### General Project Description and Key Components

This project will conduct a Project Development and Environment (PD&E) Study to evaluate alternatives for the extension of Central Polk Parkway East from US 27 to north of County Road 546 (Kokomo Road), approximately eleven miles in Polk County. The study will also evaluate new interchanges at US 27, County Road 540 (Waverly Road), Lake Hatchineha Road, and County Road 546 (Kokomo Road). Optional services will include concept development to a 15% design level, design survey and right-of-way mapping.

### General Project Description and Key Components

This project will conduct a Project Development and Environment (PD&E) Study to evaluate alternatives for the extension of Central Polk Parkway East from north of County Road 546 (Kokomo Road) to US 17/92, approximately twelve miles in Polk County. The study will also evaluate new interchanges at County Road 544 (Marion Road), County Road 580 (East Johnson Avenue / Marion Creek Road) and US 17 / 92. Optional services will include concept development to a 15% design level, design survey and right-of-way mapping.

### General Project Description and Key Components

The Scope of Work for this project is to mill & resurface and provide roadside & safety improvements for Challenger Memorial Parkway (SR 407) from Mile Post 0.000 to MP 6.788 in Brevard County. Anticipated improvements include pavement milling & resurfacing of travel lanes & shoulders, Cross Slope Corrections, Bridge Expansion Joint repairs, Misc. Drainage, and Pavement Marking Replacements.

### General Project Description and Key Components

This design project will widen Turnpike Mainline (SR 91) from south of Midway Road to north of SR 70 (MP 149-154) in St. Lucie County from 4 to 6 lanes. This project also includes the interchange improvements at Midway Road and at SR 70. A PD&E for this project was performed under FPID 423374-1-22-01. This project will initially be scoped to 30% design.

### General Project Description and Key Components

This project will widen Florida's Turnpike from 6 to 10 lanes south of Atlantic Blvd to north of Sample Rd. It includes ramp changes at Atlantic Blvd and interchange modifications at Sample Rd. It also includes new toll sites, new drainage ponds and bridge replacements and/or widenings. This project will initially be scoped to 30% design.

### General Project Description and Key Components

The project widens Suncoast Parkway (SR 589) from south of Van Dyke Road to north of Lutz Lake Road within Hillsborough County. The widening will increase the number of travel lanes from four to eight. The project also includes improvements to signing and pavement markings, bridges, lighting, and intelligent transportation systems. The primary objectives are to increase roadway capacity to meet future traffic demand, improve emergency evacuation times, and enhance safety along the roadway.

### General Project Description and Key Components

The project provides Transportation System Management & Operation (TSM&O) improvements and modifications to the interchange to enhance capacity. Additional turn lanes and signalization will be provided at the northbound ramp terminal. The project also includes bridge slopes cut back to accommodate protected sidewalks under begin/end bridge spans.

An aerial photograph of a multi-lane highway, likely a turnpike, with several vehicles including a large semi-truck. The image is overlaid with a semi-transparent green rectangle that contains the title text. The text is in a white, sans-serif font.

### General Project Description and Key Components

This project proposes widening and reconstruction of the existing four-lane facility to an eight-lane facility from north of Okeechobee Boulevard to south of SR 710 (MP 101 – 106), in Palm Beach County. Work includes replacement of the Roebuck Road and 45<sup>th</sup> Street bridges, replacement of the bridge over M Canal, pavement widening, reconstruction, and noise walls in qualifying areas. Other improvements include retaining walls, stormwater drainage improvements, signing & pavement markings, roadway lighting and ITS.

**General Project Description and Key Components**

451366-1-62-01 – This Pavement Only Project (POP) will involve milling and resurfacing the Suncoast Parkway (SR 589) from north of Van Dyke Rd to the Hillsborough County Line (MP 14.3 - 17.5) in Hillsborough County. All ramps at Lutz Lake Fern Rd and only the NB on ramp & SB off ramps at Van Dyke Rd will be milled and resurfaced.

451365-1-62-01 – This project will feature resurfacing and safety improvements along Suncoast Parkway (SR 589) from north of SR 52 to the south of County Line Road (MP 28.5 - 37.3) in Pasco County. Work will include milling & resurfacing, cross slope & superelevation correction, guardrail improvements, bridge concrete repairs, expansion joint repairs, drainage improvements, signing, and ITS improvements.

447701-1-62-01 - The Scope of Work for this project is to mill & resurface and provide roadside & safety improvements for Suncoast (SR 589) from MP 37.3 to MP 44.5 in Hernando County. Anticipated improvements include pavement milling & resurfacing of travel lanes & shoulders, cross slope corrections, bridge expansion joint repairs, drainage, signing & pavement marking replacement, and ITS improvements.

| Anticipated Major/Minor Work Types | 10.0                           |

### General Project Description and Key Components

The project improves the John Young Parkway / CR 423 interchange by modifying the eastbound off-ramp configuration. Southbound John Young Parkway / CR 423 will be widened to provide an additional auxiliary lane between the eastbound off-ramp and Central Florida Parkway. The project includes sidewalk, signals, and lighting replacement, as well as milling and resurfacing and utility adjustments to construct the proposed improvements. This project will provide needed operational improvements for southbound John Young Parkway / CR 423 from the Beachline West Expressway / SR 528 to Central Florida Parkway.

### General Project Description and Key Components

451364-1-62-01 - This project proposes milling, resurfacing, roadside safety and design upgrade improvements along the Turnpike Mainline, SR 91, (MP 54.2 - 57.3) in Broward County, Florida. The work includes resurfacing the Griffin Road and Orange Drive interchange ramps. Other improvements include pavement cross slope correction, guardrail repair, bridge expansion joint repairs, drainage, signing and pavement marking replacement, and ITS.

446224-2-62-01 - The project includes modifications to the Griffin Rd. interchange to enhance capacity. Additional turn lanes and intersection improvements, including signalization upgrades, will be made at the ramp terminal connection with Griffin Rd. /SR 818 and Orange Drive.

An aerial photograph of a multi-lane highway, likely a turnpike, with a green overlay and a white border. The highway has several lanes in both directions, with a large truck visible in the foreground. The surrounding area includes trees and some buildings in the distance.
