

## Project Development Process

Phase 1 Planning

Phase 2
PD&E Study

Phase 3
Design

Phase 4
Right-of-way

Phase 5
Construction

## Key Components of an Alternative Corridor Evaluation\*:

- Establish Purpose and Need
- Define environmental features
- Develop corridor alternatives
- Evaluate engineering and environmental impacts
- Identify fatal flaws
- Solicit community feedback
- Select corridor for further evaluation in PD&E study

<sup>\*</sup> An Alternative Corridor Evaluation is a planning-level study.
