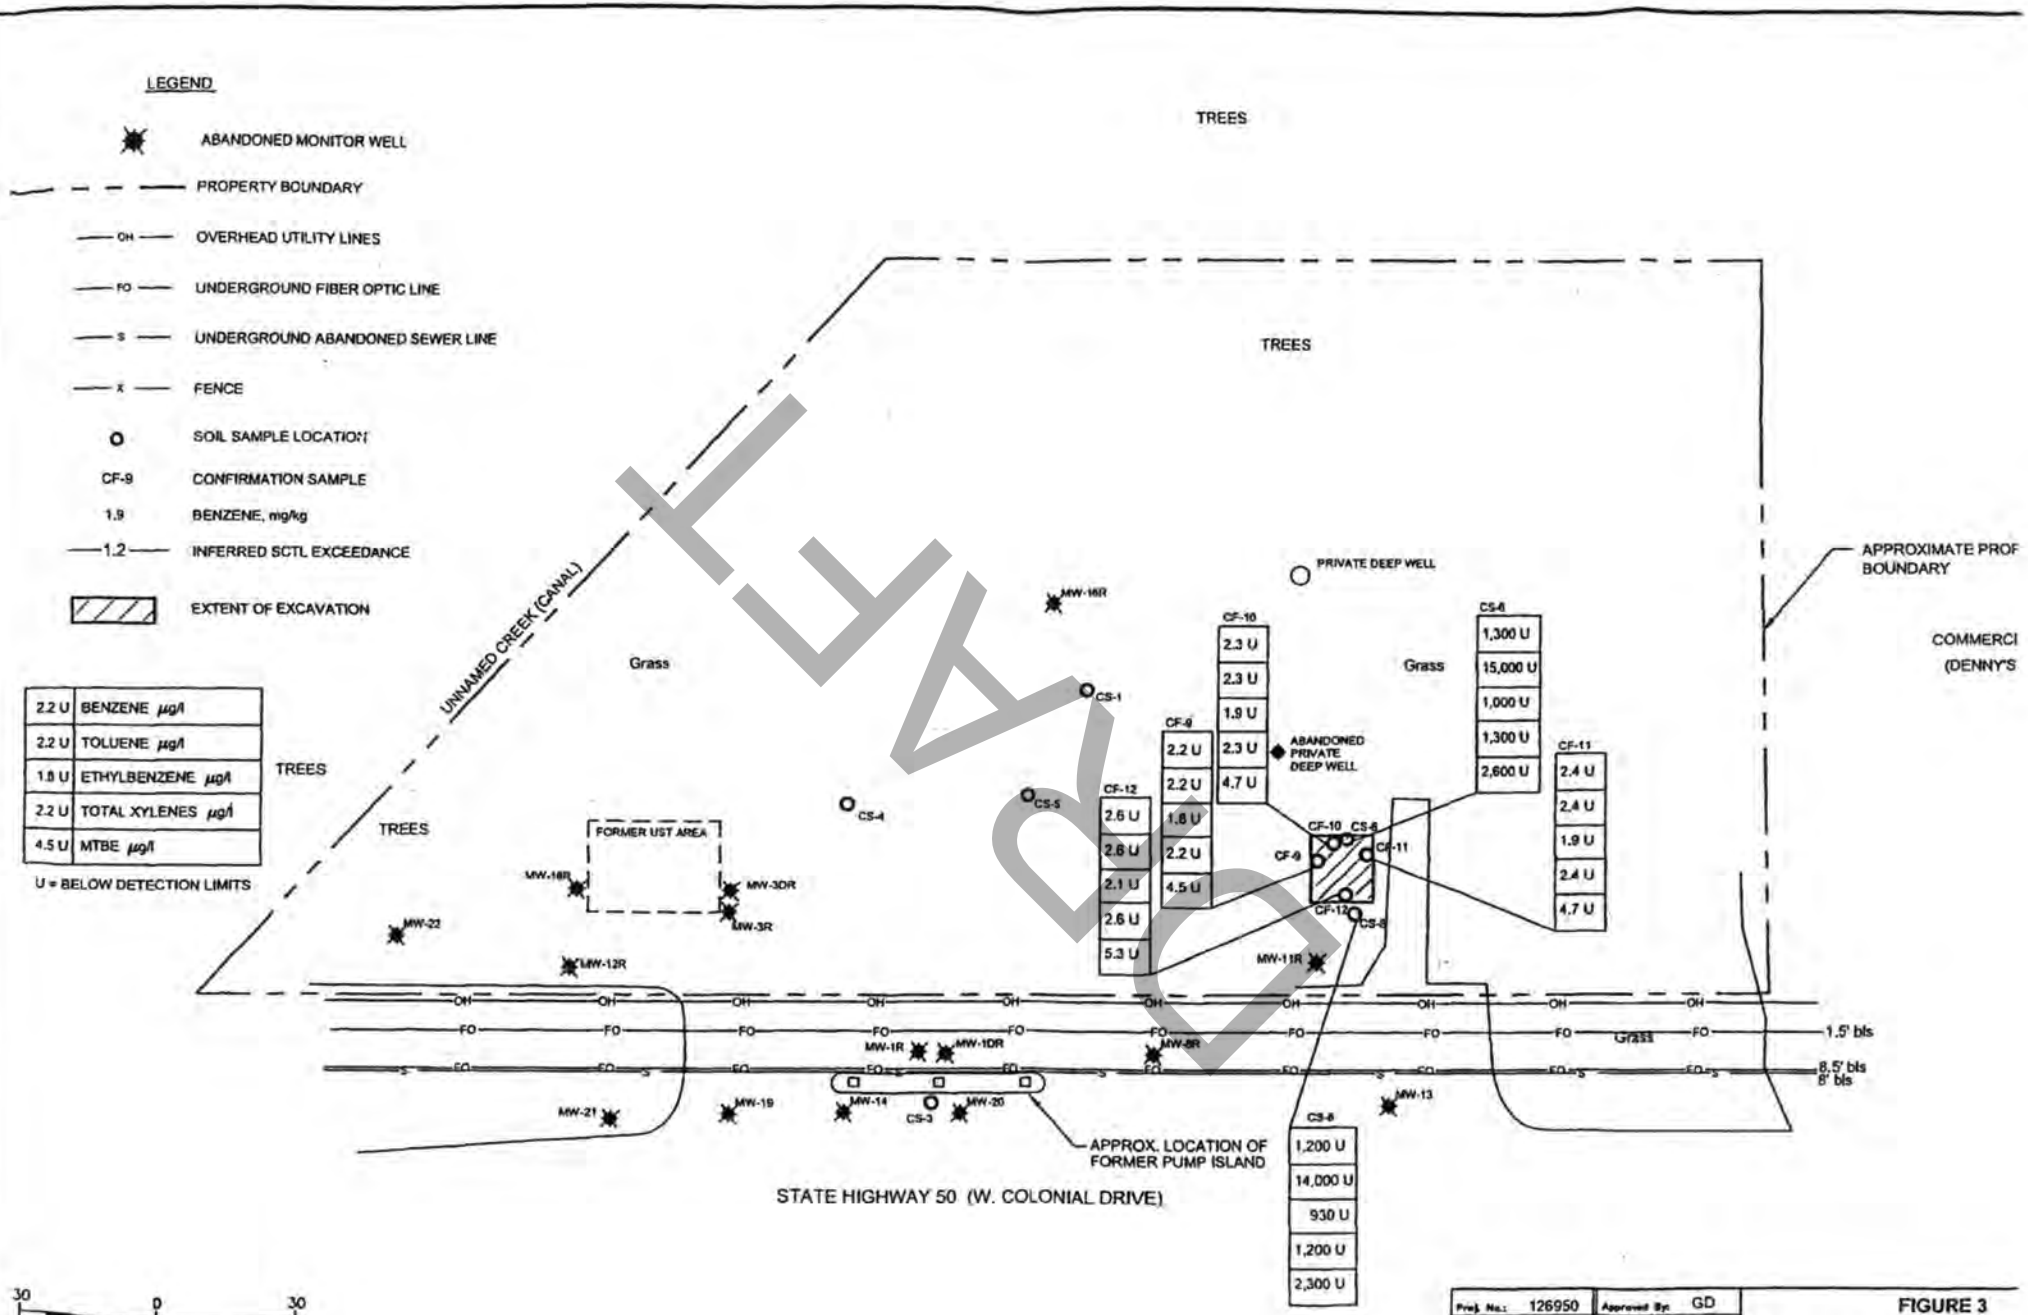

___ I personally completed this review.

1.0 INTRODUCTION

Universal Engineering Sciences, Inc. (UES) has prepared this report to document soil and groundwater assessment, soil source removal, and groundwater remediation activities associated with a former aboveground storage tank (AST) which contained diesel fuel. The AST was located on Heller Bros. Groves property at a citrus equipment maintenance area formerly present at the southwest corner of Maguire Road at Tomyn Road in Ocoee, Orange County, Florida. Figure 1 shows the site location on a portion of a United States Geological Survey topographic quadrangle map titled "Winter Garden, Florida".

2.0 BACKGROUND

Maguire Road is currently being widened and Tomyn Road is being re-routed. Construction workers installing a storm water sewer along the west side of Maguire Road noticed apparent petroleum odors. A Limited Soil Screening Activities report was then prepared by Professional Service Industries, Inc. (PSI), dated December 19, 2000 for the City of Ocoee, which identified indications of petroleum impacted soil based on organic vapor analyzer (OVA) measurements in the right-of-way along the west side of Maguire Road. The report indicated groundwater was present approximately 11 feet below land surface. No soil or groundwater analyses were preformed. A copy of the PSI report is contained in Appendix A.

Based upon UES' preliminary soil and groundwater sampling results for assessment performed on Heller Brothers Groves property, discussed in this report, a Discharge Report Form (DRF) was filed with the Orange County Environmental Protection Division (OCEPD) on January 12, 2001. A copy of the DRF is contained in Appendix B. An updated Storage Tank Facility Registration Form provided to the OCEPD on January 15, 2001 is also included in Appendix B.

All equipment decontamination, sample collection, and sample custody procedures performed by UES followed standard operating procedures established by the Florida Department of Environmental Protection (FDEP), adopted by UES in our Comprehensive Quality Assurance Plan, N0. 860101, which is approved by the FDEP.

3.0 SOIL ASSESSMENT ON HELLER BROS. GROVES PROPERTY PRIOR TO SOURCE REMOVAL

On January 4, 2001, UES performed soil assessment hand auger borings HAB-1 through HAB-7 west of Maguire Road, and HAB-8, HAB-9, and HAB-10 east of Maguire Road, to define the horizontal extent of potential petroleum impacts to soil. Figure 2 shows the soil boring locations. Soil samples were collected at two foot depth intervals to a depth of one foot below the water table. The water table was observed approximately ten feet bls. The soil samples were screened for visual and olfactory evidence of potential environmental impacts. Additionally, a Thermal Environmental Instruments, Model 580B, photo ionization detection (PID) type OVA was used to screen each soil sample for indications of petroleum impacts in accordance with procedures listed in Chapter 62-770.200, Florida Administrative Code (FAC). Table 1 contains a summary of OVA measurements. Appendix C contains soil assessment field data.

DRAFT

All soil OVA readings east of Maguire Road measured below the instrument detection limit of one part per million (ppm). Soil samples west of Maguire Road representative of high (TMW2 at 9.5 feet, OVA=419 ppm), medium (HAB-5 at 8 feet, OVA=244 ppm), and low (HAB-3 at 8 feet, OVA=18 ppm) OVA measurements were collected for laboratory analysis. The soil samples were delivered to PC&B Environmental Laboratories, Inc. for analysis of common solvent and petroleum constituents by Environmental Protection Agency (EPA) Methods 8021, 8100, and FL-PRO. Table 2 contains a summary of soil analytical results. Appendix D contains copies of the laboratory reports and chain-of-custody forms.

The soil sample laboratory results were compared to residential and leachability Soil Cleanup Target Levels (SCTLs) listed in Chapter 62-777, FAC. Total recoverable petroleum hydrocarbon (TRPH) concentrations reported in soil sample HAB-5 at 8 feet below land surface (bls) exceeded both the residential and leachability SCTLs. Xylene concentrations reported in soil sample TMW-2 at 9 feet bls exceeded the leachability SCTL. Based upon evaluation of soil OVA measurements and laboratory analytical data, a conservative field OVA measurement of 200 ppm, or higher, would indicate petroleum contaminated soil which should be remediated.

Upon receipt of confirmation that SCTLs had been exceeded, UES verbally requested PC&B Environmental Laboratories to perform analysis of arsenic, cadmium, chromium, and lead on the three soil samples to meet preburn thermal treatment disposal requirements. The laboratory results are included in Appendix D.

4.0 GROUNDWATER ASSESSMENT ON HELLER BROS GROVES PROPERTY PRIOR TO SOURCE REMOVAL

4.1 TEMPORARY MONITOR WELL INSTALLATION

Shallow temporary monitor wells TMW-1, TMW-2, and TMW-3 were installed on January 5, 2001for collection of groundwater samples and shallow groundwater flow measurements. Figure 2 shows the monitor well locations. The wells were installed using hollow stem augers with 6.25-inch internal diameter, decontaminated prior to each use. The monitor wells were set at a depth of approximately 15 feet bls and constructed with two inch diameter PVC pipe with a 10-foot screen section with 0.006-inch slot set to bracket the water table. A 30/65 sand pack filled the boring annulus. The well casings extended approximately two feet above grade. Soils generated during well installations were spread adjacent to the well. Copies of the monitor well construction details and soil logs are contained in Appendix E.

4.2 GROUNDWATER FLOW

The relative elevation at the top of each temporary monitor well casing was surveyed. Water levels were measured in the monitor wells on January 5 and 8, 2001. Field data are contained in Appendix F. Table 3 contains a summary of groundwater elevation information. Figure 3 shows the groundwater elevation measured on January 8, 2001. A slight gradient was measured toward the north-northwest.

DRAFT

4.3 GROUNDWATER QUALITY PRIOR TO SOURCE REMOVAL

Groundwater samples were collected from temporary monitor wells TMW-1, TMW-2, and TMW-3 on January 8, 2001for laboratory analysis of common petroleum and solvent constituents by EPA Methods 8021, 8100, and FL-PRO. Appendix F contains field data. Appendix G contains copies of the laboratory report and chain-of-custody. Table 4 contains a summary of groundwater quality. Concentrations of benzene, ethylbenzene, xylenes, naphthalene, 1-methyl naphthalene, 2-methyl naphthalene, and TRPH reported in temporary monitor well TMW-1 exceeded groundwater cleanup target levels (GCTLs) stipulated in Florda Administrative Code (FAC), Chapter 62-777. Benzene and xylenes concentrations reported in temporary monitor well TMW-2 also exceeded GCTLs. All of the reported concentrations were below natural attenuation default concentrations (NALs) listed in Chapter 62-777.

No duplicate samples or equipment blanks were performed, based on the preliminary nature of this site assessment.

5.0 SOURCE REMOVAL

As mentioned in Section 2, roadway expansion of Maguire Road is in progress, which covers a portion of the petroleum contamination source area. Figure 2 shows the current site plan. Alternative procedures for site restoration were proposed by UES and approved by OCEPD and FDEP. A copy of the approval letter is provided in Appendix H.

5.1 EXCAVATION AND DISPOSAL OF CONTAMINATED SOIL

Excavation of petroleum impacted soil was performed on January 18-19, 2001. Ryan Construction operated an excavator and loaded trucks for transport of contaminated soil to C.A. Meyer Paving and Construction Company. UES collected soil samples for soil OVA measurements using a Thermal Environmental Instruments, Model 580B, PID type OVA; segregated impacted soil from clean soil; and manifested impacted soil for transport and disposal. Soil prebum sampling and analyses are discussed in Section 3.

No petroleum impacted soil was identified in the top 4 feet of the subsurface. Figure 2 shows the horizontal extent of soil excavations and soil sample grid coordinates. Table 1 and Appendix I contain soil sample OVA measurements correlating to the sample grid coordinates. West of the roadway and buried potable water line, all petroleum impacted soil exhibiting OVA measurements above 10 ppm was removed to the water table at a depth of 11-12 feet bls. The bottom of the water line is approximately 3 feet bls. Excavation of petroleum impacted soil below the roadway was performed to the extent possible without compromising structural integrity of a buried storm sewer along the west edge of the roadway, and a buried reclaimed water line and active Maguire Road along the east side of the excavation. The dimensions of this excavation were 45 feet long x 13 feet wide x 8 feet deep. The bottom of the storm sewer is approximately 6 feet bls. The bottom of the reclaimed water line is approximately 3 feet bls.

DRAFT

A total of 657.14 tons of petroleum impacted soil were excavated and disposed. Copies of the soil disposal manifests and weight tickets are provided in Appendix J.

5.2 SOIL AND GROUNDWATER BIOREMEDIATION

Prior to filling of the excavations, UES applied one 55-gallon drum the bioremediation product Petrox to each of the two excavations on January 18 -19, 2001. Petrox is a liquid containing micro-organisms and nutrients with an underground injection control permit approved by the FDEP. Petrox was sprayed over the bottom of the excavation at the water table west of the roadway. Eleven hand auger borings were performed extending into the water table, at the bottom of the excavation within the roadway. Approximately 5 gallons of Petrox were gravity drained into each of the boreholes. Appendix K contains a field sketch showing the Petrox injection boring locations. The excavations were filled and compacted by Ryan Construction.

6.0 SOIL AND GROUNDWATER QUALITY ASSESSMENT AFTER SOURCE REMOVAL

6.1 INSTALLATION OF MONITOR WELL MW-4

Monitor well MW-4 was installed on March 9, 2001 near the center of the source removal excavation on Heller Bros. Groves property west of the roadway. At that time the new road had been prepared for asphalt and a sidewalk and road bed side slope had been completed. Figure 2 shows the location of monitor well MW-4 on the site plan. Temporary monitor wells TMW-1 and TMW-2 were destroyed during the soil source removal excavation. Temporary monitor well TMW-3 could not be located, apparently destroyed by road building machinery.

Monitor well MW-4 was installed using decontaminated, 6.25-inch internal diameter, hollow stem augers. The monitor well was set at a depth of approximately 15 feet bls and constructed with two inch diameter PVC pipe with a 10-foot screen section of 0.006-inch slots set to bracket the water table. A 30/65 sand pack filled the boring annulus to approximately 2 feet above the well screen. Cement grout was placed in the annulus above the sand pack. The well casing extendeds approximately 3 feet above grade. Soils generated during well installation were spread adjacent to the well. Copies of the monitor well construction details and soil logs are contained in Appendix E.

6.2 SOIL SCREENING - MW-4

Soil samples were collected at 1-foot depth intervals during installation of monitor well MW-4 and screened with a Thermal Environmental Instruments, Model 580B, PID type OVA. All OVA readings measured 0 ppm. Table 1 and the soil boring log for monitor well MW-4 in Appendix E contain documentation of the OVA measurements.

DRAFT

6.3 GROUNDWATER SAMPLING AND ANALYSES - MW-4

Monitor well MW-4 was purged and sampled by UES on March 12, 2001. A copy of the field sampling form is contained in Appendix F. Groundwater was measured at a depth of 11.27 feet within the well, approximately 8.3 feet bls. Groundwater samples were placed into pre-preserved sample containers supplied by the laboratory and delivered to PC&B Environmental Laboratories, Inc. for analysis by EPA Methods 6010 (total lead), 504 (ethylene dibromide {EDB}) , 8021, 8100, FL-PRO. Appendix G contains copies of the chain-of-custody form and laboratory report. Table 4 contains a summary of groundwater quality.

Benzene was reported at a concentration of 1.7 micrograms per liter (ug/L) which slightly exceeds the GCTL of 1.0 ug/L, and is below the natural attenuation level of 100 ug/L. Concentrations of toluene, ethylbenzene, and TRPH were reported at levels above detection limits, but below GCTLs. None of the other constituents tested were reported at concentrations above laboratory detection limits.

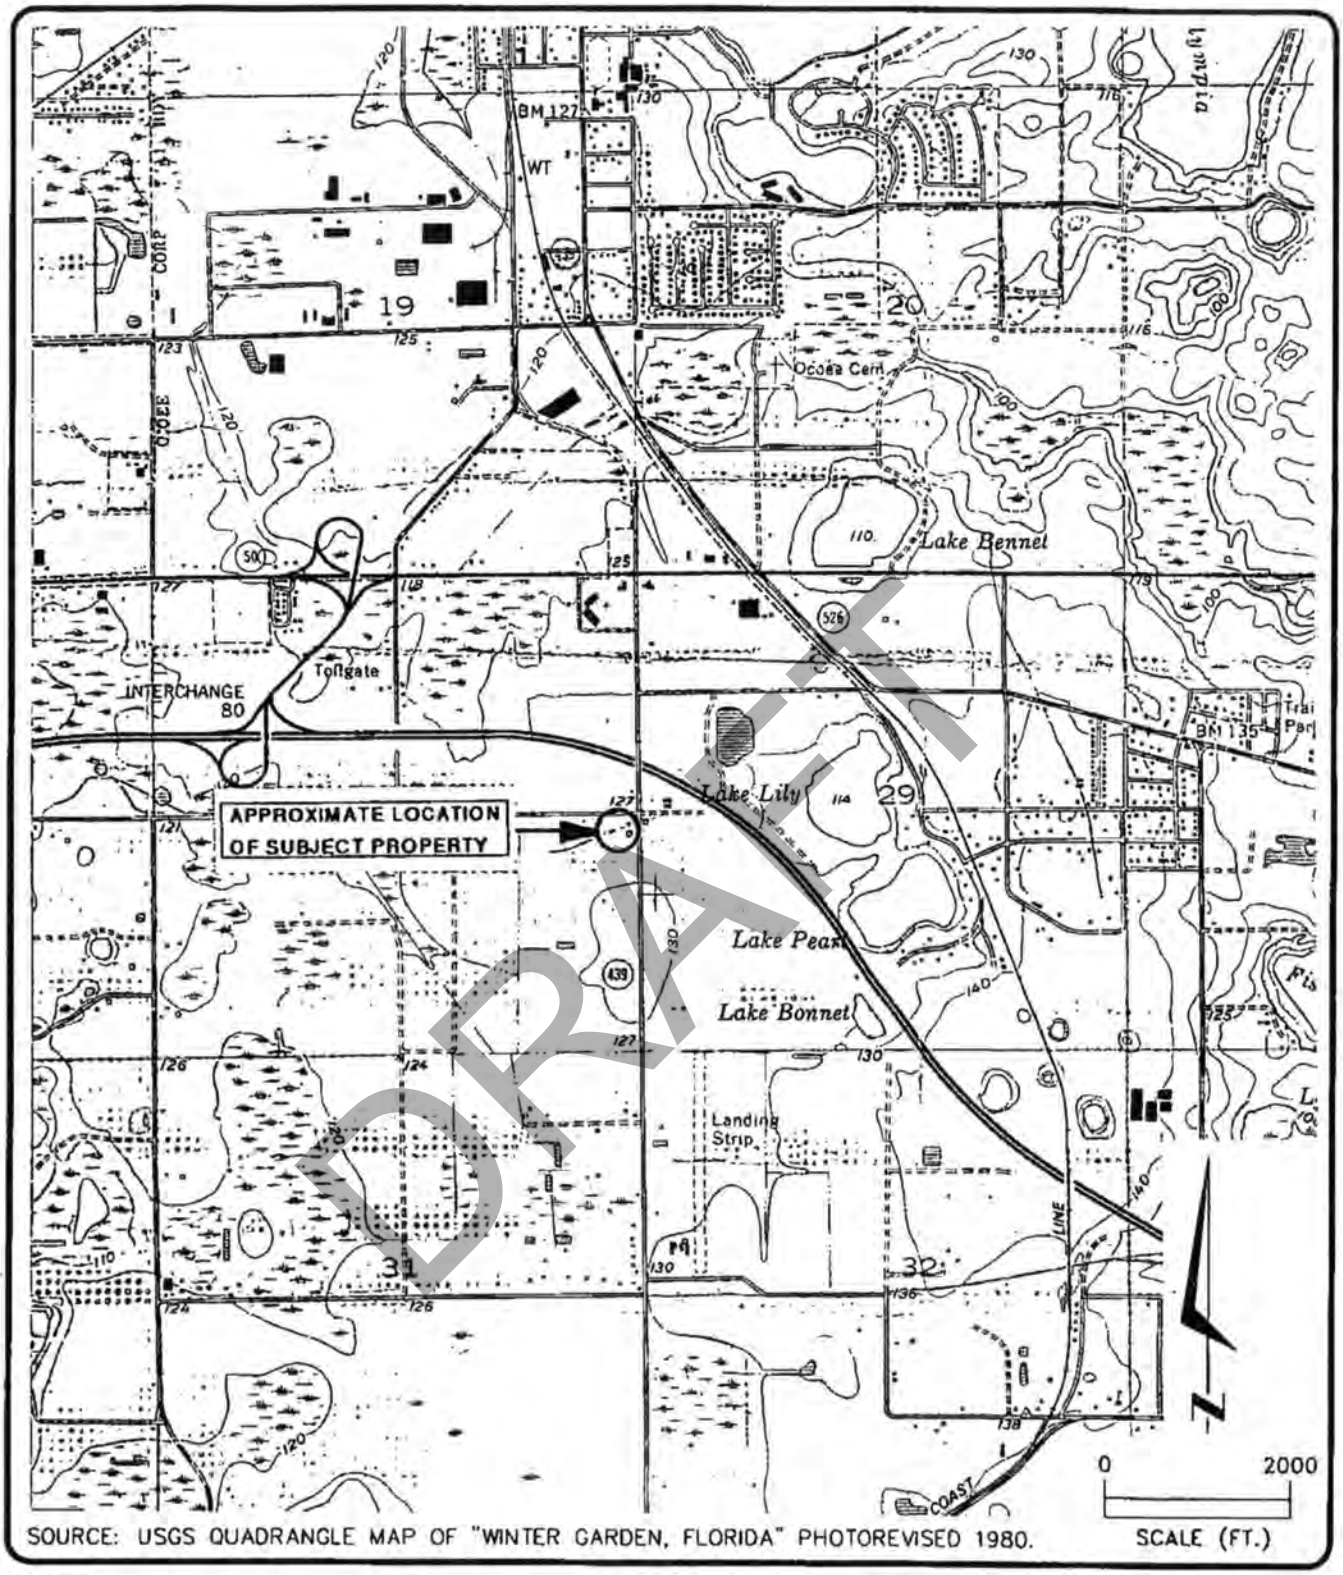

7.0 CONCLUSIONS AND RECOMMENDATIONS

Source removal activities appear to have effectively remediated petroleum impacts at this site. Based upon the soil and groundwater assessment results subsequent to source removal, no additional assessment appears warranted. In accordance with conditions of the FDEP-approved Alternative Procedures (Appendix H), UES recommends a Post Remediation Monitoring Plan of sampling monitor well MW-4 for analysis by EPA Method 8021(Volatile Organic Aromatics) on a quarterly basis for two quarters.

Re: Limited Soil Screening Activities
Maguire Road and Tomyn Road
Ocoee, Orange County, Florida

PSI Project No. 552-0G613

DRAFT

Dear Mr. Munjed:

Pursuant to your request, Professional Service Industries, Inc. (PSI) has completed limited soil and groundwater assessment activities of an area of the City of Ocoee Right-of-Way (ROW) located at the southwest of the corner of Maguire Road and Tomyn Road. It is PSI's understanding that during installation of underground utilities, including a water supply line, Professional Engineering Consultants, Inc. (PEC) and/or its subcontractors encountered soils that exhibited what appeared to have petroleum-like odors. PEC indicated that the affected area may include up to 50 feet of the approximately 500 feet of pipeline installed in the area. According to previous reports provided to PEC, it appears as though a large petroleum storage tank was historically used within close proximity of the area of the ROW that PSI investigated. To address these issues, on December 13, 2000, PSI performed nine soil borings (Figure 1) within the affected area marked by Mr. Rod Winfrey, Construction Manager.

Assessment Activities

To determine the presence of organic vapor concentrations within the on-site soils, soil samples were collected from each of the soil borings and screened in the field using a calibrated Foxboro Century 108 organic vapor analyzer equipped with a flame-ionizing detector (OVA-FID) following guidelines set forth in Chapter 62-770, Florida Administrative Code (FAC) for headspace analysis. Glass sample jars were half-filled with soil, covered with aluminum foil, sealed, and set aside to allow the volatiles to equilibrate throughout the headspace. The organic vapor response for each soil sample was determined by inserting the probe of the OVA-FID into the headspace of the sample container and recording the highest sustained reading. The two-jar method was used to obtain both total organic vapor readings and carbon filter readings, to account for the presence of naturally occurring methane in the on-site soils. The resultant total non-methane hydrocarbon level is calculated by subtracting the carbon-filtered

response from the total response. OVA-FID responses were recorded for all soil borings from land surface to a maximum depth of 11 feet below land surface (BLS) at 2-foot intervals (Table 1).

Assessment Results

Maximum OVA-FID response from Soil Borings SB-1, SB-4, SB-5 and SB-6 ranged from 996 to >9,995 parts per million (ppm). The highest OVA responses were collected at sample depths greater than 6 feet below land surface (BLS). Maximum OVA-FID responses ranged from 2 to 3 ppm within Soil Borings SB-2, SB-3, SB-7, and SB-8.

Construction Options

Based on PSI's experience in dealing with issues similar to the one encountered here, various construction alternatives do exist which would assist in reducing the potential for contamination entering or affecting the utilities to be placed within an area determined to have been impacted by petroleum or other products. If PEC or the City of Ocoee would like to further discuss these options, please contact PSI to set up a meeting to discuss such alternatives,

Conclusions

Based on the information obtained as part of these soil screening activities, it appears that the ROW has been impacted by the release of petroleum products. The data indicates that the petroleum impact within the soil is at least 6 to 10 feet BLS, the source of which appears to be the former AST which was located to the west of the fence on the ROW boundary. The soil impacts being limited to depths greater than 6 feet BLS indicates that the impacts are likely as a result of the migration of petroleum-impacted groundwater across the ROW. It appears that the area of impacted soil consists of an area at least 40 foot by 25 foot in size and is located approximately 20 feet south of STA 1142+00 along Maguire Road.

Recommendations

As it was not the intention of this investigation, insufficient data was collected to determine the vertical or horizontal extent of impact within the ROW. If this information is needed, supplemental soil and groundwater assessment activities would need to be performed. Because the impacts identified appear to be present only at depths greater than 2 feet BLS, there does not appear to be a significant risk associated with the exposure of petroleum impacted soils to the general public. However, if in the future, excavation activities to depths greater than 4 feet BLS take place in the vicinity of the area determined as being impacted are performed, appropriate consideration needs to be taken to prevent potential exposure to untrained construction workers or others which may come into contact with said impacted material.

DRAFT

If PEC has any comments or questions regarding the findings of this investigation, please feel free to contact the undersigned at (407) 645-5560. PSI appreciates the opportunity to assist PEC on this project and look forward to working on this or other projects in the future.

Respectfully submitted,

Subject: Site Rehabilitation Completion Order
Heller Brothers Groves Road Expansion
Southwest Corner of Maguire Road and Tomyn Road
Ocoee, Orange County
FDEP Facility ID# 489803519
Discharge Date: January 01, 2001 (Non-program)

Dear Mr. Avery:

The Orange County Environmental Protection Division, on behalf of the Florida Department of Environmental Protection (Department), has reviewed the Site Rehabilitation Completion Report (SRCR) and No Further Action Proposal (NFAP) dated February 09, 2010 (received February 11, 2010), prepared and submitted by Universal Engineering Sciences for the petroleum product discharge referenced above. Documentation submitted with the SRCR/NFAP confirms that criteria set forth in Subsection 62-770.680(1), Florida Administrative Code (F.A.C.), have been met. Please refer to the attached map of the source property and analytical summary table. The SRCR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharge referenced above, except as set forth below.

(1) In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Department may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the SRCR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

(2) Additionally, you are required to properly abandon all monitoring wells within 60 days of receipt of this Order. The monitoring wells must be plugged and abandoned in accordance with the requirements of Subsection 62-532.500(4), F.A.C.

DRAFT

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SRCR/NFAP you do not have to do anything. This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

DRAFT

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Heller Brothers Groves, Inc., shall mail a copy of the request to Heller Brothers Groves, Inc. at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Heller Brothers Groves, Inc., shall mail a copy of the petition to Heller Brothers Groves, Inc. at the

time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;
(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;
(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;
(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;
(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and
(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

DRAFT

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding the Orange County Environmental Protection Division's review of your SRCR/NFAP should be directed to Matthew N. Green, P.G. at (407) 836-1431. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for an

administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 489803519. Please use this identification on all future correspondence with the Department or the Orange County Environmental Protection Division.

Sincerely,

Michael E. Ashey, Chief
Bureau of Petroleum Storage Systems

1.0 INTRODUCTION

This report was prepared by Universal Engineering Sciences, Inc. (UES) to document additional petroleum cleanup activities performed at Heller Bros property located east of Maguire Road in Ocoee, Orange County, Florida. The additional assessment activities were requested by the Orange County Environmental Protection Division (OCEPD) on July 24, 2003 in a comment letter concerning review of the Petroleum Cleanup Report. The petroleum cleanup site is approximately 400 feet east of Maguire Road and approximately 250 feet south of the Florida Turnpike. Appendix A-1 shows the site location.

2.0 ASSESSMENT HISTORY

Two structures are noted on the site location map (Appendix A). It is our understanding that this location was formerly used as a truck parking/maintenance area. At the time of our investigation, the site was a grove of planted pine trees.

Petroleum impacts to soil and groundwater at concentrations exceeding cleanup target levels listed in Chapter 62-777 were identified at temporary monitor well ESTW-03 during due diligence environmental assessment performed by E Sciences during March and April 2003. Appendix A-2 shows the E Sciences investigation area. A Discharge Reporting Form for petroleum contamination identified at temporary monitor well ESTW-03 was prepared by UES and submitted on April 25, 2003. The source of petroleum contamination is unknown.

During April and May 2003 UES performed source removal activities documented in a Petroleum Cleanup Report (UES Report No. 285161) completed in June 2003. Approximately 501.81 cubic yards of petroleum impacted soil were excavated and hauled to CA Meyer Paving and Construction for thermal treatment. Groundwater exposed within the over-excavated soil excavation was treated by aeration bubbling and introduction of Petrox microbes. Once cleanup target levels were met the excavation was filled and compacted. A monitor well was installed in the center of the filled excavation and sampled. Petroleum contaminant concentrations were below cleanup target levels.

The Petroleum Cleanup Report was reviewed by OCEPD and found to be adequate for documentation of the petroleum cleanup activities; however, additional post remediation assessment was requested. A copy of the OCEPD letter dated July 24, 2003 is provided in Appendix B. The additional scope of work to meet requirements that would allow approval of No Further Action was then developed during correspondence between UES and OCEPD.

Tables containing historical site data are provided within this report. Table 1 contains a summary of soil organic vapor analyzer (OVA) data. Table 2 contains a summary of soil laboratory data. Table 3 contains a summary of groundwater elevation information. Table 4 contains a summary of groundwater quality information. Site assessment sampling locations are shown of Appendix A-3 and A-4. Groundwater data specific to the reported discharge includes monitoring points ESTMW03, TW-3R, TMW-6, TMW-7, and TMW-8.

DRAFT

Assessment activities documented in the current report include the installation and sampling of three shallow groundwater monitor wells installed at locations agreed upon by OCEPD. UES performed assessment activities in accordance with standard operating procedures DEP-SOP-001/01.

3.0 MONITOR WELL INSTALLATION

Monitor well TW-3 was installed at the center of the filled excavation on May 29, 2003, documented in the Petroleum Cleanup Report. Monitor wells TMW-6, TMW-7, and TMW-8 were installed on July 29, 2003 by UES using hollow stem augers with 4.25-inch internal diameter. Appendix A-5 shows the monitor well locations. The monitor wells were constructed using a 10-foot section of 2-inch diameter 0.006-inch slotted well screen set approximately 4-14 feet below land surface, and a 5-foot section of solid riser which extends approximately 2-3 feet above land surface. A 30/65 sand pack was placed in the boring annulus around the screen. Appendix C contains well construction diagrams and soil logs.

4.0 GROUNDWATER FLOW

Top of casing elevations at monitor wells TW-3, TMW-6, TMW-7, and TMW-8 were measured relative to an assumed benchmark elevation previously established at the site. Survey and water level data are included in Appendix D. Table 3 contains a summary of water level data. Appendix A-6 shows groundwater elevation data obtained August 7, 2003. Shallow groundwater flow was measured toward the northeast, similar to previous measurements. A slight storm water recharge mound was apparent at monitor well TW-3 located within the filled excavation. The recharge mound appears to extend down-gradient of the former excavation as indicated by the water level measured in monitor well MW-6.

5.0 GROUNDWATER SAMPLING AND ANALYSES

Groundwater samples were collected from monitor wells TMW-6, TMW-7, and TMW-8 on July 30, 2003. Field sampling data forms are contained in Appendix D. The groundwater samples were collected using a peristaltic pump. Volatile organic aromatic (VOA) samples were collected from the bottom of the drop tube, reversing flow of the peristaltic pump. A vacuum trap was used to collect samples for polynuclear aromatic hydrocarbon (PAH) analysis. Total recoverable petroleum hydrocarbon (TRPH) samples were collected directly from the pump discharge. The groundwater samples were placed into containers provided and preserved by the laboratory and stored in a chest with ice. The samples were delivered to Southern Research Laboratories for analysis by EPA Methods 8021(VOA), 8100, and FL-PRO. Appendix E contains a copy of the laboratory report.

Table 4 contains a summary of reported petroleum contaminant concentrations. Appendix A-7 shows reported contaminant concentrations plotted on the map of the investigation area. No groundwater contaminant concentrations exceeded cleanup target levels.

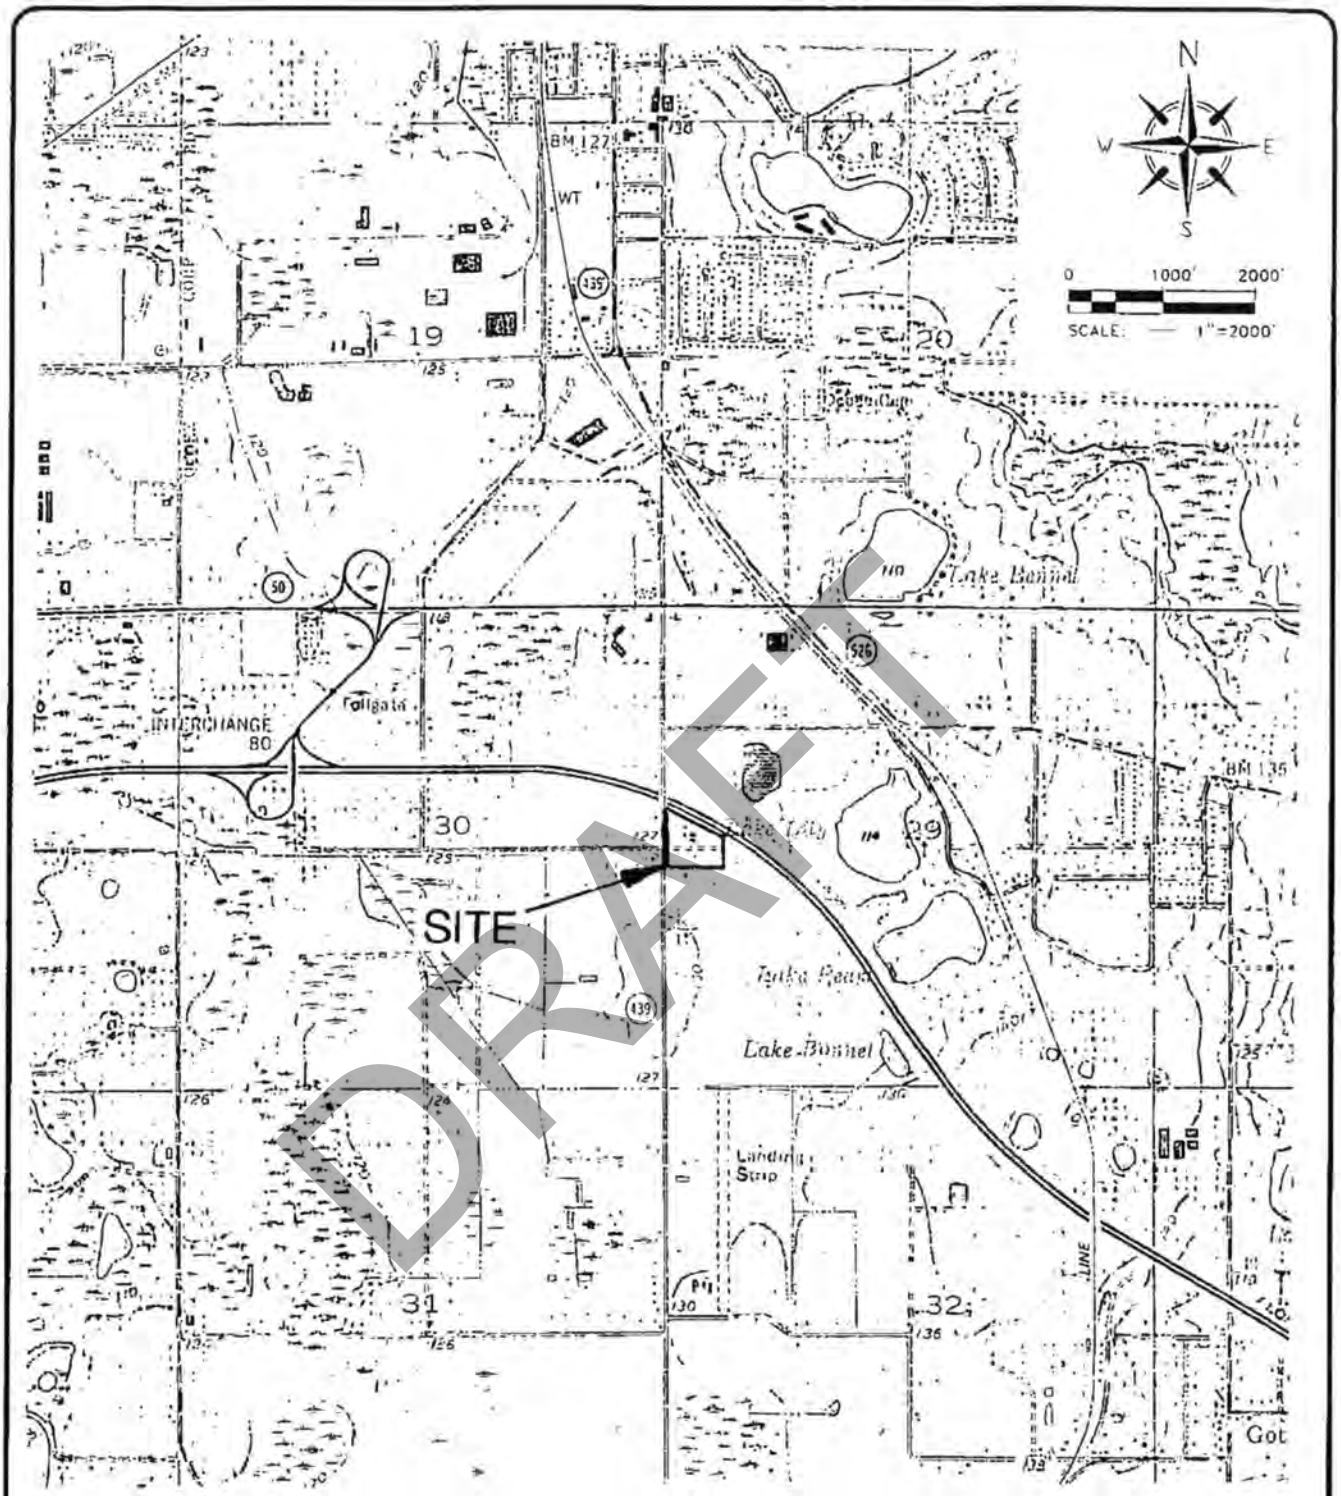

DRAFT

6.0 CONCLUSIONS AND RECOMMENDATIONS

Post remediation groundwater sampling results indicate petroleum contaminant concentrations are below cleanup target levels.

No further action (NFA) regulatory status is recommended in conjunction with the petroleum discharge reported April 25, 2003.

Subject: Site Rehabilitation Completion Order
Heller Brothers Groves Truck Maintenance
NE corner of Maguire Road and Tomyn Road
Ocoee, Orange County
FDEP Facility ID# 489805893
Discharge Date: March 1, 2003 (Non-program)

DRAFT

Dear Mr. Jackson:

Orange County Environmental Protection Division (Division) as reviewed the Site Rehabilitation Completion Report (SRCR) dated August 14, 2003 (received August 15, 2003), prepared and submitted by Universal Engineering Sciences for this site. Documentation submitted with the SRCR confirms that criteria set forth in Rule 62-770.680(1), Florida Administrative Code (F.A.C.), have been met. The SRCR is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). Therefore, you are released from any further obligation to conduct site rehabilitation at the site for petroleum product contamination associated with the discharge listed above, except as set forth below.

(1) In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the site, the Florida Department of Environmental Protection (Department) may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the SRCR or otherwise allowed by Chapter 62-770, F.A.C.

(2) Additionally, you are required to properly abandon all monitoring wells within 60 days of receipt of this Order. The monitoring wells must be plugged and abandoned in accordance with the requirements of Rule 62-532.500(4), F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative proceeding (hearing) is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for a hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SRCR you do not have to do anything. This Order is final and effective as of the date on the top of the first page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for hearing with the Agency Clerk in the Office of General Counsel of the Department within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for hearing; or

(2) File a petition for administrative hearing with the Agency Clerk in the Office of General Counsel of the Department within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

DRAFT

How to Request an Extension of Time to File a Petition for Administrative Hearing

For good cause shown, pursuant to Rule 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for hearing. Such a request must be filed (received) by the Agency Clerk in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from Heller Brothers, shall mail a copy of the request to Heller Brothers at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for administrative hearing must be made.

How to File a Petition for Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Agency Clerk in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, within 21 days of receipt of this Order. Petitioner, if

different from Heller Brothers, shall mail a copy of the petition to Heller Brothers at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsections 120.54(5)(b)4. and 120.569(2), F.S., and Rule 28-106.201, F.A.C., a petition for administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner, the name, address, and telephone number of the petitioner's representative, if any, the site owner's name and address, if different from the petitioner, the FDEP facility number, and the name and address of the facility;
(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;
(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;
(d) A statement of the material facts disputed by the petitioner, or a statement that there are no disputed facts;
(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and
(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

DRAFT

This Order is final and effective as of the date on the top of the first page of this Order. Timely filing a petition for administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Agency Clerk in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the clerk of the Department (see below).

Questions

Any questions regarding the Division's review of your SRCR should be directed to Kevin Thornton at (407) 836-1467. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for administrative hearing or request for an extension of time to file a petition for administrative hearing.

The FDEP Facility Number for this site is 489805893. Please use this identification on all future correspondence with the Department or the Division.

Sincerely,

Michael E. Ashey, Chief
Bureau of Petroleum Storage Systems

P. G. CERTIFICATION

The Site Rehabilitation Completion Report (SRCR) for Heller Brothers Groves Truck Maintenance located at the NE corner of Maguire Road and Tomyn Road, Ocoee, Orange County, Florida, FDEP Facility ID No. 489805893 has been reviewed.

I hereby certify that in my professional judgment, the components of this SRCR satisfy the requirements set forth in Chapter 62-770, FAC and that the geological interpretations in this report provide reasonable assurances of achieving the assessment objectives stated in Chapter 62-770, FAC. However, I have not evaluated and do not certify aspects of the aforementioned documents that are outside my area of expertise.

___ I personally completed this review.

9. Type of Regulated Waste Activity (Mark 'X' in all that apply):

A. Hazardous Waste Activities:

(1) Generator of Hazardous Waste

(Choose only one of the following three categories.)

☐ a. Large Quantity Generator (LQG):
Generates in any calendar month 1,000 kilograms or greater per month (kg/mo) (2,200 lbs.) of *non-acute* hazardous waste; **or** Greater than 1 kg (2.2 lbs) of *acute* hazardous waste

☐ b. Small Quantity Generator (SQG):
Generates in any calendar month greater than 100kg/mo but less than 1,000 kg/mo (>220 to <2,200 lbs.) of *non-acute* hazardous waste and/or 1 kg (2.2 lbs) or less of *acute* hazardous waste

☒ c. Conditionally Exempt SQG (CESQG):
Generates in any calendar month 100 kg/mo or less (220 lbs.) of *non-acute* hazardous waste and 1 kg (2.2 lbs) or less of *acute* hazardous waste

In addition, indicate other generator activities that apply.

☐ d. United States Importer of hazardous waste

☐ e. Mixed Waste (hazardous and radioactive) Generator

For Items 2 through 7, mark 'X' in all that apply.

(2) Treater, Storer, or Disposer of Hazardous Waste (at your facility) Note: A hazardous waste permit may be required for this activity.

☐ a. Operating Commercial TSD

☐ b. Operating Non-commercial TSD

☐ c. Non-operating: Postclosure or Corrective Action Permit or Consent Order (HSWA, etc.)

(3) ☐ Recycler of Hazardous Waste (at your facility)
Specify: ☐ Commercial; ☐ Non-Commercial.
A permit is required for storage prior to recycling.

(4) ☐ Exempt Boiler and/or Industrial Furnace

☐ a. Small Quantity On-site Burner Exemption

☐ b. Smelting, Melting, and Refining Furnace Exemption

(5) ☐ Person Authorized to Manage Conditionally Exempt Waste Generated at Other Facilities - Choose this management activity ONLY if you attach EITHER a copy of your application for such authorization OR the authorization you received from FDEP.

(6) ☐ Underground Injection Control - Mark an 'X' even if the UIC well at your facility does not receive hazardous waste.

(7) ☐ Transporter of Hazardous Waste [Note: A Certificate of Liability Insurance is required along with this registration.]
Registration must be renewed annually. ☐ a. For own waste only ☐ b. For commercial purposes

c. Hazardous Waste Transporter Insurance Information

Insurance Company _____

(4) Reverse Distributor of UW ☐ Pharmaceuticals ☐ Lamps ☐ Devices ☐

(5) Destination Facility for UW ☐
Note: for this activity, a facility must treat, dispose or recycle a UW. A permit is required for storage prior to recycling.

C. Used Oil Activities:

(1) Used Oil Transporter - indicate type(s) of activity(ies):
- ☐ a. Transporter
- ☐ b. Transfer Facility

(2) ☐ **Collection Center**

(3) ☐ **Used Oil Processor** (A permit is required for this activity.)

(4) ☐ **Off-Specification Used Oil Burner**

(5) ☐ **Used Oil Fuel Marketer**

(6) Used Oil Filter
- ☐ a. Transporter
- ☐ b. Transfer Facility
- ☐ c. Processor
- ☐ d. End User

(7) Used Oil Transporters, Transfer Facilities, Collection Centers, Off-Specification Burners and Marketers must pay an annual $100 registration fee. Used Oil Processors are exempt from this fee. If applicable, enclose a check or money order, in the amount of $100, payable to Florida Department of Environmental Protection.
☐ A check is enclosed.

(8) Specific Certification to be signed by all Used Oil Transporters
I certify as a Used Oil Transporter that the training program and financial responsibility required under Section 62-710.600, F.A.C., are in place, current and being adhered to. If any modifications have been made to the orginally approved training program, they are explained in attachments to this registration form. Evidence of financial responsibility is demonstrated by the attached Used Oil Transporter Certificate of Liability Insurance, DEP form 62-710.901(4), F.A.C.

Signature of Authorized Person

Print Name of Authorized Person

(9) The records required under the provisions of Rule 62-710.510, F.A.C., are kept at (check one):
- ☐ our mailing (business) address
- ☐ The site (facility) address

DRAFT

	EPA ID No.

D. Other State Regulated Waste Activities: ☐ **Petroleum Contact Water (PCW) Handler** [Chapter 62-740, F.A.C.]
Note: A water facility permit may be required for this activity.

10. Waste Codes for Federally Regulated Hazardous Wastes: List the waste codes of the Federal hazardous wastes handled at your facility. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112).
Hazardous waste transporters list codes routinely or usually transported. Use an additional page if more spaces are needed.

1 D001	2 D002	3 D003	4	5	6	7

Site No. 57

Luscian Hills Landfill

DRAFT

January 20, 1998

Susanna H. Rehmann, PE
Apex Engineering , Inc.
930 Woodcock Road, Suite 216
Orlando, Florida 32803

Dear Susanna H. Rehmann,

Luscian Hills Development Limited Partnership acquired "Luscian Hills" from First Executive in August, 1998. In the process of digging a burn pit it was discovered that someone had used the site as a land fill site. Further investigation found the site had been filled in the early 1970's while the property was owned by Orange County. No record of the site was ever filed by the County.

The strategy of the Partnership was to fully excavate the fill site, screen and sort the materials by classification, and then to haul the debris to the approved sites. Once an area was fully excavated, front to back and side to side of the section of filled area, Andreyev Engineering inspected the excavated area to insure that all debris was removed, and then authorized the backfilling of the clean area. See the attached pictures which demonstrate the process.

The classifications for the screened material include; construction debris, logs and stumps, tires, and clean dirt. The construction debris was hauled to the Pine Ridge Recycling, the logs and stumps were burned, and the tires were hauled to Orange County's Young Pine Road site.

The area excavated was approximately 150' X 575' x 15' or approximately 48,000 yards of excavation. See the attached drawing of the excavated area. One thousand 18 yard loads were hauled to Pine Ridge and approximately 150 tons of tires were hauled to Young Pine Road. Attached are the receipts for the dump fees, hauling and excavation costs. If there are any questions or anything else needed please call.

DRAFT

Sincerely,

Ronald E. Fenn
President

Attn: Mr WM Bostwick, Jr, PE

Subject: Orange County - SW
Luscian Hills Subdivision Groundwater Sampling

Dear Mr Bostwick:

This is in response to your request for additional groundwater sampling at the subject site, as discussed with you and members of your staff during a meeting on January 22, 1997 at your office. A copy of the Groundwater Monitoring Well Installation and Sampling report, prepared by Andreyev Engineering, Inc, dated April 14, 1997 is enclosed for your review. The laboratory test results of the groundwater analyses, presented in the enclosed report, showed that no EPA Method 601, 602 or 610 parameters were detected and chloride and sodium concentrations did not exceed the maximum allowable contaminant levels for primary drinking water standards.

This additional sampling which was requested by your staff confirms that no groundwater contamination exists at the site due to the landfill uncovered during construction of the Luscian Hills development. The results also support the original groundwater sampling results which showed concentrations very similar to the enclosed data and which were rejected by DEP.

Based on the information presented in the enclosed report, we believe reasonable assurance has been presented to the FDEP that the waste of the landfill at Luscian Hills did not impact the groundwater.

Sincerely,
APEX Engineering, Inc

Susanna H Rehmann, PE
President

April 14, 1998
Project No: PEN-98-056

TO: **R D & C Management, Inc.**
Suite 503L
7635 Ashley Park Court
Orlando, Florida 32385

Attn: Mr. Ron Fenn

SUBJECT: **Installation & Sampling of One (1) Groundwater Monitoring Well, Luscian Hills Subdivision, Orange County, Florida**

DRAFT

Dear Mr. Fenn:

Per FDEP request, Andreyev Engineering, Inc.(AEI) has installed and sampled one temporary monitoring well (MW-1) at the above referenced site. The purpose of the sampling was to determine if groundwater had been adversely impacted from former landfill activities at the site. One temporary monitoring well was installed in a location immediately adjacent to the former landfill area. The landfill material formerly located on-site has been completely excavated, and properly disposed of in accordance with FDEP criteria.

Well Installation

As part of this investigation, AEI personnel installed one, two-inch diameter temporary groundwater monitoring well on the subject property, at the location identified as MW-1 on **Figure 1**. The monitoring well was installed with decontaminated hollow stem auger to a depth of approximately 19 feet below ground surface. From the base, the temporary monitoring well consisted of a well point, followed by 15 feet of 0.006-inch slotted Schedule 40 PVC well screen and 5 feet of solid PVC riser. Groundwater was encountered at approximately 7 feet below land surface. In order to reduce sediment interference, a 30/65 silica sand filter pack was placed around the well-screen.

Groundwater Sampling

A groundwater sample was collected on April 2, 1998, in accordance with the procedures and methods detailed in AEI's FDEP-approved Comprehensive Quality Assurance Plan (#950243G)

for field sampling activities. The groundwater laboratory analyses was performed by PC&B Environmental Laboratories, Inc. of Oviedo, Florida, (CompQAP #900134G).

Field parameters, including turbidity, dissolved oxygen, pH, conductivity and temperature, were recorded at various intervals during the purging of the well. A groundwater sample was collected only after the field parameters had stabilized. Approximately ten (10) well volumes of water were purged from the well prior to sampling. Field notes describing the April 2, 1998, sampling event are included in **Attachment A.**

Laboratory Testing & Results

The collected groundwater sample was tested for chloride, nitrate, sulfate, sodium, arsenic, cadmium, chromium, lead, mercury, and the EPA Method 601, 602 and 610 parameters.

The laboratory test results indicated that no EPA Method 601, 602, or 610 parameters were detected. Two parameters, chloride (5 mg/l) and sodium (6.8 mg/l), were detected in the groundwater sample. However, the detected concentrations did not exceed the maximum allowable contaminant levels (MCL) specified in Chapter 62-550, Florida Administrative Code (FAC) for primary drinking water standards. The MCL for chloride is 250 mg/l and the MCL for sodium is 160 mg/l. The laboratory test results are included in **Attachment A.**

Conclusions

Based on the results of the sampling activities, the groundwater does not appear to be adversely affected by the former landfill material, and no further sampling activities are recommended.

We appreciate the opportunity to provide our services on this project, and if you have any questions, please do not hesitate to contact us at (407) 330-7763.

Sincerely,

Review of Report, "Substation Assessment and Remedial Action Plan Report Hemple Substation Orange County"

DRAFT

Dear Ms. Carter:

Qore submitted the report, "Substation Assessment and Remedial Action Plan Report Hemple Substation Orange County," dated June 25, 2008 on your behalf. The report was stamped "received" on July 11, 2008.

Based on the results documented in the report, the Department has determined the requirements of the Department approved Substation Assessment and Remedial Action Plan (SARAP) have been met. Additional action will not be required at this time. Please note that meeting the requirements of SARAP is not equivalent to a full Chapter 62-780, F.A.C. Site Assessment and the site will not be issued a formal No Further Action or Site Rehabilitation Completion Order. Also, this letter does not certify that the entire property is clean. The Department reserves the right to initiate appropriate actions for this property under Chapter 62-780, F.A.C., if contamination is discovered in the future.

Contact me at tom.lubozynski@floridadep.net or at (407) 893-3328, if you have any questions concerning this letter.

Sincerely,

F. Thomas Lubozynski, P.E.

DEFENSE ENVIRONMENTAL RESTORATION PROGRAM
FOR FORMERLY USED SITES
FINDINGS AND DETERMINATION OF ELIGIBILITY
MINORVILLE QUARTERMASTER DEPOT
ORLANDO, ORANGE COUNTY, FLORIDA
PROJECT NO. I04FL019300

FINDINGS OF FACT

1. The former Minorville Quartermaster Depot is located approximately nine miles west of Orlando, in Orange County, Florida. The site can be accessed from the north by Old Winter Garden Road and on the east by Hempel Road.

2. The site consisted of 186.70 acres (186.67 acres in fee and 0.03 of an acre in leasehold) acquired by the War Department between 1 March 1943 and 2 July 1943 by condemnation and direct purchase.

3. The Minorville Quartermaster Depot was acquired during World War II for the Air Forces School of Applied Tactics and utilized for storage and training purposes. It was located on unimproved land on which the government constructed approximately 460 structures consisting of administrative buildings, mess halls, theatre and recreation buildings, warehouses, tent frames, lavatories, pump houses, above-ground fuel tanks, a water reservoir, septic tank systems with tile drain fields, paving and fencing. There is no knowledge of other than Department of Defense (DOD) control during the period of DOD interest and use.

4. The entire site was declared surplus, effective 30 July 1945, by the War Department. The Federal Farm Mortgage Corporation assumed accountability of 186.67 acres in fee on 4 June 1946 and 0.03 of an acre in leasehold on 1 November 1946. The site is currently owned by various private individuals and business corporations. The utilization now consists of single family homes, commercial businesses, and orange groves.

5. There are no facilities remaining from the time period of DOD ownership. Several remaining building foundations do not present any health or safety hazard. There is no evidence of unsafe debris, hazardous or toxic waste, or unexploded ordnance resulting from former DOD use of the site.

DRAFT

Project No. I04FL019300

DETERMINATION

Based on the foregoing findings of fact, the Minorville Quartermaster Depot site has been determined to be formerly used by DOD. However, there is no evidence of unsafe conditions resulting from DOD use. Therefore, it is determined that an environmental restoration project is not an appropriate undertaking within the purview of the Defense Environmental Restoration Program, established under 10 U.S.C. 2701 et seq., for the reasons stated above.

DRAFT

I. Statement of Purpose

A. Management Action Plan

The Management Action Plan (MAP) is to outline the total multi-year environmental cleanup program for a Formerly Used Defense Site (FUDS) property. The plan will define the cleanup program requirements and propose a comprehensive approach and associated costs to conduct future investigations and response action at each cleanup site.

B. Formerly Used Defense Sites Program

During the past two centuries, the Department of Defense (DOD) has used land throughout the United States to both train Soldiers, Airmen, Sailors and Marines, and test new weapons to ensure the nation's military readiness. As training and testing needs changed, DOD obtained property or returned it to private or public uses. When no longer needed, many of these properties were cleaned up according to the best practices available at the time and then transferred to other owners such as private individuals or federal, state, tribal, or local government entities.

Today, DOD is responsible for the environmental restoration (cleanup) of properties that were formerly owned by, leased to or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense prior to October 1986.Such properties are known as Formerly Used Defense Sites or FUDS. The U.S. Army is DOD's lead agent for the FUDS Program. The U.S. Army Corps of Engineers executes the FUDS Program on behalf of the U.S. Army and DOD. The U.S. Army and DOD are dedicated to protecting human health and the environment by investigating and, if required, cleaning up potential contamination or munitions that may remain on these properties from past DOD activities.

The scope and magnitude of the FUDS Program are significant, with more than 10, 000 properties identified for potential inclusion in the program. Information about the origin and extent of contamination or munitions, land transfer issues, past and present property ownership, applicable laws and DOD policies must be evaluated before DOD considers a property eligible for Defense Environment Restoration Account funding under the FUDS Program. Environmental cleanup at FUDS properties is conducted under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

DRAFT

C. Installation Restoration Program (IRP)

Installation Restoration Program (IRP) category projects include sites that require response actions to address releases of: (a) Hazardous substances and pollutants or contaminants; (b) Petroleum, Oil, and Lubricants (POLs); (c) Hazardous wastes or hazardous waste constituents; and (d) Explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants. The IRP category also includes response activities to address UXO, DMM, or munitions constituents MC posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site.

The relative risk site evaluation (RRSE) framework is a methodology used by all DoD Components to evaluate the relative risk posed by a site in relation to other sites. It is a tool used across all of DoD to group sites into high, medium, and low categories based on an evaluation of site information using three factors: the contaminant hazard factor (CHF), the migration pathway factor (MPF), and the receptor factor (RF).Factors are based on a quantitative evaluation of Comprehensive Environmental Response, Compensation and Liability Act(CERCLA) hazardous substances, pollutants, or contaminants and a qualitative evaluation of pathways and human and ecological receptors in the four media most likely to result in significant exposure groundwater, surface water, sediment, and surface soils.

D. Military Munitions Response Program (MMRP)

In 2001, DoD established the Military Munitions Response Program (MMRP). The MMRP addresses munitions response sites (MRSs) at Formerly Used Defense Site locations. MRSs are sites that are known or suspected to contain unexploded ordnance, discarded military munitions, or munitions constituents (MC).Through the MMRP, DoD complies with environmental cleanup laws, such as the Comprehensive Environmental Response, Compensation, and Liability Act, also known as Superfund.

To prioritize funding and cleanup of MRSs that pose the greatest threat to safety, human health, and the environment, DoD uses the Munitions Response Site Prioritization Protocol (MRSPP). The MRSPP consists of three separate modules to evaluate hazards associated with explosives, chemical warfare materiel, MC, and other incidental environmental contaminants. The MRSPP scores affect how DoD sequences MRSs for cleanup. In addition to relative risk, DoD considers other factors such as economic, programmatic, and stakeholder concerns, as well as reuse and redevelopment plans, when prioritizing sites for cleanup.

III. Property Information

FUDS Number: I04FL0193
FFID: FL49799F441600
Name: MINORVILLE QUARTERMASTER DEPOT

A. Property Description

The site consists of 45.58 acres in fee and 0.02 of an acre in use permit. The site is located nine miles west of Orlando in the town of Gotha in Oange County, Fl.

DRAFT

B. Locale

City: UNKNOWN
State: FL
Latitude: 28.53333333
Longitude: -81.53333333
Congressional District: 10
Size (Acreage): No acreage reported

C. Organization

Division: South Atlantic Division
District: Jacksonville District
Phone: 904-232-2235

Current Owners:

Type	Name
Private	PRIVATE The utilization now consists of single family homes, a post office, a section of the Florida Turnpike and its easements, and orange groves.
State	STATE The utilization now consists of single family homes, a post office, a section of the Florida Turnpike and its easements, and orange groves.

D. National Priorities List Status

The National Priorities List (NPL) is the list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States and its territories. The NPL is intended primarily to guide the EPA in determining which sites warrant further investigation.

National Priorities List (NPL) Status: Not on the NPL

DRAFT

E. Project Summaries

The below table outlines all projects that have been identified on this FUDS property. The table provides information on the category of project, the legal driver, the RRSE or MRSPP score that is used for prioritization, the total funding for the project, the status of work on the project, and the actual or anticipated remedy in place and response complete dates.

No projects reported on installation

DRAFT

IV. Cleanup Program Summary

A. Historic Activity

The site was acquired during WWII for ordance storage and training purposes. The site was declared surplus in 1945 by the war dept.

VII. Community Involvement

Since 1993, the Department of Defense (DOD) has supported the development, implementation, and maintenance of the Restoration Advisory Board (RAB) program. Through the RAB program, communities provide input into the decision - making process of DOD's environmental cleanup program. A RAB is a group, equally co - chaired by a DOD representative and a community member, that serves as a forum for exchange of information between government officials and members of the local community on property cleanup issues. In addition to regular RAB meetings, a combination of activities may be conducted to enhance this process. Such activities may include coordinating installation site tours or providing interactive presentations with the use of cleanup technology models. Members of a RAB may include local citizens and representatives of the U.S. Environmental Protection Agency (EPA) and state, local, and tribal governments. The RAB team should reflect the diverse interests of the community and help identify possible issues associated with an installation's environmental cleanup program. RABs provide a link between the community and cleanup decision makers, and should complement other community involvement activities, such as holding public meetings, distributing informative mailings to the public on installation cleanup activities, and establishing local information repositories.

In fiscal year 1998 (FY98), DOD continued to build trust with local communities surrounding military installations by strengthening the RAB program and making new resources available; including the implementation of the Technical Assistance for Public Participation (TAPP) program. The TAPP program was designed to help community members of RABs and TRCs better understand the scientific and engineering issues underlying their properties' environmental cleanup activities. Under TAPP, the installation may contract for an independent technical consultant to advise the RAB on a specific project, which must be identified in the TAPP application. Typical projects may involve reviewing proposed remedial technologies, interpreting health and environmental effects data, or reviewing cleanup documents.

No RAB has been reported

MEMORANDUM FOR COMMANDER, HUNTSVILLE DIVISION, ATTN: CEHND-ED-PM

SUBJECT: DERP Negative Findings and Determination of Eligibility (FDE), Four FL Sites

1. The following negative FDE's have been signed by our Commander and are enclosed for your files:

a. Project No. I04FL019300, Minorville Quartermaster Depot (enclosure 1);

b. Project No. I04FL022600, Cannon Mills Airport (enclosure 2);

c. Project No. I04FL027800, Coastal Defenses Atlantic Beach (enclosure 3);

d. Project No. I04FL021100, Gotha Ordnance Depot (enclosure 4).

Copies of these FDE's are concurrently being sent to CEMP-RF and the appropriate districts. In accordance with current guidance, the districts will initiate the process of notifying the current owners of the negative determinations by letter in thirty days from the date of this memorandum.

2. Any questions should be directed to Mr. Gary Mauldin at (404) 331-6043.

DEFENSE ENVIRONMENTAL RESTORATION PROGRAM
FOR FORMERLY USED SITES
FINDINGS AND DETERMINATION OF ELIGIBILITY
GOTHA ORDNANCE DEPOT
GOTHA, FLORIDA
PROJECT NO. I04FL021100

FINDINGS OF FACT

1. The former Gotha Ordnance Depot is located approximately nine miles west of Orlando, in the town of Gotha, in Orange County, Florida. The site can be accessed from Hempel Avenue on the east and Sixth Street on the south.

2. The site consisted of 46.60 acres (46.58 acres in fee and 0.02 of an acre in use permit) and was acquired by the War Department by condemnation, direct purchase, and donation between 2 April 1941 and 23 November 1945.

3. The Gotha Ordnance Depot was acquired during World War II for the Air Forces School of Applied Tactics and utilized for ordnance storage and training purposes. The Government constructed approximately 98 structures consisting of warehouses, a shop, pumphouses, tent frames, lavatories, a water reservoir, a septic tank system with a tile drain field, paving, and fencing on initially unimproved land. The site was solely under control of the War Department during the period of its interest and use.

4. The entire site was declared surplus, effective 12 April 1945, by the War Department. The Army Corps of Engineers, acting as agent for the War Department, terminated 0.02 of an acre in use permit to the Atlantic Coast Line Railroad Company, the fee owner, by Agreement and Release, dated 23 November 1945. This instrument cured an encroachment by the Government and stated that the encroachment had been removed and the property was restored to the satisfaction of the owner. Accountability of 46.34 acres in fee was assumed by the Federal Farm Mortgage Corporation on 4 June 1946. The Army Corps of Engineers, acting as agent for the Department of Defense (DOD), conveyed the remaining 0.24 of an acre in fee by quitclaim deed, dated 29 July 1952, to the Interstate Development Company, a Florida Corporation located in Orlando, Florida. This instrument did not contain a restoration clause, however, it reserved for the United States of America the right to all material determined pursuant to Section 5 (b) (1) of the Atomic Energy Act of 1946 (60 Stat. 761) for the production of fissionable material. The site is currently owned by various private individuals, the state of Florida, and the U.S. Government. The utilization now consists of single family homes, a post office, a section of the Florida Turnpike and its easements, and orange groves.

5. There are no buildings or other DOD improvements to the property remaining from the time period of DOD ownership. There is no evidence of hazardous or toxic waste, unsafe debris, or unexploded ordnance resulting from former DOD use of the site.

DRAFT

Project No. I04FL021100

DETERMINATION

Based on the foregoing findings of fact, the Gotha Ordnance Depot has been determined to be a formerly used DOD property. However, there is no evidence of unsafe conditions resulting from DOD use. Therefore, it is determined that an environmental restoration project is not an appropriate undertaking within the purview of the Defense Environmental Restoration Program, 10 U.S.C. 2701 et seq., for the reasons stated above.

h. Bonita Springs Annex No. 5, Project No. I04FL029800.

2. Our customer for the DERP-FUDS program, the Department of Defense (DOD), is concerned about clearly documenting an absence of DOD liability on formerly used sites as well as identifying problems which warrant further DOD involvement and response. Guidance on preparing FDE's has been provided previously to insure the reports contain the necessary information required to fully address DOD liability. Specific questions have been identified to address particular issues for each of the five paragraphs in an FDE. Every question does not always apply at every site; however, all pertinent questions should be fully addressed when applicable.

3. Specific questions and comments are noted on the enclosed negative reports. We cannot proceed to finalize the reports until the questions are addressed. Please establish a schedule for completing the revisions and let us know. If you have any questions, please contact Mr. Gary Mauldin at (404) 331-6043.

I. Statement of Purpose

A. Management Action Plan

The Management Action Plan (MAP) is to outline the total multi-year environmental cleanup program for a Formerly Used Defense Site (FUDS) property. The plan will define the cleanup program requirements and propose a comprehensive approach and associated costs to conduct future investigations and response action at each cleanup site.

B. Formerly Used Defense Sites Program

During the past two centuries, the Department of Defense (DOD) has used land throughout the United States to both train Soldiers, Airmen, Sailors and Marines, and test new weapons to ensure the nation's military readiness. As training and testing needs changed, DOD obtained property or returned it to private or public uses. When no longer needed, many of these properties were cleaned up according to the best practices available at the time and then transferred to other owners such as private individuals or federal, state, tribal, or local government entities.

Today, DOD is responsible for the environmental restoration (cleanup) of properties that were formerly owned by, leased to or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense prior to October 1986.Such properties are known as Formerly Used Defense Sites or FUDS. The U.S. Army is DOD's lead agent for the FUDS Program. The U.S. Army Corps of Engineers executes the FUDS Program on behalf of the U.S. Army and DOD. The U.S. Army and DOD are dedicated to protecting human health and the environment by investigating and, if required, cleaning up potential contamination or munitions that may remain on these properties from past DOD activities.

The scope and magnitude of the FUDS Program are significant, with more than 10, 000 properties identified for potential inclusion in the program. Information about the origin and extent of contamination or munitions, land transfer issues, past and present property ownership, applicable laws and DOD policies must be evaluated before DOD considers a property eligible for Defense Environment Restoration Account funding under the FUDS Program. Environmental cleanup at FUDS properties is conducted under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

DRAFT

C. Installation Restoration Program (IRP)

Installation Restoration Program (IRP) category projects include sites that require response actions to address releases of: (a) Hazardous substances and pollutants or contaminants; (b) Petroleum, Oil, and Lubricants (POLs); (c) Hazardous wastes or hazardous waste constituents; and (d) Explosive compounds released to soil, surface water, sediment, or groundwater as a result of ammunition or explosives production or manufacturing at ammunition plants. The IRP category also includes response activities to address UXO, DMM, or munitions constituents MC posing an explosive, human health, or environmental hazard that are incidental to an existing IRP site.

The relative risk site evaluation (RRSE) framework is a methodology used by all DoD Components to evaluate the relative risk posed by a site in relation to other sites. It is a tool used across all of DoD to group sites into high, medium, and low categories based on an evaluation of site information using three factors: the contaminant hazard factor (CHF), the migration pathway factor (MPF), and the receptor factor (RF).Factors are based on a quantitative evaluation of Comprehensive Environmental Response, Compensation and Liability Act(CERCLA) hazardous substances, pollutants, or contaminants and a qualitative evaluation of pathways and human and ecological receptors in the four media most likely to result in significant exposure groundwater, surface water, sediment, and surface soils.

DRAFT

D. Military Munitions Response Program (MMRP)

In 2001, DoD established the Military Munitions Response Program (MMRP). The MMRP addresses munitions response sites (MRSs) at Formerly Used Defense Site locations. MRSs are sites that are known or suspected to contain unexploded ordnance, discarded military munitions, or munitions constituents (MC).Through the MMRP, DoD complies with environmental cleanup laws, such as the Comprehensive Environmental Response, Compensation, and Liability Act, also known as Superfund.

To prioritize funding and cleanup of MRSs that pose the greatest threat to safety, human health, and the environment, DoD uses the Munitions Response Site Prioritization Protocol (MRSPP). The MRSPP consists of three separate modules to evaluate hazards associated with explosives, chemical warfare materiel, MC, and other incidental environmental contaminants. The MRSPP scores affect how DoD sequences MRSs for cleanup. In addition to relative risk, DoD considers other factors such as economic, programmatic, and stakeholder concerns, as well as reuse and redevelopment plans, when prioritizing sites for cleanup.

VII. Community Involvement

Since 1993, the Department of Defense (DOD) has supported the development, implementation, and maintenance of the Restoration Advisory Board (RAB) program. Through the RAB program, communities provide input into the decision - making process of DOD's environmental cleanup program. A RAB is a group, equally co - chaired by a DOD representative and a community member, that serves as a forum for exchange of information between government officials and members of the local community on property cleanup issues. In addition to regular RAB meetings, a combination of activities may be conducted to enhance this process. Such activities may include coordinating installation site tours or providing interactive presentations with the use of cleanup technology models. Members of a RAB may include local citizens and representatives of the U.S. Environmental Protection Agency (EPA) and state, local, and tribal governments. The RAB team should reflect the diverse interests of the community and help identify possible issues associated with an installation's environmental cleanup program. RABs provide a link between the community and cleanup decision makers, and should complement other community involvement activities, such as holding public meetings, distributing informative mailings to the public on installation cleanup activities, and establishing local information repositories.

In fiscal year 1998 (FY98), DOD continued to build trust with local communities surrounding military installations by strengthening the RAB program and making new resources available; including the implementation of the Technical Assistance for Public Participation (TAPP) program. The TAPP program was designed to help community members of RABs and TRCs better understand the scientific and engineering issues underlying their properties' environmental cleanup activities. Under TAPP, the installation may contract for an independent technical consultant to advise the RAB on a specific project, which must be identified in the TAPP application. Typical projects may involve reviewing proposed remedial technologies, interpreting health and environmental effects data, or reviewing cleanup documents.

No RAB has been reported

Re: Compliance Assistance Offer
Fire Station #33
Facility ID #9804286
Orange County

DRAFT

Dear Mr. Francom:

An inspection was conducted at your property on January 28, 2020 under the authority of Section 403.091 Florida Statutes (F.S.). During this inspection, potential non-compliance was noted. The purpose of this letter is to offer compliance assistance as a means of resolving these matters.

Specifically, potential non-compliance with the requirements of Chapter 403, Florida Statutes, and Chapters 62-762 Florida Administrative Code were observed. Please see the attached inspection report for a full account of Department observations and recommendations.

We request you review the item(s) of concern noted and respond in writing within **30 days** of receipt of this Compliance Assistance Offer. Your written response should include one of the following:

1. Describe what has been done to resolve the non-compliance issue or provide a schedule describing how/when the issue will be addressed.
2. Provide the requested information, or information that mitigates the concerns or demonstrates them to be invalid, or
3. Arrange for the case manager to visit your facility to discuss the item(s) of concern.

It is the Department's desire that you are able to adequately address the aforementioned issues so that this matter can be closed. Your failure to respond promptly may result in the initiation of formal enforcement proceedings.

Please address your response and any questions to Casey Brock of the Central District Office at 407-897-2924 or via e-mail at casey.t.brock@floridadep.gov. We look forward to your cooperation with this matter.

Sincerely,

Daniel K. Hall, Manager
Central District

Two Years	Monthly Maint. Visual Examinations and Results	05/01/2018	01/02/2020	Records from February 2017 - April 2018 were not available.

Areas of Concern:

Type: Area of Concern
Rule: 62-762.501(1)(f)
Violation Text: Exterior portions of tanks and integral piping not protected from external corrosion, deterioration or degradation for shop fabricated tank systems.
Explanation: Delamination of the protective paint covering the top of the generator tank was observed.

Corrective Action:	Repaint the tank in order to protect it from external corrosion.

Violations:

Type:	Violation
Significance:	SNC-B
Rule:	62-762.501(2)(e), 62-762.501(2)(e)1., 62-762.501(2)(e)2., 62-762.501(2)(e)2.a., 62-762.501(2)(e)2.b., 62-762.501(2)(e)2.c., 62-762.501(2)(e)2.d., 62-762.501(2)(e)3
Violation Text:	Failure to provide approved overfill protection for shop fabricated tank systems.
Explanation:	Testing was received by the Department on January 31, 2020. Annual operability for overfill protection appeared to be completed in 2018. Necessary information was missing from the testing documents, such as the device(s) being tested and a pass or fail for the device. No testing was provided for the years 2017 and 2019.
Corrective Action:	Ensure that all future annual operability is completed properly and on time. Annual operabilty should at minimum include the device being tested, method of testing, testing done to manufacturer specifications, a pass or fail, and the testers signature. Annual operability for overfill protection should be completed annually, not to exceed 12 months.

Type:	Violation
Significance:	Minor
Rule:	62-762.701(1), 62-762.701(1)(a), 62-762.701(1)(a)1., 62-762.701(1)(a)2., 62-762.701(1)(a)3.
Violation Text:	Shop fabricated storage tank system has a not repaired component which has or could cause a release or discharge.
Explanation:	The spill bucket contains extensive amounts of debris and the wall is corroded and chipping which could potentially result in a release or discharge.
Corrective Action:	The spill bucket needs to be repaired or replaced.

Type:	Violation
Significance:	SNC-B
Rule:	62-762.601(1)(d), 62-762.601(1)(e)
Violation Text:	Release detection, including visual inspections not being conducted monthly (not to exceed 35 days) for shop fabricated tank systems. For electronically monitored sumps, visual inspections not conducted every 6 months.
Explanation:	Monthly Visual Inspections for February 2017 through April 2018 were not provided to the department.
Corrective Action:	Ensure that all future monthly visual inspections are completed on time. Monthly visual inspections are to be conducted monthly, not to exceed 35 days. Provide the Department with the next 3 months of monthly visual inspections. Forward the documentation to casey.t.brock@floridadep.gov.

Type:	Violation
Significance:	Minor
Rule:	62-762.601(7)
Violation Text:	Shop fabricated storage tank system release detection devices not tested annually.
Explanation:	Testing was received by the Department on January 31, 2020. Annual operability for release detection appeared to be completed for 2018, but necessary information was missing from the testing documents, such as the device(s) being tested and a pass or fail for the device. No testing was provided for 2017 or 2019. A completed annual operability test for 2020 with all necessary information was received by the department.
Corrective Action:	Ensure that all future annual operability is completed properly and on time. Annual operabilty should at minimum include the device being tested, method of testing, testing

DRAFT

done to manufacturer specifications, a pass or fail, and the testers signature. Annual operability for overfill protection should be completed annually, not to exceed 12 months

01/28/2020
FDEP was on-site for a routine compliance inspection. Casey Brock, Sean Boyles, and Komlan Konvi were in attendance for FDEP. Christopher Rossing was present for Orange County Risk Management and Randall Mayo was present for Orange County Fire Rescue.

The last compliance inspection was 01/18/2017.

The registration placard was current and available for review.

The Certification of Financial Responsibility was current and sent to the Department for review.

The AST is an emergency generator belly tank. It is registered with the Department as having a capacity of 772 gallons and is located on the southern side of the fire station.

The tank is labeled with the appropriate fuel type. The area immediately surrounding the tank is well maintained and the top of the tank was clean and dry. Delamination of the protective paint covering the top of the generator tank was observed. There were no obvious signs of corrosion on the top of the tank. The spill bucket was located within the generator housing and fitted with a tight fill and plunger device to send any fuel spills back to the tank. The spill box was dirty, corroded, and chipping. All safety vents on the tank appeared to be functioning properly.
The Krueger Interstitial gauge used for release detection can be easily read. The Krueger At-A-Glace gauge in the spill bucket used for monitoring the fuel level and overfill protection can also be easily read.

Records for the period of August 2018 through April 2019 were provided on site. Records for January, May, and June 2018 as well as all of 2019 were provided via email on 01/31/2020. No monthly visual inspections were provided for February 2017 through April 2018.

Annual operability for overfill protection appears to be completed in 2018, but necessary information was missing from the testing documents, such as the device(s) being tested and a pass or fail. No testing information was provided for 2017 and 2019.

Annual operability for interstitial release detection appears to be completed in 2018, but necessary information was missing from the testing documents, such as the device(s) being tested and a pass or fail. No testing information was provided for the was not completed in 2017 and 2019. No testing information was provided for 2017 and 2019. Annual operability was completed on 01/02/2020 within the requirements of the Department.

Orange County was informed that the tank needs to be repainted and the spill bucket needs to be repaired or replaced.

DRAFT

NOTE: PUT X IF ANSWER IS UNKNOWN. This form may be reproduced. For each tank, whether in use or out of use, use one row across. Use more than one letter per column, if applicable. When a mixture of several hazardous substances is stored in one tank, enter the name of the substance of greatest quantity. Provide a sketch of tank location in reference to a stationary structure. The tank number on the sketch must agree with the number on the form. Attach extra pages if necessary and write your facility number, if known, or name and address, exactly as it appears on the form.

INFORMATION CODE LIST

List (4) Facility Type

A. service station.
B. residence.
C. business.
D. bulk petroleum storage.
E. industrial plant.
F. federal government (give GSA#).
G. state government.
H. local government.
I. collection station.
K. bulk chemical storage.
L. chemical user facility.
M. agricultural facility.
N. facility on Indian land.
S. small user facility.

List (10) Tank Number

List (11) Tank Size. Gallons.

List (12) Tank Content

A. leaded gasoline.
B. unleaded gasoline.
C. unleaded gasohol.
D. vehicular diesel.
E. aviation fuel.
F. aviation gas.
G. jet fuel.
H. concrete.
I. sand.
J. empty.
K. kerosene.
L. used (waste) oil.
M. diesel (boilers & generators)
N. leaded gasohol.
O. new oil.
V. hazardous substance (write in name or chemical abstract service (CAS) number.
W. water.
Z. other (specify).

List (13) Tank Installation Date: Month/Year

List (14) Underground Tanks

A. has overfill protection.
B. is interior lined.
C. is painted/asphalted steel
D. is of unknown type.
E. is fiberglass type.
F. is fiberglass clad steel.
G. is sacrificial anode type.
H. is impressed current type.
I. is double walled.
J. is concrete.
K. in secondary containment.
L. is other type (specify).

List (15) Integral Piping System has:

A. no parts in contact with the soil.

Parts contacting the soil which are:
B. unprotected metal.
C. built of corrosion resistant materials.
D. corrosion resistant coated.
E. cathodically protected.
F. double walled.
G. within a secondary containment.
H. interior lined.

List (16) Monitoring System is:

A. automatically sampled well(s).
B. manually sampled well(s).
C. groundwater monitoring plan.
D. SPCC plan.
E. well/detector in secodary containment.
F. inground detector.
G. within walls of doublewalled tank.
H. continuous in piping.
I. not required.

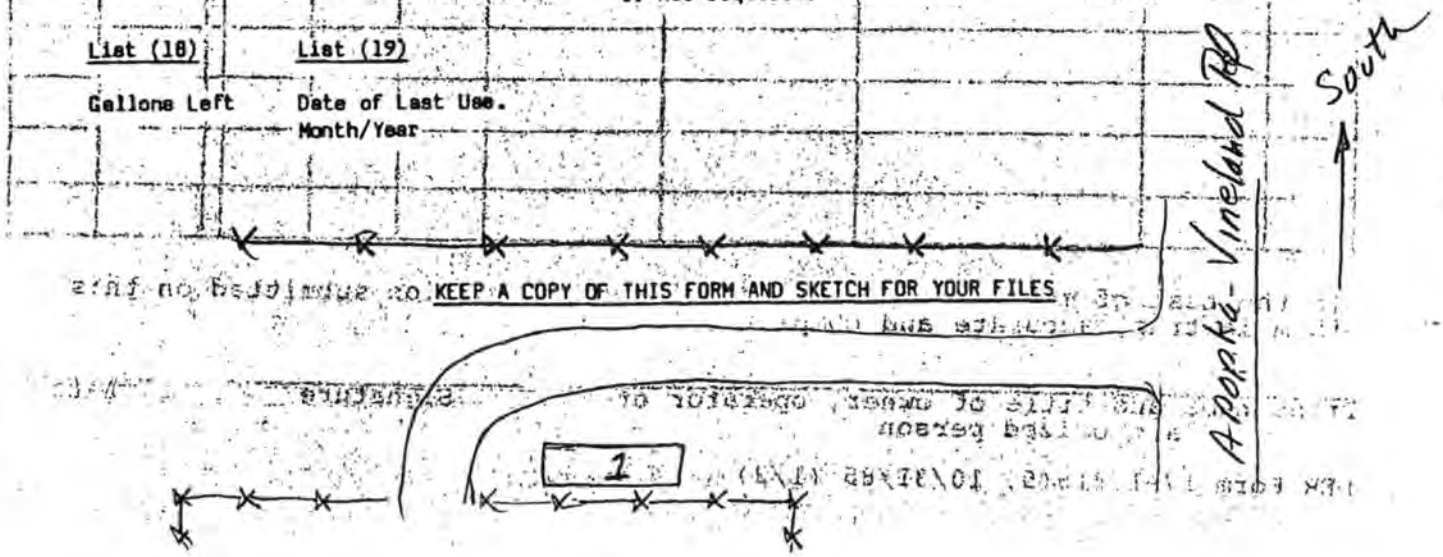

List (17) Tank Status

Petroleum Tanks:
A. filled.
B. removed.
C. retrofitted.
F. abandoned.

Hazardous Substance Tanks:
P. permanently out of use.
T. temporarily out of use.
V. brought into use after 5/8/86.

List (18) Gallons Left

List (19) Date of Last Use. Month/Year

Underground Storage System Installation and Removal Form for Certified Contractors

Pollutant Storage Systems Contractor as defined in Section 489.113, Florida Statutes (certified contractors as defined in Section 62-761.200, Florida Administrative Code) shall use this form to certify that the installation, replacement or removal of the underground storage tank system(s) located at the address listed below was performed in accordance with Department Reference Standards. This includes system components such as dispenser liners, piping sumps, and overfill protection devices.

General Facility Information

Facility Name: AT & T	DEP Facility Identification No.: 8627913
Street Address (physical location): 1717 S. Apopka Vineland Rd., Orlando, FL 32735	
County: Orange	Telephone #: (407) 294-3000
Owner Name: AT & T	Telephone #: (407) 294-3000
Owner Address: 1717 S. Apopka Vineland Rd., Orlando, FL 32735	

Storage Tank System Information

Number of Tanks Installed: -1-	Number of Tanks Removed: -2-
Date Work Initiated: 2-4-02	Date Work Completed: 9-11-02
Tank(s) Manufactured by: Installed Tank: Phoenix Ind. Removed Tanks: Both Modern Welding	
Description of work Completed: Removed 2-10,000 and Installed 1-12,000 tank.	

DRAFT

Certification

I hereby certify and attest that I am familiar with the facility that is registered with the Florida Department of Environmental Protection; that to the best of my knowledge and belief, the storage tank system installation, replacement or removal at this facility was conducted in accordance with Chapter 489, Florida Statutes, Section 376.303, Florida Statutes, and Chapter 62-761, Florida Administrative Code, and its adopted reference standards and documents for underground storage tank systems.

Site Visit Comments

07/07/2020
On site for routine compliance inspection with Jeremy Heiderich.
The facility has two Diesel tanks: 8000 gallon and 12000 gallon
Both are used to fuel emergency generators.
Tanks are monitored with a Veeder Root TLS-350.
Both tanks use leak sensors and overfill alarms which were last tested on 11/19/2019.
Records are up to date; Insurance, CFR, COI, placard and operability testing.

The 12000 gallon tank uses a suction pump to supply fuel to a day tank. Anti-Siphon valve was installed.
The steel supply and return lines are painted to prevent corrosion.
The 8000 gallon diesel tank was installed on October 24, 2017. It is a Phoenix Firesteel double wall tank. The tank is filled using a remote fill box.
All piping looked ok and there were no visible leaks at the time of the inspection.

1.0 INTRODUCTION

The project site is located in Section 3, Township 23S, Range 28E, in Orange County, Florida. More specifically, the site is located at 1955 South Apopka-Vineland Road, Orlando, Florida. A Site Vicinity Map adapted from the U.S. Geological Survey Quadrangle Map of Winter Garden, Florida, is presented as Figure 1.

Contamination Assessment Activities were carried out in accordance with Chapter 17-770 Florida Administrative Codes (FAC), Petroleum Contamination Site Clean-up Criteria. The general objectives of a study of this nature as outlined in Rule 17-770.600 FAC, are as follows:

- Determine whether the soil and/or groundwater are contaminated on-site;
- Determine or confirm the contaminant source;
- Recommend and implement initial remedial actions as necessary to abate any eminent hazard;
- Establish the horizontal extent and thickness of free product, if any;
- Describe regional geologic and hydrogeologic characteristics of affected and potentially affected hydrogeologic zones;
- Describe site specific geologic and hydrogeologic characteristics which influence migration and transport of contaminants, including the rate and direction of groundwater flow;
- Determine mechanisms of contaminant transport including rate and direction of contaminant movement in soils and surface water, if applicable;
- Determine the horizontal and vertical extent of contamination; and
- Develop a Contamination Assessment Report (CAR) based on the site specific data generated for this subsurface investigation.

DRAFT

2.0 EXECUTIVE SUMMARY

On January 14, 1991, one (1) underground storage tank (UST) containing unleaded gasoline was removed from the Landscape Nursery facility located at 1955 South Apopka-Vineland Road, Orlando, Florida. The UST closure was performed by Angelo and Sons Pump and Tank Services, Apopka, Florida. Schmidt Environmental Services, Leesburg, Florida, monitored the tank removal utilizing a Porta-FID II flame ionization detector. Based on FID results, 26.10 tons of "excessively contaminated" soil were removed and transported to Soil Treatment Services, Inc., of Kissimmee, Florida. Location of the former UST is presented on the facility Site Plan, Figure 2. All background material including trucking manifests, certificate of materials recycling, and letter of Abandoned Tank Restoration Program (ATRP) acceptance are appended hereto (Appendix II).

Based upon the results of the UST closure assessment report, a Contamination Assessment Order was issued by the Orange County Environmental Protection Department (OCEPD). Application was subsequently made by Landscape Nursery to the ATRP and eligibility was granted on April 29, 1992. On July 2, 1992, Landscape Nursery retained Environmental Solutions and Services, Inc. (ESSI) to complete a Contamination Assessment Report (CAR).

The results of our CAR, as detailed herein, have yielded no evidence to indicate that groundwater quality in the study area has been adversely impacted from a discharge of petroleum fuels. Therefore, the level of detail undertaken for this CAR is based solely upon the site specific conditions encountered as allowed pursuant to Rule 17-770.630 (3) regarding No Further Action guidelines.

DRAFT

3.0 HYDROGEOLOGIC SETTING

3.1 Regional Overview

The geology of Central Florida to a depth of 1500 feet has been described by Lichtler (1968). Regional information indicates that this section is comprised of unconsolidated sediments extending from land surface to a depth of approximately 200 feet. These Miocene to Recent age sediments directly overlie a thick sequence of Eocene age limestone and dolostone.

Based on published information, the uppermost unconsolidated sediments, from land surface to a depth of 75 feet, consist of undifferentiated Pleistocene to Recent age sands with discontinuous interbedded lenses of silty sand and clayey sand (+100 ft-MSL to +25 ft-MSL). Underlying this stratum is the Miocene age Hawthorn Formation. This formation consists predominantly of clays and silts with interbedded lenses of silty and clayey fine sands which are frequently phosphatic. This formation is estimated to extend to a depth of 200 feet and generally occurs between +25 ft-MSL to -55 ft-MSL.

The first limestone formation encountered underlying the Hawthorn Formation is the Eocene age Ocala group limestone. In the site vicinity, the Ocala limestone is estimated to be approximately 50 feet in vertical thickness and occurs between elevation -55 ft-MSL to -100 ft-MSL. This formation is described by Lichtler (1968) as a tan sandy limestone. The Ocala limestone overlies the Avon Park limestone and Lake City limestone which extends to a depth over 1500 feet.

These formations comprise three major hydrostratigraphic divisions. These divisions include an unconfined water table aquifer occurring in the Pleistocene to Recent age sands, the Hawthorn Formation which is a regionally extensive confining unit, and the Floridan aquifer comprised of the previously discussed Eocene age limestone formations.

The Floridan aquifer is the major source of potable water supply for Central Florida and Northern Florida. This aquifer is typically solution riddled and highly transmissive. The thick overlying clay beds of the Hawthorn formation confine the Floridan aquifer under pressure.

The saturated portion of the sands which overlie the Hawthorn formation comprise the surficial water table aquifer. This aquifer unit is the focus of this investigation and is the aquifer in which contamination was originally detected.

DRAFT

3.2 Site Stratigraphy

The site specific stratigraphy for this project has been characterized via a series of soil borings and groundwater monitoring well installations. Based on the data collected during our field investigations, site specific geologic conditions can be characterized to a depth of 11-feet below land surface.

The soil conditions encountered consist of a light gray to a dark brown fine grain sands to a depth of 11-feet below land surface. The average depth to groundwater was found to be less than 2-feet deep in the study area.

DRAFT

4.0 FIELD INVESTIGATIONS

4.1 Soil Boring Program

On July 17, 1992, machine auger borings were drilled at locations corresponding to AB-1 and AB-2 as shown on the attached site plan (Figure 2). Each auger boring was carefully drilled to prevent desegregation of the shallow lithologic units. These borings were done to obtain detailed subsurface information, determine the presence or absence of soil contamination, and to help select groundwater monitoring well locations.

Selected soil samples were collected for field testing purposes as described in Section 4.3, Organic Vapor Screening Program. Subsurface drilling logs for auger borings AB-1 and AB-2 are presented in Appendix III.

4.2 Groundwater Monitoring Wells

On January 17, 1991, one (1) groundwater monitoring well (MW-1) was installed by others for Landscape Nursery. The well was drilled to a depth of 11-feet and was constructed of 1-foot of schedule 40 PVC casing thread coupled to 10-feet of machine slotted well screen. This well was finished at land surface with a flush-mounted steel manhole cover and secured with a locking, expandable well cap. A copy of the well completion report was provided by the Client and is attached in Appendix III.

Monitoring wells MW-2 and MW-3 were installed on July 17, 1992. These wells were also installed to a depth of 11-feet deep and are constructed of 10-feet of machine slotted well screen thread coupled to 1-foot of clean schedule 40 PVC casing. The annular space between the borehole wall and the well screen was filter packed with 20/30 silica sand and a bentonite pellet seal was placed above the well screen interval. The remainder of the annular space was backfilled to land surface with neat portland cement grout. Monitoring wells MW-2 and MW-3 were developed by over pumping until clear of sediments. A copy of the well completion reports are appended hereto along with the soil boring logs as Appendix III. FID analysis of collected soil samples is discussed in Section 4.3, Organic Vapor Screening Program.

Thorough field decontamination procedures are strictly adhered to in order to prevent possible cross-contamination between field monitoring points. All drilling equipment, drill rods, bits, hollow-stem augers, and all down-hole tools were thoroughly decontaminated between each auger boring and well location. Residual soils were removed from the auger flights using an alconox soap and brush wash followed by a potable water rinse. All well construction materials and drilling equipment were then subjected to a separate pressurized steam cleaning event prior to being utilized again on-site.

4.3 Organic Vapor Screening Program

Selected soil samples were collected from each of the aforementioned auger borings and from monitoring wells MW-2 and MW-3. Typically, samples were obtained from the vadose zone above the water table, and at depths at which groundwater was encountered in each boring.

DRAFT

Soil samples were collected by an ESSI field geologist and placed into clean 16-ounce glass soil jars (half-filled) for organic vapor screening pursuant to FDER approved procedures as described in Rule 17-770.200 (2), FAC. Headspace vapor readings were taken using an portable flame ionization detector in the survey mode (Porta-FID II). The Porta-FID II was calibrated using 100 ppm Methane gas prior to each field day, and all positive responses were screened to avoid elevated readings caused by naturally occurring organics. All sampling activities were conducted in accordance with procedures described in ESSI's approved Comprehensive Quality Assurance Plan (CQAP) on file with the Florida Department of Enviornmental Regulation (FDER).

Net FID readings are noted on the attached auger boring logs and well completion reports (Appendix III) where positive responses were noted. Soil vapor survey results are presented on the following data table.

TABLE I

SOIL VAPOR SURVEY RESULTS

Sample Location	Sample Depth (ft)	FID Readings (PPM) Survey	Filtered	Net
AB-1	0'	0 ppm	0 ppm	0 ppm
	1'	0 ppm	0 ppm	0 ppm
	2'	0 ppm	0 ppm	0 ppm
AB-2	0'	0 ppm	0 ppm	0 ppm
	1'	0 ppm	0 ppm	0 ppm
	2'	0 ppm	0 ppm	0 ppm
MW-1*	-	-	-	-
MW-2	0'	0 ppm	0 ppm	0 ppm
	1'	0 ppm	0 ppm	0 ppm
	2'	0 ppm	0 ppm	0 ppm
MW-3	0'	0 ppm	0 ppm	0 ppm
	1'	12 ppm	10 ppm	2 ppm
	2'	4 ppm	8 ppm	0 ppm

* No FID data available as MW-1 was previously installed by others.

DRAFT

4.4 Groundwater Sampling Program

Prior to initiating the CAR, on May 18, 1992, groundwater monitoring well MW-1 was purged (approximately 4 well volumes) and sampled by an ESSI field geologist utilizing a disposable teflon bailer per our approved CQAP. Collected groundwater samples were delivered to Environmental Conservation Laboratories, Inc. (ENCO Labs) of Orlando, Florida, for Volatile Organic Aromatics (VOA's) analysis per EPA Test Method 602. As shown on the attached ENCO Laboratory report (Appendix IV), total VOA's were found to be below laboratory method detection limits.

On July 21, 1992, groundwater samples were collected from monitoring wells MW-1, MW-2, and MW-3. The groundwater samples collected from MW-1, MW-2, and MW-3 were analyzed for Poly Aromatic Hydrocarbons (PAH), Total Petroleum Hydrocarbons (TPH), Ethylene Dibromide (EDB), and Lead (Pb) per EPA Test Methods 610, 418.1, 504, and 239.2, respectively. Groundwater samples collected from MW-2 and MW-3 further analyzed for VOA's and Volatile Organic Halocarbons (VOH) per EPA Test Methods 602 and 601.

As shown on the attached ENCO laboratory reports, groundwater samples from all wells were found to be below laboratory method detection limits for all parameters tested.

4.5 Well Head Survey

As a component of our field investigation, a survey benchmark was established on the concrete sidewalk in front of the facility utility building shown on Figure 2. Elevation of the survey benchmark was assumed to be 150-feet msl based on topographic data obtained from the U.S. Geological Survey Quadrangle Map for the study area (Figure 1).

In order to determine groundwater flow direction and the hydraulic gradient for the study area, all monitoring wells installed for this project were surveyed and referenced to the benchmark datum elevation on July 21, 1992. Based on the survey data gathered at this time, the direction of groundwater flow in the surficial aquifer was determined to be in a northwesterly direction at an approximate gradient of 0.017. Our groundwater elevation data gathered at this time are presented on Table II and illustrated on Figure 3, Groundwater Contour Map.

DRAFT

TABLE II

FLUID LEVEL DATA

7/21/92

Well Number	Top of Casing Elevation (ft)	Water Level Depth (ft)	Water Level Elevation (ft)
MW-1	150.30'	1.27'	149.03'
MW-2	150.59'	1.40'	149.19
MW-3	149.93'	1.14'	148.79'

4.6 Underground Utilities

There are no underground utilities located in the study area which could potentially effect groundwater contaminant migration.

DRAFT

5.0 CONTAMINATION ASSESSMENT RESULTS

5.1 Soil Contamination

Results of our organic vapor screening program were utilized to determine the extent and concentrations of soil contamination at the subject site. Field tasks were carried out as previously described and the data obtained from this portion of our investigation was previously presented on Table I, Soil Vapor Survey Results. Based on the data obtained from this portion of our field investigation, there is no evidence to indicate that excessively contaminated soils exist at the subject facility. In fact, petroleum contaminated soils were encountered at only one (1) sample location.

Net FID readings of 2 parts per million were noted at 1-feet deep at monitoring well MW-3.

5.2 Groundwater Contamination

Representative groundwater samples were obtained from all three (3) groundwater monitoring wells installed at this site. Analysis of the groundwater samples collected from these wells indicates that there is no evidence of petroleum contaminated groundwater at this facility at the locations sampled.

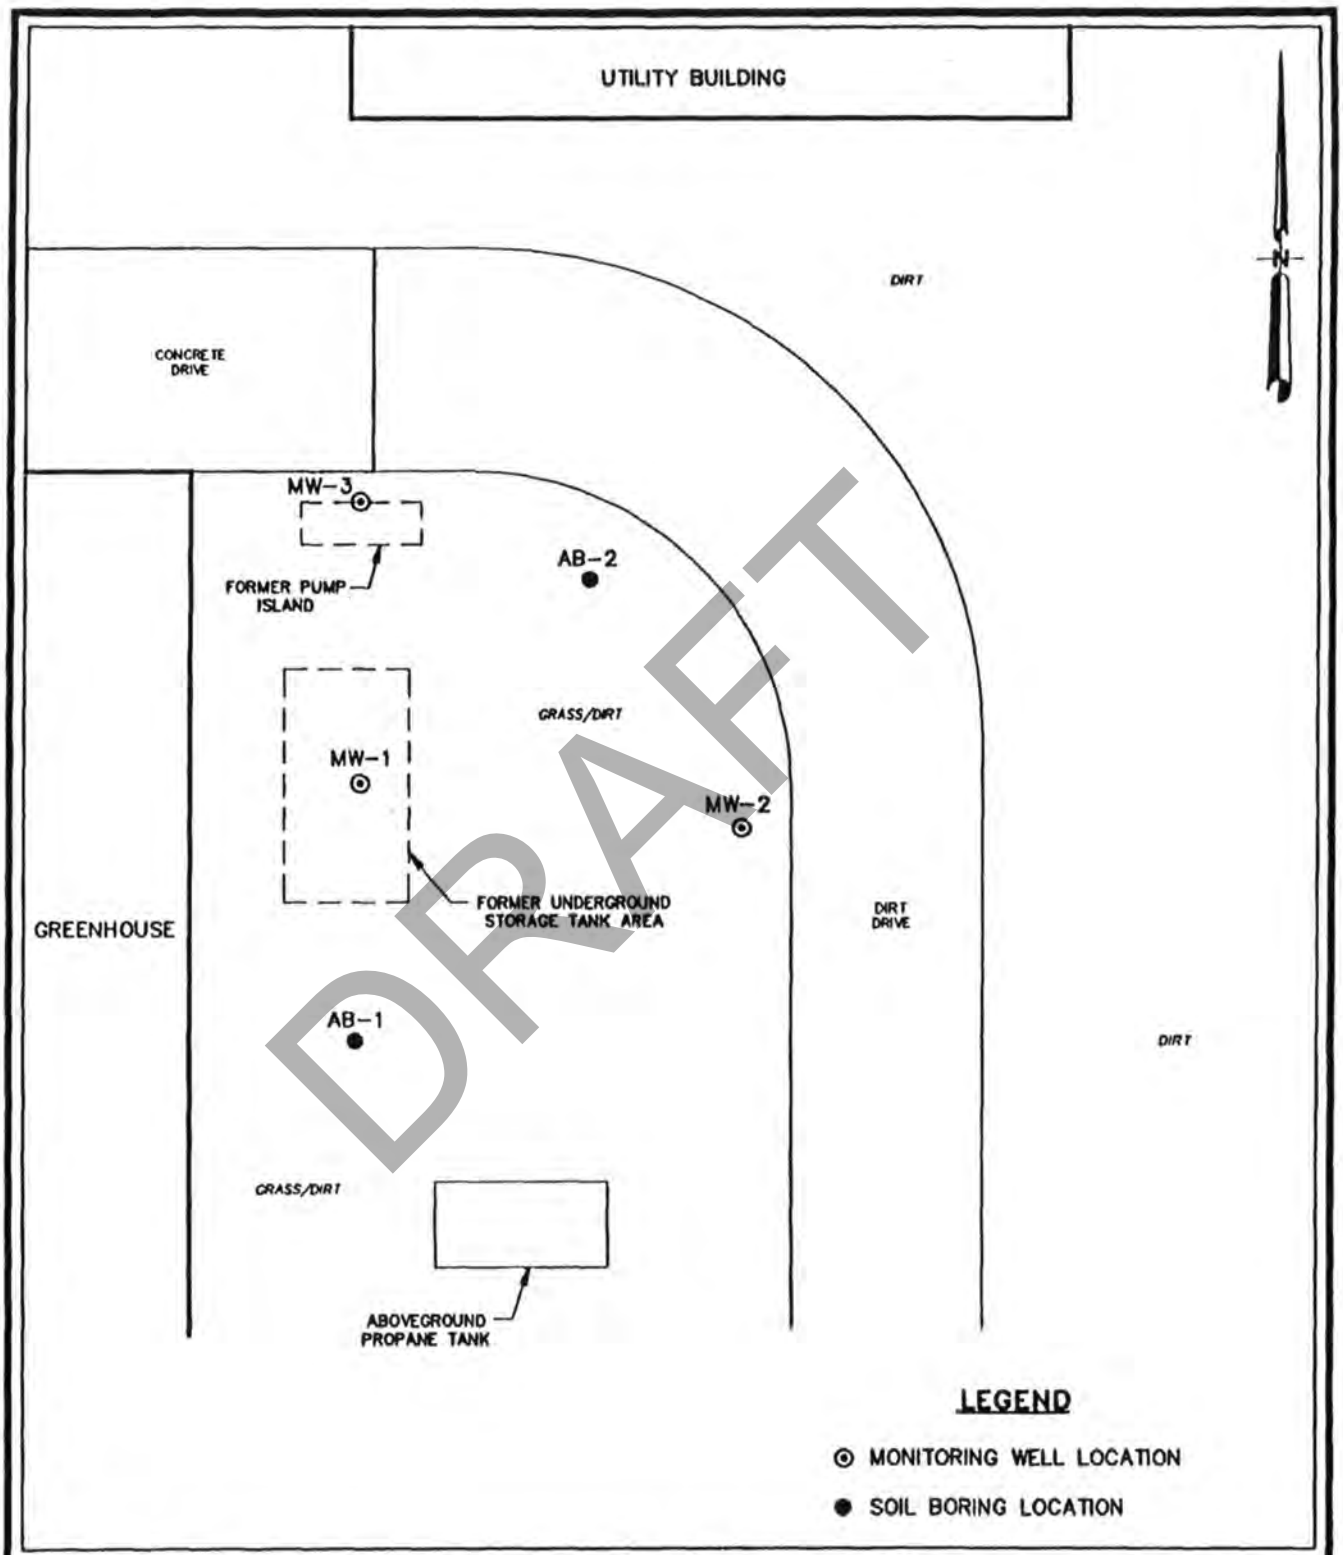

DRAFT

6.0 CONCLUSIONS AND RECOMMENDATIONS

ESSI has completed field and analytical tasks as described in carrying out the requirements of this CAR. Following an evaluation of all contamination assessment data collected to date, it is our opinion further field investigations (i.e. slug testing, potable well survey, etc.) are unwarranted as petroleum based groundwater contamination does not exist within laboratory detection limits at all locations sampled.

Therefore, on behalf of Landscape Nursery we recommend that the OCEPD undertake "No Further Actions" with regard to petroleum contamination at this site.

D.E.P. Facility I.D. #488945540

Dear Mr. Darrow:

The Bureau of Waste Cleanup has reviewed the Contamination Assessment Report (CAR) Addendum and No Further Action Proposal (NFAP) dated June 30, 1993, received July 6, 1993, submitted for this site. Documentation submitted with the NFAP confirms that criteria set forth in Rule 17-770.630(3), Florida Administrative Code (FAC), have been met. The NFAP is hereby incorporated by reference in this Order. Therefore, you are released from any further obligation to conduct site rehabilitation at the site, except as set forth below.

If a subsequent discharge of petroleum or petroleum product occurs at the site, the Department may require site rehabilitation in order to reduce contaminant concentrations to the levels approved through review of the NFAP or otherwise allowed by Chapter 17-770, FAC.

Additionally, you are required to properly abandon all monitoring wells except compliance wells required by Chapter 17-761, FAC, for release detection. The wells must be abandoned in accordance with the requirements of Rule 17-532.500(4), FAC.

Persons whose substantial interests are affected by this Site Rehabilitation Completion Order have the right to challenge the Department's decision. Such a challenge may include filing a petition for an administrative determination (hearing) as described in the following paragraphs. However, pursuant to Chapter 17-103, FAC, you may request an extension of time to file the Petition. All requests for extensions of time or petitions for administrative determinations must be filed directly with the Department's Office of General Counsel at the address given below

DRAFT

within twenty-one (21) days of receipt of this notice (do not send them to the Bureau of Waste Cleanup).

Notwithstanding the above, a person whose substantial interests are affected by this Site Rehabilitation Completion Order may petition for an administrative proceeding (hearing) in accordance with Section 120.57, Florida Statutes (FS). The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, within twenty-one (21) days of receipt of this notice. Failure to file a petition within this time period shall constitute a waiver of any right such person may have to request an administrative determination (hearing) under Section 120.57, FS.

The Petition shall contain the following information:

(a) The name, address, and telephone number of each petitioner, the Department file number (DER facility number), and the name and address of the facility;
(b) A statement of how and when each petitioner received notice of the Department's action or proposed action;
(c) A statement of how each petitioner's substantial interests are affected by the Department's action or proposed action;
(d) A statement of the material facts disputed by each petitioner, if any;
(e) A statement of facts which each petitioner contends warrant reversal or modification of the Department's action or proposed action;
(f) A statement of which rules or statutes each petitioner contends require reversal or modification of the Department's action or proposed action; and
(g) A statement of the relief sought by each petitioner, stating precisely the action each petitioner wants the Department to take with respect to the Department's action or proposed action.

This Site Rehabilitation Completion Order is final and effective on the date of receipt of this Order unless a petition (or time extension) is filed in accordance with the preceding paragraphs. Upon the timely filing of a petition, this Order will not be effective until further order of the Department.

When the Order is final, any party to the Order has the right to seek judicial review of the Order pursuant to Section 120.68, FS,

DRAFT

by filing of a Notice of Appeal pursuant to Rule 9.110, Florida Rules of Appellate Procedure, with the Clerk of the Department in the Office of General Counsel, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400; and by filing a copy of the Notice of Appeal, accompanied by the applicable filing fees, with the appropriate District Court of Appeal. The Notice of Appeal must be filed within thirty (30) days from the date the Final Order is filed with the Clerk of the Department.

The DEP Facility Number for this site is #488945540. Please use this identification on all future correspondence with the Department.

Any questions you may have on the technical aspects of this Site Rehabilitation Completion Order should be directed to Maria H. Holinski at (407) 836-7400. Contact with the above-named person does not constitute a petition for administrative determination.

Sincerely,

John M. Ruddell

The Hazardous Waste Management Program has reviewed your application for a hazardous waste DER/EPA I.D. Number.

Based on the information received you have been issued the following identification number for the facility at MILE MK 263 TURK LK PL , OCOEE

Facility ID # FLD984203018

Your facility status is the following:

Small quantity generator.

Florida Administrative Code rule 17-730 requires all large quantity generators of hazardous waste and all hazardous waste treatment, storage, or disposal facilities to file a biennial report of their hazardous waste activities with DER. You must comply with this rule concerning the filing of a biennial report by March 1 for the preceding odd-numbered year. The report forms will be sent to the contact person. Businesses that generate less than 1000 kilograms of hazardous waste per month (small quantity generators) are not subject to these reporting requirements.

If any of the information on the Hazardous Waste activity form changes, please notify us in writing at the letterhead address. For further assistance, please call 904/488-0300.

Sincerely,

Michael X. Redig

1 INTRODUCTION

Gasoline Equipment Systems, Inc. (GES) was contracted by Martin Petroleum Corporation, Inc. to install an E85 aboveground storage tank system at the existing Citgo facility located at the Florida Turnpike Turkey Lake Service Plaza. The E85 system installation included one 10,000 gallon double wall aboveground storage tank, new dispenser island, one single E85 product dispenser and canopy along the northbound and southbound sides of the facility. Figure 1 shows the location of the Turkey lake facility. Figure 2 shows the location of the source removal area within the Turkey Lake Service Plaza facility. All figures are presented in Appendix A.

On May 14, 2008, GES personnel notice a petroleum odor emitted from the soil being excavated at the proposed location of the southbound dispenser sump and canopy footer area. GES notified Mr. Michael Judd, Project Manager for the FDOT with (PBSJ) and REP Engineering Solutions, Inc. (REP) about the petroleum impacted soils encountered. REP instructed GES to stockpile any suspected petroleum impacted soil excavated to date onto and cover with visqueen.

All samples collected by REP personnel were done so in accordance with FDEP Field Sampling Procedures and when applicable were analyzed by Jupiter Environmental Laboratories, Inc. (Laboratory Certification E86546).

DRAFT

2 SITE CHARACTERISTICS

The unsaturated soil in the vicinity of the petroleum impacted soil can be generally described as 0 to 5 foot below land surface (bls) mixture of dark brown to black medium to fine grained sandy soil. During source removal activities, the water table was encountered at a depth of approximately 6.5 feet bls.

3 FREE PRODUCT RECOVERY

Free product was not encountered during source removal activities.

4 SOIL EXCAVATION

On May 15, 2008, REP personnel arrived on-site to oversee petroleum contaminated soil excavated for the installation of the new canopy footer forms and dispenser sump at the southbound E85 facility installation. Upon arriving, approximately 10 cubic yards of soil had been excavated by GES and placed onto and covered with visqueen.

On May 15, 2008, GES continued the source removal as required to set the canopy footer and dispenser sump.

REP performed on-site monitoring and documentation of petroleum contaminated soil removal activities in accordance with FDEP requirements. Soil samples collected by REP personnel during soil excavation activities were placed in 16-ounce glass jars. The jars were half filled and sealed with aluminum foil. Each soil sample was screened using a Foxboro 128 organic vapor analyzer (OVA). Each hydrocarbon measurement was corrected for methane using an activated charcoal filter. OVA samples were collected for analysis to determine the endpoint of petroleum soil contamination and subsequent soil excavation. As a result, the OVA sample location and results do not necessarily represent high, medium and low OVA soil concentration.

All soil removed on May 14 and 15, 2008 were screened using the OVA. All petroleum impacted soil removed to install the canopy footer and dispenser sumps was combined with the petroleum impacted soil previously excavated on May 14, 2008. The petroleum contaminated soil were placed onto and covered with visqueen. Figure 3 shows the OVA sampling locations and results.

The soil excavation area was limited to the volume only as required to install the canopy footers and dispenser sump. REP estimated approximately 13 cubic yard of petroleum contaminated soil were removed and stockpiled on-site.

All other soil excavated were returned to the excavations and compacted around the canopy footer forms.

Boundary soil samples were not collected since the source removal was limited to only the volume of petroleum contaminated soils that were displaced by the installation of the canopy footers and dispenser sump.

DRAFT

5 PREBURN SAMPLING AND LABORATORY ANALYSIS

On May 23, 2008, REP personnel collected one composite preburn soil samples from the petroleum contaminated soil stockpile. The preburn soil sample were submitted to Jupiter Environmental Laboratories, Inc. for analysis of Volatiles (EPA Methods 8260B), Florida PRO, arsenic, cadmium, chromium, and lead. The preburn laboratory analysis results were within the incineration facility operating permit requirements. A copy of soil preburn analysis results are presented in Appendix B.

6 SOIL TRANSPORTATION AND DIPOSAL

The stockpile of petroleum contaminated soil was loaded onto dump truck using a frontend loader on June 17, 2008. The excavated soil was transported to Clark Environmental soil incineration facility located in Mulberry, Florida by DeCaro Trucking. A total of 18.09 tons of soil was transported for processing at the Clark facility located at 755 Prairie Industrial Parkway, Mulberry, Florida. Certificate of Material Recycling, post burn laboratory analysis, non-hazardous waste manifests, weight tickets are provided in Appendix C.

7 GROUNDWATER QUALITY

Post source removal groundwater sample collection was not performed as part of this investigation.

8 CONCLUSIONS AND RECOMMENDATIONS

The OVA and subsequent laboratory data indicate soil excavation did not reached the endpoints of petroleum impacted soils. Groundwater sample laboratory analysis was not performed as part of this investigation. The potential source of the soil contamination is unknown. Although, the suspected source of petroleum contamination is from a previous island that was once located at the same location as the new E85 island.

1.0 INTRODUCTION

1.1 HISTORICAL AND ASSESSMENT SUMMARY

This Limited Scope Remedial Action Plan (LSRAP) proposes to remediate the impacted soil and groundwater identified in the vicinity of the northbound and southbound fueling dispenser areas of the Turkey Lake Service Plaza (TLSP) site located at Milepost 263 of the Florida Turnpike in Ocoee (Orange County), Florida. The intent of the supplemental site assessment information provided in this document was solely to define endpoints for the proposed source removal. The current Florida Department of Environmental Protection (FDEP) site score for this facility is 6 and the site is in the FDEP's Early Detection Incentive (EDI) Program. This site is managed locally by the Orange County Environmental Protection Division (OCEPD). The preparation of this LSRAP has been authorized by Florida Turnpike Enterprise (Turnpike) Letter of Authorization (LOA) No. 5 – Amendment No. 1 under Contract No. BDD45. The site plan is presented as **Figure 1 & 1A**.

DRAFT

The following paragraphs summarize information from field investigations at the TLSP site:

- Presently, the TLSP site contains an operating gas station/convenience store with associated dispenser islands **(Figure 1 & 1A)**.

- The lithology at the TLSP site consists of brown and grey fine grained sands and silty sands with some dark organics from just below the surface cap to approximately six feet below land surface (bls). Handex Consulting and Remediation – Southeast, LLC (HCR) did not penetrate the site deeper than six feet during the site assessment activities since the goal of the assessment was solely to gain information necessary to define the endpoints for the proposed source removal as mentioned previously.

- The groundwater in the surficial water table appears to be flowing in a south-southwesterly direction. A groundwater elevation contour map constructed from data collected on June 22, 2009 is included as **Figure 2**.

- The depth-to-water (DTW) across the site, based on DTW data collected in June 2009, averages approximately 3.6 feet bls. Groundwater monitoring well construction details, DTW measurements, and water level elevations are presented in **Table 1**.

- No liquid phase hydrocarbons (LPH) have been detected in the on-site wells.

- On June 9 and June 10, 2009, HCR personnel installed 25 soil borings (SB-1 through SB-26, excluding SB-13 since it could not be performed) via hand auger to the water table. The 25 soil borings were collected across three areas: the former tank field (Area 1), the impound lot (Area 2), and the footprint of the southern convenience store (Area 3). Soil samples were collected from two feet and four feet bls at SB-1 through SB-15 and SB-23. Soil samples were collected from one foot and three feet bls at borings SB-16 through SB-22 and SB-24. Three samples each were collected at soil borings SB-25 and SB-26 at one foot, three feet and five feet bls. Samples were analyzed using an organic vapor analyzer (OVA) equipped with a flame ionization detector (FID). Each soil sample returned an unfiltered OVA reading less than 10 parts per million (ppm) and was therefore not screened with an inline activated charcoal filter. An OVA headspace summary map is included as **Figure 3**. The OVA headspace sampling summary, including lithology and moisture descriptions, is presented in **Table 2**.

- From September 1 through 4, 2009 and on October 14, 2009, HCR personnel installed an additional 33 soil borings (SB-27 through SB-59) via hand auger to the water table. The 33 soil borings were collected across the northbound and southbound dispenser areas. Soil samples were collected at approximately one to two foot intervals and were screened using an OVA equipped with a FID. A net

DRAFT

OVA response was determined by subtracting the carbon-filtered measurement from the unfiltered measurement to correct for methane. A total of three soil samples (SB-27 at three feet bls, SB-47 at three feet bls, and SB-54 at four feet bls) were collected for laboratory analysis and shipped to Pace Analytical Services, Inc. (Pace) for analysis by EPA Method 8260 (benzene, toluene, ethylbenzene, total xylenes [BTEX] and methyl-tert-butyl ether [MTBE]), EPA Method 8270 (polynuclear aromatic hydrocarbons [PAHs]), and the FL-PRO Method (total recoverable petroleum hydrocarbons [TRPH]). Petroleum-impacted vadose and smear zone soils were identified at the site during the assessment conducted from September 1 through 4, 2009 and on October 14, 2009. **Figure 3** presents a net OVA headspace summary map for the various depths and depicts the net OVA 1,000 ppm and 50 ppm contours. **Figure 4** presents a soil analytical summary map. A Chapter 62-777, Florida Administrative Code (FAC), Table II Soil Cleanup Target Level (SCTL) contour could not be developed since there is not enough lab data points to generate one. All three laboratory soil samples revealed hydrocarbon constituent concentrations above the applicable SCTLs for various constituents. The OVA headspace sampling summary, including lithology and moisture descriptions, is presented in **Table 2**. A soil analytical summary (BTEX & MTBE) is attached as **Table 3A** and a soil analytical summary (PAHs & TRPH) is attached as **Table 3B**. A benzo(a)pyrene conversion table for SB-27 is included as **Table 3C** and a benzo(a)pyrene conversion table for SB-47 is included as **Table 3D**. Both the SB-27 and SB-47 total benzo(a)pyrene equivalents did not exceed any of the applicable SCTLs. A benzo(a)pyrene conversion table was not required for SB-54 since none of the carcinogenic PAHs was detected above the method detection limit (MDL). The Pace soil sampling analytical reports from the soil samples collected on September 1 and 4, 2009 and October 14, 2009 are included as **Appendix A**.

- The soil assessment data from the June, September, and October 2009 assessment events indicate that hydrocarbon-impacted soil was not encountered in Area 1 (SB-1 through SB-7 [former tank field]), Area 2 (SB-8 through SB-20 [impound lot]), and Area 3 (SB-21 through SB-26 [southern convenience store]).

DRAFT

However, hydrocarbon-impacted soil was encountered in Area 4 (SB-27 through SB-59 [northbound and southbound dispenser island areas]). Based on the available data, soil impacts in the northbound and southbound dispenser island areas of the site were identified in both the vadose (approximately one foot bls to three feet bls) and smear (approximately four feet bls to five/six feet bls) zones, with both the vadose and smear zone net OVA readings well above 10 ppm in the one to five/six feet bls range. A low-level net OVA and laboratory soil analytical result correlation, as per the *Guidelines for Assessment and Source Removal of Petroleum Contaminated Soil (GASRPCS)*, prepared by the FDEP Bureau of Petroleum Storage Systems (May 1998), to segregate clean soil from hydrocarbon-impacted soil, is difficult to establish given the limited laboratory soil analytical results. SB-27 at three feet bls had a net OVA measurement of 312 ppm and revealed a naphthalene leachability to groundwater SCTL exceedance of 1.5 mg/kg as compared to the SCTL of 1.2 mg/kg. Additional laboratory data would be needed in order to create a low-level net OVA excavation extent measurement threshold. Based on the available laboratory data, a conservative net OVA excavation extent threshold would be approximately 50 ppm in order to provide reasonable assurance of excavating soils above the SCTLs.

- The most recent groundwater sampling at the site was conducted in June 2009. On June 15, 2009, HCR personnel collected groundwater samples from four compliance wells (CW-1 through CW-4) located around the northbound and southbound dispenser island areas and deep monitoring well DW-UNK (unknown, but presumably MW-15D) located towards the west of the southbound dispenser island area. On June 22, 2009, HCR collected additional groundwater samples from existing monitoring wells MW-2, MW-4, MW-6, MW-8, and MW-9 located towards the west-northwest of the southbound dispenser island area. Samples were submitted to Pace and analyzed via EPA Methods 8021 (BTEX and MTBE) and 8270 (PAHs). A groundwater analytical summary map for BTEX and MTBE is included as **Figure 5** and a groundwater analytical summary map for naphthalenes is included as **Figure 6**. A groundwater analytical summary for BTEX and MTBE is

DRAFT

attached as **Table 4A** and a groundwater analytical summary for PAHs is attached as **Table 4B**.

- The June 15, 2009 sampling event revealed dissolved hydrocarbon concentrations above Chapter 62-777 FAC Table I Groundwater Cleanup Target Levels (GCTLs) and Table V Natural Attenuation Default Concentrations (NADCs). Benzene and MTBE concentrations were reported above GCTLs but below NADCs at CW-1. Benzene, ethylbenzene, and total xylenes concentrations were reported above NADCs and toluene, naphthalene, and MTBE (presumably) concentrations were reported above GCTLs but below NADCs at CW-2. The benzene concentration at CW-3 was reported above GCTLs but below NADCs. Benzene, MTBE, and benzo(a)pyrene concentrations were reported above GCTLs but below NADCs at CW-4. Samples from each of the remaining wells sampled on June 15, 2009 and all the wells sampled on June 22, 2009 reported concentrations for all analyzed constituents below GCTLs and/or laboratory method detection limits (MDLs). Copies of laboratory analytical reports, groundwater sampling logs, and equipment calibration logs for the June 15 and 22, 2009 sampling events were included under separate cover in a Preliminary Site Assessment Report (Phase I) dated September 11, 2009.

DRAFT

Based on the assessment activities described in this report and the upcoming TLSP renovation activities, HCR recommends the implementation of this LSRAP for source removal via excavation. The estimated total impacted soil excavation area around the northbound dispenser area is approximately 6,900 square feet (ft^2) and the estimated total impacted soil excavation area around the southbound dispenser area is approximately 14,450 ft^2.

1.2 REMEDIAL ACTION PLAN OBJECTIVES

In conjunction with proposed renovation of this service plaza scheduled to begin in approximately late 2010, the Turnpike will be demolishing the existing service station

and replacing it with a new convenience store and fuel islands. During this renovation, there will be a unique opportunity to conduct a direct source removal (excavation) in currently inaccessible areas and the Turnpike has allotted a window of time at the start of construction to allow the source removal to occur. To this end, the objective of this LSRAP is to design a plan to remediate vadose and smear zone soil hydrocarbon concentrations and dissolved-phase hydrocarbon concentrations located in the northbound and southbound dispenser island areas of the TLSP site (as indicated on **Figures 3 through 6**) to levels required under Chapter 62-770, F.A.C. The recommended excavation design is expected to remediate affected soils present beneath the site in the proposed excavation locations to levels required under F.A.C. 62-770. The design will also address the dissolved-phase hydrocarbon concentrations in the proposed excavation locations through dewatering and via the addition of an oxygen-release-type compound (ORC) prior to backfilling. The primary objective will be to remove the source of the hydrocarbon-impacted groundwater and soil using excavation with dewatering to fully excavate the smear zone and a few feet below the smear zone into the saturated zone, and to place ORC at the base of the excavation prior to backfilling, thus allowing continued active remediation of the smear and dissolved-phase zones via aerobic biodegradation. It should be understood that after this proposed excavation and after the ORC has had ample time to generate dissolved oxygen (at least one year following the excavation event), any remaining dissolved-phase hydrocarbon impacts above GCTLs throughout the proposed excavation areas and/or other areas of the site may need to be addressed via natural attenuation monitoring or by another remediation technology. A determination of whether natural attenuation monitoring or another remediation technology should be utilized should be made after the source removal and ORC application are complete and groundwater analytical data are collected at least four quarters after the ORC application to allow adequate time for oxygen generation, dispersion, and biodegradation time.

DRAFT

1.3 SUMMARY OF PROPOSED REMEDIAL ACTION

With the TLSP site renovation activities planned, there is the potential for large-scale source removal during construction. Implementation of this LSRAP would occur during the site renovation activities and would consist of performing excavation with dewatering and without sheet piling activities around the northbound and southbound dispenser island areas. HCR proposes to place ORC at the base of the excavation prior to backfilling, thus allowing continued active remediation of the smear and dissolved-phase zones via aerobic biodegradation.

DRAFT

2.0 REMEDIAL ACTION SELECTION AND DESIGN

2.1 GROUNDWATER AND SOIL REMEDIATION

2.1.1 SELECTION – EXCAVATION WITH DEWATERING

HCR proposes to complete a soil excavation (with dewatering and an ORC application but without sheet piling as sloping will be utilized for sidewall stability) at the TLSP site to remove the source of the hydrocarbons in the soil and treat dissolved-phase hydrocarbon impacts in the northbound and southbound dispenser island areas. This LSRAP would be implemented during the site renovation activities.

Based on the soil and groundwater data previously discussed, HCR proposes to excavate the soil around the northbound and southbound dispenser island areas of the TLSP site as shown on **Figure 7**, with both areas excavated to a maximum depth of approximately eight feet bls. Any non-hydrocarbon-impacted soils, including the sloping areas and overburden/vadose zone soils above the impacted soils (approximately one foot), will be stockpiled onsite and used as backfill upon completion of the excavation. HCR recommends using a soil segregation net OVA reading of approximately 50 ppm as discussed in Section 1.1 (bullet point number eight). HCR recommends that any soils exhibiting net OVA readings above 50 ppm be stockpiled for proper disposal. All those soils eliciting a net OVA response below 50 ppm should be stockpiled onsite to be used as backfill.

DRAFT

The rationale for choosing excavation as the remediation method at the TLSP site is based on several reasons:

First, the proposed excavation areas will be accessible. The northbound and southbound dispenser island excavation areas will be accessible during the planned service plaza site renovation activities.

Second, the hydrocarbon-impacted soils are located in the vadose (approximately one to three feet bls) and smear zones (approximately four to five/six feet bls), which are vertically accessible and in a lithology mainly consisting of fine-grained sands. The excavation activities would proceed without costly sheet piling as sloping can be utilized for sidewall stability. The proposed excavation depth of approximately eight feet bls would be a few feet into the saturated/dissolved-phase zone to allow for maximum capture of sorbed hydrocarbon mass below the smear zone. Additionally, there should be enough horizontal area around the excavation locations to employ sloping without the need for costly sheet piling. Sloping may be hindered in the extreme northeastern portion of the southbound excavation area in the vicinity of the southwest corner of the UST farm area, which will continue to remain in the same location throughout the site renovation activities and beyond, but a steeper slope may be attempted in this corner in an effort to excavate as close to eight feet bls as possible.

Third, excavation is quick and provides reasonable assurance of source removal as compared to other remediation technologies.

Fourth, no remediation equipment is required to be installed and maintained as with traditional remediation technologies. Additionally, the ORC application activities will assist with the reduction of any remaining dissolved-phase and adsorbed-phase hydrocarbon mass in the source areas. Finally, an excavation is cost-competitive with traditional remedial technologies.

HCR proposes to use sloping in all excavation areas as necessary to prevent sidewall cave-ins. Based on the lithology/soil type, HCR is proposing a sloping factor of 1:1 (H:V). It may be possible to utilize a steeper slope as needed depending on actual site conditions. A steeper slope may be especially useful in the extreme northeastern portion of the southbound excavation area in the vicinity of the southwest corner of the UST farm area. Upon completion of the excavation activities, additional replacement monitoring wells should be installed and sampled to measure the effectiveness of the excavation, dewatering, and the ORC application.

DRAFT

2.1.2 REMEDIATION METHODOLOGY

Based on the available data, the proposed area of excavation of impacted soils in the northbound dispenser island area, illustrated on **Figure 7,** is approximately 6,900 ft² at an average thickness of seven feet (one foot bls to eight feet bls) based on OVA soil screening results, soil sampling, and groundwater sampling. The total areal extent of the northbound dispenser island excavation, including the sloping area, is approximately 10,350 ft². The volume of the hydrocarbon-impacted area is approximately 1,790 cubic yards (yd³). The concrete cover is estimated at approximately 320 yd³, the sloping volume is estimated at approximately 512 yd³, and the non-impacted overburden soils is estimated at approximately 255 yd³. Therefore, the total volume of the excavation is approximately 2,875 yd³, minus the concrete cover (320 yd³), which equates to 2,555 yd³, or 3,575 tons using a 1.4 [mass of compacted soil per yard (ton/yd)] multiplier. The volume of hydrocarbon-impacted soils to be excavated and treated is approximately 1,790 yd³ which is approximately 2,500 tons using a 1.4 [mass of compacted soil per yard (ton/yd)] multiplier. Adding in a 10% contingency factor, approximately 2,750 tons of hydrocarbon-impacted soil is estimated for excavation and disposal. Estimated source removal excavation mass calculations for the northbound dispenser area of the site are included in **Table 5A**.

Based on the available data, the proposed area of excavation of impacted soils in the southbound dispenser island area, illustrated on **Figure 7,** is approximately 14,450 ft² at an average thickness of seven feet (one foot bls to eight feet bls) based on OVA soil screening results, soil sampling, and groundwater sampling. The total areal extent of the southbound dispenser island excavation, including the sloping area, is approximately 19,085 ft². The volume of the hydrocarbon-impacted area is approximately 3,745 cubic yards (yd³). The concrete cover is estimated at approximately 590 yd³, the sloping volume is estimated at approximately 685 yd³, and the non-impacted overburden soils is estimated at approximately 535 yd³. Therefore, the total volume of the excavation is approximately 5,555 yd³, minus the concrete cover (590 yd³), which equates to 4,965 yd³, or 6,950 tons using a 1.4 [mass of compacted

DRAFT

soil per yard (ton/yd)] multiplier. The volume of hydrocarbon-impacted soils to be excavated and treated is approximately 3,745 yd^3 which is approximately 5,245 tons using a 1.4 [mass of compacted soil per yard (ton/yd)] multiplier. Adding in a 10% contingency factor, approximately 5,770 tons of hydrocarbon-impacted soil is estimated for excavation and disposal. Estimated source removal excavation mass calculations for the southbound dispenser area of the site are included in **Table 5B**.

Approximately two weeks prior to the excavation, if it is determined that thermal treatment is the chosen hydrocarbon-impacted soil disposal method at the time of the excavation, then HCR will collect a total of seven in-situ "revised" pre-burn soil samples from within the proposed northbound dispenser island excavation area and a total of 12 in-situ "revised" pre-burn soil samples from within the proposed southbound dispenser island excavation area. The soil samples will be shipped to an approved lab for analysis. The proposed excavation will commence shortly after the pre-burn laboratory analytical results are received and the necessary waste profiling is complete. The pre-burn soil sample quantity estimates are based on the requirements of Chapter 62-713 F.A.C. (Table A), which outlines the evaluation of pre-treatment soil analysis requirements. Five pre-burn soil samples are required to thermally treat between 700 and 1,400 tons of soil. For every additional 700 tons of soil, one additional pre-burn is required.

DRAFT

If it is determined that landfilling the hydrocarbon-impacted soils is the chosen disposal option at the time of the excavation then approximately two weeks prior to the excavation, HCR will collect a total of seven in-situ pre-disposal soil samples from within the proposed northbound dispenser island excavation area and a total of 12 in-situ pre-disposal soil samples from within the proposed southbound dispenser island excavation area. The soil samples will be shipped to an approved lab for analysis of the constituents required by the landfill. In most cases, a Class I, Subtitle D landfill accepting hydrocarbon-impacted soil will require analysis for four RCRA metals (arsenic, cadmium, chromium, and lead). If the results for any of the RCRA metals are at, or above, 20 times the RCRA regulatory limits, then a TCLP extraction will be

required. The proposed excavation will commence shortly after the pre-disposal laboratory analytical results are received and the necessary waste profiling is complete.

In addition to the offsite thermal treatment and landfill disposal options, at the time of the excavation activities, other methods of disposal/reuse may be researched for implementation. As disposal option costs can change rapidly, it will be necessary to choose the appropriate disposal option at a later date just prior to commencing the excavation activities.

Approximately one to two weeks prior to initiating the proposed soil excavation activities, HCR will supervise the well abandonment of three compliance wells (CW-2, CW-3, and CW-4) by a licensed Florida driller. Compliance well CW-1 will not be abandoned as it will be outside the footprint of the excavation sloping extents.

DRAFT

2.1.3 DEWATERING

During the week prior to the excavation, a dewatering well point system will be installed, using the hollow stem auger drilling method, to lower the water table to below approximately eight feet bls in the excavation areas. The well point system will be installed along three perimeters of the proposed excavation areas to allow an open end for heavy machinery ingress/egress with points spaced approximately four to five feet on-center. Due to the large horizontal expanse of the two proposed excavation areas, the two areas will need to be dewatered and excavated in sections. Typically, the maximum distance between opposing dewatering headers should be approximately 60 feet to avoid pooling of groundwater in the center of the excavation. The northbound dispenser island excavation area could be completed in approximately two sections and the southbound dispenser island excavation area could be completed in approximately three sections. The well points will be installed to an approximate total depth of 16 ft bls using two feet of 1.25-inch diameter screen. Dewatering should be initiated approximately two to three days prior to the excavation of each section and continue until the backfill activities are complete.

HCR will provide the electric or diesel dewatering pump to connect to the dewatering header, which will connect to each dewatering point via flexible hose swing arms. All pertinent dewatering equipment will also be supplied by HCR. An on-site treatment system consisting of an air sparge unit will be provided to treat the groundwater. The dewatering treatment system specifications are included as **Appendix B**. However, other similar non-HCR owned dewatering and treatment equipment may be used at the site depending on equipment availability and the specific project scope at the time of the excavation. The treatment system will be monitored daily. Once treated, the extracted groundwater will be discharged to an onsite storm water swale that feeds into an onsite stormwater retention pond. A short-term National Pollutant Discharge Elimination System (NPDES) permit may be necessary since the onsite stormwater retention pond has an outfall for overflow protection. HCR will secure the NPDES permit through the submittal of a Notice of Intent (NOI) to discharge to the FDEP's Industrial Wastewater Section. It is expected that the average flow rate from dewatering may be in the neighborhood of 50 gallons per minute (gpm) once the dewatering system has run a few days (an initial maximum flow rate of 100 gpm could be anticipated). Treated system effluent samples (one at the startup and weekly thereafter) will be collected for analysis as defined by the conditions of the NPDES permit. Additionally, the NPDES permit typically requires the weekly measurement of operational parameters (pH and flow). Approximately five days will be required to install the dewatering points in each section.

DRAFT

2.1.4 SOURCE REMOVAL

As the excavation activities commence, the concrete in the proposed excavation areas will be removed first if it is not already removed by the site renovation contractor. The concrete will be disposed of as construction and demolition (C&D) waste. Any large non-petroleum impacted debris encountered during excavation activities will also be discarded as C&D waste. Any small petroleum-impacted debris encountered during excavation activities will be discarded with the petroleum-impacted soils and treated with them, if feasible. Any large petroleum-impacted debris that can't be commingled

with the impacted soils, as per the chosen soil disposal method requirements, must be segregated from the soils and disposed of separately.

As per the *Guidelines for Assessment and Source Removal of Petroleum Contaminated Soil (GASRPCS)*, prepared by the FDEP Bureau of Petroleum Storage Systems (May 1998), excavated soils will be screened with an OVA to determine whether the soil should be segregated for disposal, or whether it can be used as backfill. Excavated soils will be periodically screened from the excavator as the excavation progresses. Soils revealing a net OVA reading of 50 ppm or greater will be removed and stockpiled for disposal. Based on the assessment results, it is expected that the soils in both the northbound and southbound excavation areas may be impacted from approximately one foot bls to approximately eight feet bls. Any soils registering net OVA readings less than 50 ppm will be staged onsite to be used as backfill material following excavation.

Based on the existing soil and groundwater data, it appears that all soils in the proposed locations may be impacted at the water table interface. The average DTW measured in June 2009 across the site was approximately 3.5 feet bls. The current estimated mass of petroleum hydrocarbon impacted soils to be excavated and removed for treatment is approximately 2,500 tons (or 2,750 tons with a 10% safety factor) from the northbound dispenser island area and approximately 5,245 tons (or 5,770 tons with a 10% safety factor) from the southbound dispenser island area. The proposed areas of excavation (northbound and southbound dispenser island areas) are presented as **Figure 7**. Approximately 17 days (12 days for surface cap and soil removal plus five days to move the dewatering system to the second section) will be required to complete the excavation activities in the northbound dispenser island area and approximately 33 days (23 days for surface cap and soil removal plus 10 days to move the dewatering system to the second and third sections) will be required to complete the excavation activities in the southbound dispenser island area. This estimate is based on moving approximately 375 tons per day of concrete cover, overburden soils, hydrocarbon-impacted soils (including the 10% safety factor), and sloping soils (4,270 tons in the northbound dispenser island area and 8,300 tons in the southbound dispenser island

DRAFT

area) and includes time for OVA soil screening, soil segregation, and time for moving the dewatering points and treatment system to the various sections.

During the implementation of the proposed excavation activities if traffic flow is expected to continue in the vicinity of the excavation areas, the appropriate Maintenance-of-Traffice (MOT) plan will be utilized as approved by the FDOT Florida Turnpike District.

2.1.5 ORC APPLICATION

Prior to backfilling, HCR recommends spreading approximately 1,075 pounds (lbs) (or as recommended by the manufacturer) of ORC at the bottom of the northbound dispenser island excavation area and approximately 2,859 lbs of ORC at the bottom of the southbound dispenser island excavation area to act as a biodegradation agent. The ORC estimate for the northbound dispenser island excavation area is based on applying the ORC over the 1,000 ppm OVA contour area, or an area of approximately 3,455 ft^2. Utilizing a thickness of saturated treatment zone of two feet, the volume of the treatment zone is 6,910 ft^3, or 256 yd^3. Assuming a soil density of 1.4 tons/yd^3, the mass of the treatment area is 358 tons, or 716,593 lbs. Using a percent-ORC-to-use figure of 0.15% (mass ORC/mass of soil – manufacturer recommends minimum of 0.10%), the mass of approximate ORC required is 1,075 lbs (716,593 lbs x 0.0015 = 1,075 lbs). The ORC estimate for the southbound dispenser island excavation area is based on applying the ORC over the 1,000 ppm OVA contour area, or an area of approximately 9,190 ft^2. Utilizing a thickness of saturated treatment zone of two feet, the volume of the treatment zone is 18,380 ft^3, or 681 yd^3. Assuming a soil density of 1.4 tons/yd^3, the mass of the treatment area is 953 tons, or 1,906,074 lbs. Using a percent-ORC-to-use figure of 0.15% (mass ORC/mass of soil – manufacturer recommends minimum of 0.10%), the mass of approximate ORC required is 2,859 lbs (1,906,074 lbs x 0.0015 = 2,859 lbs). These application rates of approximately 4 lbs ORC/yd^3 of saturated soil removed are within the manufacturer recommended application range of 3 to 5 lbs ORC/yd^3 of saturated soil removed. The surface area

DRAFT

application rate is approximately 0.31 lbs ORC/ft² for both the northbound and southbound dispenser island excavation areas.

The slow-release source of oxygen stimulates the indigenous microorganisms to aerobically biodegrade any remaining post-excavation residual petroleum hydrocarbons. By applying the ORC at the bottom of an open, dewatered excavation, as opposed to injecting the ORC through multiple injection points, the costs are minimized and there is better assurance of a proper distribution of the ORC material. When backfilling over the ORC is complete and the dewatering system is turned off the water table will rise into this ORC layer and act to mix and activate the ORC to begin supplying oxygen both horizontally and vertically throughout the saturated and smear zones. The Regenesis Acceptance Letter and the ORC-Advanced Material Safety Data Sheet (MSDS) are included as **Appendix C**. However, other oxygen releasing compounds will be researched and may be used in place of the ORC-A at the time of the excavation.

After applying the ORC, the overburden and clean fill soils will be immediately placed back into the excavated area and properly compacted according to the FDOT Standard Specifications for Road and Bridge Construction.

DRAFT

2.1.6 BACKFILLING

Prior to backfilling the excavation areas with clean fill, HCR will collect laboratory confirmatory soil samples from the sidewalls of the excavation areas approximately every 50 to 100 feet for a total of four to eight samples from the northbound dispenser island excavation area and a total of five to 10 samples from the southbound dispenser island excavation area. Approximately three bottom samples (north end, center, and south end) from each of the two dispenser island excavation areas will be collected if the bottom of the excavation areas is not too saturated. All soil samples will be sent to an approved lab to be analyzed by USEPA Methods 8260/8021 (BTEX/MTBE), 8310/8270 (PAHs), and FL-PRO (TRPH) constituents. The soil screening and

subsequent sampling will be performed as outlined in the *GASRPCS*, prepared by the FDEP Bureau of Petroleum Storage Systems (May 1998).

Backfill will be installed to the elevation of the sub-base in compacted lifts. A subcontractor will be secured to perform density testing of the compacted backfill to ensure it meets the FDOT Standard Specifications for Road and Bridge Construction. At the end of the excavation, the northbound and southbound dispenser island excavation areas will be compacted to just below grade, but will not immediately be finished with a surface cap since these areas will be resurfaced under the direction of the prime contractor tasked with the site renovation activities. A generalized timeline for the events described above relating to the proposed excavation of the northbound and southbound dispenser island excavation areas has been included in **Table 6**. This is only a generalized timeline since access to these excavation areas will be dependent upon the site renovation activities and the window(s) of opportunity allotted based on the renovation plans and schedule at the time of the excavation.

DRAFT

2.1.7 WELL REPLACEMENT

The abandoned wells (CW-2, CW-3, and CW-4) listed in the final paragraph of Section 2.1.2 above and two additional proposed monitoring wells (MW-19 [proposed in the vicinity of SB-57] and MW-20 [proposed in the vicinity of SB-47]) will need to be installed by a licensed driller in the proposed excavation areas after all excavation, backfill, and compaction activities are complete. The well specifications should consist of ten feet of 2-inch diameter 0.01-inch slotted schedule 40 PVC screen threaded to two feet of 2-inch diameter schedule 40 PVC riser. Approximately one to two quarters after their installation, the replaced monitoring wells (CW-2R, CW-3R, CW-4R), existing well (CW-1), and proposed monitoring wells (MW-19 and MW-20) will be sampled by USEPA Methods 8260/8021 (BTEX/MTBE), 8310/8270 (PAHs), and FL-PRO (TRPH) constituents to aid in the determination of the effectiveness of the excavation, dewatering, and ORC application.

3.0 REMEDIAL ACTION SUMMARY

HCR proposes to excavate approximately 2,750 tons (including 10% safety factor) of hydrocarbon-impacted soils from the northbound dispenser island excavation area and approximately 5,770 tons (including 10% safety factor) of hydrocarbon-impacted soils from the southbound dispenser island excavation area, which will be properly disposed of as discussed in Section 2.1.2 of this report (a total excavation of approximately 4,270 tons of surface cap, overburden soil, hydrocarbon-impacted soil (including the 10% safety factor), and sloping soil from the northbound dispenser island excavation area and 8,300 tons from the southbound dispenser island excavation area, including surface cap, overburden soil, hydrocarbon-impacted soil (including the 10% safety factor), and sloping soil, is estimated). The excavation activities are expected to occur during the Florida Turnpike Enterprise site renovation activities. The excavation will proceed with dewatering, but without costly sheet piling. The final stages following the removal of the hydrocarbon-impacted soil are ORC application, backfilling and compaction. The surface cap is expected be resurfaced under the direction of the prime contractor tasked with the site renovation activities.

Prior to backfilling and compaction of the clean fill, HCR proposes the application of approximately 1,075 pounds of ORC-Advanced, or other oxygen releasing compound, to the bottom of the northbound dispenser island excavation area and approximately 2,859 pounds of ORC-Advanced, or other oxygen releasing compound, to the bottom of the southbound dispenser island excavation area to provide an oxygen source for aerobic degradation of residual hydrocarbons in the smear and saturated zones.

Approximately one to two quarters after their installation, the replaced monitoring wells (CW-2R, CW-3R, CW-4R), existing well (CW-1), and proposed monitoring wells (MW-19 and MW-20) will be sampled to aid in the determination of the effectiveness of the excavation, dewatering, and ORC application. This will allow some time for the oxygen to be released into the formation to allow biodegradation to proceed. Approximately one month after the groundwater samples have been collected, a Source Removal

DRAFT

Report will be submitted with recommendations regarding the next appropriate work scope.

It should be understood that after this proposed excavation and after the ORC has had ample time to generate dissolved oxygen (at least one year following the excavation event), any remaining dissolved-phase hydrocarbon impacts above GCTLs throughout the proposed excavation areas and/or other areas of the site may need to be addressed via natural attenuation monitoring or by another remediation technology. A determination of whether natural attenuation monitoring or another remediation technology should be utilized should be made after the source removal and ORC application are complete and groundwater analytical data are collected at least four quarters after the ORC application to allow adequate time for oxygen generation, dispersion, and biodegradation time.

As a rough timeline, the northbound dispenser island excavation is expected to take approximately 17 days (12 days for surface cap and soil removal plus five days to move the dewatering system to the second section) for the removal of the surface cap, overburden soils, sloping soils, and hydrocarbon-impacted soils. An additional eight days of backfilling and compacting is estimated and includes the ORC application. It is assumed that surface refinishing is to be completed by the prime contractor responsible for the site renovations.

As a rough timeline, the southbound dispenser island excavation is expected to take approximately 33 days (23 days for surface cap and soil removal plus 10 days to move the dewatering system to the second and third sections) for the removal of the surface cap, overburden soils, sloping soils, and hydrocarbon-impacted soils. An additional 15 days of backfilling and compacting is estimated and includes the ORC application. It is assumed that surface refinishing is to be completed by the prime contractor responsible for the site renovations.

DRAFT

4.0 POST EXCAVATION MONITORING

The proposed replacement monitoring wells (CW-2R, CW-3R, CW-4R), existing well (CW-1), and proposed monitoring wells (MW-19 and MW-20) may be sampled quarterly to provide analytical data used in evaluating the effectiveness of the excavation, dewatering, ORC application, and any possible future active remediation employed at the site. Samples will be analyzed by USEPA Methods 8260/8021 (BTEX/MTBE) and 8310/8270 (PAHs). The sampling may continue quarterly as a means of Natural Attenuation Monitoring or Post Active Remediation Monitoring depending on the constituent concentrations. The sampling schedule and analytical parameters are subject to change based on regulatory requirements. A summary of sampling parameters and schedule is located in **Table 7**.

During post-excavation monitoring, reports will be developed to summarize the sampling events. The reports should include water level measurements, groundwater concentrations, laboratory analytical reports, sampling and calibration logs, figures, tables, and any additional requirements described in Chapter 62-770 F.A.C.

Warning Letter

DRAFT

Dear Mr. Bjork:

The purpose of this letter is to advise you of possible violations of law for which you may be responsible, and to seek your cooperation in resolving the matter. A hazardous waste complaint inspection was performed at Granite Construction Company's temporary work yard located at 4510 S Hiawassee Rd, Orlando, on September 28, 2007. The purpose of this inspection, conducted under the authority of Section 403.091, Florida Statutes (F.S.), and Chapter 403, Part IV, Florida Statutes, was to determine the compliance status of your facility with 40 CFR 260-268, adopted in Florida Administrative Code Chapter 62-730 and 40 CFR 279, adopted in Florida Administrative Code (F.A.C.) Chapter 62-710.

Department personnel observed possible violations of Florida Statutes and Rules regarding used oil filters. These violations are set forth in "Potential Noncompliance Items and Corrective Actions" section of the attached inspection report.

The activities observed during the Department's field inspections and any activity at your facilities that may be contributing to violations of the above described statutes and rules should be ceased immediately. The Department has calculated penalties for the violations addressed above. The penalty work sheet is enclosed.

The Department is interested in reviewing any facts you may have that will assist in determining whether any violations have occurred and whether any penalties are appropriate. Please contact Michael Eckoff, Hazardous Waste Section, by telephone at (407) 893-3323 or by e-mail at michael.eckoff@dep.state.fl.us within 10 days of receipt of this letter to schedule an informal conference concerning resolution of this matter. You may bring anyone with you to the meeting that you feel could help resolve this matter.

This Warning Letter is part of an agency investigation preliminary to agency action in accordance with Section 120.57(4), Florida Statutes. The Department looks forward to your cooperation in completing the investigation and resolution of this matter.

Sincerely,

Vivian F. Garfein
Director, Central District

DRAFT

9. **Introduction:**
On September 28, 2007, John White and Michael Eckoff inspected Granite Construction Company of California, doing business as Granite Construction Company (FDOT Contractor), in response to a complaint alleging improper management of used oil filters. The complainant alleged disposal of used oil filters in a roll-off type dumpster that goes to a local landfill.

Granite Construction Company's temporary work yard is located at 4510 S Hiawassee Rd, Orlando, Florida. The property is owned by Florida State Turnpike Authority, 605 Suwannee St, Room 476, Burn Building, Tallahassee, FL 32399.

10. **Inspection:**
When the inspectors arrived on the property a worker indicated no supervisors were on site. A worker provided a telephone number for Granite Construction Company as (407) 656-2514. He indicated the supervisor for this project was Wayne Roberts and the company safety manager is Ronnie Seets.

The inspectors attempted to contact Mr. Roberts or Mr. Seets by telephone; however, Mr. Roberts was in a meeting and a voicemail message was left with Mr. Seets. The worker on site then indicated company representatives were on their way to the site.

Two company representatives arrived and disposal of used oil filters was discussed. According to the company representatives, they were told by their environmental department to drain used oil filters for 24 hours and then dispose of them in the dumpster (trash). The inspectors told the company representatives that disposal of used oil filters in the landfill was not allowed in Florida.

Fourteen used oil filters were visible in the construction dumpster.(Figures 3, 4, and 5) Also in the dumpster was a Porter Cable 5500 Watt portable generator, which the company representatives stated did not contain gasoline.(Figures 2 and 6) They were asked to check the generator for gasoline when removing the used oil filters.

The company representatives were asked to remove the used oil filters from the dumpster and place them in a drum in the waste storage area. A "used oil filter" label was provided.

The site has a 500-gallon aboveground used oil storage tank and a drum of used absorbent. The tank and the container were properly labeled. The used oil tank had also been provided with secondary containment as required. Used oil is collected by On Time Environmental Services, a registered used oil transporter.

Company representatives were provided with a copy of the Florida regulations regarding used oil filters.

11. **Potential Non-Compliance Items and Recommended Corrective Actions:**

DRAFT

a) Regulation: 62-710.850(1), F.A.C.
No person who removes or manages used oil filters shall dispose of such filters, or commingle such filters with other solid waste, for disposal in a landfill in Florida. It is the responsibility of the generator to make reasonable efforts to assure that such filters are not disposed of in a landfill. Specifically, Granite Construction Company disposed of used oil filters in a dumpster destined for a landfill.

Recommended Corrective Action
Used oil filters must be stored in above ground containers which are clearly labeled "Used Oil Filters," and which are in good condition (no severe rusting, apparent structural defects or deterioration) with no visible oil leakage. The containers shall be sealed or otherwise protected from weather and stored on an oil-impermeable surface. Used oil filters must be shipped off site for reclamation using a registered used oil filter transporter and the facility must maintain records for a period of three years.

b) Regulation: 62-710.850(5)(a), F.A.C.
All persons storing used oil filters shall store used oil filters in above ground containers which are clearly labeled "Used Oil Filters," and which are in good condition (no severe rusting, apparent structural defects or deterioration) with no visible oil leakage. The containers shall be sealed or otherwise protected from weather and stored on an oil-impermeable surface. Specifically, Granite Construction Company stored used oil filters in an unlabeled, open container set directly on gravel/soil.

Recommended Corrective Action
Used oil filters must be stored in above ground containers which are clearly labeled "Used Oil Filters," and which are in good condition with no visible oil leakage. The containers shall be sealed or otherwise protected from weather and stored on an oil-impermeable surface.

DRAFT

12. **Conclusion:**
Granite Construction Company is a generator of used oil and used oil filters. It was not in compliance at the time of this inspection. The hazardous waste generator status of this facility has not been determined. In order to complete its review of this facility, the Department requires the following information be submitted:

- A list of all the company's work yards in the state of Florida.
- Documentation showing that all the company's work yards in Florida will be collecting and recycling used oil filters.

Lisa,

After researching our database, I've located these incidents for this request. Due to the age of these incidents and our four-year retention schedule this is the only remaining information on these incidents. OER considers these incidents closed. I've also attached the spills spreadsheet for Orange County for you to look over to make sure I haven't overlooked anything. Please feel free to contact me if you have any questions.

Thanks,

APPENDIX L: External Tables

DRAFT

Site No:	1	Risk Potential:	**LOW**
Site Name	**Creative Auto Boutique**		
Site Address	17949 West State Road 50		
Site Location	North of SR 50, east of Lake Boulevard		
Distance/Direction	Adjacent to SR 50		
Facility ID Nos:	FLR000221739; SQG_232128		
Database Sources:	RCRA-CESQG		
Historical Land Use	Citrus grove		
Current Land Use	Creative Audio vehicle audio services		
Contaminants	Hazardous Materials		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: A compliance inspection was conducted in January 2017 following a large fire at the facility. The portion of the site used as a work shop to install electronics such as stereo systems was destroyed in the fire; the separate paint shop building was unaffected. The inspection noted the potential for contamination of the facility's onsite dry ponds from the wastewater generated by the fire crews. No violations or compliance issues were noted to have occurred as a result of the fire. The Central Florida Waste Cleanup Program manager determined that no assessment was required at that time.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is an audio installation shop for automobiles and boats.

CONCLUSIONS: Based on the lack of assessment requirement by FDEP, this facility has been assigned a Contamination Risk Rating (CRR) of **Low**.

View of the office trailer on site for the audio installation company.

Site No:	2	Risk Potential:	**MEDIUM**
Site Name	**Circle K #2722116**		
Site Address	17503 West State Road 50		
Site Location	Northeast corner of the SR 50 and Oakland Avenue intersection		
Distance/Direction	Adjacent to SR 50		
Facility ID Nos:	9800096		
Database Sources:	UST		
Historical Land Use	Citrus grove		
Current Land Use	Gas station and convenience store		
Contaminants	Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed
1	U	15,000	Unleaded Gasoline	1-1-98	In Use
1	U	16,000	Vehicular Diesel	1-1-98	In Use

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: This facility was constructed in 1998. No discharges have been reported. No out of compliance issues or violations have been reported during annual inspections which would indicate contamination impacts.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is an operating gas station and convenience store.

CONCLUSIONS: Based on the current site use as a retail gas station and proximity to the roadway alignment, this facility has been assigned a CRR of **Medium**.

View of the UST field, dispensers, and convenience store.

DRAFT

Site No:	3	Risk Potential:	MEDIUM
Site Name	**Killarney Fruit Company**		
Site Address	100 West State Road 438 (Oakland Avenue)		
Site Location	North of SR 50, east of Oakland Avenue		
Distance/Direction	200 feet north of SR 50		
Facility ID Nos:	8521522		
Database Sources:	Aerial Photographs		
Historical Land Use	Citrus packing house		
Current Land Use	ABC Bus parking lot		
Contaminants	Hazardous Materials and Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed
1	A	10,000	Vehicular Diesel	Unk.	1987
1	A	10,000	Unleaded Gasoline	Unk.	1987
1	A	5,000	Unleaded Gasoline	Unk.	1987

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil		Groundwater
Documented/ Known Impacts:	No		No

PUBLIC RECORDS: A citrus packing house was visible in aerial photographs from 1958 through 1995. Several large buildings and warehouses were visible on the site, and several aerial photographs included trailers parked at the site, used for hauling citrus. The aboveground tanks were reportedly removed in 1987. The facility was involved in a fire in approximately 1990, and further demolished in the late 1990s, finally appearing as cleared vacant land in 1999. The property was incorporated into the adjacent ABC Bus Company by 2006 and is currently a parking lot for the bus company.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The former packing house is in use as parking for ABC Bus Company.

CONCLUSIONS: Based on the lack of assessment information and potential for unreported contamination impacts having occurred prior to current regulatory requirements, this facility has been assigned a CRR of **Medium**.

View of the former packing house in 1969; SR 50 is visible to the south, with several rail lines and spurs also visible.

Site No:	4	Risk Potential:	LOW
Site Name	**Toms Interstate Inc.**		
Site Address	17530 West State Road 50		
Site Location	South of SR 50, east of Deer Isle Boulevard		
Distance/Direction	Adjacent to SR 50		
Facility ID Nos:	FLD984222695		
Database Sources:	RCRA-SQG		
Historical Land Use	Citrus grove		
Current Land Use	Single family residential		
Contaminants	Hazardous Materials		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil		Groundwater
Documented/ Known Impacts:	No		No

PUBLIC RECORDS: Limited information is available for this facility in the public record. The facility registered with FDEP as a generator of hazardous wastes in 1991. A 2014 inspection noted the facility had closed and the mapped address was part of a residential subdivision with no evidence of any past commercial uses.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The approximate site location consists of a single family residential neighborhood.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

Approximate location of the Toms Interstate facility address as mapped by Google Earth, presented on a 1995 aerial photograph.

DRAFT

Site No:	5	Risk Potential:	LOW
Site Name	**ABC Bus Companies Inc.**		
Site Address	17469 West State Road 50		
Site Location	North of SR 50, east of Oakland Avenue		
Distance/Direction	Adjacent to SR 50		
Facility ID Nos:	FLD062440870; 9814266; SQG_77469		
Database Sources:	UST, RCRA-SQG		
Historical Land Use	Citrus grove		
Current Land Use	ABC Bus service center and parking lots		
Contaminants	Hazardous Materials and Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed
1	A	12,000	Vehicular Diesel	4-1-14	In Use

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Several hazardous waste inspections have taken place at the facility, which has been in operation since 1976. Violations have included improper storage and handling of wastes, lack of training employees with waste handling procedures, and poor record keeping. The site also has a 12,000-gallon aboveground fuel tank. None of the readily available inspection records indicated a spill or discharge had occurred.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with several buildings used for servicing, painting, and maintaining coach buses. Paved parking areas are located across the site.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the main office on the eastern portion of the ABC Bus Company property.

Site No:	6	Risk Potential:	LOW
Site Name	**Rachels Collision Center**		
Site Address	917A West Oakland Avenue		
Site Location	South of Oakland Avenue, approximately 350 feet south of Turnpike		
Distance/Direction	Adjacent to Florida Turnpike		
Facility ID Nos:	FLR000117515		
Database Sources:	RCRA-CESQG		
Historical Land Use	Citrus grove and vacant land		
Current Land Use	Automotive repair		
Contaminants	Hazardous Materials		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: This facility was located at the site from 2006 through at least 2011. One inspection took place in June 2011 due to a citizen complaint regarding paint mixing. Several violations were reported including improper storage of waste materials. The violations were brought into compliance by September 2011 and FDEP issued a "Project Closed Letter". No additional information was available in the public record.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site consists of an automotive body repair shop.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View towards the Rachel's Collision Center shop.

DRAFT

Site No:	7	Risk Potential:	MEDIUM
Site Name	**Racetrac #2399**		
Site Address	17108 Remington Road		
Site Location	Southwest corner of the SR 50 and Remington Road intersection		
Distance/Direction	Adjacent to SR 50		
Facility ID Nos:	9817273		
Database Sources:	UST		
Historical Land Use	Citrus; undeveloped commercial land		
Current Land Use	Gas station and convenience store		
Contaminants	Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed
1	U	20,000	Unleaded Gasoline	6-1-19	In Use
1	U	24,000	Vehicular Diesel	6-1-19	In Use
1	U	24,000	Ethanol E85	6-1-19	In Use

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: This facility was constructed in 2019 on previously undeveloped land. No discharges have been reported at the facility.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with a gas station and convenience store.

CONCLUSIONS: Based on the current site use as a retail gas station and proximity to the roadway alignment, this facility has been assigned a CRR of **Medium**.

View of the on-site gas station and convenience store.

Site No:	8	Risk Potential:	MEDIUM
Site Name	**7-Eleven Store #34286**		
Site Address	17100 West Colonial Drive		
Site Location	Southeast corner of the SR 50 and Remington Road intersection		
Distance/Direction	Adjacent to SR 50		
Facility ID Nos:	9805476		
Database Sources:	UST		
Historical Land Use	Citrus grove		
Current Land Use	Gas station and convenience store		
Contaminants	Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed
2	U	15,000	Unleaded Gasoline	12-1-02	In Use
1	U	10,000	Vehicular Diesel	12-1-02	In Use

Discharge Date:	7/23/2008 7/2/2009 1/10/2013	Cleanup Date:	2/18/2010 4/13/2011 11/26/2013
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Three discharges have been reported for this facility, which was constructed in 2003 on land previously planted with citrus. All three discharges were related to damaged over-fill spill buckets at the tanks. Assessment of soil and groundwater was conducted following each discharge. No contamination exceeding applicable target levels was detected and each discharge received regulatory closure orders from FDEP.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with a gas station and convenience store.

CONCLUSIONS: Based on the current site use as a retail gas station and proximity to the roadway alignment, this facility has been assigned a CRR of **Medium**.

View of the on-site gas station and convenience store.

DRAFT

Site No:	9	Risk Potential:	LOW
Site Name	**FL Dept of Transportation-Turnpk MP 272**		
Site Address	Turnpike MM 272 and Highway 91 Toll		
Site Location	South side of the Turnpike southbound entrance ramp from SR 50		
Distance/Direction	Adjacent to Florida Turnpike		
Facility ID Nos:	9201702		
Database Sources:	UST		
Historical Land Use	Turnpike toll plaza		
Current Land Use	Turnpike right-of-way		
Contaminants	Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed
2	U	600	Emergency Generator Diesel	5-1-92	1-29-04

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Two 600-gallon tanks connected to emergency generators were installed at the toll plaza in 1992. The two underground tanks were removed in 2004. No contamination was reported during tank removal.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site consists of the Turnpike roadway and grassed right of way areas.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

Approximate location of the former tank, located at the former toll booth plaza.

Site No:	10	Risk Potential:	LOW
Site Name	**West Orlando Powersports**		
Site Address	16333 West Colonial Drive		
Site Location	North of SR 50, just west of South Tubb Street		
Distance/Direction	Adjacent to SR 50		
Facility ID Nos:	SQG_141247		
Database Sources:	RCRA-CESQG		
Historical Land Use	Citrus grove		
Current Land Use	Recreational vehicle sales and service		
Contaminants	Hazardous Materials		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Inspections were conducted at this facility in 2009, 2011, 2014, 2016, and 2018. Minor compliance issues were noted, though none were associated with spills, discharges, or other sources of contamination. Proper disposal of waste materials (automotive fluids, rags, etc.) was ensured and properly labeled.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is occupied by West Orlando Powersports, a recreational vehicle sales and service shop.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the sales and service building from the entrance of the property.

DRAFT

Site No:	11	Risk Potential:	MEDIUM
Site Name	**US C-Stores Oper-Chevron Colonial**		
Site Address	16131 West Colonial Drive		
Site Location	Northeast corner of the SR 50 and Tubb Street intersection		
Distance/Direction	Adjacent to SR 50		
Facility ID Nos:	9805042		
Database Sources:	UST, LUST		
Historical Land Use	Vacant rangeland		
Current Land Use	Gas station and convenience store		
Contaminants	Petroleum Products

1	U	12,000	Unleaded Gasoline	7-1-02	In Use
1	U	10,000	Unleaded Gasoline	7-1-02	In Use
1	U	10,000	Vehicular Diesel	7-1-02	In Use

Discharge Date:	11-6-14	Cleanup Date:	10-29-18
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Cracked overfill spill buckets were observed in November 2014; replacement of all spill buckets at the facility resulted in reporting a discharge. A decreasing trend of groundwater contaminant concentrations was noted from 2016 through 2018. The most recent analytical results show no contaminants were present above cleanup target levels. An October 29, 2018 letter from Orange County Environmental Protection Division noted the discharge was eligible for a regulatory closure order, however the formal closure letter was not available in the public record.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with a gas station and convenience store.

CONCLUSIONS: Based on the current site use as a retail gas station and proximity to Flood Plain Compensation Area 11-12A, this facility has been assigned a CRR of **Medium**.

View of the on-site gas station and convenience store.

Site No:	12	Risk Potential:	MEDIUM

Discharge Date:	8-18-89	Cleanup Date:	10-29-12
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: A discharge was reported in August 1989. An active remediation system was installed and operated in 1994-1995. In 1998, approximately 156 tons of soil was excavated from the site. A regulatory closure order was issued in December 2000, but was later rescinded in December 2008 after additional contamination was encountered and removed from around the overfill spill buckets. The 1989 discharge was issued a Site Rehabilitation Completion Order in October 2012.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with a gas station and convenience store.

CONCLUSIONS: Based on the current site use as a retail gas station, this facility has been assigned a CRR of **Medium**. This site is > 400 feet north of Pond Basin B, Alternative 3.

Tanks, dispensers and convenience store on-site.

Site No:	14	Risk Potential:	LOW
Site Name	**Dewitt Excavating**		
Site Address	14463 West Colonial Drive

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Hazardous waste inspections were conducted at this facility in 2015 and 2017. The facility was found to be in compliance with no significant violations. Improper storage of spent bulbs was observed in 2015 and was corrected immediately. The latest tank inspection was in January 2021 and the facility was in compliance. No discharges or spills have been reported at this facility.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is occupied by a construction and site development company.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the on-site fuel tank at the Dewitt property.

0					

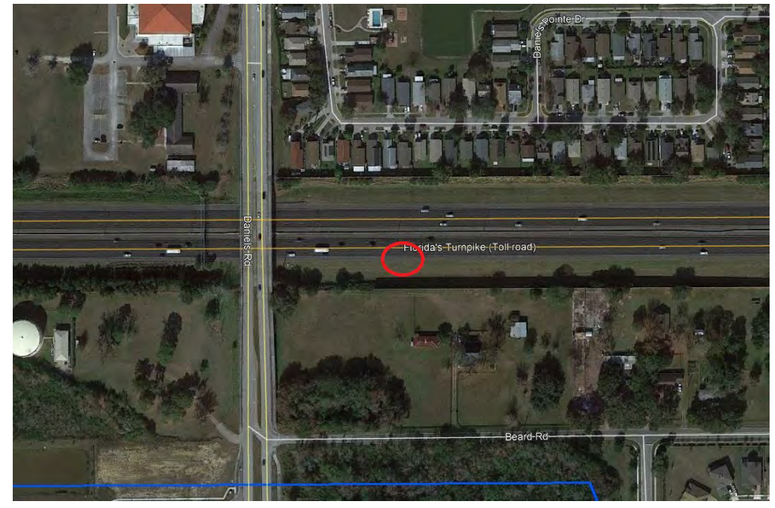

Discharge Date:	5-28-2000	Cleanup Date:	9-13-2000
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: On May 28, 2000 a fuel line on a Yellow Freight semi-trailer was severed and approximately 25-50 gallons of diesel fuel was discharged to the southbound shoulder of the Turnpike just south of Daniels Road. Approximately 20 tons of impacted soil was excavated from the spill area and disposed of. No elevated vapor screening readings were encountered following removal of impacted soil. It appears a formal closure order was approved by FDEP in September 2000, though the letter was not readily available.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site consists of the Turnpike roadway and grassed right of way areas.

CONCLUSIONS: Based on the lack of remaining subsurface contamination impacts and subsequent regulatory closure order, this facility has been assigned a CRR of **Low**.

Approximate location of the vehicle spill based on FDEP records shown on a 2021 aerial photograph.

PUBLIC RECORDS: A diesel spill resulted from a semi-truck accident on the Turnpike at the Beulah Road overpass in December 2007. Diesel reportedly leaded onto the grassed area next to the roadway and below the overpass. Approximately 17 tons of contaminated soil was removed in March 2008. Subsequent soil and groundwater sampling and testing indicated contamination did not remain at the spill site. FDEP approved a No Further Action closure status for the spill dated May 14, 2009.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site consists of the Turnpike roadway and grassed right of way areas.

CONCLUSIONS: Based on the lack of remaining subsurface contamination impacts and the subsequent regulatory closure order, this facility has been assigned a CRR of **Low**.

Approximate location of the vehicle spill based on FDEP records shown on a 2021 aerial photograph.

DRAFT

Site No:	**19**	Risk Potential:	**MEDIUM**

1	A	15,000	Fuel Oil – Onsite Heat	5-1-00	In Use

Discharge Date:	9-30-14	Cleanup Date:	Unk.
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: A discharge was reported to have occurred on September 30, 2014 when heat transfer oil was discharged from an on-site aboveground oil tank. The spill reportedly traveled across a paved parking area to a storm drain leading to the on-site retention pond. A contractor was hired to recover the oil from the pond and storm drain. Several vacuum trucks removed impacted pond water, and approximately 6.4 tons of impacted soil, sediment, and pond vegetation was excavated and disposed of. Two soil samples obtained from the spill area did not exhibit elevated contaminant concentrations.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with an asphalt and roadway construction company.

CONCLUSIONS: Based on the lack of regulatory closure order, this facility has been assigned a CRR of **Medium**.

View of the Ranger property from a publicly accessible area; facing southwest across the site.

Site No:	**20**	Risk Potential:	**LOW**
Site Name	**Alpha & Omega Drycleaners**		
Site Address	12270 West Colonial Drive		
Site Location	Southwest corner of the SR 50 and Elboc Way intersection		
Distance/Direction	Adjacent to the south of SR 50, approximately 1,200 feet west of SR 429		
Facility ID Nos:	9700419; SQG_74255; FLR000193938		
Database Sources:	AST, RCRA-CESQG		
Historical Land Use	Citrus grove		
Current Land Use	Drycleaner		
Contaminants	Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: This facility has been at this location since approximately 2009. Compliance inspections in 2012, 2013, 2015, and 2017 found the facility in general compliance with no indications of contamination resulting from spills, discharges, or dumping, though more appropriate housekeeping-type measures were recommended. No contamination impacts have been reported to FDEP.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is occupied by a typical drycleaners. No monitoring wells were observed at the site.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the front entrance of the dry cleaners.

DRAFT

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: The northern portion of the property is occupied by MCI Sales and Service, an automotive sales and service company. No significant violations were revealed from inspection records. No discharges or spills have been reported at this facility.

Academy Bus occupies the southern portion of this property. A minor violation was reported during a 2015 inspection where the facility was in possession of an unpermitted quantity of hazardous wastes (anti-freeze and other automotive fluids). The facility supplied disposal manifests and was returned to compliance.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: Most of this site consists of paved parking for buses. A warehouse was present at the site for service and repairs. A portion of the building was for offices.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the bus repair shop entrance on the southern side of the on-site structure.

Site No:	22	Risk Potential:	LOW
Site Name	**Go Vacations America Inc.**		
Site Address	12201 West Colonial Drive		
Site Location	North of SR 50, approximately 800 feet west of SR 429		
Distance/Direction	Adjacent to the north of SR 50, approximately 800 feet west of SR 429		
Facility ID Nos:	9300846		
Database Sources:	UST, LUST

TANKS	U/A	Capacity (gal)	Content	Installed	Removed
1	U	1,000	Waste Oil	1-1-73	8-7-93

Discharge Date:	8/7/1993	Cleanup Date:	1/4/2007
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: A waste-oil UST was present at the site between January 1973 and August 1993. A discharge was reported at the time of tank removal. A limited contamination assessment was performed in 2006, and a Site Rehabilitation Completion Order (SRCO) was issued in January 2007.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site consisted of a commercial property that was under construction. A large building was located at the southwest corner of the property.

CONCLUSIONS: Based on the lack of remaining subsurface contamination impacts and subsequent regulatory closure order, this facility has been assigned a CRR of **Low**.

View of the construction activity at the former Go Vacations facility.

DRAFT

Site No:	**23**	Risk Potential:	**MEDIUM**
Site Name	**Dunbar Ave Debris Staging Area; Winter Garden Trash Site**		
Site Address	691 Dunbar Avenue		
Site Location	West of SR 429, approximately 600 feet south of Dunbar Avenue		
Distance/Direction	Adjacent to the west of SR 429, approximately 1,350 feet north of Story Road		
Facility ID Nos:	100088; 22015		
Database Sources:	SWF/LF		
Historical Land Use	Citrus groves; vacant land; trash dump		
Current Land Use	Undeveloped, vacant, and overgrown land		
Contaminants	Hazardous Materials		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: This location is listed as a solid waste facility and disaster debris staging area. Records show the site was used as a "sanitary landfill" from approximately 1954 through 1977. Debris is visible on site in historical aerial photographs during this period. The facility appears to have been closed according to applicable standards, and no significant contamination impacts have been reported. The southern portion of the former landfill was excavated during construction of the existing SR 429 roadway. No documents or additional information related to the site were found in the public record.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The area is vacant, structurally undeveloped land.

CONCLUSIONS: Based on the historical use of the property as a solid waste landfill, lack of available assessment information, and the proposed Pond Basin 429 N, Alternative 2 and Flood Plain Compensation Area 15A being located at this site, this facility has been assigned a CRR of **Medium**.

Approximate area of the former landfill shown outlined in red, on a 1969 aerial photograph.

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Eight aboveground petroleum storage tanks were removed from this facility in September 1992. Contamination impacts were observed at one tank location. Approximately 7 cubic yards of soil was removed; no visible or olfactory evidence of remaining contamination was observed following excavation. Groundwater sampling results did not find contamination impacts above target levels. A formal discharge was not reported to FDEP. Discarded 55-gallon drums abandoned by the previous property owner were transported off-site for proper disposal.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site was occupied by Mid-Florida Materials, a recyclable materials sorting facility.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the facility from the Enterprise Street/Roper Parkway intersection facing the facility; no public access was available.

Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: This site operates as an automotive detailer and storage yard. The site was previously found out of compliance with respect to the disposal of waste solvents and paint and for improper storage of rags in May 2011. The site is registered as a conditionally exempt small quantity generator of hazardous waste. A March 2021 inspection showed Central Florida Automotive had vacated the property. No record of registered tanks or documented contamination impacts was found in the public record.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is occupied by a small automotive repair shop.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the property from Roper Parkway.

Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: A complaint was alleged against the Chase Automotive facility in August 2020, that a tenant had dumped a 55-gallon drum of an oily substance at the site and then power-washed the area, causing a discharge to an on-site retention pond. An FDEP inspection report concluded that a drum had been accidentally spilled and an absorbent material applied promptly. The used material was disposed of, and visibly contaminated soil was removed and taken to a landfill. The FDEP inspection notes that disposal records had been provided to FDEP but were not included in the inspection record. Remaining on-site wastes were disposed of by approved contractors. The inspection record states that the facility returned to compliance in September 2020.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is occupied by a small automotive repair shop.

CONCLUSIONS: Based on the lack of documented subsurface contamination impacts and subsequent regulatory closure order, this facility has been assigned a CRR of **Low**.

PUBLIC RECORDS: The Franks Detail, Inc. site has operated as an automotive body shop and detailing facility since 1989. The facility is currently a part of the Manheim Remarketing complex. The site has been found to be out-of-compliance in the past with regards to improper disposal of waste paint and poor record keeping. No record of registered tanks or documented contamination impacts was found in the public record.

The Manheim Remarketing site functions as a used vehicle repair and auction facility. The site is registered as not generating hazardous waste. The facilities within the study area currently function as vehicle storage areas as well as an office building. No record of documented contamination impacts was found in the public record.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site consists of a 165+ acre automotive auction lot with areas for washing and detailing, selling, transporting, and storing vehicles before and after sales. Limited areas of the site were able to be observed from publicly accessible areas due to the

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

The entirety of the Manheim/Franks Detailing facility is outlined in red; only a small portion of the facility is located within the Study Area (blue), which consists mostly of paved parking and stormwater retention areas.

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	Yes	

PUBLIC RECORDS: The tank was removed from the facility in December 1993. The tank was noted to be in poor condition, with petroleum groundwater impacts detected. No further information regarding assessment or cleanup was available in the public record. The site was redeveloped in the late 1990s and the former toll booth plaza where the tank was located was demolished.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site currently consists of SR 429 access ramp travel lanes. The former tank location was not discernable.

CONCLUSIONS: Based on the documented subsurface contamination impacts and lack of subsequent assessment data, this facility has been assigned a CRR of **Medium**.

Approximate location of the former tank located at the former toll plaza depicted on a 1990 aerial photograph.

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: No record of documented contamination impacts was found in the public record for the Earth Resources facility, which appears to have occupied the site in approximately 2004. Compliance inspections conducted for the Woodall Auto Wholesale facility, which appears to have occupied the site from November 2003 through at least November 2016 do not indicate out of compliance issues or violations. No record of documented contamination impacts was found in the public record for the Woodall Auto Wholesale facility.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The facility is occupied by Woodall Auto Wholesale; portions of the property was used for parking, and the building was occupied as office spaces.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the paved parking area and on-site office building.

0	U		Unk.	Unk.	~1985

Discharge Date:	4/21/2003	Cleanup Date:	On-going
	Soil	Groundwater	
Documented/ Known Impacts:	No	Yes	

PUBLIC RECORDS: The underground fuel tanks at the site were removed in approximately 1985 or 1986, before tanks were regulated. No information on tank size, contents, or the removal is available in the public record. Approximately 485 tons of impacted soil was excavated from the facility in July 2008. The most recent groundwater sampling data is from 2014; construction activities along SR 50 by the site destroyed the monitoring well network. The 2014 data stated that no contamination remained at the actual facility property; one well exhibited benzene and total xylenes at concentrations just above applicable target levels on the northern side of SR 50. Groundwater flow was to the northeast, towards SR 50. The facility was previously occupied by a used auto sales company which performed minor maintenance on-site. No compliance violations were reported for the former auto sales facility. Inspections at the Pep Boys automotive repair facility revealed minor housekeeping-type violations and improper labeling of waste containers.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The facility is an operating Pep Boys automotive repair shop. Monitoring wells were observed across the property.

CONCLUSIONS: Based on the remaining groundwater contamination within the SR 50 right-of-way at concentrations exceeding applicable cleanup target levels, this facility has been assigned a CRR of **Medium**.

View of the current Pep Boys repair facility and former dispenser island canopy at the facility.

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Inspection records from 2010 through 2021 indicate no out of compliance violations at the site. The facility appears to have been a salvage yard from the late 1960s through early 2000s, and transitioned to a towing lot and auto sales by the 2010s. The facility was razed and vacant by 2021.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The facility is currently vacant commercial land. No obvious signs of contamination was visible from publicly accessible portions of the property.

CONCLUSIONS: Based on the historical use of the property as a salvage lot and lack of available assessment information, this facility has been assigned a CRR of **Medium**.

View of the former savage and towing yard from SR 50 facing north.

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: An old, unregistered landfill was encountered in 1998 during the excavation of a burn pit for a planned residential subdivision. Aerial photographs indicate the area had been used as a landfill in the 1970s and 1980s prior to being abandoned. The contents of the landfill were excavated in 1998, and the area inspected by a third party contractor for completion prior to backfilling with clean fill. Materials encountered included construction debris, logs/stumps, and used tires. Confirmatory groundwater sampling did not indicate the presence of contamination impacts at the former facility. The area was developed residentially in 1999 with the existing neighborhood.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with SR 408 and a single family residential neighborhood.

CONCLUSIONS: Based on the lack of documented subsurface contamination impacts and residential development of this property, this facility has been assigned a CRR of **Low**.

Approximate location of the former landfill area; Old Winter Garden Road is visible to the nearby north of the former site.

	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: This site was an approximate 186.70-acre property once owned by the US Military for ordnance storage and training purposes. It was declared a surplus and sold in 1945. No contamination impacts have been documented and none were readily observed in aerial photographs.

INTERVIEW INFORMATION: Information regarding the former use of the property was provided by Ms. Donna West with the US Army Corps of Engineers on October 22, 2021, by email. The documentation provided by Ms. West did not indicate a historical use which may have impacted the environmental status of the site.

SITE OBSERVATIONS: The area of the former Depot consists of several single family residences, vacant land, and public roads. No evidence of historical military uses was apparent during the site visit.

CONCLUSIONS: Based on the lack of documented subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

The general former FUDS area is shown in red on this 1990 aerial photograph. The facility was generally bound to the north by Old Winter Garden Road and to the east by Hempel Avenue.

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: This site was an approximate 7.89-acre property once owned by the US Military from 1959 through 1965. No contamination impacts have been documented and none were readily observed in aerial photographs.

INTERVIEW INFORMATION: Information regarding the former use of the property was provided by Ms. Donna West with the US Army Corps of Engineers on October 22, 2021, by email. The documentation provided by Ms. West did not indicate a historical use which may have impacted the environmental status of the site.

SITE OBSERVATIONS: The area of the former Depot consists of several single family residences, vacant land, and public roads. No evidence of historical military uses was apparent during the site visit.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

The general former FUDS area is shown in red on this 1990 aerial photograph. The facility was generally bound to the east by Hempel Avenue and to the south by 6th Street.

Site No:	62	Risk Potential:	LOW
Site Name	**Fire Station #33**		
Site Address	1700 South Apopka Vineland Road		
Site Location	Northwest corner of the Westover Roberts Road and Apopka Vineland Road intersection		
Distance/Direction	400 feet southwest of the Turnpike		
Facility ID Nos:	9804286		
Database Sources:	AST		
Historical Land Use	Citrus groves		
Current Land Use	Fire station		
Contaminants	Petroleum Products

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: The facility currently maintains two emergency generator tanks. All historical tanks have been removed. No discharges have been reported at the facility.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The property is developed with a large communications facility consisting of transmission towers, satellites, and office buildings.

CONCLUSIONS: Based on the lack of reported subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

View of the transmission towers at the property; no public access was available.

Site No:	64	Risk Potential:	MEDIUM
Site Name	Landscape Nursery Inc-Old Fuel Site		
Site Address	1955 South Apopka Vineland Road		
Site Location	East of Apopka Vineland Road, south of Florida Turnpike		
Distance/Direction	Adjacent to the southwest of the Turnpike		
Facility ID Nos:	8945540		
Database Sources:	UST, LUST		
Historical Land Use	Citrus grove		
Current Land Use	Nursery and landscaping		
Contaminants	Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed
1	U	1,000	Unleaded Gasoline	7-1-80	1-14-91
1	A	1,000	Unleaded Gasoline	1-1-91	In Use

Discharge Date:	1-14-91	Cleanup Date:	8-6-93
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Contamination was reported in January 1991 during the removal of a UST at the facility. Approximately 26 tons of impacted soil was removed and disposed of. Groundwater sampling conducted in May 1992 and May 1993 indicated no contaminants were detected above applicable target levels. A No Further Action closure status letter was issued on August 6, 1993.

The site is a nursery facility. There is a potential that agricultural chemical impacts may exist on-site.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with a plant and landscaping nursery.

CONCLUSIONS: Based on the plant nursery land use, this facility has been assigned a CRR of **Medium.**

Aerial photograph view of the nursery property, dated 2021.

Discharge Date:	12/8/1986 7/3/1994 8/26/1999 12/27/2002 12/6/2006	Cleanup Date:	On-going

	Soil	Groundwater
Documented/ Known Impacts:	Yes	Yes

PUBLIC RECORDS: Multiple discharges have been reported at the Turkey Lake Plaza fueling stations. Several active remediation methods have been used at the site including removal of free product and excavation of excessively contaminated soil. The most recent groundwater analytical data is dated December 2009; both soil and groundwater contamination above applicable target levels was reported in the vicinity of the historical fueling station area, at the southeast portion of the plaza (currently a paved parking lot). However, the contamination did not appear to have migrated beyond the property boundaries of the service station.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The property consists of a travel rest stop. Facilities include DOT and Highway Patrol offices, public restrooms, shops, and a food court, a gas station, and paved parking areas.

CONCLUSIONS: Based on the remaining groundwater and soil contamination at the facility at concentrations exceeding applicable cleanup target levels, this facility has been assigned a CRR of **Medium**.

View of the current fueling station at the rest stop plaza.

DRAFT

Site No:	**66**	Risk Potential:	**MEDIUM**
Site Name	**Turkey Lake Service Plaza (Vehicle Spill)**		
Site Address	Turnpike MM 263		
Site Location	Florida Turnpike, approximately 4,200 feet southeast of the Apopka Vineland Road overpass		
Distance/Direction	Between the Turnpike travel lanes

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	~4-22-03	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	Unk.	Unk.	

PUBLIC RECORDS: A vehicle accident in April 2003 resulted in the discharge of diesel fuel from a truck fuel tank. No additional information, including the location of the accident, was available in the public record.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The property consists of a travel rest stop. Facilities include DOT and Highway Patrol offices, public restrooms, shops, and a food court, a gas station, and paved parking areas.

CONCLUSIONS: Based on the spill being at the Turkey Lake Plaza and the existing contamination impacts at this facility, this spill has been assigned a CRR of **Medium**.

A 2004 aerial photograph depicting the travel plaza site conditions similar to what would have been present in 2003 at the time of the vehicle spill.

Site No:	**67**	Risk Potential:	**LOW**
Site Name	**FDOT Widening Turnpike Mainline I-4 to Gotha Road**		
Site Address	4510 South Hiawassee Road		
Site Location	Southwest corner of the Florida Turnpike and Hiawassee Road overpass		
Distance/Direction	Adjacent to the southwest of the Turnpike		
Facility ID Nos:	FLR000141945		
Database Sources:	RCRA-CESQG		
Historical Land Use	Vacant forested land		
Current Land Use	Turnpike right-of-way		
Contaminants	Hazardous Materials		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: The site was previously used as a construction staging lot in 2007 during widening of the Turnpike. A complaint alleged improper disposal of used oil filters. An inspection conducted by FDEP concluded that several used oil filters had been improperly disposed of in a general waste dumpster. The oil filters were removed and placed in a labeled drum for proper disposal. The violation received a case closure order in December 2007. No discharges were reported in connection with the improper disposal.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The site is developed with a dry-bottom grassed stormwater retention pond.

CONCLUSIONS: Based on the lack of documented subsurface contamination impacts, this facility has been assigned a CRR of **Low**.

A 2008 aerial photograph of the former construction staging lot, during construction activities along the Florida Turnpike.

DRAFT

Site No:	68	Risk Potential:	MEDIUM
Site Name	**Agriculture/Citrus Groves**		
Site Address	Study Area		
Site Location	Study Area		
Distance/Direction	Adjacent		
Facility ID Nos:	n/a		
Database Sources:	Aerial Photographs		
Historical Land Use	Citrus groves		
Current Land Use	Roadways, residential, and commercial properties		
Contaminants	Hazardous Materials and Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

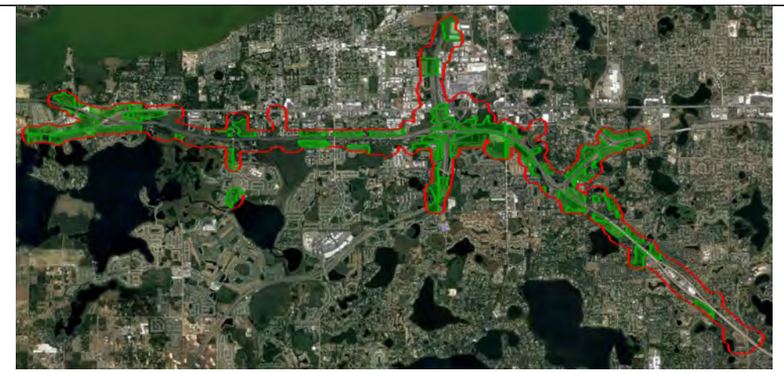

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: The vicinity of the study area was planted with citrus groves from prior to 1941 through the mid-2000s. Portions of the groves were redeveloped with roadways, residential neighborhoods, and commercial businesses over the years. Agricultural land and citrus groves typically have environmental concerns associated with them. These concerns include pesticide/herbicide storage and usage, grove heating during cooler winter months (smudge pots and other grove heating equipment), tractor and equipment maintenance and fueling, underground and aboveground fuel storage tanks, irrigation pumps and maintenance, and asbestos irrigation lines.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: The grove areas have largely been redeveloped with residences, roadways, and commercial properties

CONCLUSIONS: Due to the potential for residual agricultural contamination impacts along the project areas, the agricultural land use has been assigned a CRR of **Medium**.

Areas of historical citrus use across the Study Area, depicted on a 2021 aerial photograph.

DRAFT

Site No:	69	Risk Potential:	**MEDIUM**
Site Name	**Railroads**		
Site Address	Study Area		
Site Location	State Road 50, SR 429, SR 408, Florida's Turnpike		
Distance/Direction	Adjacent to and north of SR 50		
Facility ID Nos:	n/a		
Database Sources:	Aerial Photographs		
Historical Land Use	Rail road		
Current Land Use	West Orange Trail, rail roads		
Contaminants	Hazardous Materials and Petroleum Products		

TANKS	U/A	Capacity (gal)	Content	Installed	Removed

Discharge Date:	n/a	Cleanup Date:	n/a
	Soil	Groundwater	
Documented/ Known Impacts:	No	No	

PUBLIC RECORDS: Existing and historical rail lines were observed to intersect several areas along the Study Area, including adjacent to and along SR 50, across the Turnpike, at the interchange of SR 50 and the Turnpike, across SR 429, and at the Turnpike/SR 408 interchange. Existing and historical rail lines have several common chemical constituents of concerns as follows:

- Arsenic: The most commonly used arsenic-containing products were herbicides, pesticides, insecticides, and wood-treating agents such as chromated copper arsenate.
- Creosote: Creosote is used to coat railroad ties.
- Polynuclear aromatic hydrocarbons: Polynuclear aromatic hydrocarbons are a coal tar and creosote by-product. Coal tar is more commonly associated with rail yards.
- Other inorganic constituents used in herbicides.

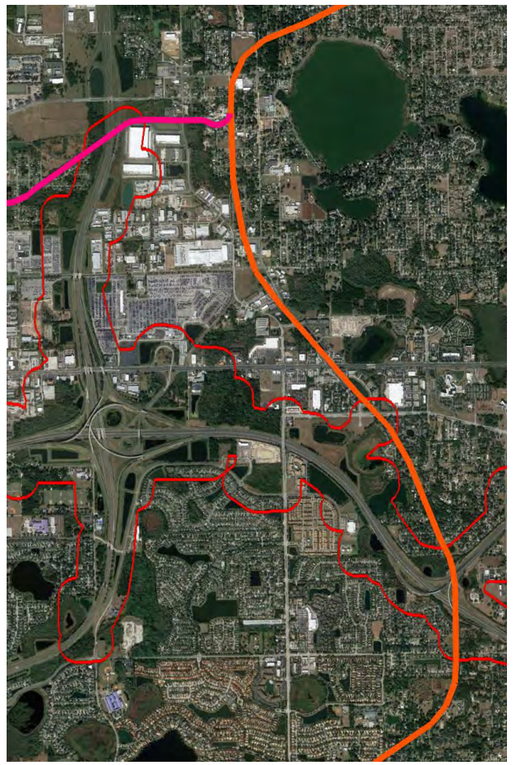

Due to its residual nature, arsenic is the most commonly occurring chemical constituent related to railroad beds, and liberal applications of herbicides were used to keep the railroad free of vegetation. The creosote and polynuclear aromatic hydrocarbons are commonly associated with railroad ties and rail yards.

INTERVIEW INFORMATION: n/a

SITE OBSERVATIONS: Portions of the railroads have been redeveloped with the West Orange Trail, a paved pedestrian recreational trail. Other portions of the former corridors have been completely demolished, removed, and/or redeveloped commercially or with roadways.

CONCLUSIONS: Based on the potential for contamination impacts to the site soils from historical railroad use, the rail line corridor has been assigned a CRR of **Medium**.

Intersections of historical rail lines along the west end of the Study Area (outlined in red), and on the northeastern portion, depicted on 2021 aerial photographs.

Table 7
Aerial Photograph Review Summary
FTE FROM SOUTH OF SR 408 TO WEST OF SR 50
FPID No. 444007-1-22-01
GEC Project No. 4471E

Site No.	Site Name	Site Address	Year First Observed in Aerial Photographs	Comments
1	Creative Auto Boutique	17949 West State Road 50	1990	Citrus grove present from 1958 through 1984. Structure on the southern portion of the site visible in 1990; additions visible in 1995 and 1999. Original structure damaged by a fire by 2017 and demolished in 2021. Additional buildings visible on-site.
2	Circle K #2722116	17503 West State Road 50	1999	Citrus grove from 1941 through 1984. Cleared, vacant land in 1990 through 1995. Current gas station visible in 1999.
3	Killarney Fruit Company	West State Road 50	1947	Vacant land prior to 1947; developed with several large warehouses in 1947 through 1974. Site use appears to have changed to a construction lot until 1995. Several photographs depict semi-trailers for hauling citrus, and a rail spur runs adjacent to the south of the warehouse.
4	Toms Interstate Inc.	17530 West State Road 50	2006	The approximate area of this site was historically planted with citrus from 1941 through 1974. Land was vacant and grassed through 2006 when residences were constructed.
5	ABC Bus Companies Inc.	17469 West State Road 50	1984	The majority of the site was citrus from 1958 through 1978. Eastern portion of the facility visible in 1984 and expanded to the western portion (former construction lot) by 2006.
6	Rachels Collision Center	917A West Oakland Avenue	1995	Citrus groves prior to 1969 and cleared, vacant land through 1990. Facility visible in 1995.
7	Racetrac #2399	17108 Remington Road	2021	Citrus groves from 1941 through mid-2010s, followed by vacant grassed land; developed with the current gas station in 2019.
8	7-Eleven Store #34286	17100 West Colonial Drive	2006	Citrus groves from 1941 through mid-2010s, followed by vacant grassed land; developed with the current gas station by 2006.
9	FL Dept of Transportation-Turnpk MP 272	Turnpike MM 272 16952 West Highway 50 and Highway 91 Toll	1995	Citrus groves from 1941 through construction of the Turnpike entrance ramp in early 1990s. Toll plaza was visible from 1995 through 2006. Site is grassed land since.
10	West Orlando Powersports	16333 West Colonial Drive	2006	Citrus groves from 1941 through late 1990s, followed by vacant commercial land; developed with the facility by 2006.
11	US C-Stores Oper-Chevron Colonial	16131 West Colonial Drive	2005	Citrus groves through 1984; cleared, vacant land from 1990 through 1999. Developed with a gas station in 2005.
12	Jack H Ross Groves, Inc.	15567 West Colonial Drive	1947	Barns are visible at the site from 1947 through 1990, after which dense tree cover prohibited view of the property.
13	Circle K #7490	14990 Colonial Drive	1990	Citrus groves from prior to 1947 through 1969. Cleared, vacant land from 1978 through 1984. Gas station from 1990 through present.
14	Dewitt Excavating	14463 West Colonial Drive	1978	Citrus groves, current facility visible in 1978.
15	Wesmere Cleaners	1291 Winter Garden Vineland Road	2010	Citrus groves from 1947 through 2005. Current structure visible in 2010.
16	Yellow Freight Diesel Spill	Turnpike MM 269	1969	Citrus groves through 1954; the Turnpike is visible in 1969. The incident location is not clearly discernable.
17	Florida's Turnpike Mile Post #269 Spill	Turnpike MM 269	1969	Citrus groves through 1954; the Turnpike is visible in 1969. The incident location is not clearly discernable.
18	Gotta Go Transport Ber 07-71-38668Z	Beuhlah Road Turnpike Overpass MM 269 Southbound	1969	Citrus groves through 1954; the Turnpike is visible in 1969. The incident location is not clearly discernable.
19	Ranger Construction Industries Inc.	1200 Elboc Way	1984	Agricultural land/citrus groves from 1947 through 1974. Appears as a construction and materials site in 1984 through present.
