

Widen Turnpike Mainline from Becker Rd to Crosstown Pkwy (FPID 446335-1)

Fast Facts

- ✓ Widening mainline from four to eight lanes (Becker Rd to Port St. Lucie Blvd) and four to six lanes (Port St. Lucie Blvd to Crosstown Pkwy)
- ✓ Bridge structures widened/reconstructed
- ✓ Coordination with stakeholders (incl. FGT)
- ✓ Potential noise wall locations
- ✓ Part of mainline widening initiative

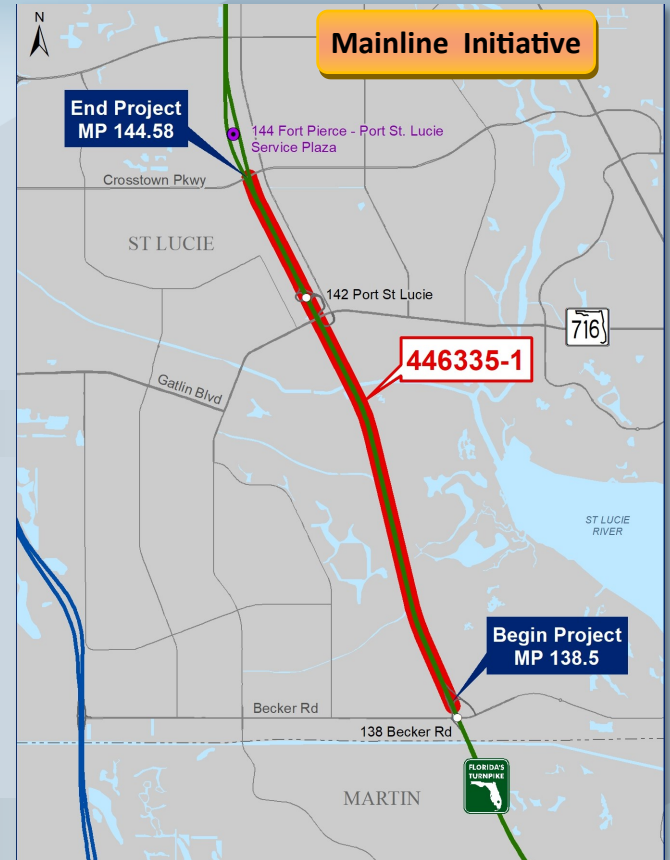

Project Needs & Benefits

- ✓ Adds capacity for future travel demand
- ✓ Improves travel time reliability, safety, and mobility options in St. Lucie County.
- ✓ Facilitates traffic movement during emergency response and evacuation periods

Project Description

This project widens Turnpike Mainline / SR 91 from Becker Road (MP 138.5) to Crosstown Parkway (MP 144.58) in St. Lucie County. The typical section consists of widening the existing four 12-foot lanes to eight 12-foot lanes from Becker Rd to Port St. Lucie Blvd and to six 12-foot lanes from Port St. Lucie Blvd to Crosstown Pkwy. The inside and outside shoulders will be widened from 10 feet to 12 feet. Noise barriers will be further evaluated during design and provided for qualified areas.

The estimated construction cost for this project is approximately \$296 million.

Project Status

A Project Development and Environment (PD&E) Study was completed in March 2022. Design for this project is programmed in FY 2024 and is anticipated to take up to four years to complete, which includes utility coordination and permitting. Construction for this project is not yet programmed in the Five-Year Work Program.
