

Turnpike / SR 91 Interchange Improvements at SW Port St. Lucie Blvd (FPID 446220-1)

Fast Facts

- ✓ Improvements to existing interchange at SW Port St. Lucie Blvd (MP 143)
- ✓ Bridge structures reconstructed
- ✓ Coordination with stakeholders (incl. FGT)
- ✓ Part of mainline initiative to accelerate widening of existing four lane facilities

Project Needs & Benefits

- ✓ Adds capacity for future travel demand
- ✓ Improves travel time reliability, safety, and regional mobility options in the Treasure Coast
- ✓ Relieves interchange congestion at connections from local streets
- ✓ Facilitates traffic movement during emergency response and evacuation periods

Project Description

This project improves the interchange at Turnpike Mainline / SR 91 and SW Port St. Lucie Blvd (MP 143) in St. Lucie County. The modified interchange accommodates the eight lane mainline widening and provides improved traffic flow.

The estimated construction cost for this project is approximately \$70 million. Additional Right-of-Way is anticipated to be needed for the construction of the interchange.

Project Status

A Project Development and Environment (PD&E) Study was completed in March 2022. Design for this project is programmed in FY 2025 and is anticipated to take up to four years to complete, which includes utility coordination, permitting, and Right-of-Way acquisition. Construction for this project is not yet programmed in the Five-Year Work Program.
