

South Florida Wrong-Way Detection Technology Implementation Project

Project Overview

As part of the Florida Department of Transportation's Wrong-Way Driving Prevention Initiative, Florida's Turnpike Enterprise (Enterprise) is enhancing the Wrong-Way Vehicle Detection System in Miami-Dade County.

The Enterprise is increasing the amount of wrong-way signage equipped with sensors to detect vehicles traveling the wrong way along Florida's Turnpike Extension/State Road (S.R.) 821 from Allapattah Road/SW 112 Avenue/S.R. 989 to Tamiami Trail/SW 8 Street/U.S. 41. These enhancements will assist in monitoring, detecting, and preventing wrong-way drivers, and notifying law enforcement and Traffic Management Center staff for response.

Construction and Traffic Impacts

Construction activities will occur during both daytime and nighttime hours. Nearby residents and businesses may experience occasional impacts from construction-related light, noise, vibration, or dust. The Enterprise is committed to minimizing these disruptions and is taking steps to limit traffic delays and noise.

Lane closures will generally take place during off-peak hours to reduce impacts on drivers. Information about closures will be provided in advance through the South Florida Weekly Lane Closures and Work Zone Advisory.

Project Schedule and Funding

Construction Timeline: Work is anticipated to continue through late-2026.

Project Cost: Approximately \$3.3 million.
